>produce a radio talk show distributed by data files on the 'Net. (The
>files are huge, and you need some sort of sound equipment on your machine.)

I believe that the "Geek of the Week" interview program is broadcast live over the net periodically (meaning you can listen to it as it comes over the wire). I don't know what kind of equipment you would need for this (aside from a high-speed connection to the internet).

The sound files available in the archives include GOTW, the NPR program "Soundprints", and some clips from Harper's audio books. Files are in .au (Sun) format at 8K 8-bit mono - which works out to 14 meg or so for a half hour of audio. These files are easily converted to different formats with the SOX program - available on most common platforms. If you run MS-Windows and get the PC speaker sound driver, you can listen to these files without any special equipment.

Geek of the Week is also available on cassette from O'Reilly Publishing.
800-998-9938

Happy Listening,
Norm

* Pyramid's ChUrban WJMN-94.5FM is looking for a new morning jock. Its popular 5-year morning man J.R. Edwards will start a new gig with KDMX-FM in Dallas,TX at the end of the month

JR was very displeased the way Pyramid's management handled the take-over of the station in early June. His morning side-kick, stand-up comic Chris Zito and other staffers from the morning show were pink-slipped without any advance notice. Also, Pyramid in a move to protect its #1 morning personaility, Matt Siegal, on a sister station CHR WXKS-107.9FM pretty much muzzled JR. His job duties in the last 3 months consisted of punching up the right CD players and giving out time and weather checks as the station got into 'less talk, more jams' formula.
Pyramid released JR out of his contract(2 more years were left on it) without too much hassle since he landed an out-of-the-market gig.

WXKS-WJMN's GM Matt Mills has stated that he wants an out of state talent to take over the mornings on WJMN-94.5FM.[If you have any experience with Churban/CHR format and wouldn't mind getting up early, I suggest you get your tape in the mail...:-)] Meanwhile, weekend/fill-in Bill O'Brien is in the house from 6-10a.

As I reported last month, Marc Clark is out as WJMN's night-time(7-12) personality. A brand new import by the name of Ralph Marino has taken Clark's hours. Clark has been assigned to weekends and fill-ins...

* A brand new station debuted sometime on Friday(9/9/94) afternoon. WBNW AM 590(Business 5-90) imports most of Bloomberg Business Radio except for 9a-12a block where a local talk/ call-in 'Money Experts' airs. Local news updates and traffic are handled by Metro Networks. Metro Networks is also providing customized newscasts for SportsRadio WEEI 8-50.

* A mini-riot broke out during AP WFNX 101.7FM's sponsored free concert at the Hatch Shell on Friday(9/9) night. An estimated 60,000 to 70,000 people came to see an LA-based punk band GreenDay. WFNX was projecting half of that number. Lack of organization and security lead to a chaotic atmposphere in a Back Bay section of Boston. Green Day members walked off the stage when beer bottles started to get thrown in their direction...Over 50 people were injured(one very seriously) and about 100 were arrested...

The neighborhood organization and the city and state police officials have indicated through the press media that WFNX will no longer have access to the Hatch Shell for free summer concerts...

Another problem for 'FNX as the result of the Friday night riot
is its soured relationship with Boston/New Engalnd's biggest concert
promoter Don Law. Through a very reliable source, I can tell you
that Don Law is quite pissed off at 'FNX regarding the whole mess that
took place at the Hatch Shell. Apparently Law had booked a
charity-alternative music nite at Great Woods in Mansfield,MA(just
outside Boston) for Friday night--and then had to cancel it because
it is hard to sell a paid-admission show on the nite when you have
a free show.
Law then told all the people who work for him not too get involved
with 'FNX related promotions...
'FNX came to Law for security work for Friday night free show and
he refused.
Law books almost every night club in the city of Boston. For WFNX,
a station which relies heavily on music niteclub promotions, this
could be a rough fall if Law bears his grudge a little while longer..
We will see. He has done this before.

* Local authorities will not cancel another free rock concert scheduled
for Sept 17(2pm-9pm) at the Hatch Shell despite last Friday's chaos.

Warren Zevon will perform as part of Infinity's CR WZLX 100.7FM's
second anual 'Be-In' show. Chances are moshing probably will not
be part of the 'boomer-oriented concert...;-)

-Mark

3759. Buffalo/Toronto Radio Watch(9/13)

From the #40 market(and typed with a wrist immoblizer on my left wrist,
which is sprained):

*Here's the full list of Bills affiliates(thanx to Greg Coniglio):

WBEN(930)Buffalo-FLAGSHIP(NewsTalk930)
WHAM(1180)Rochester(NewsRadio 1180)
WHEN(620)Syracuse(Talkradio 620)
WGY(810)Albany/Schnectady/Troy(more on 'GY later)
WODZ(1450/96.1)Rome/Utica(oldies format on both)-new this year
WINR(680)Binghamton(news/talk)
WJTN/WWSE(1240/93.3)Jamestown(AM is AC/talk;FM is AC)
WPIG(95.7)Olean(Pig 95.7;country)
WELM(1410)Elmira(oldies)
WPIE(1160)Ithaca/Trumansburg(country)
WATN(1240)Watertown(MOR;Van Miller taped an ID for them)
WACK(1420)Newark(AC/sports)(SportsRadio 1420)
WABH(1380)Bath(AC/CHR/oldies)
WFLR(1570/95.9)Dundee(both N/T;AM also country-FM also AC)
WDOE(1410)Dunkirk(AC/MOR/news)
WCJW(1140)Warsaw(country;won't get all games-daytime only)
WFWC(1330)Springville(country)
WRIE(1260)Erie,Pa.(oldies)
KNNS(1360)Phoenix,Ariz.
WKDR(1360)Burlington,Vt.

Also of note:
-N.Y.Giants games are on WRQI(95.1/95.5,RockIt 95)in Rochester.
-The Cleveland Browns can be heard on WCQA(96.5,Country 96.5)in Dunkirk.

*About WGY:It has picked up Tom Leykis from 6-10pm(correct if I'm wrong).
This gives TL 3 50 kW flamethrowers:'GY,WWKB here,and WWL in New Orleans.

*WHTK(1280,Rochester;Hot Talk 1280)has said buh-bye to Don & Mike and
plugged in The Fabulous Sports Babe from 2-6pm on a tape-delayed basis.
TFSB is also on in Buffalo,but she's live(after Stern's finished until 2pm).

*CJEZ(Z 97.3,Toronto)uses 2 voices:John Majhor & Bill Robinson. Majhor
was at 1050chum for years,while Robinson worked at CKEY(590,now CKYC) and
ran the Children's Radiothon on CFRB(1010)and CKFM(Mix 99.9). BTW,Toronto
Maple Leafs games are back on Z 97.3 .
While on sports,CJCL's second computer baseball simulation('93 Jays v.
'75 Reds)finished up 6-5(or something like that)in 15,w/the Blue Jays winning.
The Fan 1430 is also picking up the International League finals,because their
top team-Syracuse-is in it. The Jays mailing list said that the facilities or
equipment at MacArthur Stadium in the Salt City were so lousy that the Fan

asked the Chiefs to upgrade their facilities,which they did-buying new equipment.

TTFN...

3760. re: Louisville ratings

Newsgroup: rec.radio.broadcasting
Date: 1994-09-16 07:12:34 UTC
From: "Steve Petty @ ACME Water Tower Productions" <pettysm@iglou.com>
Message-ID: <35bgh2$go4@vixen.cso.uiuc.edu>
Source record: 37965

I'm Taking this from an article that was posted here
by <kmacharg@mhs.hcjb.com.ec>, I'm adding the formats for each of
the stations listed below.

I just received a newspaper clipping with the latest
Louisville ratings:

1. WAMZ-FM > Country 10. WLRS-FM > A.C.
2. WHAS-AM > A.C. / Talk 11. WHKW-FM > Country
3. WDJX-FM >A.C. 12. WKJK-FM > Hot Country
4. WVEZ-FM > A.C. 13. WQNF-FM (WQMF2) > AOR
5. WGZB-FM >Urban 14. WLSY-FM > Urban
6. WRKA-FM >Oldies 15. WWKY-AM > Talk
7. WTFX-FM > AOR 15. WLOU-AM > Urban
8. WQMF-FM > AOR 15. WLLV-AM > Religious
(See Also WQNF-FM) (the above Three Tied)
9. WAVG-AM > Adult Standards 18. WDJX-AM > Alternitive
(Changed format to AP News)
19. WTMT-AM > Country Standards
Not shown in Survey:

WFIA-AM > Religious; WXVW-AM > Oldies for Survey NOW All sports
WGCC-AM > Religious, WTFN > CNN Headline; and Public stations.

I hope That Helps To Show What We Listen To here in
Indiucky. (Indiana / Kentucky)

P.S. WAMZ-FM and WHAS-AM have dominated the #1 & 2 spots for a number
of years, they are both owned by, I believe, Clear Channel
Communications. WQMF-FM was usually #3 or #4 but the recent addition
of WTFX-FM cut their audience in half and caused their drop in the
ratings.

3761. Fwd: San Diego report

Newsgroup: rec.radio.broadcasting
Date: 1994-09-16 07:12:35 UTC
From: ChrisCarm@aol.com
Message-ID: <35bgh3$go5@vixen.cso.uiuc.edu>
Source record: 37966

Here's what is happening in the 55th market. Sept. 12, 1994

High school radio returns to north county! KBNN (Julian, 48 watts - antenna 2,221 feet above terrian) has a full slate on Friday night with a"Game of the Week," starting at 8 p.m. Cabin, as the station is know, has a slate of 14-games for the pigskin season; and 36 basketball games starting in December. The Escondido Times-Advocate publishes the schedule every Friday.

This is a strong commitment, and one that I applaud! Good going KBNN. [The owners have applied to increase their power from 48watts to a more respective 3kw. Yes, it is 48watts, because I called the station. "It's because our stick is at 5,000 feet elevation, and the %$^& FCC thought 48 would do 'er," said Jim Klapthor of KBNN]

Let Go Woos: Ron Reins, a 25-year veteran of San Diego radio was FIRED on Thursday from KSDO (1130, 10kw D, DA-II N). Susan Hoffman, GM told Reins that "We can't justify a full time sports-caster anymore." {gee, I can't justify six hours of Rush Limbaugh, so I have to . . . . . }

Saddleback College in Mission Veijo, is seeking up-and coming musicians. Any music format is showcased. Call 714.582.5727 for more information. The station is at 88.5; and can be received in Orange, Imperial and San Diego counties.

KKOS (95.5, Carlsbad) continues to screen current movies in conjunction with a local theater. So far they have free showings for "True Lies" and "Forrest Gump."

>From the Reader's Post: Radio World reported in the Sept. 7, edition that digital radio is on in Chicago. CBS' WBBM-FM and Gannett owned WGCI-AM have been testing transmissions for two months. The front-page article says that the FM is not subect to multipath; and the AM DAB quality approaches 15 kHz.

E-mail me for a complete San Diego radio and radio with pictures log.

[this is an XETRA-AM free report!]

3762. WOWO: We Lose Round One (but it's not over)

Newsgroup: rec.radio.broadcasting
Date: 1994-09-16 07:12:41 UTC
From: fybush@world.std.com
Message-ID: <35bgh9$goa@vixen.cso.uiuc.edu>
Source record: 37967

There will be more to come on this issue from Peter George, but
just to keep everyone up to date:

The FCC has approved docket BAL940311EC, the sale of WOWO(AM)
and WOWO-FM from Price Communications to Inner City Broadcasting
Corporation.

Peter learned of the sale through a letter to him from the FCC, and
I'll let him post the details directly, but basically the FCC
acknowledged only one valid set of complaints, those regarding
the dimunition of WOWO's 50kw clear channel Class A signal.
The Commission says it will consider that matter separately
when WOWO and WLIB apply to modify their signals.

That's the bad news. Now here's the good news. In an effort
to put together a submission that the FCC will have to consider
valid, Peter and I are forming the "WOWO Listeners' Guild."
We're hoping to bring together WOWO listeners in Fort Wayne
and around the country to speak up against the attempt to
cut down one of the few remaining full Class A clear channels.

PLEASE, if you have any interest at all in saving 1190 in
the east from being reduced to a regional channel, I urge you
to send a postcard to:

WOWO Listeners' Guild
c/o Peter Q. George
PO Box 1183
Randolph MA 02368-1183

If you have any special skills that can help us (like being a
communications lawyer willing to do some very minimal pro bono
work on our behalf), please say so on the postcard. And of
course provide us with a way (snailmail, email, Ma Bell) to
reach you with more information.

This fight is about more than a single radio station. It's about
who the clear channels belong to. We think the listeners still
count, and we think some things are too important to be bought
and sold as commodities.

I will be posting the FCC docket numbers as soon as ICBC files
the applications to modify WOWO and WLIB. If I understood
the WOWO sale contracts correctly, today's FCC decision won't
actually take effect until, AND UNLESS, the FCC approves
the rest of the modifications. With some legal help, some
community support, and a bit of luck, we can still win the

clear channels back.

23 cents and a few minutes is all it takes; please drop a line today.

Thank you.

-=Scott Fybush - fybush@world.std.com=-

POLITICAL BROADCASTING REMINDER

The next few weeks mark the most important time of the year for political broadcasting. Candidates for local, state and Federal offices will be approaching broadcasters with political advertising that they would like to have aired and it is important for broadcasters to take the time to review all of the FCC's rules and policies in this area. For example, broadcasters should note that, beginning September 9, 1994, and continuing until election day, November 8, 1994, the FCC's Lowest Unit Rate requirements for political advertising will be in effect. This is just one of a number of important FCC rules that broadcasters must follow during the election season.

In an effort to remind broadcasters of the more important requirements they face during this time, the law firm of Smithwick & Belendiuk, P.C. has drafted a Memorandum entitled "Political Broadcasting," which answers some of the most commonly-asked questions in this area. A copy of this Memorandum can be obtained for free by contacting Smithwick & Belendiuk at the above address and phone. We will also make it available via Internet e-mail. In addition, a copy of the Memorandum is available in electronic form on "FCC

WORLD" a computer bulletin board service. You can
reach FCC WORLD via computer and modem at 202-887-5718.

: We're starting up an AC station for a small market in Finland. How do I
: promote my station effectively at low or no cost? The market has four
: network relays plus competition from two major-city stations nearby.
: To survive, we need to be #1 in 25-49s. Any tips? Thanks.

One of the hottest things going here in the U.S. is sports talk radio. If your station is a medium wave station I'd say try it. I know how big hockey is in Tampere. Does another station in that market carry the live play by play locally? Is there a network for the Finnish Elite League? These are things I would go after.
If you are starting a FM stereo station thats another story. Go the music route, survey everyone you can age 25-49 and give them what they want.

My mother lives in central Florida and often listened to the I-MAN years back. Does anyone know which station carries him in central Florida (Ft. Meyers, West Palm beach, etc)? She lives 20mins north of West Palm Beach.

Secondly, the October issue of ESQUIRE has a longish article on IMUS. The I-man says its a very accurate article. It includes two picture of him and one of those photos includes his fiancee Deidre Coleman. The cover of ESQUIRE has a photo of Woody Allen.

Thanks,

> Jay Lawrence "Part of this complete breakfast"

92 Moose is WMME Augusta Maine. They became 92 Moose around Winter 1987. Somewhere I have a tape of their original signon (it involved a ticking clock and a bunch of Rocky & Bullwinkle bits, as well as an incredulous male voice pondering the concept of a station called Moose...perhaps as incredulous as Jay is today?)

WMME's address is 52 Western Ave., Augusta ME 04330.
They also have an AM at 1400
Oh yeah it's a top 40 station.

3770. Announcing ONLINE TONIGHT newsgroup

>From our press release:

ONLINE TONIGHT SUBJECT OF USENET NEWSGROUP

September 15, 1994 -- Washington, DC (OLT PR) -- OnLine Tonight with David Lawrence, the country's fastest growing computer oriented radio talk show, has become the subject of a USENET newsgroup.

The newsgroup, alt.radio.online-tonight, was created for listeners and friends of OnLine Tonight to meet, discuss issues, ask questions, and generally have a good time. It is accessible through any newsreader, including the Expert Add command in the Newsgroups area of the Internet Connection on America OnLine. If your newgroup base does not include alt.radio.online-tonight, you can make a request of your system administrator to carry it.

OnLine Tonight With David Lawrence is a nationally syndicated radio show based in Washington, DC and has affiliates across the United States. Its two-hour Sunday night talk show format covers personal computing and electronic entertainment, and features news, reviews, listener phone calls, industry interviews and fun and games. Hosted by radio veteran David Lawrence, its cast includes Rita Daniels, resident DOS/Windows expert and Peter Burns, news anchor. For more information, use keyword OLT on America Online, or call Matt Coates at 202/337-3111.

Some time ago I realized I'm not the only fan of baseball who wants to learn more about the game, its strategy, and all its traditions. I've met dozens of people from all walks of life and various age groups who don't fully understand the game and want to know more. Of course, there are many more who just love the game and enjoy hearing baseball info-and not just trivia-in a short daily program that offers a national sponsor a large, targeted audience. It will also provide the local broadcaster with quality programming that will appeal not only to new fans, but oldtimers, too.

It's so simple it has to work. The hardest thing to do will be compiling the broadcast excerpts and getting rights to them. Seeing as how they're used all the time in other venues, it shouldn't be a problem, just lots of tedious work. (Notice my hand is raised?!?!)

A full-blown business plan is currently being written and will explain in full detail what is required in order to make this program a reality, as well as funding needs and proposed exit strategies.

My background is in radio production and multi-image soundtrack production for big corporate slide shows. For the last six years I've been doing graphic design. (I know, I know...it's a leap...but what can I say?)

If you have any experience with program syndication, I'd like to discuss with you the merits of this idea as well as the ins and outs of barter vs. buying time. Plus, if you know of anyone who might want to become involved, send them my way.

If you are interested in knowing more, please leave me e-mail here on AOL. My screen name is 'LStevens'.

I am a radio television and film student in Little Rock AR.
I would like to end up in talk radio (not necessarily on air) and was
wondering something. If there are any hosts on line, am I better to
stay here at a medium market school with lagging behind in technology,
or would I be better off to go to a school of audio ingeneering like
University of Memphis, which is one of the best in the country?

Mark

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the noncommercial, electronic newsletter for folks who
enjoy collecting and listening to nostalgic radio programs is proud to
announce the acceptance of charter subscriptions.

OTR was founded after discussion in Usenet newsgroups and email
exchanges, indicating the desire of a number of Usenet users to
have a forum dedicated to the hobby of listening to old-time radio
(OTR) programming.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the anticipated topics include (but are not limited to):

Lists of AM radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during
the "golden age of radio", would like to learn more about programming
on the "TV without a tube" that fascinated your parents, or would like
to contribute your topical expertise, send in your subscription
request now.

Are you interested in the "Modern Day" radio dramas and how they
compare and contrast to the 'Golden Age" of radio? If so, then OTR
is for you.

Subscribers will receive periodic emailings of contributed articles.
in a daily digest format (as news warrants). You may enjoy reading

OTR while listening to your favorite radio dramas. An enjoyable
example of sensory multiplexing :-).

-o-o-o-o-o-o-o-o-o-o-o-o-

To subscribe, send an email message in the following format:

To: otr-request@airwaves.chi.il.us
Subject: SUBSCRIBE

You will receive a 'welcome' message with even more information.

OTR is brought to you courtesy of -Airwaves Radio Journal
and Lou Genco, who actually remembers some of the original programs |-).

I have more on WIBC, from today's (16 Sept. 94) _Indianapolis Star_:

Heckman will return to WIBC

By Steve Hall, Star Television Editor

WIBC-AM (1070) is bringing back an old friend -- Fred Heckman.

Heckman, 70, the station's news director for 35 years, will return to its airwaves as a "senior news analyst" on Sept. 26. _My Town Indy_, which features Heckman's reflections on local events and people, will air daily after the 8 a.m. news.

He will also participate in election coverage and other stories.

"We plan to rely on Fred's perspective and insight on major news," said WIBC General Manager Tom Severino. "We'll use him like CBS does Walter Cronkite."

For most of his career, Heckman was as much a part of the city's morning routine as coffee. But he and WIBC had a nasty parting last year after Sconnix Broadcasting officials denigrated his style as "old-fashioned."

An age discrimination suit seeking $680,000 in compensatory damages from WIBC was settled to Heckman's satisfaction in May. When Emmis Broadcasting took over WIBC in June, officials were outspoken about wanting to bring Heckman back.

"It feels good, given the circumstances under which I left," said Heckman, reached Thursday at his home. "I'm just happy that Jeff Smulyan and Emmis own the station now. The changes I'm hearing make it sound better."

Heckman will talk about his new duties on Jeff Pigeon's WIBC morning program Sept. 23.

Another WIBC note: As long as I've been in and around Central Indiana (nearly 10 years), they've called themselves "Ten-Seventy, WIBC." I notice now that many of their promos, especially those produced with their "station voice", are saying "Ten-Seven-Oh, WIBC." They haven't figured out yet whether to stay with this or not; news anchors are
/help
\help

/?
\quit
/exit
Ah, crud. Sorry about that, folks. I truly despise Delphi's editor.

figured out yet whether to stay with this or not; talk show hosts
seem to be sticking with ten-seventy.

Peace,
jim grey

I have posted in the alt.binaries.pictures and a.b.p.misc groups uuencoded
black and white photos of 3 different old vacuum tube table radios from
the late 40's early 50's. These photos are in the jpg format.
(these files are around 40 to 50K each, way too big for this group).
If you don't get the alt groups, I could e-mail these files.

Some oldies or nostalgia stations might find these pictures of old
radios (sitting on the patio railing out in the sunshine) of some
use for newspaper ads and such. Go ahead and use them.

photos:

emerrad.jpg black cube shaped radio with a grid of holes in front, tuning
knob points to range of numbers 5, 6, 7, 9, 11, 14, 16 on front surface.

olymrad.jpg Moulded bakelite style radio, right front has a sloping
radio station dial (round) behind a clear "watchglass". 2 knobs below.
and left front has clapboard style speaker grill slots. You could
easily modify this image to make the dial pointer point at your frequency
on the AM band.

rcavrad.jpg Moulded bakelite cabinet, has a big clear plastic tuning
knob front center, "clapboard" speaker grill slots on both left and
right sides of the tuning knob (speaker really on the left). And a
metal trim somewhat like what they used on cars.

> actually carries the AP Network News cast in its entirety!
> It is taped every hour and the newest cast can be heard about
> about :05:30 past each hour.

The Sacramento Bee's "BeeLine" also does this, so it must be common. And probably it's the same in Portland as it is here... the station that has AP's radio feed probably just uses it for news cuts and audio, and doesn't carry the hourly newscast. I know that's true here in Sacramento, as our station is the AP Radio affiliate here and we carry the ABC Information Network for hourly newscasts.

However, I'm unaware if the AP Radio service is market exclusive, or if anyone else in this market can carry it...

Thanks for the info on Don Law/FNX. Some additional things:
--This morning's Globe reported that Green DAy's record company has issued a statement saying how great it is that their band was made to end their set by the police, that a riot broke out, etc. which is a disgusting attempt to cash in on a sorry incident.
--This was the first attempt to bring nationally known hardcore artists to a free concert since a 1992 incident involving then top 40 WZOU (now Churban WJMN) which also had to end early because of rioters. Don't they ever learn?

Another Boston radio addition from the left side of the dial: Jill Kaufman leaves WUMB/WBPR (91.9)'s mid-day Acoustic Images folk slot to become board operator/local announced/producer during WBUR (NPR News, 90.9) new mid-day talk/news lineup. She'll probably be replaced by one of the DJ's from WERS (Emerson College, 88.9)'s folk program "The Coffeehouse", perhaps former student GM Sonia Morrinson.

: One of the hottest things going here in the U.S. is sports talk radio. If
: your station is a medium wave station I'd say try it.

It may be hot for one segment of a market, but it is hot overall? Some stations doing sportstalk are near the bottom of their ratings. I'd say sportstalk is a tricky format to do and depends a *lot* on the community where it's done. Can Finland support sportstalk? What kind of competition is there?

Does Finland have the kind of marketing structure where sportstalk would be appealing to advertisers? For instance, in the USA a sports shoe store like Footlocker could be an advertiser on a sportstalk station -- but in Finland are there such things as stores which sell only sports shoes?

Ahem. Here's a snippet from our press kit:

OnLine Tonight with David Lawrence is an internationally syndicated radio talk show that revolves around personal computers. We air Sunday evenings from 8-10 PM Eastern, 5-7 PM Pacific (and 1-3 AM in London, 2-4 PM Monday afternoon in Sydney...not that we're on in either place yet) on the following radio stations (some may tape delay us):

WCBM AM 680 Baltimore MD (Live/tape from 9p-11p ET)
WIBR AM 1300 Baton Rouge LA (Live from 7p-9p CT)
WWWS AM 1440 Buffalo NY (Live from 8p-10p ET)
WING AM 1410 Dayton OH (Tape delayed - next Sunday, 10a-noon ET)
WMMN AM 920 Fairmont/Morgantown WV (Live from 8p-10p ET)
WNFL AM 1440 Green Bay WI (Tape delayed - next Sunday, 1p-3p CT)
WJGR AM 1320 Jacksonville FL (Live from 8p-10p ET)
WHMP AM 1400 Northampton MA (Live from 8p-10p ET)
KEX AM 1190 Portland OR (Live from 6p-7p PT)
KAVA AM 1450 Redding CA (Live from 5p-7p ET)
WYTA AM 820 Tampa FL (Live from 8p-10p ET)
WBKV AM 1470 West Bend WI (Tape delayed - 9p-11p CT)
KFH AM 1330 Wichita KS (Live from 7p-9p CT)
...around the world on the Armed Forces Radio Network, and on your phone via the OnLine Tonight ListenLine: 1-800-846-4OLT.

Regular features on the show include:

* phone calls and questions from across the nation and around the world

* an online simulchat on America OnLine in the OnLine Tonight chat room, Studio B

* Computing-oriented newscasts called The OnLine Tonight Digital Update with news anchor Peter Burns (and two headline versions of the same)

* Interviews with industry heavyweights

* This Just In (snippets of late breaking goings-on in the computer/personal entertainment industries)

* The Two Minute Test Drive (reviews of currently released software and hardware)

* The Baby Contest (a music trivia game involving your Macintosh or PC)

* Regular features that touch on specific aspects of personal computing such as the Internet, home-based offices, kids and computing, etc

* Travel Weather (an up-to-the-second weathercast for the top traveled-to markets in the country culled from online and wire service resources)

* QuickTips (DOS/WIN or Mac-based tips and hints that help you use your computer more efficiently)

* plus comedy bits that help keep the show accessible to people who aren't heavily computer oriented, such as The Top 5 List, Reagan Calling, The Virus Report and much more.

If there are any questions, please let me know.

David Lawrence
Host
OnLine Tonight

3788. Progressive Rock syndicated show available

Newsgroup: rec.radio.broadcasting
Date: 1994-09-17 01:48:59 UTC
From: exposure@ix.netcom.com
Message-ID: <35dhub$md2@vixen.cso.uiuc.edu>
Source record: 37993

I am part of a progressive rock radio show that is
working on syndication.

We define progressive rock as "Synphonic, Fusion and Electronic rock,"
with the flavor of old Genesis, Yes, Tull, Ponty, etc. We include obscure
tracks from the well know bands, and place a heavy emphasis on unknown
bands, thus the name or our show, "Exposure."

The show is weekly, 2hrs, and has run for 27 weeks on WOZN,
Key West, Florida, Sundays 10pm - midnight.

The show would play best on variety AOR stations (a rare breed,
these days), AAA or any music-oriented non-commercial station.
The terms are barter, so there's no cost to your station. Our spots
are made to run on commercial or non-commercial stations (value neutral,
underwriter/sponsorship, etc.)

Email for more information

> quirk, or a flash-in-the-pan.

The fact is that Stern bucks convention, and persists in countering all the sacred cows that PDs hold dear: Play X number of records an hour, "It's the music that's important, etc." People have a hard time dealing with events and people that fly in the face of all they have been taught.

Indeed, this is one reason that the syndicated "Don and Mike" show does so well; their persistence in exposing the "soft underbelly" of Radio. PD's as simps, GM's as lizards.

Oh well, as always, if we can't deal with something, we can always turn the dial...

In my opinion you would be better off getting an education in something other than broadcasting, if you desire to bring anything interesting to talkradio. An example, the hottest talkhost in San Francisco right now is Shann Nix, a woman of 28 who wrote stories about "Generation-X" for the San Francisco Chronicle, then wrote a book. She went to KGO trying to push her book on a talkshow and instead ended up getting a gig there. When I look around I see many radio people with careers outside of radio.

Some, such as SF's Brian Copeland and Marilyn Pittman are standup comics. Another, Michael Krasny, is an English professor. One former program director at KQED is an attorney, another former PD there is a statistician who positions political campaigns. It goes on and on like that.

Neither ---- get a good education where you are --- and get a job at a small station. Even an internship is extremely valuable. You get to see the different jobs at a station and figure out what interests you. Internships often lead to entry level jobs. There are at least a dozen people in my company (Westinghouse Broadcasting) who have moved up through the ranks after starting their careers as interns.

Hot off the presses...Here's a 12+ ranker from the AccuRatings Summer 1994 Boston survey (June 28 - September 5). The full report will be released to subscribers on Monday, September 19.

Share of core listeners (Summer 1994, Spring 1994)
1. WBZ-AM (News) 9.4, 9.9
2. WJMN-FM (Urban CHR) 8.4, 8.0
3. WXKS-FM (CHR) 7.5, 8.1
4. WBCN-FM (AOR) 5.5, 5.2
5. WBUR-FM (Public) 4.6, 4.3
6. WRKO-AM (Talk) 4.5, 4.2
7. WZLX-FM (Classic Rock) 4.4, 4.4
8. WBMX-FM (AC) 4.2, 3.6
9. WAAF-FM (AOR) 4.0, 3.3
10. WODS-FM (Oldies) 4.0, 4.2
11. WMJX-FM (AC) 3.4, 4.0
12. WBOS-FM (Soft AOR) 3.3, 3.7
13. WEEI-AM (Sports) 3.2, 3.2
14. WCLB-FM (Country) 3.2, 2.2
15. WFNX-FM (Modern Rock) 3.1, 3.6
16. WHDH-AM (Talk) 2.7, 3.3
17. WGBH-FM (Public) 2.4, 2.4
18. WCRB-FM (Classical) 2.4, 3.1
19. WSSH-FM (AC) 2.3, 3.0
20. WBCS-FM (Country) 2.0, 1.6

Enjoy!

From the #40 market(and with no immoblizer on my left wrist,just an ACE bandage-thankfully :)):

*WBUF(B93,AC)has a new program director in place. Steve Wiersman was last at WYSR in Waterbury,Conn. He replaces Chris Whittingham-who was the PD on an interim basis;Chris remains PM driver.

*J.J.Rice,who handles 10am-2pm on WPXY(97.9,CHR;98 PXY)in Rochester, adds music director duties as well. Cat Collins,who was MD,left to go to WJMN(Jam'n 94.5)in Boston.

*Tom Calderone(ex-PD at WBNY-FM)has left WDRE-FM and its network of stations to join Jacobs Media as a consultant for "the Edge" format. He'll be based in N.Y.

*More on CKEY(FM 101 The Planet):another jock has been added. Kerry, as he bills himself,handles PM drive. Caught some of his stuff,and he's OK-not great,but not lousy,either. He mentioned he was last in Hawaii (location unknown;one of the things he couldn't stand was that at night they ran episodes of Magnum P.I.,Hawaii Five-O,and 1 West Waikiki back-to-back-theorizing that why does one have to watch shows made here when one lives in Hawaii? Think that's bad...try putting up with Jake & the Fatman reruns. :)),but is an area native. Also,a Planet fax line(actually,2) is up and running-and they are actively promoting concerts-5 at last count.

TTFN...

Since I live in Fort Wayne and WoWO's chief engineer is a personal friend, I will print this message and send it to Kevin Kilbane the Entertainment editor of the News-Sentinel. This is absolutely criminal!

To make matters worse, the news was printed in FW Newspapers/ both of them on the inside back page in a little corner. There is no appreciation for art or talent or tradition anymore!!!

I am outraged!

Saturday, September 17, 1994

Chances are that you have seen the posting from Scott Fybush about the FCC giving the OK for the Price Communications/Inner City Broadcasting sale to Radio Stations WOWO and WOWO-FM, Fort Wayne, Indiana to occur. This means that the sale CAN happen with the blessing of the Commission. Whether it happens or when it happens is anyone guess. I was one of the 5 people who formally protested to the FCC about this planned sale mainly because of the well known allegation that Inner City has only one plan for the future of WOWO-AM, to turn it off or to severely diminish its' famous Clear Channel Service. This would make it possible for its' co-owned WLIB in New York to operate FULLTIME, at the expense of WOWO. Many other people were scared that Inner City might otherwise take WOWO's unique program service (format and personality) and scrap it for its' own brand of alleged "hate mongering" shows.
In a nutshell, WE LOST this battle to save WOWO....but not the entire war....yet. I will get to that in a moment. The reason why the FCC denied ANY motions is simple, they go by the book.... The FCC is NOT in the format business, mainly because the Constitution guarantees the right of Free Speech and I myself am a firm believer in that. In spite of what you may not like about something broadcast on WLIB, it is protected by the Constitution. Secondly, the fact that Inter City is controlled by people who live in the City of New York does not constitute that they are not fit to be a licensee of WOWO. WOWO has not been locally owned since 1936. All of our letters, 200 of them were simply looked at and put back in the file. MY formal protest of the sale did not include a standing statement and did not provide an affidavit on why this sale should not be allowed and therefore was put into the same pile. The other 4 formal protests where considered but were basically DENIED for the above stated reasons.
All is not lost YET. Part of the stipulations of the sales agreement is that FCC grant a Construction Permit to change the parameters of operation of WOWO to alow WLIB fulltime service. Without that authorization, Inner City may be stuck with a station that they simply do not want to operate. The whole idea is for Inner City to own WOWO AM and FM for a "legal minute" and immediately sell the station to Pathfinder who in turn would do the changes in the Construction Permit. This whole long drawn out procedure is CONTINGENT upon the FCC's granting a Construction Permit for the changes. And that's where we come in. The FCC has a comment period just like the one that we had in the early part of this year. According to Scott Fybush, the sales agreement is loaded with legalise and has more "therefores" and "whatnots" than a epic novel. The gist of the whole matter is that that the whole mess is contingent upon the FCC granting a CP. Otherwise, there is an escaape clause in which all parties can duck out of the sale in December. This of course is NOT etched in stone as anything really is.

We need ALL people who protested the sale to contact us IMMEDIATELY with
a letter or postcard to the WOWO Listener's Guild to let the Commission know
that them know what WOWO's programming and strong signal means to them. WE
need to hear from people (listeners) east of Fort Wayne especially as they
are going to be the most affected by Inner City's planned degradation of
WOWO's signal. If something is ever more important, this is probably the
most important letter or card you'll ever mail. Scott and I cannot do it
alone, whe need everyone's cooperation to nip this travesty "in the bud".
As it stands now, there is NO application in Commission's files for any
changes on WOWO's signal, YET. That won't be so for long. AND if you did
not take the time to contact the Commission about the Inner City sale, by
all means get off you butt and contact the Guild. When the time comes, we
want to be ready to show the Commission what a real diservice it would be
if WOWO's signal were to be decimated in order to give New York City yet anotherClear c
hannel station at the expense of WOWO. There is strength in numbers,
especially if these numbers happen to live in the 29 states of the U.S.A.
and Canada that receive WOWO's nighttime service. We also need "pro-bono"
(sic) legal representation to facilitate the planned formal petition of
sta
the changes planned by Inner City. If you believe in what we want to do
to save a 70 year tradition called 1190/WOWO.... please find it in your heart
to help us stop this destruction of a Fort Wayne (or for that matter, an
American) landmark. Together, we can make things really happen. Without
your help, 1190 will sound just like 1200...try that frequency some night.
I almost gaurantee you WONT hear WOAI.
Also, if we are successful...this will also help save what is left of the
Clear Channel service...the FCC may realize that the so called "AM Improvemnet
and Revitalization" that they have been touting about will only bring more
"graveyard channels" to an already exhausted AM band. In closing, be assured that the
Guild's purpose is not to put down Inner City Broadcasting Company. I
have a lot of respect for ICBC, especially WBLS/107.5 in New York. In
the past, I have enjoyed listening to "The Quiet Storm" when ever the conditionsmade it
possible (trops) or when I have been in the New York City area. I
just dont like the way they plan to destroy WOWO's signal for the sake of
giving WLIB a night signal. Make note that ICBC has a pending application to
change their operation to daytime 1190 and 1200 nighttime and to change the
city of license to Yonkers, NY. I have NO problem with that, in fact I
endorse it. They also have a good chance of getting a Expanded Band slot above
1600.
All in all we have a great battle to fight. Please, if you believe in
what we stand for...help us save WOWO. We are not rich, we are not some large
corporation and we do this on our own time. The time is now and WE NEED
EVERYONE"S HELP, NOW!!!!!

From: wa2ise@netcom.com
Message-ID: <35gl6i$2f3@vixen.cso.uiuc.edu>
Source record: 37865
Cross-posted to: sci.electronics,rec.radio.broadcasting

Earlier today, I was shopping at an electronics and applince "superstore", "Incredable Universe" (needed a memory SIMM for my PC). Went browsing around in the HI-FI area (speakers, recievers, tuners, and such) and saw a "JVC FM/AM Stereo Tuner" (that's what the lettering on the faceplate said). AM Stereo? I ask the sales-kid "Does this tuner really recieve AM Stereo?". He says "There is no AM stereo, sir, AM is mono only. There's only one 'signal' on an AM station." "What about FM, then?" "Each FM station has two signals, one left, one right. Trying to get AM stereo would be like trying to get stereo out of a mono VCR." "But I heard that some stations around here (KBBT) on AM are stereo, they quadature modulate their carrier." "what's 'quadature'?" at this point, I figured to forget it, and left. Guess it's too much to expect the salesguys to know the stuff they're selling...

AP Network News may indeed be exclusive; I note that the SF Chronicle has
a service called Cityline, which carries the full gamut of audiotex
services (weather, trivia contests, backache advice, etc), but does not
carry the AP cast at all. Some station locally does carry it, though.
This wasn't true in Portland at the time I lived there, so maybe their
contract forbids carriage, even in a different medium.

I agree about Peter Burns. While all the other Mutual announcers would speak in dramatic voices or give a hard newsy punch to their reading, Peter Burns always had that laidback kind of intimacy I really liked. I always fantasized that he was about 30 years old, had long hair in a pony tail, and wore wire rim glasses, maybe with a pointy goatee. Of course, I'm probably totally wrong, too.

A TV program which sets the record right about who REALLY started the first broadcast station will be aired Monday night (Sept 19) at 8pm on KTEH, channel 54 in San Jose.

This program goes where "Empire of the Air" failed to go -- exploring the early operation of KQW [now KCBS] in San Jose by Dr. Charles David Herrold beginning in 1909 (a full 12 years before KDKA).

Herrold noticed that the arc streetlights of the day made buzzing noises. He theorized that perhaps an arc transmitter, besides being useful for just dots and dashes of Morse code, could be made to talk, too.

The program also mentions that Herrold and his father worked on several inventions for prune farming in the Santa Clara (now "Silicon) Valley. (It is thought that because of this close link to farming that Herrold came up with the term "broadcasting" to describe radio transmissions designed for a wide audience, in the same way that "broadcasting" is a term used to mean scattering of seeds over a large area.)

People outside the Bay Area who might want to have their local station air this program can contact KTEH in San Jose for information.

ONCE AGAIN, FINE CLASSICAL MUSIC IS HEARD IN THE BAY AREA

The New KKHI at 100.7 FM and 15/10 AM Spent this past week tuning and tweking the Transmitters in preparation for Formally going on the air on Saturday, September 17th 1994 beginning at midnight. It was great listening to this new station broadcasting from San Rafael California in the North Bay on Friday September 16th as they called listeners by playing Whole CD's and inserting anouncements between each CD letting listeners know that they were in the test phase and that they were Formally going to go on the air at Midnight.
As I write this article it is still Friday so I can't comment on the personalities who will staf the station but as the Old KKHI formally was located in San Francisco became History, the New KKHI Operated by a new team will be a Credit to The Bay Area.
I believe that I can speak for those of us who were sorry to see the old KKHI die, how thrilled we are that Fine Classical Music is back. I congratulate the new team headed by Mr. Saul Levine and I Pray that the New KKHI will be Successful and carry on a tradition of Excellence in Broadcasting.

>your CHR act...it's a loser.
In case you haven't noticed lately, CHR and "Alternative" are just about
the same thing when you take out the Urban product (and the country!)...

Given the changes in Detroit's Urban station market, 'HYT made a
calculated risk that will probably pay off in the long run.

CIMX/89X is run like a small market station, HYT should, over time, be
able to take their entire share, plus the non-Urban audience they already
have. Cap Cities doesn't make format shifts without research, do they?

Q101 Chicago and Z100 New York seem to do fine with the Modern CHR format.

3811. Re: RADIOTEXT(E): highly recommended book on radio

Newsgroup: rec.radio.broadcasting

Source record: 37859

I second - RADIOTEXT(E) is a very good book on radio, even if some of the essays are soemewhat unreadable. There is a great essay about the Joe Frank by Irwin
Chusid of WFMU in East Orange, New Jersey.

Steve Post currently hosts a classical music show on WNYC-FM (93.9) in New York City on weekdays from 9 a.m. to noon. He does his own rip-and-read version of the news from approximately 9 .to 9:15 a.m. (oops - meant the show starts at 8 a.m. He occasionally whines about the state of radio, or about suggestions in the press that he is liberal-biased. His current catch line is that, for example, if the last news story he read was about a toxic waste dump, he'll end the monologue with "speaking of toxic waste dumps, you're listening to WNYC - New York".

Bob Fass is currently hosting a revived Radio Unameable on WBAI-New York (99.5) Thursday nights from midnight to 3 a.m.

From: talk1370@aol.com
Message-ID: <35gl7j$2so@vixen.cso.uiuc.edu>
Source record: 37853

A couple of new wrinkles in talk radio in Rochester, NY;
WHAM has finally more or less filled its midday talk slot, which has been vacant since the beginning of June when Jack Kinnicutt bailed out in a salary dispute [he wanted a raise, management looked at his sinking ratings and said no]. The winners are as follows; Monday through Thursday, Stephen Ruben, a Canadian lawyer who recently washed out in late nights on CFRB in Toronto, and wil keep his home for the moment in Thornhill, Ontario (staying over here four days and three nights a week, spending Thursday night, Fridays and weekends in Canada). On Friday, local newspaper columnist Bob Lonsberry, who hoped to get the five-day-a-week regular slot, will be permanent guest host.
WHAM's duopoly sister "Hot Talk 1280" WHTK has dropped the Don & Mike show from its all-satellite talk lineup, replacing them with the Fabulous Sports Babe on tape delay. (Why they are keeping Liddy on the schedule after two miserable books in a row is anyone's guess, except that Liddy's politics closely parallel those of the owners.) This may also be a counterprogramming move against recently established SportsRadio 990, WCMF-AM. It also maintains a sports presence for the station which was lost after the Yankee baseball season ended in August, to return---who knows when?
No big changes at the other major talker in the market, WXXI-AM, and none expected. No big lineup changes at the station since 1989, and none forthcoming...although we are currently looking for a full time news reporter, T&R to Box 21, Rochester NY 14601 if you're interested and experienced, and hurry because the job will be filled soon.
Bob Smith, middays WXXI/1370 Rochester NY

I agree with Honzman.

Get into an area that you can start as an internship. I don't want to de-value education for radio, but in my mind the most valuable education I received was an intership with Capcities/ABC in Detroit. I moved from an intern to a jock and eventually became the asst production director. The real hands-on experience is very valuable.

On the other hand, I graduated from UofM and now continue my education at Wharton/UPenn. It helps to be educated in radio, it doesn't necessarily give you your ticket to broadcasting.

DON'T DO IT!! DON'T DO IT!!

Still there? Oh. Well, the best advice I can igive you is
to get an education in something other than broadcasting. Couple
of reasons: first, you wikll be more diverse in terms of being
able to be an "expert" on any particular field, and second, if
you can't get a job in the industry at any point in time, you
will still be able to eat.

I spent 8 years in the computer business before I came back to
radio earlier this year, and when I came back, I literally fell
into a job.

The last bit of advice I can give you is one that my 7th grade
band teacher gavbe me on the 1st day of school in the mid-70's:

"Be in the right place at the right time, with the right
equipment and the right attitude, ready to go to work."

Pity the poor kid, expounding on things he knows nothing about -- but hate
the management for paying only $5 an hour. I'm sure the kid will ditch
the job once he gets a better one (he'd be a fool not to). Go into
Nordstrom and ask the stereo department person the same question and you
WILL get a better answer. Why? Because the Nordstrom way is to build
repeat business, something their salespeople can't do by giving wrong
information and talking about things they don't know. When SAP TV came
into existence I went to Nordie's and came this ->][close to buying
a TV with SAP, because the salesperson took the time to demonstrate it
on the lone station that had it (I think it was a Spanish SAP on KOIN).
Even so, the guy had me convinced this would be the hottest thing in TV.

AP would be interested in that. For AP All-News Radio, though, you should be aware that they're selling it on a market exclusive basis to stations that are very close geographically. The MSA is used... if two stations are in the same MSA, and pay the market exlusive rate, that's a problem.

You can buy it on a non-exclusive, though, and more likely that's what's happened with those stations.

I'm working at the moment on negotiating market exclusive on AP All-News for one of my stations. Runs about $300 weekly for the exclusive in market #144.

I'm almost positive AP Network News is _not_ market exclusive; nor is
UPI. Since stations pay a fee for use of the services, and there are no
commercials aired on either service, there is no exclusivity.

However, there may be market exclusivity on their all-news operation; I
wouldn't be surprised.

BAY AREA RADIO NEWS - September 18, 1994

A CLASSICAL ALTERNATIVE: KTID 100.7 FM/1510 AM returned to the airwaves at Midnight, September 17 (Saturday) with a new classical format under a new owner.

All on air ID's are "KKHI", so I assume the application for the KKHI calls has been sent to the FCC, but the authorization has not come back.

According to a newspaper article in the Marin Independent Journal Friday, owner Saul Levine said that for the first few weeks, the majority of programming would originate from his station in Los Angeles, KKGO. However, all on air personalities were talking auite a bit about the Bay Area, so the article might be wrong.

Studios are to be located in the Corte Madera Town Center, a local shopping mall.

The article said that KTID (to be KKHI) would feature a lot of local information, including community events, news on the hour, and traffic information for Marin.

To better cover parts of San Francisco, a translator has been brought up on 100.9 FM in Sausalito, calls K265DI. The new owner has other plans to increase coverage of the entire Bay Area.

KTID went off the air last spring as an adult contemporary station, which _never_ did very well in the ratings. In its heyday, however, then KTIM was one of the Bay Area leaders in free form FM radio.

Don Coco (djc@crl.com) wrote:

: The New KKHI at 100.7 FM and 1510 AM Spent this past week

I hear them on their 100.9 translator (the signal is not aimed for San Francisco, but they have a translator for at least a corner of this city. Sounds good. Unfortunately, being 2:00am, their AM is not on (but KGA in Spokane is booming in on the channel at the moment). Funny, this makes two classical stations in the Northbay [this is the famous Marin County area where people play with peacock feathers in their hot tubs], but nothing for the Southbay [known to the rest of the world as Silicon Valley]. This is just an accident of planning, but still, it does create a split market.

Source record: 37880

This past Monday, 2 stations in this area switched format without warning and caught many by surprise. WGCX, an AOR outlet started running repeated promos that they had moved to 92.1 FM, because "this frequency (104.1) is going to 'the Dogs'." On Tuesday, "The Dog," came on with a Country format. Also, an an even weirder move, WAVH (Oldies 96.1--The Wave) abandoned it's Oldies format for---you guessed it---Country. What is sad here is that now this area has no receivable Oldies outlet. WYXB (105.5) in Fort Walton Beach is the nearest, but with their signal, they cannot be received clearly here. WGCX has now deprived this area of good syndicated programming such as Rockline, In The Studio, Flashback, and The Westwood One Superstar Concert/In Concert series. True, there are other AORs in this area, but for a station that has these programs to switch to a 3kw channel and deprive most of their audience...boggles the mind...I think it's safe to say that in the case of The Wave...this was an even stupider move. This area needs another Country outlet like Rush Limbaugh needs to gain more weight.

DACS is a private NPR information service. Through the generosity of a couple stations we have seen bits and pieces of DACS material on the net, but I don't think NPR will ever release this stuff publicly. I mean, heck, they don't want the world to know when they might screw up and have to re-send a feed for Car Talk or something...and that's mainly what it is. Best to cozy up to your local NPR affiliate, give them some money, help them out at pledge time, and maybe they'll share the Friday job listings with you.

Larry Glick is 72 now, retired, and living in Florida.

I too spent years listening to Glick on WBZ. I consider him the best radio talk show host I ever heard. Glick helped influence the style of a generation of talkers including Larry King, with whom he worked in Miami, and Dick Goran, a friend of his from Boston who later enjoyed a great deal of success in Las Vegas. Dick still keeps in touch with Glick, who is in good health and always happy to hear that his name has come up in discussions on computer bulletin boards.

Bobby Skafish, veteran "jay" at alternative WXRT and WLUP (before transition to entertaining talk) took over mornings at Chicago's New Rock Alternative (WKQX (Q101)) from Mark Goodman. Skafish and the station parted ways last Monday. Brian Peck, former news guy on the Mark Goodman show had been doing fill in work at the station. He takes over mornings, at least temporarily at Q101 The revolving door at Q101 continues.....WGN, Chicago's former number one station appears to have solved their ratings decline. They announced a shuffle of their news anchors. Tom Pedersen takes over as new director. Former news director Dave Ellsworth joins the morning crew. Lyle Dean shifts to afternoons while Wes Bleed gets the post of assistant news director. .....Gary Price, operation director at Infinity owned WJJD and WJMK resigned to pursue other interest. Price has been with Infinity since 1984. Rumors of changes at WJJD continue and this move will probably accelerate them.....Karen Williams takes over mornings on smooth jazz WNUA (95.5) from Dean Richards.....Johnathon Cook, formerly of WLUP-FM moves over to WRCX (103.5) where he will handle the overnight shift.....Finally, Wali Muhammad, former midday and overnight jock at WVAZ moves on the Kankakee's WBUS (99.9) on the overnight shift. Johnathon versus Wali overnights. Who is your money on?.....

:Nordstrom and ask the stereo department person the same question and you
:WILL get a better answer.

The problem is, that the management doesn't know any better, either.
Worse yet are the clowns (and I am being kind to them) that THINK they
know what they are talking about. A local Radio Shack's assistant manager
tried to tell me that there aren't any AM Stereo stations in the area, so
why should they stock the radios? (At the time, they had an AM Stereo
tuner for home use, and a car stereo with AM Stereo, FM Stereo, and
cassette. They didn't sound bad either, even though they didn't have the
wide band option.) When I told him which stations at that time were
stereo, he just stammered and said that when it becomes nation-wide, then
he will stock the items.
Another incident was when the station I work for had a promotion called
"The Cure for Mono", and gave away a car stereo outfit from a local
audio-video dealer. When I came to see the display, the sales person had
a competing FM station on. I asked why this was done, he said that all
the sales people put the car stereos on that particular station, without
thinking. He then asked what is AM Stereo, so I switched the display
stereo to our station, hit the wide-band button, and the sales person
looked surprised at the sound. (He seemed to like it.) It didn't last
long, however. He still wanted to put the stereo back on the FM station.
At this point I reminded him who was paying for that display, and he got a
bit miffed.
But the radio community could've done a lot better job at promoting AM
Stereo when there was still time. These people are supposed to be wise in
the ways of promotion, and they dropped the ball big time. The F.C.C.
didn't help either. But with the broadcasters insistance, an AM Stereo
standard would've come a lot sooner, perhaps in time to help AM escape the
dreaded "talk doldrums".

Forget the kid at the stereo store for now. Let's find out what happened to the NAB promotion for AMAX, or Motorola's AMAX chip set with built-in noise blanker, or Radio Shack's rumored 1995 AMAX radios. Broadcasters have complied with NRSC-1 (the audio processing), recently measured their RF mask (NRSC-2), and are still waiting for receivers even under the relaxed AMAX guidelines. Sure DENON/NAB has a receiver for people that know about and want to special order, the GE SuperRadio approaches mono AMAX specs, but give us a mass market radio that when it hits stereo stores the sales kid will say, "AM stereo, not bad".

It's a great place, but don't expect much from the salesdroids. I'm impressed that most of them seem reasonably proficient with their slick Grid computers.

>He says "There is no AM stereo, sir, AM is mono only. There's
>only one 'signal' on an AM station."

The Incredible Universe by me sells Sony's AM stereo WalkMan. Perhaps you could take him for a little walk over to their "personal electronics" section...

>Guess it's too much to expect the salesguys to
>know the stuff they're selling...

When they're working at Incredible Universe and they just got rid of acne, yes.

Ignorance of AM stereo is not limited to minimum-wage store help. A few weeks ago, I got a lengthy letter from a KKSJ listener who took the station to task for "falsely" claiming to be broadcasting in stereo. After giving me a page-worth of his qualifications (mostly consisting of his experience in the "Signal Corps" circa WWII), he explained that it was technically impossible to broadcast stereo over a single AM station.

I answered his letter with a brief history of AM stereo, and a simplified explanation of how C-QUAM worked.

His response (this time quite valid) was that he had searched and searched for radios capable of stereo reception and was able to obtain nothing more than an occasional sneer from some clerk who claimed there was no such thing.

AM stereo is FAR more trouble than it is worth--particularly when listeners have so much trouble even getting the radios.

Depends. If you talking about APs 'All News Radio,' the new format they put on a few months ago, then yes, it is market exclusive. If you are speaking about the old AP stuff, where there is a top of the hour newscast and feeds on the same channel, then I do not believe it is market exclusive.

The thing I noticed most about the recently published Boston radio ratings were:
--WJMN beating out WXKS! And I thought that AcuRatings favored baby boomer stations (I may be wrong about that)

--WCLB losing listeners, WBCS gaining them--this after 'BCS raided CLB's management, beefed up it's morning show, etc. Of course, WCLB is still out in front, but this may help convince BCS's management not to make that runored format switch.

--As an NPR lover I was glad to see WBUR edge out WRKO. Wonder how RKO's switch and WBUR's adding a local talk show will change things.

David Kaye wrote that he pictured Peter Burns being 30 years old, with a goatee, wire-rimmed glasses, etc.

Actually, I pictured him as being about 60, with a large grey beard, overweight, and always being slouched back in his chair. He seemed like a retired public school English teacher of a certain variety.

Anyways, I called the "listen-in" line for "On Line Tonight", the show that he is now a news caster for, and they said that it cost thirty cents a minute, meaning that to listen to one two-hour show would be $36!!! (And I for some reason thought it would be free!) Now that I think of it, Peter Burns was always filing computer stories for Mutual's "America In the Morning", usually during the second half hour that most of the stations don't air, so it's no wonder he now words for a computer show.

From: martin@cod.nosc.mil
Message-ID: <35lbcj$ic@vixen.cso.uiuc.edu>
Source record: 37803

I am an active AM-BCB dxer, and had just about given
up on my hobby in San Diego, was surprised to find:
Spanish between KMPC-710 and KBRT-740 at mid day. Indeed, it's 730 kHz, XEEBC
from Ensenada. For a long time this station had a construction permit for 1500 kHz,
but nothing happened, so those of us here who dx the AM broadcast band thought
it went away, not so, just changed to 730 and now on the air.
Apparently, for whatever reason, Mexico is giving up on clear channels,
just as the US did about ten years ago. At least 540 and 730 are no longer
clear. I wonder if new XE... stations will soon appear
on 900, 940, 1220, etc.
REgards,
Doug Marttin martin@nosc.mil

>Barry Campbell

Hold on, let me check. Larry Glick retired on June 1, 1992 after WHDH, Boston failed to renew his contract. They offered him time to sell instead of a salary. He said he would take it if he were a few years younger, but he was too tired to hustle airtime, so he retired. Glick's Boston radio career started at the original WMEX in 1964, when he did the graveyard shift. He moved to WBZ in late 1968, and remained there doing graveyard, then late night, and beginning in 1986, early afternoons. In 1988 WHDH gave him an "offer he couldn't refuse" and he headed over there. 'BZ invoked the exclusivity clause on his contract, so he had to sit out a year (and was paid for it). 'HDH started Glick on early afternoons, then moved him back to late night (10-2) where he finished his career. He is reportedly still active as a hypnotist and several other business ventures.

Larry retired a few years back, after spending much of his career at WBZ and then the final few years at the now-defuct :-(WHDH-850.

He's living in Boston's western suburbs these days, and is pretty much out of the spotlight.

As WBZ approaches its 75th anniversary in 1996, I'm hoping the station can get Larry and other well-remembered veterans back for some sort of reunion...so stay tuned!

Message-ID: <35lbcv$je@vixen.cso.uiuc.edu>
Source record: 37809

Yesterday, I picked up what appears to be a very old shortwave receiver. The unit seems to date from the thirties and is a unit made by the Patterson Radio Company of Los Angeles called a PR-10. The unit is a 10 tube receiver with tube types such as #55, 58, 59 etc. Nice, solid construction, high-polish chromium chassis and magnificent dials!

If you or anybody knows anything about this set, such as the exact age, possible value or merits, I would really appreciate obtaining some information, since I think it may be fairly obscure. I do not have a matching speaker for it, but believe it operates on a field-coil set-up. I'm delighted to have found it, but wonder more about its history right now.

Thanks for your time!

3855. Changes in Ithaca

Just to let everyone know:

As of 6 am this morning:.....

In Ithaca, NY, WQNY is no longer "Q104", but 103.7 The Wave. It reflects a change to a kinder, gentler sound (my ad lib) to appeal to daily listeners.
A Consultant from Finger Lakes Productions did it for owner Jim Gilmore.

So far, it sounds to me more like the simple elimination of almost all currents and harder edged classics. It is not Jazz/new age (like The Wave elsewhere) - it is an attempt to get audience from Lite 97.3 (12+ share in Ithaca; all others are clustered between 8 and 9)

Hmmmmmm..... We'll see. In any casse, it leaves WVBR 93.5 FM as the rock and roll station (AAA/AOR).

Just updating with 2 cents from IThaca

Item Subject: Text_1

Late Sunday night (well, post-midnight, purists call that 'early Monday morning'), I was dx'ing on the trusty black Superadio down at the low end of the AM spectrum from here in Boston. Canadian stations seemed to be booming in with the crisp early autumn breeze.

There was one way down in the 500s that was rebroadcasting an FM 'cast from 106.9 in Ottawa, a rock request show, with the station or the program calling itself "The Bear". What was that? CJSB at 540? CFRA at 580 (less likely, since I wasn't that close to the local 590, WBNW)? I have a slightly dated Canadian FM list that shows CIXX at 106.9 from London, Ontario, but nothing in Ottawa. Anyone know the Ottawa FM station here?
I also found something (US or Canadian) at 780 called "KIX Country" that was actually coming in stronger than WBBM Chicago. What's that?

Unfortunately, my French isn't good enough to catch station id call letters, but I can usually figure out from the directory listings which strong signals are coming from Quebec stations. Pardon my ignorance, but are there strong French AM stations broadcasting from provinces other than Quebec?
(Anybody know of a handy guide to the French pronunciation of the letters of the alphabet?!) ah-beh-ceh-deh-eh-eff-??-ahsh-ee-kah?....

It is true that the PC speaker driver will allow you to listen to these programs without any special equipment but the results are extremely unsatisfactory. A sound card is really the way to go on a PC and, at that, AM radio sounds better. When everyone is directly connected to the Net via fibre, this form of distribution may be more successful.

Mark --

a) Hang out at ANY local radio station you can. Make friends with the air talent, the production people, the management. Do anything you can to be helpful and useful to them! Money's not the issue; experience is.

b) Go for the most rounded education you can. Learning to work the equipment is easy; getting the background to understand the effect your work will have on others is not so easy. That's where a solid liberal arts pgm can help. Include Business courses, psyche, economics, and sales training where possible.

c) Insist upon an internship (see point a. above). Stations love to get interns to work with; costs them next to nothing and can pay off big-time.

d) Get to know as many talk radio people as possible. Listen to talk radio. National and local. (Obviously, don't be a pain to them, but you'll soon figure out what works.)

e) If you have access to ANY facilities at school, PRODUCE PRODUCE PRODUCE! The experience will be valuable beyond belief. Try to get a "teaching assistant" (or student asst. or whatever they call it) position. When you have to help or explain something to someone, you learn it much better yourself.

f) The Compuserve Broadcast Professionals Forum also has a lot of talented people interchanging ideas and thoughts (not to denigrate this group, of course; I have more than one CD-ROM encyclopedia, for example <grin>).

g) The sooner you get the RF running through your veins, the better!

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the noncommercial, electronic newsletter for folks who
enjoy collecting and listening to nostalgic radio programs is proud to
announce the acceptance of charter subscriptions.

OTR was founded after discussion in Usenet newsgroups and email
exchanges, indicating the desire of a number of Usenet users to
have a forum dedicated to the hobby of listening to old-time radio
(OTR) programming.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the anticipated topics include (but are not limited to):

Lists of AM radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during
the "golden age of radio", would like to learn more about programming
on the "TV without a tube" that fascinated your parents, or would like
to contribute your topical expertise, send in your subscription
request now.

Are you interested in the "Modern Day" radio dramas and how they
compare and contrast to the 'Golden Age" of radio? If so, then OTR
is for you.

Subscribers will receive periodic emailings of contributed articles.
in a daily digest format (as news warrants). You may enjoy reading

OTR while listening to your favorite radio dramas. An enjoyable
example of sensory multiplexing :-).

Source record: 37827

WBBM-FM (96.3) has settled on a replacement morning team for the departed Ed Volkman and Joe Bohanon. Eddie and JoeBo were dumped by the CBS owned station (despite solid ratings) for publicizing a (false) rumor that a local newscaster (former wife of Seattle and former Chicago deejay John Fisher) was carrying the child of a Chicago Bull player. The new morning team is Terry "T.J." Jacobs (formerly of KQIX in Grand Junction Colorado) and "Wild" Bill Cody of KWNZ in Reno. The pair has not worked together previously.

Robert Chase takes over mornings at WKQX from the departed Bobby Skafish. That makes four deejays over the past 12 months. This might be a record for deejay mortality. Brooke Hunter, former producer of Mark Goodman's morning showgram, gets Chase's former evening slot.

The rumors at WJJD, (denied by current morning guy Clark Weber) is that Ed Vrdolyak (former alderman and talk show host at WLS) and Ty Wansley, (currently hosting the afternoon gabfest on LS-AM) would be reunited at WJJD mornings. Ed and Ty were a very successful team at WLS until Capital Cities (owner of WLS) decided to split the AM/FM signal. This caused Vrdolyak to leave the station based on wording in his contract. Where there is smoke, there is usually fire.....

3861. Indianapolis Radio Watcher -- The Thick Plottens

Two suburban Indianapolis stations have changed to oldies formats, trying to capitalize on the audience that used to listen to oldies 93.1 WKLR before it switched to all-70s under the heritage WNAP calls.

101.9 FM WQFE/Brownsburg is now "Oldies 102". WQFE General Manager Steve Ross said in last Saturday's Indianapolis Star that WQFE is expanding the oldies playlist "beyond the 500 songs WKLR played over and over".

106.7 FM WGGR/Greenwood moved from "Rebel Country" to the oldies format, and the Indianapolis Star reported that the station would use the WKLR calls. The Star also reported that an attorney for the owners of the former WKLR said the company was considering legal action against WGGR, out of fear that diary-toting WNAP listeners may write WKLR out of habit. Apparently, the threat worked: this morning, WGGR is running promos announcing they will stay with their WGGR calls, claiming that using the WKLR calls was "causing too much confusion". The promo went on to say that although they "may not be able to use the four-letter name we wanted," they would continue to broadcast oldies in the WKLR tradition.

The Star reported that Charlie Morgan, operations manager of top-rated Indianapolis country station 95.5 FM WFMS and hit-country 104.5 FM WGLR, said that WGGR had failed to affect either stations' ratings. WGGR covers a majority of the Indianapolis metro area, so this move to oldies may well be a boon for them. WQFE doesn't cover most of the lower half of Indy; their format change may not have as much effect.

Mornings at WQFE are handled by Steve Ross. WGGR's lineup includes morning man Jay Reynolds, a top-rated morning man at local legend top-40 WIFE-AM in the 1960s; Bill Thomas from 10 to 3, and Chris Conner from 3 to 7.

Some interesting things in the market during the past week.
Unfortunately, I was unable to post anything about it until today...
you'll understand why.

On Friday (9/16) at 6:00am, background light AC station WWWB-FM [100.3 -
B100FM] began simulcasting its sister station, AC WMAG-FM [99.5 -
Magic]. Everything was carried except for a 45 second promo each hour
which ran on B100 alone. It stated that if you wanted to continue to
hear light AC, set your radio now to Magic 99.5FM. This continued all
day Friday, Saturday and Sunday.

On Sunday evening at 11:56p, the simulcast ended with the very last song
to be heard on B100. It was, of course, "Mandy" by Barry Manilow.
Then, a burst of static, an interesting liner, and a new radio station
was born. "Crystal clear and static free, 100.3... the Fox. The
greatest rock 'n' roll of all time." First song: "Changes" by David
Bowie<?> .. then "After midnight..." and of course "Listen to the music"
by the Doobie Bros.

The FOX now takes on the only other rock station in the market, WKRR-FM
[92.3 - Rock 92]. Rock 92 has been a steady in the top 5 of the market
over the past 3-4 years .. possibly longer.

In other triad news .. WFDD-FM [Public Radio, Wake Forest University]
today went on their new stick. (They lost their old one in a tornado in
'89). I can't recall at exactly what height they are located, but
signal quality has increased dramatically.

More as the news rolls in....

3863. Pittsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-09-21 06:00:45 UTC
From: AMCCOY@delphi.com
Message-ID: <35oi6d$k0t@vixen.cso.uiuc.edu>
Source record: 37828

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

A number of local radio stations will observe a 15-second moment of silence tonight in memory of the 132 lives lost on flight 427 last week.
WTAE/WVTY program Bruce Gilbert organized the collective airwave tribute,
which will begin tonight at 7:05 p.m - one week after the tragic incident.
At press time, several stations had committed to the 15 seconds of silence: WVTY-FM, WTAE-AM, WDVE-FM, WBZZ-FM, WSHH-FM, WLTJ-FM, WRRK-FM, WQKB-FM, WDSY-FM, WXRB-FM and WEEP-AM. Other stations are expected to take part.

WQKB-FM (K-Bear) fired the latest volley in the country radio wars over Labor Day weekend. Following months of rumors and speculation that the station was going to switch format, it didn't. Every major summer holiday since Memorial Day weekend has been accompanied by murmurings that K-Bear was switching from everything to '70s hits to alternative.
They didn't change the channel, but they did turn up the volume, with a shift to ``Rockin' Country.'' The music is generally uptempo, with a harder brighter sound.

Former WTAE-AM morning show host David Lawrence has gone national with a syndicated radio show devoted to personal computers.
Lawrence came to Pittsburgh in 1988 and moved on to Washington, D.C. He worked at stations in Cleveland, Columbus and New Haven, .is a computer consultant and was a founding member and executive producer of the American Comedy Network
``OnLine Tonight with David Lawrence'' airs live on Sundays from 8-10 p.m. and features Lawrence and a team of specialists in different areas who answer questions and discuss issues relating to personal computers. Its creators describe it as ``fast, funny, and it's 100 percent geek-free.''
The show is syndicated in around a dozen U.S. cities - but not here. However, you can tune in by phone by calling 1-800-846-4OLT (800-846-4658) and following the prompts. The charge is 30 cents per minute. To call the show with computer questions, the number is 1-800-39-ONLINE (1-800-396-6546)

Lucky for Dr. Michael Lynn that the Steelers beat the Cleveland Browns on Sunday. The WAMO-FM morning host had more riding on the game than most people.
Lynn challenged a rival Cleveland station and jock - WZAK-FM's Lynn

Toliver - to a bet. If the Browns won, Lynn vowed to take a drink from Lake Erie. If the Steelers won, Toliver would have to down some Allegheny River water, which he allegedly did earlier this week.

Long-time NPR host and correspondent Susan Stamberg will be inducted into the Broadcasting and Cable Hall of Fame in November, along with 16 other media professionals.
Stamberg, who now covers cultural issues as a special correspondent for NPR's news magazines, also cohosted ``All Things Considered'' for 14 years, and moved on to ``Weekend Edition'' when it premiered in 1987.

Psychic Jim Attina will host a new talk show on WWCS-AM starting Sept. 28. ``The Jim Attina Show'' will feature guests, listener call-ins and topics relating to the paranormal. It will air Wednesdays from 7 to 9 p.m.
Attina hosted a similar program on WEDO-AM and has been a featured psychic on other local radio talk shows.

Around the Dial:

Rolling Stones fever is hitting the rock and classic rock formats in the days preceding the band's upcoming appearance here. WDVE-FM will broadcast live from Three Rivers Stadium on Sept. 29 and will have an all-Stones day featuring music and interviews starting at noon that day.
WRRK-FM will do a 21-hour Stones marathon, with interviews and music running Sept. 26-28 (Monday through Wednesday before the concert) from 7 p.m. to 2 a.m.

WSHH-FM will broadcast live from the Make-A-Wish Foundation Balloon Launch at Hartwood Acres from noon to 6 p.m. Saturday and Sunday.

Correction: An item in the last column on the sale of WWKS-FM/WBVP-AM in Beaver Falls listed incorrect call letters for the AM station.

3864. Audio News Feeds for College Stations

Howdy from Harrisonburg, VA!
I'm the news director at WXJM, our campus station. Our regular newscasts would sound a lot better if we had sound to use with stories we read from AP. Are there any other college newspeople out there or seasoned pro's who could tell me where to go about in my search for sound? I was thinking something along the lines of AP or ABC network feeds, but on our station's budget, I'm surprised we have an AP computer!

We are great at using sound from campus events, so I think our newscasters are ready for the next step in incorporating more of it.

Many thanks,
Scott Gilbert
James MADison University

3865. Re : Boston Radio Ratings

>Dan <dschaffe@lynx.dac.neu.edu> writes :

>The thing I noticed most about the recently published Boston radio
>ratings were:
>--WJMN beating out WXKS! And I thought that AcuRatings favored baby
>boomer stations (I may be wrong about that)

Actually, AccuRatings reflect a younger music-oriented listeners.
Churban WJMN also tied CHR WXKS for the number one position in the
18-34 demo. 'JMN's summer success is not really surprising. Even as the
old CHR WZOU they used to kick 'XKS in the behind during summer months.

If you look at the all-important 25-54 demo, WXKS is still numero
uno with 7.2(down from 8.3 in the spring) followed by WBCN 6.9(7.2),
WBMX 6.5(5.3), WBZ 6.5(5.3), WBUR 6.3(5.9), WODS 6.0(5.7), WZLX-FM 5.1(4.9),
WBOS 4.9(4.6), WMJX 4.9(4.6) and WJMN 4.7(4.1). WJMN ranks only 10th
in the 25-54.

IMHO, if CHR WXKS and AC WMJX will continue to ignore the rising success
of Hot AC WBMX-98.5FM, then both of these stations could face some
troubles down the road. Actually, WMJX has been in trouble for the past
year while WBMX-FM has been eating away at them quite nicely. 'MJX
was the top AC station in the country a couple of years ago. Now, it gets
beat by a secondary-market rock station(WAAF). It's mostly their own
fault for sticking to a safe, boring AC format while 'BMX spiced up
its playlist quite a bit and even added some old favorite uptempo disco
classics.[not that I like disco but at least 'BMX is not afraid to
break some established AC rules].

Also, I think Pyramid is facing an interesting dilemma on its hands.
It got two top music stations in the market(CHR WXKS-107.9 and CHUrban WJMN
94.5FM). 'XKS has been their cashcow for 14 years now. Can
they afford to let 'JMN overshadow its personality-driven KISS 108
powerhouse? Will Pyramid allow Disco Matty, Uncle Dale, JJ Wright become
less popular than new and not-so-new 'JMN personalities(ex-KISS 108
jocks Diana 'Lady Di' Steele and JoJo Kincaid, NYC-import Ralphie
Marino. and a brand new morning voice to be named shortly)?

This should get interesting...

>--As an NPR lover I was glad to see WBUR edge out WRKO. Wonder how RKO's
>switch and WBUR's adding a local talk show will change things.

WRKO will be kicked and kicked again until they actually do something
about their programming. Just look at what WBZ-AM has been doing to
them in the morning for the last 2-3 years? I was hoping that
late August shuffle was going to produce a good listening option

during AM-drive. It didn't happen. We're still stuck with junk.

Yes, I have a feeling Charles Adler will turn up on WBUR's airwaves sooner than later. Currently, Adler can be seen and heard live on BU's UHF station(WABU-TV68) weeknights at 11pm. Ironically, he subbed for Jerry Williams on WRKO a couple weeks ago...

Regards,

-Mark

3866. Radio Internet To Broadcast Around The Clock

Newsgroup: rec.radio.broadcasting
Date: 1994-09-21 06:00:55 UTC
From: clampett!nrn@uunet.uu.net
Message-ID: <35oi6n$k19@vixen.cso.uiuc.edu>
Source record: 37818

The New York Times today (Sep. 19) had an article about Internet Multicasting Company's plans to broadcast over the net 24 hours a day via "cyberstation" RTFM (Radio Technology For Mankind) starting January. Broadcasts will include gavel-to-gavel coverage of the House and Senate, clips of Kennedy Center performances, National Press Club speeches, and readings of literary works.

IMC, best known for its "Geek of the Week" interview show, will also produce a 3 CD-ROM set featuring congressional highlights and background material.

I find this to be an extremely interesting development. While Al Gore pushes the "500 TV channels" model, increased bandwidth on the net could allow thousands of channels of audio - making it possible for one to listen to a favorite local radio show on the other side of the globe!

I'm also very keen on CD-ROM as a medium for delivery of lo-fi audio. Over 20 hours of lo-fi mono can fit on a standard ROM. This would be perfect for old-time radio multimedia titles or audio books.

3867. Low end AM in Ontario

Newsgroup: rec.radio.broadcasting
Date: 1994-09-21 06:00:56 UTC
From: talk1370@aol.com
Message-ID: <35oi6o$k1b@vixen.cso.uiuc.edu>

In article <35lbd6$k1@vixen.cso.uiuc.edu>,
Troutman_Stuart/HP-Chelmsford_om1@om1.ch.apollo.hp.com writes:

(on bottom-of-band Canadians)

That station people have been hearing on 540 lately si-
mulcasting a new Ottawa FM is in fact CJSB, or what's left
of it. It will soon go dark, as Standard Broadcasting shuts down
the AM for good and operates exclusively on FM in Ottawa.
The AM band in general will only have a few stations in the
Ottawa region, all commercial, some English, some French,
as CBC has moved all its services off the AM side. It's a
technical thing...they're selectively moving stations off AM
to FM in areas where the FM band is underpopulated and
the AMs can't spread their patterns out enough to cover the
whole region at night. Meanwhile there are other areas (like
Toronto) where the CRTC is pushing stations the other way,
on to the AM band, by refusing to license all the FMs that
the technical standards would permit. (Toronto's geography
is such that nearly all the AMs can locate their transmitters
and configure their patterns and power to cover substantially
the whole core metro.)
One low band AM in the Toronto area is about to disap-
pear. CIAO/530 will soon leave that frequency. They will
move to 1430, and increase power to 50,000 watts full time,
when the current occupant of that channel, CJCL/Fan 1430,
moves down to 590 (where its 50,000 watts and a revised pat-
tern will carry it a lot further). This will happen some time in
the spring or summer of 1995. No new transmitters are
being built. CJCL will inherit the transmitter of CKYC/Country
59, which is selling its license and facility after losing out
in the country format competition to CISS-FM. CIAO will
buy and operate the transmitter that CJCL leaves behind
in the move down the band. The 530 transmitter (which only
put out 1000 watts into an inefficient antenna) will go silent.
This will be the second frequency shift for CIAO in this
decade...it started out on 790 with a pattern so tight it didn't
hit its target area in the heart of Toronto well with its ethnic
programming format. 530 was a little better but not much.
1430 gives them a competitive signal with transmitter site on
Toronto Island, very close to the heart of town...and will help
them in their format battle with ethnic programming pioneer
CHIN/1540. One unintended effect is that it leaves the top end
of the AM dial in Toronto as basically a foreign language
ghetto, with Buffalo's news/talk WWKB/1520 as the only

English language signal easily audible in Metro at that end
of the band. Conversely, it shoves the English language pro-
gramming down to the bottom half of the band, which is ac-
tually the most desirable territory for AM radio. (The only other
non-English language station audible further down the AM band
is CBC's French language powerhouse, CJBC/860.) All the
Toronto AMs with English language programming will be
concentrated between 590 (The Fan) and 1050 (CHUM-AM).
One thing that hasn't been discussed in all the shuf-
fling in Ontario is what happens to the frequencies left be-
hind. If past history is any guide, they will remain dark, at
least in Canada. There are no plans for new stations on 530
and 540, and there were none licensed when 790 was vacated
in Toronto or 1440 was vacated a few years back in Ottawa.
No stations on either side of the border have pre-empted the
empty turf yet, and I'm not even aware of other existing co-
channel stations taking advantage by spreading their patterns
or increasing operating hours. But nature abhors a vacuum,
and it'll be interesting to see who tries to muscle in on 530
and 540 now that CJSB and CIAO are on their way out.
Don't be surprised if a new station on those channels speaks
with an American accent....
Bob Smith, middays WXXI/1370 Rochester NY

The best thing for you to do is to try to get an internship at a radio station while you're in college, around your junior or senior year. I am a senior at Salisbury State University in Maryland, and just completed a summer internship at MIX 107.3(WRQX) and I learned a lot about how radio works. One of the biggest things I learned as far as getting a career in radio is that it's all about who you know, and being in the "right place at the right time." Sounds cliche, but it's all I heard when I was at MIX, about breaking into radio. Having an internship can help you make connections, and you can use those to help you break in. With most jobs in radio, you have to start at the bottom, from what I've heard. Your friend should try to contact local radio stations or make a demo tape. Or even go for a college degree in Communications. A degree is not essential for radio, but it helps. I hope to get into radio when I graduate, but I don't expect to get a cushy job soon, even if I get to be a board op. once a week, it'll be a start. Good luck to you!

-Andy Schachter

Hi,

Well, I finally managed to get an antique radio set. Now I need to find some documentation to help me get it into proper working condition.

The radio is a Zenith 5-S-250, a 5-tube superhet with BCB (AM) and SW. It appears to be an AC-only set. The "Collector's Guide to Antique Radios" lists it as a 1937 model.

Does anyone know if Zenith still has any info available on older sets? I'm looking for schematics, alignment procedures, etc. I have some general information on radios of this vintage, but it would help alot to have some specifics on this particular model.

I know this isn't quite the right forum for this, but I didn't see a newsgroup that appeared to be appropriate, and I figured perhaps there would be some folks here who have experience with older sets.

Perhaps someone here can give me a pointer in the right direction, I'd be most appreciative.

Thanks.
Steve

Source record: 37826

RWANDA: RSF HERALDS OPENING OF HUMANITARIAN RADIO GATASHYA

Reporters sans frontieres (RSF) has set up a new radio station in Rwanda as a service to refugees, reports the September 1994 issue of RSF's "La Lettre". The station, Radio Gatashya, was instituted as a direct response to the violent propaganda emitted by Radio des Milles Collines which provoked the killing spree that has evolved into genocide. Radio Gatashya went on air on 5 August 1994 in Goma, after overcoming a number of political and technical problems, such as a lack of electricity or access to the airwaves.

Billed as "humanitarian radio," Radio Gatashya has a range that extends throughout the refugee camps in Goma and Bukavu where it is badly needed. It acts as an emergency service, for example, by telling refugees not to drink the water. RSF's Chantal de Casabianca writes, "All that remains is to gain the confidence of the refugees. On a continent like Africa where radio is usually laden with propaganda, that is not an easy task."

Radio Gatashya is sanctioned by the United Nations High Commission for Refugees (HCR), which has given over the basement of its offices for the use of the station. The HCR has received requests from other humanitarian organizations to encourage the instalment of similar radio stations elsewhere because radio is the most efficacious medium by which to transmit information in the area.

I have been working for the largest combo in the Seattle market (KVI, KPLZ & most recently KOMO) for three years and I am about to graduate from the U. of Washington. I have a passion for radio, especially programming, but I am not sure if radio is a wise career choice. Are there enough opportunities out there for young, motivated programmers? Can I make a decent living? And will radio still exist in 20-30 years? These are just some of the questions I am pondering before making the plunge into radio as a career. Please feel free to respond in this thread to help other students who are thinking about this career option or email me, personally. Thank you.

Also, if anyone would like to discuss the Seattle radio market I would be more than happy to chat away.

Thanks again.

3877. Re: Ever ask for AM stereo receivers at HI-FI shops? "Duh, whatzat?"

Newsgroup: rec.radio.broadcasting
Date: 1994-09-21 06:01:24 UTC
From: bobw@panix.com
Message-ID: <35oi7k$k2h@vixen.cso.uiuc.edu>
Source record: 37816

Does anyone have any idea why I never get an AM Stereo signal from WQEW, 1560 AM in New York?

I have got a Denon TU-680NAB, and live in Brooklyn Heights (Downtown Brooklyn).

I can receive all the other AM Stereo NYC stations just fine in Stereo (WFAN 660, WPAT 930, WINS 1010, WEVD 1050), and get a perfectly strong and clear Mono signal from WQEW (all the lights on the signal-strength meter are always lit), but I never get a Stereo signal.

On the other stations, it takes 2 or 3 seconds after tuning to the station, and then the Stereo indicator lights up and stays lit. With WQEW, consistentely, after 2 or 3 seconds, the Stereo indicator flashes on very briefly and then remains off.

Does anyone have any clue as to what might be happening and what the solution might be?

Thank you.

Bob Weinstein

3878. alt.fan.greaseman FAQ

Newsgroup: rec.radio.broadcasting
Date: 1994-09-23 19:35:25 UTC
From: jcastro@mason1.gmu.edu
Message-ID: <greaseman-faq_780348302@rtfm.mit.edu>
Source record: 37833
Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,rec.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-
Try to stump the Grease, but if you don't, you best
drop them pants....
Sgt. Fury- the Grease relives his time in Viet
Deliverance 101-
a class in which the Grease analyzes the movie
Deliverance.
Clinton- a look at how life would be if the Grease and
Clint Eastwood got a knock on the head and decided
to live alternative lifestyles
Law Man- the Grease tells about life as a law man
Big Dick Brannigan-
the Grease tells about his flashback to his past
life as a private dick
Emperor Tocasfacius-
the Grease tells about his flashback to his past
life as a ruler of the Holy Roman Empire

Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen to some of his bits.

3879. Boston Radio Watch 9-23-94

* Addition to on-air line-up at Granum's AAA WBOS-92.9FM :

A familiar voice joins this soft adult rocker effective immediately.
'BOS PD Jim Herron announced that Dick Pleasants, most recently with
non-commercial WGBH-89.7FM, takes over night-time slot vacated by
Mailee Kelly who departed for a brand new AAA station in LA in July.
Pleasants will keep hosting 'Folk Heritage' on 'GBH heard on
Satudays,12-5pm.

WBOS weekday line-up looks like this :

6-10am Bill Smith
10-3pm Liz Solarz
3pm-7pm David O'Leary
7pm-12a Dick Pleasants
12a-6pm Doug Bruce

* NPR's affiliate WBUR-90.9FM is beefing up its news/talk programming
and getting rid of remaining music shows. Starting on Saturday,
October 8 James Isaacs' popular Saturday aftenoon(12:30-5pm)
'Contemporary Music' show will be replaced by a new NPR program,
BBC news, and a personal finance talkshow. The only music heard
on 'BUR will be jazz show weeknights from 1am-4am.

* Seatle-based 24-hour KidsStar Network will get into Boston in April 1995.
KidsStar has apparently secured a deal with a Boston AM station
but hasn't revealed the signal yet. From a limitted list of
available major AM signals only a couple make a logical choice :
Noble's struggling 50kw WSSH-AM 1510 and Greater Media's 5kw WMEX-AM
1150.

The WNAP/WKLR - WGGR/WKLR saga continues.

In our last episode, we learned that oldies WLKR/Indianapolis changed format and became all-70's WNAP. Then, country WGGR/Greenwood (an Indy suburb) snapped up the oldies format, and began using the WKLR calls and old "Good Time Oldies" slogan. Finally, under apparent pressure from Emmis Broadcasting, WNAP's owner, WGGR quit using WKLR and "Good Time Oldies".

This suspected pressure was confirmed in yesterday's Indianapolis Star. Emmis FM Radio Corporation of Indianapolis filed suit in U.S. District Court Tuesday afternoon against Greater Greenwood Broadcasting. The suit alleges that G.G.B. violated trademark laws by using the WKLR call letters and "good time oldies" slogan. The suit seeks damages, even though WGGR used the slogan and calls from 5 p.m. Friday through 5 p.m. Monday. An Emmis spokesman says that Emmis still owns the trademarked call letters and slogan, and that WGGR used them illegally.

A spokesman for IBL, LLC, a partner in Greater Greenwood Broadcasting, said that having the WKLR name, even for a weekend, was beneficial to the station, and that if the company had it to do all over again, they would change nothing.

>
Okay, could someone help me? I'm trying to differentiate between modern CHR vs AAA vs Adult progressive. I think I'm safe in claiming that WXRT is Adult progressive. What is the difference between AAA and modern CHR? Q101 doesn't go very deep into albums (certainly not for my taste) but what defines AAA or modern CHR? Q101 has more of an FM delivery, vs. WXLC (hot 102.3, Waukegan, Il.) which has a top-40 delivery and mixes Michael Bolton and Mariah Carey with Nirvana, Hole, etc. Any opinions out there?

Also, Lite FM (the softest thing in Chi-fm except for WNUA's lite jazz) has taken to playing "Sultans of Swing" by Dire Straits, "In the Air Tonight" by Phil Collins... does anyone still play Barry Manilow records? The Carpenters? You'd be hard pressed to find that sort of thing in Chicago, except maybe on the 70's station (Y107.9) or the nostalgia station (WJJD).

One more thing...I hope Ed & Ty don't end up on WJJD. I like Clark Weber. Hope the old style of truly fair, unbiased talk doesn't die completely...Clark is the last vestige of such talk in this city...

>the service.

There is only one All News Radio feed from AP, and it IS market-exclusive...and stations pay nicely for that. The news feeds...the voicers, actualities and separate newscasts are a separately priced service that is billed separately and is not market-exclusive. The All News Radio feed is the "produced feed" you're talking about here...anything else you're hearing is coming from the regular AP Network News service which is not market-exclusive.

I've yet to hear it implemented...although I've been on it with live reports a couple of times. We had one station in Cedar Falls, KCFI-AM, which was going to use it, but I understand they're in such dire straits financially that they dropped that idea and are using bartered satellite talk programming now.

What I have heard in demos and the time I waited "on hold" for my reports, it sounds very good...and their best anchors are all on All News now. I wonder if anyone can comment on whether AP's entry has forced Unistar to make any pricing or delivery changes in their product to ward off the competition?

>DO NOT SKIP COLLEGE. IF THERE IS ANY WAY YOU CAN GO...DO IT.

I ditto the above statement. I have been in the "tv/radio business" for over 25 years, off and on, with only an Associate Degree (2 year degree) in Telecasting. This degree did prepare me well for the entry-level jobs such as cameraman, floor manager, DJ and news announcer. However, even this type of degree does not prepare a person well for a management position. Most stations DEMAND a minimum of a BS degree for Sales, Managerial and some News on-air positions. Don't skip college. There are many good Communications - Broadcast or Film/Video programs out there at many state universities.

I saw this light late. I am 49 years old and have now just completed a B.S. Communications/Broadcasting Degree and am now finding that many more employment opportunity doors have majically opened! I am even currently pursueing a Masters Degree to pry the doors open further. It is never too late for a good education, but if you can, get that degree early in life! Good Luck.

What........ like the Flintstones?

Eh?

>Q: Is one's right to freedom of expression unreasonably limited
> if one is only allowed to speak under cover of darkness?

Freedom of expression is domain of the CRTC! They decide what freedom
means twenty four hours a day! Additionally, the conservative
definition reins between the hours of six in the morning to nine in
the evening. The Liberal definition is then invoked after all the
impressionable little minds have been safely tucked away for the night.
Further, just as BIG BROTHER knows best..... so too does the CRTC and
the content review boards that are funded by the pluralism of an
ignorant society. Capitalists know the true value of propaganda and it
would not be in their best interests to educate that ignorant mass. It
would defeat the purpose and cause a sense of empowerment which cannot
be tolerated in such a dictatorship. (see Jaques Ellul's _Propaganda_)
Where would we be if people actually knew what their _RIGHTS_ were? We
can't have that now can we! No..... it's best to leave well enough
alone! We need to build egocentric and ethnocentric attitudes and then
we will be safe from knowledge and understanding. These are evil and
protections must be sanctioned or we may end up with anarchy and chaos.

God save the dollar!

Date: Thu, 25 Aug 1994 14:32:40 -0600
From: djw@eff.org (Daniel J. Weitzner)
Subject: New indecency rules proposed for all online services

(900#s in cyberspace)

I. Overview

During the final hours before the Senate telecommunications bill
(S.1822) was marked-up by the Senate Commerce Committee, a provision was added
which would expand the current FCC regulation on obscene and indecent
audiotext (900 number) services to virtually all electronic information
services, including commercial online service providers, the Internet, and BBS
operators. This proposal, introduced by Senator Exon, would require all
information service providers and all other electronic communication service
providers, to take steps to assure that minors do not have access to obscene
or indecent material through the services offered by the service provider.

Placing the onus, and criminal liability, on the carrier, as opposed to
the originator of the content, threatens to limit the free flow of all kinds
of information in the online world. If carriers are operating under the
threat of criminal liability for all of the content on their services, they
will be forced to pre-screen all messages and limit both the privacy and free
expression of the users of these services. Senator Exon's amendment raises
fundamental questions about the locus on liability for harm done from content
in new digital communications media. These questions must be discussed in a
way that assures the free flow of information and holds content originators
responsible for their actions.

II. Summary of Exon Amendment

The Exon amendment which is now part of S.1822, expands section of the
Communications Act to cover anyone who "makes, transmits, or otherwise makes
available" obscene or indecent communication. It makes no distinction between
those entities which transmit the communications from those which create,
process, or use the communication. This section of the Communications Act was
originally intended to criminalize harassment accomplished over interstate
telephone lines, and to require telephone companies that offer indecent 900
number services to prevent minors from having access to such services. The
900 number portions are known as the Helms Amendments, having been championed
by Senator Jesse Helms. These sections have been the subject of extension

constitutional litigation.

If enacted into law, these amendments would require that anyone who "makes, transmits, or otherwise makes available" indecent communication take prescribed steps to assure that minors are prevented from having access to these communications. In the case of 900 numbers, acceptable procedures include written verification of a subscriber's age, payment by credit card, or use of a scrambling device given to the subscriber after having verified his or her age. Failure to do so would result in up to a $100,000 fine or up to two years imprisonment.

III. Carrier Liability and Threats to the Free Flow of Information

These provisions raise serious First Amendment concerns. (Note that we use the term 'carrier' here to refer to a wide range of information and communication service providers. This does not suggest that these entities are, or should be, common carriers in the traditional sense of the term.)

Overbroad carrier liability forces carriers to stifle the free flow of information on their systems and to act as private censors

If carriers are responsible for the content of all information and communication on their systems, then they will be forced to attempt to screen all content before it is allowed to enter the system. In many cases, this would be simply impossible. But even where it is possible, such pre-screening can severely limit the diversity and free flow of information in the online world. To be sure, some system operators will want to offer services that pre-screen content. However, if all systems were forced to do so, the usefulness of digital media as communication and information dissemination systems would be drastically limited. Where possible, we must avoid legal structures which force those who merely carry messages to screen their content.

Carriers are often legally prohibited from screening messages

In fact, under the Electronic Communications Privacy Act of 1986, electronic communication service providers are generally prohibited from examining the contents of messages or information carrier from one subscriber to another.

Extension of the 900 number rules to all electronic information services may be unconstitutional

The regulation of indecent 900 number programming was only accomplished after nearly a decade of constitutional litigation, with rules being overturned by the Supreme Court. The regulations were finally found constitutional only after being substantially narrowed to meet First Amendment scrutiny. Since the access methods offered by online service providers are significantly different than simple telephone access to 900 services, we doubt that the same constitutional justifications would support the newly expanded rules. This issue requires considerable study and analysis.

Content creators, or those who represent the content as
their own,
should be responsible for liability arising out of the content

In sum, it should be content originators, not carriers, who are responsible for their content. Any other approach will stifle the free flow of information in the new digital media.

IV. Next Steps

Having only just received the language offered by Senator Exon, EFF still needs to do further analysis, and consult with others in the online community. We also hope to speak with Senator Exon's staff to understand their intent. Another important hearing will be held on S.1822 in mid-September by the Senate Judiciary Committee. By that time, we hope to have this issue resolved. While we agree that these carrier liability problems are in need of Congressional consideration, we do not believe that the time is ripe to act. Before any action is taken, hearings must be held and careful evaluation of all the issues, not just indecency, must be undertaken.

========== 33

Does anyone from NAB, RTNDA, IRTS, or other such organization monitor this list? I've been invited to a government workshop on Seamless Networking. The workshop's goal is to explore options for overcoming technical, legal, social, and other types of barriers in order to achieve seamless networking using the National Information Infrastructure (the "information superhighway"). I have also been asked to suggest names of other people who can speak about the broadcasting business as possible invitees (the workshop will be limited to 50 people). I would appreciate being put into e-mail contact with a couple of these organizations to solicit nominations for my list of suggestions. The names should probably be well grounded with years of experience at decision-making levels of the the business of radio and TV broadcasting (including noncommercial broadcasting), who can think innovatively, beyond their immediate business interests.

The workshop is the second week in November, so I need to pass along names quickly. Please send e-mail addresses of contacts to me.

>something along the lines of AP or ABC network feeds, but on our station's
>budget, I'm surprised we have an AP computer!

>We are great at using sound from campus events, so I think our newscasters
>are ready for the next step in incorporating more of it.

I don't have any details on the network audio feeds, but here are a
couple of other ideas... I don't know if you are already doing these...

But as a former News Director at KSCR, the student station at Univ. So.
California, our shcool's PR department put out an "Experts Directory"
every year, listing college professors and staff by their areas of
research/expertise. This works great, for instance, for the Haiti
story. Look up in the directory for experts on maybe Caribbean politics,
or on the military. Talk to them for a few minutes, and not only have
you got a sound bite on an international story, YOU'VE MADE IT LOCAL.

Of course, you can also always do an occasional POS
(person-on-the-street) story... it works well every now and then in a
newscast...

Hope this helps...

Hello everyone.

Has anyone heard about Eve Ackerman's progress in getting a station online in Alachua. I heard it was going to be Jazz/FM Talk. Can anyone confirm this? How many Watts is she looking to go? Last I heard the station was to go online in Dec. 1995. Any info out there?

Respectfully,

Christian.

Hello all on rec.radio broadcasting! We are developing a new offshore FM (possibly MW/SW) broadcasting venture in the Southern and Eastern Carribean market. We are now looking for some "human" resources to round out our team! Read on if you would like to join us in this adventure!

What You Can Offer Us....

Real world experience in radio broadcasting is required. International programming experience a plus! Carribean outlet exposure a plus+! We are currently searching for experienced professionals only. We invite those currently in school and/or intern programs to submit, but please understand that you will be kept on file until we fill primary positions.

What We Can Offer You....

A friendly yet challenging experience in broadcasting in an international market. And if you like warm, sunny places, the location is an extra bonus to the compensation and expatriate package we plan to offer the right people!

Staff We Are Currently Searching For....

- Station Management
- Program Director
- Spot Sales (experience in sales to hotels/restaurants a +)
- On-Air Talent
- Technical Staff (transmitter/antenna, studio)
- Administrative Staff

The Next Step....

Interested? We are looking for a resume with a cover letter describing your professional experience and interests, as well as how you will contribute to the success of a new station. In return, we will send you further details about the positions, the station and arrange to chat with you about the possibilities of joining our team! Your inquiry will be kept in the strictest confidence. ALL INQUIRIES WILL BE ACKNOWLEDGED BY E-MAIL. No agencies please!

Thanks for the bandwidth and hope to hear from you soon!

Michael Carraher (mcarraher@delphi.com) wrote:

: Did KQW [now KCBS] operate on a regular schedule? Can it claim to
: be the same station when it changes call letters and city of license? When
: did the original owners apply for (and were issued) a broadcast license?

April 1909 is the official date. The station broadcast (1) on a regular schedule, (2) specifically to a wide audience and eliciting responses continuously from at least 1912 until the government shut them down for World War I in 1917. This much is documented. What's in dispute is the period from 1909 to early 1912 which may or may not have been regular. Not only did Charles Herrold announce his schedule in advance, he had regular newspaper articles, a listener request show hosted by his wife (the first DJ), and had a trade-out arrangement with the Sherman Clay music store for records, etc.

As for tracing history after a move, well, it's true that "San Jose Calling" on 833 kHz in San Jose is a far cry from KCBS on 740 in San Francisco with transmitter in Novato. But how DO you trace history? KDKA doesn't use it's original transmitter. Is it still on the same site in East Pittsburgh? It's not on the same frequency anymore either.

For stations keeping consistency I think very few stations can make the claim of keeping callsign, frequency, site, antenna, and ownership intact. On the West Coast probably the station coming closest is KPPC in Pasadena, which still uses its original horizontal antenna and was until lately using its original broadcast hours and site.

UltimaJock (ultimajock@aol.com) wrote:

[letter to homophobic station manager in Kentucky]
: "I, sir, have been in broadcasting since I was 9 years old, which means
: it's been almost 25 years since my voice was first heard on a radio
: station. I also, sir, have had one long-term emotional and sexual
: relationship with another male...."

There are probably more gay/bi men in broadcasting than in any other industry except possibly the hotel industry. I came out radiowise in 1973 (apparently only the 2nd Bay Area radio personality to do so) and found some amazing things: (1) Some guys shunned me, whom I later saw at the gay discos, and (2) I met enough other gay broadcasters that we nearly started a Northern California gay broadcasters association. When I went to Eureka on vacation I met a gay DJ there after "dropping a hairpin", a euphemism for dropping a hint only another gay man would know. Same happened in Santa Barbara, Reno, and Albuquerque. In short, I discovered we were everywhere. So much for being special, eh?

I suggest that the station manager in Kentucky knows damned well how many gay broadcasters there are, but is more likely trying to court support in his local business community -- so he can go to the Elks lodge meeting and his fellows would pat him on the back and maybe buy some ads on his station.

: work as an entertainment critic for the Wisconsin Light, a
: bisexual/lesbian/gay/transgender newspaper in Milwaukee, I have not been
: hired by some stations whose management somehow feels my sexual
: orientation would have a negative effect on my performance on the job.

<shrug> Or they've never heard of the Wisconsin Light. In 23 years of being out (I started early), I can think of only one job I may have lost for being gay or bi. I was forced out of Channel 31 in Sacramento. No biggie -- the company went bankrupt soon thereafter. It was after that that I (1) started my first business to make sure that wouldn't happen again, and (2) was hired back by a station where I used to work when they discovered I was available again.

: The point to all this is that it is chowderheads like you, Mr. Kentucky
: General Mismanager, that has made radio the creative wasteland it is in
: comparison to 20 years ago....

Uh, this kind of attitude is going to get you another job? Nobody seeing your post is going to hire you, even if they agree with you, knowing your

ability to explode at a moment's notice. Broadcasting is one of the most stressful careers around; hotheads are not needed.

: Daevid Aachen, Mornings, WRJQ-AM 1570, Appleton WI

Why are you posting this into a Bay Area newsgroup, when rec.radio.broadcasting is the more appropriate group?

As a fellow broadcaster (engineering mostly, some on-air and LOTS of production) I have collected quite an assortment of jingles, ID's and airchecks dating from the '70's on up. Most are New York area along with demo's, networks feeds and other "goodies" that were passed along the way.

I would be interesting in networking with others who collect and are interested in this part of the business.

Thanks

In article <35r5t3$kfo@vixen.cso.uiuc.edu>, armageddon@maple.circa.ufl.edu writes:

"Safe Harbor" is a time zone where the FCC won't pull you over for broadcast INDECENCY -- as distinguished from broadcast OBSCENITY, which ain't allowed, period. (Yes, there are news exemptions, etc., but that's another paragraph.) The federal courts and the FCC (egged on by some we-know-what's-good-for-you types in Congress) have been battling over the so-called "safe harbor." Issue's still up in the air. The supposition is that children are unlikely to be listening during "safe harbor", and thus it's a place where adults could be free to hear things that kids aren't supposed to know about. Latest federal appeals court ruling affirms that adults DO have a right to hear such things, some of the time, even if there's a slight risk that a toddler's ear might be near the radio. It's an issue worth following!

To All-

Did anyone experience a skip or some type of weird reception on 9/22/94 from around 9pm on? Here's what happened in Southern PA were I am...

Around 9PM, the picture on several of the stations on the cable began to get very fuzzy with vertical lines and other noise. At the same time, the radio which is also hooked up to the cable started to receive some far off stations. At the same time, all of the local stations which always come in clear with the cable faded away completely or had very poor reception. The interference in all of the cases came from same channel or co-channel stations. For instance,
-Arrow 94.7 from Washington, DC blown away by Q-94 on 94.5. Had ads for the Richmond, VA area.
-Arrow 94.7 from Washington, DC also had same channel interefernce from WDSD in Dover, DE.
-Star 92.1 from Mercersburg, PA blown away by 92Q on 92.3. It is from Baltimore.
-Received B-101.5 WBQB Fredericksburg, VA.
-The River 97.3 in Harrisburg, PA was blown away by not WKMZ from Martinsburg, WV on 97.5 but another 97.5 which was playing rock music. I couldn't get an ID on this one.

When I took the cable off my radio, the same stuff was occuring although the signals were not as strong.

When I called the cable company to ask what was going on, they said there was some sort of atmospheric condition that was causing all this.

Did anyone else experience anything similar to this on 9/22/94? What stations did you get? What would explain these very strange receptions?

Mike.

: which are currently in use today. A brief description of the system with
: the address of the company would be greatly appreciated.

We have been using a Audisk system for abour 4 years. The system has performed real well. Ther unis consist of two computers. The main unit is rack mounted, it holds the "Large" hard drive 760meg that holds the audio. It's keyboard and monitor are extended into the production prrom to dub spots into the system. The second coomputer is in the control room connected to the 1st by a serial cable. The contol room computer schedules that spots. Press start on the console that closure trips the spot playback. Stop sets are clean with no gaps between spots in fact the spots overlap on a controled basis.

The units are built by DHK in California. They market them through Harris Allied.

3902. Indianapolis RadioWatcher - More WNAP

Newsgroup: rec.radio.broadcasting
Date: 1994-09-24 08:30:33 UTC
From: JIMGREY@delphi.com
Message-ID: <360o39$mku@vixen.cso.uiuc.edu>
Source record: 37757

The Indianapolis Star today published a Letter to the Editor from an Indianapolis resident critical of the revived WNAP's format. I have condensed the letter below. I submit it here, because it does an excellent job of explaining the significance of these call letters to many central Indiana residents, and is a voice I suspect many of a certain generation would echo.

"In the late 1970's and early '80s, WNAP-FM was a home of sorts. For those of us coming of age then, the station had a place in our hearts. Just listening to it was a small act of defiance against the forces of conformity and the powers-that-were. "The Buzzard," after all, was not our parents' radio station.

"Scanning the dial after all this time and stumbling across a typically cocky WNAP promo was a rush... Finally, I thought, somebody realized that the Buzzard's former listeners had more purchasing power...now, and that there's an increasing collective awareness that Top 40, rap, and Generation X stations all have the same bleak, soulless, overriding commercialism that produces Stepford DJs and aimless channel surfing.

"...The promising return of WNAP now turns out to be a sham. ... In a clever marketing ploy, an old name is being used with a narrower range of oldies than WKLR played. Well, station big shots, consultants, and accountants, let me explain it to you: My friends and I don't have a bond with Cat Stevens, Foghat, and Grand Funk Railroad. We might have those albums in an attic somewhere, but they don't get played. We care about the old WNAP because of that station's "turn the radio up, go to the raft race, in your face" attitude. ... The insurgent, outrageous, rebel air staff who knew the establishment despised them, and liked it.

"In the '70s ... we were smirking with Chris Connor and the Breakfast Club, jamming with Adam Smasher, and finding a place to party after school with Buster Bodine blowing out the car speakers. ...Knowing that some corporate suit is trying to manipulate my past in order to get me to pay attention to a fraudulent, imitation, plastic Buzzard motivates me to do the one thing I know would be in the true spirit of the original WNAP. Keep scanning the dial.

3903. Kansas City Radio Watchers (9/23/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-09-24 08:30:34 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <360o3a$mkv@vixen.cso.uiuc.edu>
Source record: 37758

Defunct suburban station KCXL(AM) in Liberty is expected to
return to the air today (Sept. 23).
The 500-watt daytimer at 1140 kHz left the air in May 1992 as
an urban contemporary station that couldn't compete with entrenched
urban powerhouses KPRS(FM) and KPRT(AM).
Indepedence school district computer technician Pete Schartel, a
radio enthusiast, purchased the station from the Small Business
Administration. The previous owners had turned the station's assets
over to the SBA.
Schartel will continue to keep his school district job as well
as running the station.
KCXL will be an oldies station, with programming provided by
the Jones Satellite Network.
Schartel told the Kansas City Star he is hoping to recover some
of the audience for 50s and 60s oldies that were played on WHB(AM)
before it was sold 13 months ago. WHB now relays the farm-oriented
programming of Carrollton's KMZU(FM).
However, as of 10 am, the station was not on the air.
I was able to receive KSOO from Sioux Falls, South Dakota,
a news/talk station with some farm-oriented programming, after
I unplugged a compact disk player that was generating a whining tone
at that frequency.
Stay tuned to my .plan file (finger transvox@tyrell.net) for
bulletins at once.
*****
Bonneville International took over Kansas City talk station
KCMO(AM) nearly a year ago, but the firings continue.
Perhaps Bonneville wants to drum up business for the Westwood,
Kansas post office near its studios by sending out a large number of
W-2 forms at tax time to former employees.
The latest talk show host let go is afternoon host Beth Albright.
Albright told the Kansas City Star she was terminated Friday (Sept. 16)
with no explanation.
Albright called KCMO "a very toxic environment to work in.
Everybody who was there was afraid they were going to be the next one
out the door."
KCMO manager Ron Carter told the Star, "to couch it as anything
other than a programming decision is incorrect." Carter replaced
Albright with a syndicated talk show featuring a Los Angeles
psychiatrist.
KCMO-AM/FM were purchased last fall from Gannett for a price
estimated at $7 million. Bonneville has owned KMBZ(AM) and KLTH(FM) in
Kansas City since 1967.
At the time of the purchase, KMBZ and KCMO were both news/talk

stations. Bonneville has increased the news emphasis on the weaker KMBZ signal (5,000 watts at 980 kHz) at the expense of newscasts on KCMO's 50,000-watt daytime signal (5,000 watts nighttime at 810 kHz). KCMO has also had substantial staff turnover since the Bonneville purchase.

Albright's husband, KSHB(TV) reporter Ted Ishler, had his contract extended by Channel 41 the day before Albright was fired.

*****

For unknown reasons, KMBZ has decided to activate the 67 kHz subcarrier of KLTH. Wednesday (Sept. 21), a relay of the KMBZ signal appeared on the KLTH subcarrier.

KLTH already uses its 92 kHz subcarrier to relay the Bonneville International LDS Network, a programming service consisting of Mormon gospel and relays from Salt Lake City's KSL(AM) and KSL-TV, also owned by Bonneville.

Bonneville is owned by the Church of Jesus Christ of Latter Day Saints, more commonly known as the Mormon church.

The 67 kHz subcarrier is plagued by crosstalk from KLTH's main channel, while the 92 kHz subcarrier is free of that problem. This suggests to me that the KMBZ relay is a temporary one utilizing spare equipment.

This isn't the first Kansas City AM station to be relayed by a co-owned FM station's subcarrier. WDAF was relayed on KYYS(FM) during Kansas City Royals (baseball) home stands, apparently for use as an air monitor during sports talk shows conducted at local bars. The KYYS(FM) subcarrier now appears to be in use for a data relay.

To clear up the apparent confusion: There are THREE stations in Seattle using the AP All-News service. Not the audio service or the hourlies. The all-news service. KING is running it full-time, KOMO overnight (duplicating KING), and KIRO weekend afternoons and weekend overnight (duplicating both KING and KOMO).

Therefore, it seems that the all-news service is NOT market-exclusive.

Definately include college if you can, especially if you just want to be a dj (you won't forever, believe me). Not only will a BS or BA help you when you're ready to move on/up, but also where you want to start.

WHy does college help a dj? To help you learn the board? No way, you can train a rather stupid computer to do that. Instead, go to college to learn how to learn, and learn about as much as possible. Notice that this is more like liberal arts than trade school. DJ's are hired because of their personalities and their ability to handle a wide range of interview subjects, either some author with his latest book in the studio or a caller who's about to be your next pidgeon. The DJ's that are hired to just run the machine and give the time and temp could just as well be flippin' burgers. And yesterday they probably were. And likely will be tomorrow.

Here is a more complete listing of radio stations in Columbia

CALLS FREQ FORMAT

WUSC 90.5 fm Alternative
WRLK 91.3 fm Public Radio
WKWQ 93.1 fm Adult Urban
WARQ 93.5 fm Album Rock
WHKZ 96.7 fm Country
WCOS 97.5 fm Country (also owns 96.7 fm)
WFMV 95.3 fm Gospel
WLXC 98.5 fm Sports
WSCQ 100.1 fm Big Band
WWDM 101.3 fm Urban Contemporary
WMFX 102.3 fm Classic Rock (also owns 104.3)
WOMG 103.1 fm Oldies
WNOK 104.7 fm CHR
WTCB 106.7 fm AC
WVOC 560 am News/talk

I have not included many AM stations because most are either simulcast
or weak gospel stations that are not worth my time logging. I hoped
I have helped you out.

Mike

I just got a deluge of articles sent to me from the Delphi newsreader, dating back well into August. Most of the posts are too old to post now, but I wanted to tell dephi users not to trust their news-posting software and to tell the powers that be that your articles are not getting through to this group.

I wrote a letter to news@delphi.com, notifying them of the trouble, and I ask all users who posted from dephi in the past two months (maybe longer) and have never received an 'autoreply' from me, and whose articles were not posted, to scream to your adminsistrators about this. You are paying for full Internet and that includes this group.

I want you all to know that every article I receive is auto-replied to, and if you dont get that auto-reply, I never got your submission. I received over 50 articles in this BURST from Delphi.

Bill

>myself. (They are also at 1610, depending upon the allocation of AM
>frequencies in the area, although the ones at 1610 may be forced to move
>-- perhaps to 1710 -- after the AM band expands.)

That's right -- 530 and 1610 are only used for those special-purpose stations. (Jefferson County, Kentucky, has one built into their Disaster and Emergency Services mobile unit to broadcast warning messages to residents near a disaster site.) As I understand it the 1610 stations will stay there because relatively few people would be able to hear them on 1710.

Chicago market.

3916. Maybe I *AM* the only listener in Portland of AM stereo?!

Newsgroup: rec.radio.broadcasting
Date: 1994-09-24 08:30:58 UTC
From: wa2ise@netcom.com
Message-ID: <360o42$mll@vixen.cso.uiuc.edu>
Source record: 37771

I sort of wonder, maybe I am the only listener with an AM stereo radio (a Sony ARF100 connected to my stereo amp) in this town. I'll have to write a letter to KBBT telling them that their AM stereo sounds fine. Called them some time ago, would you believe the phone receptionist didn't know about it. Well, on second thought, maybe not so unbelievable... I can maybe imagine the scene at the KBBT offices: "Hey, look! there really is an AM stereo listener in town!".

:-)

3917. Talkers Magazine?

Source record: 37773

In article <35oi7j$k2g@vixen.cso.uiuc.edu>, paco@u.washington.edu (Gregg Greene) writes:

(Will radio exist in 30 years?)

Gregg asks a very interesting question...and one that demands a response from everyone who visits this newsgroup...when he asks, "Will radio exist in 30 years?" He wants to know specifically because he is looking for a business and career with a future. The rest of us in this newsgroup who are already involved deeply in the radio trade have equally pressing reasons to consider this question.
As one who expects to spend the next 30 years of his working life in radio, on the air, I certainly hope radio has a future. But whether it will still be important in our lives, or even commercially viable, depends to a great degree on what we are putting on the air right now and in the next few years---and whether we are doing things with the medium that will attract new generations of listeners down the road. I have my doubts. Let me explain, format by format.
Start with talk, the format in which I work. It's starting to lose Arbitron share in all the major markets because what was once spontaneous is now predictable, knee-jerk conservatism almost everywhere on the dial. Programmers cloned Rush's ideology rather than imitating what really made him work, namely his style and humor. The results are predictable, and unless the format makes room for more personality and more different voices, it will be preaching to an ever-smaller choir.
Move to CHR, another format in trouble. It has become so mechanical, populated by easily replaceable jocks reading liners in between almost indistinguishable dance numbers, that there's just nothing compelling any more. Contrast it with the personality, spontaneity and promotional hi-jinks that marked the format 15 or 20 years ago and it seems like a timid, pallid imitation of itself.
Then there's AOR...still playing the same artists and songs it was playing in 1979. ZZZZZZ.....
Adult contemporary? Again, becoming as formulaic as CHR, without even a beat you can dance to, and its other crucial element---a strong news and information presence, especially in drive time---has fallen victim to budget cutting, and audiences, especially in drive times, are falling accordingly.
Beautiful Music? Making somewhat of a comeback with older demographics and dentists' offices, but its potential audience is either dead, inform or aesthetized.
Urban contemporary? Program directors scared of rap seem to have decided to turn it into almost a variation on the adult contemporary theme, and there's none of the excitement or energy that UC

stations generated (and attracted listeners of all colors with) justnform or aesthetized.
Urban contemporary? Program directors scared of rap seem to
have decided to turn it into almost a variation on the adult contempor-
ary theme, and there's none of the excitement or energy that UC
stations generated (and attracted listeners of all colors with) just a
decade ago.
So you see two things happening...one, is a decline in total lis-
tenership and time spent listening. Two, is a drift by some listeners
into what up to now have been fringe formats (classical, AAA, NAC)
and to the largely non-commercial stations that play them. Either
way those listeners are lost to you and to your potential advertisers.
And programmers did it to themselves.
What is the solution? Not tinkering with music mixes, or more
research on songs or issues. It's LESS formula programming, and
MORE personality, spontaneity, and willingness to be creative and
stand out from the crowd. It's the stations that BREAK the rules
that will be the winners...but we are now in an environment where no
one has the courage or creativity to break the rules. That's an en-
vironment that could make radio irrelevant to a growing number of
people, who will get their information and entertainment from inter-
active TV or from the Information Superhighway rather than the AM
and FM bands...unless we give them a compelling reason to stay
with us. Right now, in most large markets, we're not.
Bob Smith, midday host, news/talk WXXI/1370 Rochester, NY

3919. Radio is viable!

Newsgroup: rec.radio.broadcasting
Date: 1994-09-24 08:31:05 UTC
From: MAGOODELL@STTHOMAS.EDU
Message-ID: <360o49$mlp@vixen.cso.uiuc.edu>
Source record: 37774

My posting comes in response to Gregg Greene's request for info on the current job market in radio. It is always fun to see new talent who are still excited and ready to take the world by storm. Too often, experienced broadcasters downplay their own industry and have no memory of their own first years in the business.

Primarily, I wanted to respond to Gregg's question regarding the viability of radio. He asked, "Will radio still exist in 20-30 years?" Of course it will.

How many times throughout history did the critics and public think that radio was dying. It seems that every new technology brings up the topic. When TV first started, everyone was sure radio would die. More recently, cable TV and more accessible, better sounding commercial music products have brought more idiots out of the woodwork who thing radio's days are limited. I think they are wrong.

Lest we forget, radio is not a jukebox. It's not exactly like having a home stereo. There are important elements that cannot be reproduced elsewhere. Radio has it's own personality and the ability of programmers to augment that personality with music, news, features, and most importantly...announcers, ensures its future. You can't get personality from your home stereo.

The technology that is advancing into our lives today is incredible. To some, it spells clear death for radio. It is important, however, to look closer at listening habits and determine why people listen to the radio. Beyond the obvious Arbitron-ish answers (music, news, etc.) are the real foundations of whyradio can exist in this day and age and well into the future. Simply look at your daily life. When do you listen to the radio? For most of us, it is those times when it isn't practical to enjoy any other media.

I subscribe to the local paper and even have a mini 3" TV, but when I'm screaming down the highway, it's not likely I will turn to either to bide the time. There are many other times when radio is the only likely source of stimulation whether it be at work, in the car, while jogging, or whatever.

Finally, the big reason. This fact alone will keep the industry alive. Ask yourself: When I am lonely, does the TV comfort me? This sounds odd, I know. But really, does the TV cater to you in the way that radio does? Radio is a personal medium. Radio announcers talk directly to you and you can feel that personal relationship. Television has never pretended to be so personal, nor can it be. Television's long history of broadcasting a wide range of programming took away their opportunity to get more personal with the viewer. Even now, when channels like MTV and LIFETIME have a clear demographic, they don't take the advantage of personalizing their programming. Radio can and does. This tradition should keep radio viable and Gregg working as long as he can stand working long hours for little pay. (That last sentence should

answer his other question about pay!)

>Mutual Broadcasting with Jim Bohannon (air time 12midnight)

Thompson's feature also runs on AP's "All News Radio" service, which we carry on KOMO, AM-1000 1-5 a.m. Pacific. You should be able to receive us in Bay Area those hours. Don't know the specific time of the feature, but I'll find out. You might also check your local Associated Press bureau to find whether you've got a local affiliate.

I believe KIRO, AM-710 is or may soon run Bohannon overnights.

I may also have a phone number to monitor Brudnoy's program. It's long distance. Don't know whether any station other than WBZ runs his show.

good luck

Message-ID: <362hu7$k84@vixen.cso.uiuc.edu>
Source record: 37778

Happenings in the #40 market:

*You can always tell when a new ratings book starts-that's when the contests rev up.
WKSE(Kiss 98.5)and WMJQ(102.5;Q102)plan to duel with money.
-Kiss is putting its listeners on the "payroll";by calling their name out,they can win $20/hour until someone else calls up and gets their share.
-Q102 is restarting their Free Money promotion,with $102 on most days and $1,000 on Thursdays(at least,the last time).
Across the border,CHUM(104.5)is proceeding full speed ahead with the I Want It All promo,billed as the largest promotion ever in Toronto radio. (Hey,I thought CHOG(AM 640)'s last year of lost of $$$ was the biggest.)
If your name is read,that person has to call and say that he or she listens to chumfm,adding "and I want it all".

*Speaking of Toronto,Dan Williamson and Maureen Holloway are handling AM drive until its new AMers(said to be Rob Christie & Audie Lynds)jump from Edmonton's Power 92.

*Correction of note about CKEY(FM 101 The Planet)'s PM driver,Kerry Gray(or Grey). He's from the Detroit area. Just yesterday,they were traveling to offices around the area,handing out copies of the new R.E.M. CD,Monster.

*Back on the U.S.side:
-Don & Mike are back on WHTK(Hot Talk 1280)in Rochester,live from 3-7pm. They had been yanked last week for The Fabulous Sports Babe on a tape-delay basis,but station manager Jeff Howlett said that the station got over 500 letters opposing the move. A want ad was set to be taken out as well,among other things.

*David Letterman's Top 10 list has a new home in Buffalo(actually,2). WBEN(NewsTalk 930)and WMJQ now run it,taking over from WKSE-all 3 stations are Keymarket-owned. 'MJQ runs it at 5:40 & 7:40am,while 'BEN has it at 6:20 and 7:20.

*The rest is devoted to WGR(NewsRadio 55).
-Just when you thought the war between 'GR and the Am-Pol Eagle was over,it returns. This week's edition has an editorial noting that midday talker Rich Michaels "launched an unprovoked attack on the...Eagle and Polish-American Congress" and(in a separate piece) suspended Eddie Nagel (aka Eddie from the East Side,a frequent caller)from his show. Michaels didn't give Nagel any reason,but Eddie thinks it may have something to do with Michaels' recent 3-day suspension for making derogatory comments. "When I saw him at the station a few weeks ago when I was taping my latest commercial",Nagel said,"he said I was the one who was getting him in all the

trouble. I said,'No,you have been getting yourself in trouble,not me.'"(BTW, Chuck Finney,ex-PD,is said to be trying to quietly line up a job for Michaels before the ax falls.)
-Chuck Dickerson will be on WIVB(ch.4,CBS)to discuss Bills games and provide some commentary. GM Tony Kiernan was interested in giving Art Wander the same opportunity-some callers to his show didn't take it that well,but that's business.
-The station recently ran ads for Sellout Inc.,a company that wants to ensure that Bills games are sold out. Fans are asked to call a toll-free number and pledge $12.95 to buying tickets for this Monday's tilt with Denver was sold out.(BTW,it didn't happen. As of today,about 14,000 tickets remain.) The money would be pooled and all tickets would be given to charities and advertisers to give away,while retailers could sell them at half-price. Now,here's where the fun starts. Federal postal inspectors were asked to look into the company after an inquiry was received on Tuesday.James Richert Jr.says it's all above board,adding that he checked with the Bills and the NFL,but even the Bills aren't endorsing the venture. PR Director Denny Lynch says it's "a private venture that has nothing to do with the Bills." 1st Assistant U.S.Attorney Denise O'Donnell,who called it "a classic situation of 'buyer-beware'",wasn't planning on sending $12.95 to the company,despite being a Bills fan.
(No comments needed...you're invited to make your own.)

TTYL...

C.K.G.

Q:Can radio improve?
A:"You'd better check the temperature in hell first."

I can't help you on the reason why the strange reception occurred, but I
might be able to help you on the station ID. Possibly CHR 97.5 WPST from
Trenton, NJ?

I've also experienced a similiar type of reception interference at home in
Central New Jersey. I don't know the reason why, but most often the
interference would occur on Sunday nights.

97.5 WPST - Trenton, would be blocked out by 97.5 WALK from Long Island,NY.
I would also be able to receive other distant stations not ordinarily receivable
in my area such as 95.1 WAYV - Atlantic City, 104.1 WAEB - Allentown, Pa,
107.9 WEBE - Somewhere in Connecticut, and two other stations which I
believe were from Connecticut, but I didn't know the ID's, 104.7 and 101.3.

Anyone else have any ideas?

Hello!

I was quite interested to read of the long distance reception from Southern Penna. on the night of Sept. 22nd. It sounds as if tropospheric ducting is the culprit here (or "Tropo" or "trops" for short). This will often bring in strong signals in the 100-300 mile range. Stagnant weather patters especially high pressure is usually the culprit, setting up a temperature inversion, which "bends" the signals back to earth at the distant point. Best times for this are the morning and evening, when these inversions are most likely to occur. Foggy weather and high humidity are other things to look for, in addition to also when a large front is approaching. Those are some interesting receptions there! The other album rock station on 97.5......Two big choices come to mind-WWWV Charlottesville, Va., or else WKVE St. marys also plays that music. WPST Trenton may have been playing a hard edged tune, although I believe they are top 40/modern.

"e-skip" is a whole other animal. This happens most ofthen in the mid May to mid July period, with sometimes a minor peak in mid-December. Best times are around noon, and early evening, and it has nothing to do with local weather or the weather at the receiving end. (Keep in mind though, that even if those are the "peak" times, skip can happen really *anytime*). clouds of ionized particles in the ionosphere, halfway between you and the station you hear, bounce the station back to earth. The average distance here is a whopping 1,000 miles, with 800-1500 being a reasonable range. Signals are unsteady but VERY strong sometimes at their peaks. Here in Buffalo the most common skip states are Texas and Florida. This woudl also affect TV 2-6 but almost never gets up into ch7 and higher.

Hope I have answered any questions, feel free to write if you have any more. I am a member of World TV FM DX Association, which is a club for people interested in trops and skip FM & TV reception. Let me know if you are anyone is interested in more information on this. The club address is P.O. Box 514, Buffalo, NY 14205-0514 (I don't run the club, it just happens to be in the same town, which makes for quick delivery of the monthly bulletin "VHF UHF Digest" :)

: For stations keeping consistency I think very few stations can make the
: claim of keeping callsign, frequency, site, antenna, and ownership intact.
: On the West Coast probably the station coming closest is KPPC in Pasadena,
: which still uses its original horizontal antenna and was until lately
: using its original broadcast hours and site.

When I lived in Pasadena in the '70's, KPPC was on the air only on Wednesday nights and all day Sunday at 1240 KHz and ran a mighty 100 watts of religious programming. I understand that KGFJ (1230 KHz Los Angeles, 1 KW days/0.25 KW nights) had to reduce power, perhaps to as little as 100 watts, when KPPC was on the air, and that KGIL (1260 KHz San Fernando, 5 KW full-time) had to use their nighttime pattern all day each Sunday for the same reason.

If KPPC has expanded their schedule, how are the other local stations at 1230 and 1260 accommodating them now?

3929. ANNOUNCE: Mr. KFI Home Page

3930. alt.fan.mr-kfi FAQ

Newsgroup: rec.radio.broadcasting
Date: 1994-09-25 00:58:01 UTC
From: bnunes@netcom.com
Message-ID: <362hup$k8s@vixen.cso.uiuc.edu>
Source record: 37785

Just wanted to remind those of you in Southern California (or even the 14 Western United States) of the (relatively) new newsgroup alt.fan.mr-kfi.

It's dedicated to the "dopest, freshest homeboy on KFI." For a while the group had a bit of a problem propagating to a few sites, but I think the problem has been solved now.

I've included the FAQ (Frequently Asked Questions) for the newsgroup to give you a feel for the show...

The Mr. KFI FAQ (Frequently-Asked Questions) version 1.00

Compiled 9/11/94 by Robert Briggs (rbriggs@netcom.com) and by Brian Nunes (bnunes@netcom.com)

Q: Why?
A: Because.

Q: Who is Mr. KFI?
A: Mr. KFI is the dopest, freshest homeboy on KFI. He is interactive and multimedia. He is charismatic, and people do flock to him. He is not like other radio talk-show hosts.

Q: What is Mr. KFI's show called?
A: It is called "Ask Mr. KFI." However, very few of his callers seem to remember this accurately.

Q: What is Mr. KFI's real name?
A: His first name is M, his middle name is Ster, and his last name is KFI. He comes from a long line of KFI's.

Q: When is Mr. KFI on the radio?
A: Mr. KFI is heard every Saturday and Sunday from 6-9 p.m., from now until the end of the milennium.

Q: Where can I hear the "Ask Mr. KFI Show"?
A: Mr. KFI's show can be heard in the 14 Western United States. [NOTE: The 14 Western States encompass the following states: California, Arizona, Nevada, Utah, Idaho, Oregon, Washington, Colorado, New Mexico, Texas, Oklahoma, Hawaii, Alaska, [missing one -- maybe Montana? Wyoming?]

Q: What is the Mr. KFI show like?
A: He has no guests, no topics, no screener, no goofy sound effects, no pre-recorded comedy, no scripts, no planted callers -- all he's armed with is a 50,000-watt microphone to pummel you into submission. For these reasons it is a talk show the way

Mother Nature intended a talk show to be. It is also the most
cost-effective show currently broadcast in North America.
It is the modern-day campfire and the most popular show among
alcoholics, insomniacs, and those inclined toward deviant social
behavior.

Q: Are there any advantages of listening to the Mr. KFI show?
A: Of course! He will change your life in magical ways.

Q: What is Mr. KFI talking about when he refers to a caller as
"Local and hostile" or "Distant and docile"?
A: Mr. KFI likes to refer to the caller on Line 5 as "Local
and hostile," and the caller on Line 2 as "Distant and docile."

Q: How can loyal minions of Mr. KFI show their devotion?
A: They can take the Mr. KFI oath.

Q: What is the Mr. KFI oath?
A: "I, State Your Name, am a member of a small but growing legion
of Mr. KFI fans, and I pledge to protect Mr. KFI and his good
name from all enemies foreign and domestic." After professing
this oath you become deputized and can administer the oath
to others (do not take the oath lightly!). You can take the
oath at home or even in your car; you do not have to be on the
air to take the oath.

Q: What are the questions most commonly asked of Mr. KFI?
A: "What is a SigAlert?" and "What do you think of the
legalization of drugs?"

Q: What is a SigAlert?
A: The SigAlert was named after Lloyd Sigmund, one of the original
traffic reporters in Los Angeles. It is a planned lane closure
that will last at least 30 minutes.

Q: What does Mr. KFI think of the legalization of drugs?
A: Mr. KFI is in favor of the legalization of drugs. The war on drugs isn't
working. And as long as alcohol and caffeine are legal, so should
marijuana be.

Q: I hear callers often asking Mr. KFI for a prediction of, say,
what to pick in the football pool, but he never offers any.
Why is that?
A: There are two reasons for that. First of all, Mr. KFI does
not make predictions. Second, Mr. KFI does not have the
sports gene. (Simply put, some people are born with it;
he is not.)

Q: What is Mr. KFI's political viewpoint?
A: Mr. KFI describes himself as a "law-and-order liberal." He is
also on a one-man crusade for the illegalization of veganism.
He believes in social Darwinism, meaning that only those callers
best-suited for the program will persevere and get through

on the telephone.

Q: What are Mr. KFI's religious beliefs?
A: Mr. KFI believes in a higher power, and just for the sake of reference, he calls that power "the god of change." He does not believe in any organized religion.

Q: Is there anything that Mr. KFI does *NOT* believe in?
A: Mr. KFI does not believe in the Council on Foreign Relations, the Trilateral Commission, tarot card readings, or UFO's (but he does believe in other intelligent life in the universe).

Q: Where did he grow up?
A: Mr. KFI was born and raised in Los Angeles, living mostly in Woodland Hills and Tarzana. However, he lived in San Diego at the corner of Prosperity and Defiance, near San Diego State University from ages 2-8.

Q: Where did Mr. KFI go to school?
A: He graduated from the University of California, Santa Barbara in 1989. His degree was in Political Science. He also spent a year at Cal Poly, San Luis Obispo.

Q: How is he?
A: Better than most, not as good as some.

Q: Where is Mr. KFI when he's not doing the show?
A: He is incarcerated and serving the remainder of his seven-year sentence at the Men's Penitentiary in Century City during the week. Occasionally he can be seen picking up litter along the San Diego Freeway.

Q: When was he arrested?
A: He was not arrested; he turned himself in.

Q: When will he be released from jail?
A: When his seven-year sentence is over. He cannot be paroled, because parole is only granted to rapists.

Q: Why is he in jail?
A: He was convicted of embezzling from his own checking account by failing to fill out the check register.

Q: If he's in jail, how can he get to the KFI studios to do the show?
A: He is at KFI through a weekend furlough work release. The "Ask Mr. KFI Show" is part of his community service. In fact, he was ordered by a judge to do the Mr. KFI show. He is also allowed conjugal visits with his wife, the lovely Mrs. Mr. KFI.

Q: What does the lovely Mrs. Mr. KFI do for a living?
A: She turns bolts at the GM plant in Van Nuys.

Q: Mr. KFI claims that he has no guests. Yet I frequently hear guests on his show. What's going on?

A: These people are not guests. They are simply hanging with Mr. KFI.

Q: What is the so-called "3-umm" policy?
A: If a caller says "umm" 3 times during the course of the call, Mr. KFI must cut him or her off.

Q: What are those "six-line tributes" that I hear Mr. KFI referring to so often?
A: A "six-line tribute" requires six callers -- one on each line -- hence the name. He does not refer to them "so often"; rather, he reserves them for people who have been truly memorable figures. In a six-line tribute, Mr. KFI will take words of respect and recognition from each of the six callers on the line. Then in unison, the seven of them (including Mr. KFI) will say, "Thanks, Dick" (or whatever happens to be the first name of the honoree).

Q: Who is Mike TPA?
A: "Mike TPA" is actually an acronym; it stands for "Mike The Parking Attendant," who is a regular caller to the Mr. KFI show.

Q: What are the phone numbers to call into the show?
A: You can call toll-free from anywhere in the United States at 1-800-767-4KFI. There is also a local phone number good from the 213, 818 and 310 area codes: 520-1KFI.

Q: How can I e-mail Mr. KFI?
A: Mr. KFI can be reached at the following e-mail addresses:
Internet: mrkfi@netcom.com
America Online: AKA MrKFI
CompuServe: 72072,2417

Q: What if I don't have e-mail? How can a loyal minion get more information about Mr. KFI and his show, and possibly leave a message for Mr. KFI himself?
A: There is now a Minion Hotline, dedicated especially for the minions of Mr. KFI. Just call (213) 368-MSTR and you can leave a voice message for Mr. KFI.

Q: How can I remember the letters MSTR in the Minion Hotline number?
A: There are two ways: Either remember that it spells "Mister" (as in Mr. KFI) but without the vowels, or that it stands for "More Stimulating Talk Radio." Or, it could also stand for "Minion Support Telephone Recording."

Q: Can I hang up on myself now?
A: It would be most appropriate if you did. Thank you for the call.

Exactly.

Is it true that WQEW AM 1560 in New York is still using Kahn rather than C-QUAM modulation for AM Stereo?

If so, does anyone know if they have any intention of changing to match most of the rest of the world?

I have a DENON TU680-NAB receiver, and am a regular WQEW listener. I would love to be able to receive them in stereo.

Bob Weinstein

: >It's my impression that WQEW is still using the Kahn system, Not C-Quam.
: Well, that would explain it.
: I wonder if they have any intention of changing?

I understand that the Kahn system is primarily used these days to concentrate a station's power in one or the other sideband to avoid interference. I have also been told that WQEW, sometime towards the end of its existence as WQXR-AM, turned off the stereo and started using it this way. That would have been consistent with my reception of their station on my old Sony SRF A-100 radio, which, in the Kahn switch position, tended to put the audio primarily in one of the two channels.

If WQEW is successfully using the Kahn system this way, it is unlikely that they will switch back to stereo using that or any other system anytime soon.

3937. (fwd) Re: The viability of radio

Newsgroup: rec.radio.broadcasting
Date: 1994-09-25 00:58:12 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <362hv4$k9d@vixen.cso.uiuc.edu>
Source record: 37792

Organization: The Tyrell Corporation, Internet Service to the Midwest, (800) Tyrell-1

I try rarely to horn in on others' posts in r.r.b -- but I will here, to note that I think Bob's articles concisely outlines why radio stations are now their own worst enemies. Others of us have said much the same things before. However, in my case, I've been speaking only as an observer of the business who's not been an active participant for more than eight years. The fact that these remarks come from someone who is still hanging in there gives them added punch and impact, in my opinion.

One thing I would like to note:

> Start with talk, the format in which I work. It's starting to lose
> Arbitron share in all the major markets because what was once spon-
> taneous is now predictable, knee-jerk conservatism almost every-
> where on the dial. Programmers cloned Rush's ideology rather than
> imitating what really made him work, namely his style and humor.

Even worse, the format has lost touch with its origins in NEWS and talk radio. The technology exists for more exciting, more instantaneous coverage of events than ever before. TV stations are employing this technology, sometimes in questionable ways, but at least they're trying to incorporate live coverage of breaking events in full color.

What are radio stations doing? In most cases, not much. In a few cases, trying to handle news via phone interviews.

This would be like a Los Angeles TV station covering the O.J. Simpson case with black-and-white Polaroid snapshots held up to a fuzzy security camera.

My Gawd! We have cellular phones, portable stereo tape recorders, Marti units that go up to 15 kHz in audio bandwidth, and most of our radio news operations still rely on *phoners*? Sheesh.

Yeah, yeah, yeah, the station management types will tell you this costs too much money.

Of course, it could just be they're spending money in the wrong places.

> So you see two things happening...one, is a decline in total lis-
> tenership and time spent listening. Two, is a drift by some listeners
> into what up to now have been fringe formats (classical, AAA, NAC)
> and to the largely non-commercial stations that play them. Either
> way those listeners are lost to you and to your potential advertisers.

(I also would blame ad agencies and their media time buyers who don't look beyond raw numbers in the latest book. Many ad agencies don't have people who understand radio and its dynamics, so they go strictly by the

numbers.)

Or, in my case, I listen to CDs and LPs. And mess around with the
Internet.

3938. Women's programming available: Special of interest

Newsgroup: rec.radio.broadcasting
Date: 1994-09-25 00:58:17 UTC
From: "Michael Black...WEOS-FM" <BLACK@HWS.EDU>
Message-ID: <362hv9$k9m@vixen.cso.uiuc.edu>
Source record: 37793

Here is a description of a program we are offering for air. The feed and rights information are at the end of the description. We can make tapes available sometime this month for stations that can not take the satellite feed. In addition, we can provide SW56 G.722 or Zephyr feeds of the program. Call if you are interested.

Program descritption:

25 Women are being inducted this year into the National Women's Hall of Fame on September 24, 1994. 7 of the 9 living honorees are going to be in attendence. The Ceremony will present the opportunity for remarks by the recipients during the ceremony. Remarks for the posthumous inductees will be made by others, in a shorter format.

The inductes that will be in attendence include:
Bella Abzug, Catherine East, Geraldine Ferraro, Helen Hunt, Antonia Novello, Betty Bone Schiess, and Muriel Siebert. Wilma Rudolph and Oprah Winfrey are also being inducted, but will not be in attendance.

Presenters of the awards will be Barbara Renyolds, Columnist for USA Today, Carol Ritter, Gannett Newspapers, and Diane Soehner, Vice President and General Manager of Preferred Care. The Ceremony will take place in Seneca Falls, NY, the birthplace of the Women's Rights Movement, at the historic First Presbyterian Church.

The program will be offered as 1 hour "press club" style program. The program will be self contained, and run 59 minutes in length, and will be fed on Monday. The program can be used as a stand alone information program, aired in Women's History Month, or excerpted. The format will be:

Brief open, and then presenter, followed by remarks from the recipient. If enough interesting material is presented, we will endeavor to put together two hours, in two complete shows, with the second hour presented at a later time. A lot will depend on the inductees. Last year, the ceremony ran 3 1/2 hours! So, that is why we are offering a telescoped version, with the living inductees responses.

Rights: Unlimited broadcast use through October 30, 1995. Excerpts are permitted with credit given to WEOS-FM Geneva, NY.

Funding: USAIR, Hobart & William Smith Colleges, Mckee Communications, Inc.

Feed information: The program will feed Monday, September 26, at 1300 EDT, on the Public Radio Satellite System, channel 8.

This is Galaxy IV, Transponder 3, 67.7MHz SCPC.

PROGRAM ID 94-000-00837

FEED INFORMATION:

MONDAY SEPTEMBER 26, 1300-1359 Channel 8

You must notfy WEOS if you use the program or excerpt from it.

Yup, it's me again.

To all those alumni who were able to come to homecoming weekend, and stopped into the station, thank you! It was great to have met so many of you, talked with you, and most importantly, received advice from you.

We had an impromptu executive meeting that Sunday, and pooled information from alumnis, so that we can actually set forth upon the paths suggested.

To those alumni who don't know me, have not seen previous posts, or could not come to the homecoming festivities, I would appreciate any and all information about yourself and any other alumnis you might have.

*Most important to us is your address, as we are planning an alumni newsletter.

My name is Lukas Neckermann; I am the Public Relations Director at WVBR right now. To update: we are AAA format, tied for second in the market, have strong promotions, great programming (see - nothing's changed) and are at:

227 Linden Avenue
Ithaca, Ny 14850

(For pre-'70's alums... ;-) ....)

We would love to hear from as many of you as possible.

Again, please E-Mail me with your addresses; I thank you in advance.

: A familiar voice joins this soft adult rocker effective immediately.
: 'BOS PD Jim Herron announced that Dick Pleasants, most recently with
: non-commercial WGBH-89.7FM takes over nighttime slot

And boy is it incredible how that "familiar voice" all of a sudden has latched onto the generic WBOS DJ sound. Luckily, he still retains his lovable tendecy to ramble and his complete inability, despite years of experience in the radio industry, to operate record and CD players without lots of glitches, both of which may annoy WBOS management. The move is very cleaver on WBOS' part--getting a well known personality who will draw folkies to their "Unplugged" segment (which he'll handle 9-12), plus having someone who can actually handle all the performer interviews that this segment has. Past jocks, including the departed Marilee Kelly and the fill-ins after she left, really made fools of themselves when talking to the artists. It's quite ironic on Pleasants part, because he left his job as PD and AM jock at commercial folk WADN 1120AM in Concord because the station was losing lots of money and was trying to shift from esoteric folk to a more AAA format. Now he's completely under orders from management in script, playlist, etc., and it's a lot more crass and repitive than WADN ever was.

: * NPR's affiliate WBUR-90.9FM is beefing up its news/talk programming
: and getting rid of remaining music shows. Starting on Saturday,
: October 8 James Isaacs' popular Saturday aftenoon(12:30-5pm)
: 'Contemporary Music' show will be replaced by a new NPR program,
: BBC news, and a personal finance talkshow. The only music heard
: on 'BUR will be jazz show weeknights from 1am-4am.

Actually, they also air "Mountain Stage" Sat. from 7-9PM, followed by Isaacs "Sweet Soul Music" for two hours, NPR's "Afropop Worldwide" at 11PM and at midnight the local Spanish bi-lingual "ConSalsa" with Jose Masso. This seems nitpicky, but actually I note it because even though it doesn't fit their format,they keep Mt. Stage because of the fact that it is the center of the SPring fundraiser. Also, Masso is the only minority on-air person at BUR, which is odd for a PC network's affiliate in a PC town like Boston.

: * Seatle-based 24-hour KidsStar Network will get into Boston in April 1995.
: KidsStar has apparently secured a deal with a Boston AM station
: but hasn't revealed the signal yet. From a limitted list of
: available major AM signals only a couple make a logical choice :
: Noble's struggling 50kw WSSH-AM 1510 and Greater Media's 5kw WMEX-AM

: 1150.

Does this mean that the rumors of 1330AM in the press last year going to a Children's satelite service were wrong? Right now, they can't even broker out a lot of time (and play carts of jazz albums in between messages of the "your show here" variety. Whenever I try to find out what the albums, which are aired in their entirety are, I get put onto one of the ethnic show producers, and both of us end up confused

SOrry for such a long and poorly typed post.

3941. Are there any Jaye Marvin fans out there?

Newsgroup: rec.radio.broadcasting

Just wondering if there are any Jaye Marvin fans out there. He is a talk radio host in Chicago on WLS 94.7 FM at 2 pm weekdays. He is a anarchist on a mostly conservative radio station. I would advise anybody who love manic-depressive DJs that dig movies such as Reseroir Dogs and Pulp Fiction should check out Screaming Jaye. Also e-mail me and tell me you favorite shoot out question.

Harold J.

Subject: RE: Paging John Dowling...

Joe (and others interested from rec.radio.broadcasting),

John Dowling (who was even more popular as the early evening host at Metromedia's late WASH-FM than his incarnations at WPGC and KBIG), is today running his family's home painting business in the Maryland suburbs of Washington, D.C. He also does occasional free-lance voiceover commercial work from here. I last saw him at the reunion of alum from WMUC (the college radio station at the University of Maryland/College Park). I'm sure John appreciates your interest, and I'll pass it along when I see him next time.

Cheers,
Max

Does anyone know what happened to John Dowling? He was
a popular PM drive man on WPGC/WCLY FM in the mid 80's, in
Washington, and I had heard him once in L.A. (KBIG ?), and have
tried since to find him, with no luck. Does anyone know where
he is???
Thank You,

Alan L. Cassel (alcassel@crl.com) wrote:

: When I lived in Pasadena in the '70's, KPPC was on the air only on
: Wednesday nights and all day Sunday at 1240 KHz and ran a mighty 100 watts
: of religious programming.

This was correct. KPPC was running on its original authorization from back in 1923 or whatever, from the roof of Pasadena Presbyterian Church. The church never applied for license changes over the years because they used it for church services on Sunday and for some religious programming Wednesday night, and their license was indeed all day Sunday and Wednesday evening only. Both KGFJ on 1230 and KGIL in San Fernando (does the city of San Fernando actually exist?) came on the air after KPPC, so they had to accommodate its schedule. I once met the chief engineer there and he showed me a copy of the license and the authorization for the horizontal wire antenna. It was a scream.

: If KPPC has expanded their schedule, how are the other local stations at
: 1230 and 1260 accommodating them now?

I understand this is true, but don't know for a fact. It's likely that they are probably ALL allowed fulltime use of their facilities and interference be damned. Many times KGFJ failed to cut power on Wednesday nights and Sundays from 250 to 100, and KPPC repeatedly had to file complaints with the FCC about it. KGFJ has been pinkslipped at least twice that I know of on it.

Frankly, there's not much else they can do with those assignments. There simply are no other channels available. And KPPC, even at their low wattage, still serves a significant population center, even if they do suffer interference.

In article <362hv1$k99@vixen.cso.uiuc.edu>, bobw@panix.com (Robert B. Weinstein) writes:

>Is it true that WQEW AM 1560 in New York is still using Kahn rather
>than C-QUAM modulation for AM Stereo?

I knew Herb Squire (Director of Engineering) while I was involved with the New York chapter of the Society of Broadcast Engineer's New York chapter. Herb was/is a great believer of Leonard Kahn's engineering talents (like many of us) and feel that the only way Motorola was able to win the AM-Steeo war was buy BUYING their way into the marketplace.

FCC rules prohibit users of the Kahn system from generating stereo or a pilot associated with the Kahn system. It is possible that Herb is running the Kahn PowerSide(TM) system which helps fend off any adjacent channel interefernce. I used it when I engineered a station in Connecticut and got favorable results.

Message-ID: <365pi0$nh6@vixen.cso.uiuc.edu>
Source record: 37700

WQEW/1560 is still operating in stereo using the Kahn system. I know that to be a fact as I also use a Sony SRF-A100 Multimode Stereo Receiver. From what I have been able to surmise, they will operate the Kahn system until the FCC deadline of October 1, 1994 when all Kahn stereo generators (all one of them) must cease to operate. However, all Kahn stereo generators can be used with a little modification for "Powerside" as long as both side bands are not used for binaural purposes (true stereo). I myself HOPE that QEW' will switch over to the C-QUAM system. Admittedly, I was a staunch supporter of Leonard Kahn's system. He had the BEST system available for AM stereo. But, his marketing strategy was not strong enough to beat the Motorola folks. Motorola had more money, people and more importantly.....free loaners to stations who wanted to try AM stereo for the first time. I think Leonard Kahn knew the fix was in several years ago when all but a few Kahn stations switched to C-QUAM. I do wish at that time he would have "called it a day" and allowed Marketplace decision stand. A lot of people thought that he did deserve the title "Father of AM stereo". But with all of the litigation that persued later on, a lot of those people now feel that what he had done was a detriment and was a major factor on why the AM band suffers so much now. The average person would that the time was up and to let it go, gracefully. Unfortunately, Leonard Kahn is not the average man.

Make note, when FM stereo was first new in 1962...it sounded HORRIBLE !! But, as time went by...new improvements in the way the Zenith system had beenn developed. And with modern technology, what took over a full rack of very unstable stereo generator equipment can now be put on one PC board. C-QUAM has some inherent defects, but as time progresses and the radios begin to filter into the market...AM stereo can prosper. AM stereo can do music just as well as FM can do and then some. The QEW's, the WOWO's and the WHAS's of the world can bring AM stereo to millions of people, hundreds of miles away. Try doing that with FM.

Tracey W. Liston <twl2@po.CWRU.Edu> writes:

>Sure DENON/NAB has a receiver for people that know about and want to special
>order, the GE SuperRadio approaches mono AMAX specs, but give us a mass market
>radio that when it hits stereo stores the sales kid will say, "AM stereo, not
>bad".

It's here, and has been here for several months -- namely the Sony SRF-42
Walkman, which proudly bears the AMax Stereo logo on its case right next to the
power switch. While it has its flaws (no pilot detection, and no way to drop
to mono while staying in wideband mode), it does provide shockingly good sound
when confronted with an AM signal that's actually worth a darn.

I just checked Radio Shack's new "Answers" catalog, and could find no evidence
of AMax or AM stereo. Their previous C-QUAM tuner lingered for quite a while
in the stores and may have left a bad taste in the product line manager's
mouth...

3947. Station w/$150,000 annual budget?

From: John Higdon <john@bovine.ati.com>
Message-ID: <365pi8$nha@vixen.cso.uiuc.edu>
Source record: 37704

Back in the not too distant past, I had it out with some people on a regional group concerning the FCC's "deregulation" of radio and how (they claimed) that this is what has led to radio's downfall. I believed then, and do now more than ever, that this is complete garbage.

For the fact of the matter is that radio has not been deregulated at all. A recent article in Broadcasting & Cable nails the issue completely. While a viable case can be made that financial concerns have Pablumized content, there is a darker, more sinister force to be considered. More than ever, the FCC IS regulating content in the form of capricious enforcement of "obscenity laws".

As any broadcaster knows, the FCC-style obscenity witch hunt is our justice system turned upside down. In the traditional world of jurisprudence, laws are passed, punishments set, and infractions are dealt with according to statute. In broacasting, station owners are given no guidelines or any information whatsoever concerning what an "obscenity violation" might look (or sound) like.

Suddenly, there is a listener complaint to the FCC. Then the backfill begins. The FCC immediately assumes guilt by the station and the station must PROVE that it is not guilty. As far as the FCC is concerned, the existence of the complaint is sufficient proof that communitity standards have been violated, and the station is now on the hook for a substantial fine.

There are no warnings and, for that matter, not many avenues of defense. The FCC aggresively goes after the station because, after all, there is big money involved. FCC fines have been increased by an order of magnitude, justified in part by the big money that changes hands when radio stations are traded. A $1,000 fine is easily written off as a cost of doing business, but a $200,000 per-day fine is not easily dismissed by any broadcaster, regardless of size.

And obscenity is only one issue. The FCC has tightened up considerably on things such as EBS, the public file, the political file, and virtually every other administrative and engineering triviality that exists in the rulesbook--which did not get any slimmer, by the way.

So to those who moan that the deregulation of radio in the past decade or so has caused the downfall of the medium I ask, What Deregulation? The past few years have seen record numbers of citations and record fines paid by broadcasters. This is NOT deregulation in my book.

But it can certainly put a chill into any broadcaster who might be considering doing anything new, different, or "out of the ordinary".

Q14. Is there anywhere I can get a complete listing of all the episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of OTR programs?
Q16. Is there a World Wide Web (html) page or ftp address that I can access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
|Q18. Can I get archived copies of old issues of OTR?

Q1. What is "OTR"?
A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Q5. Are OTR shows rebroadcast on the radio? If so, where and when?
A5. Yes, several AM radio stations and at least one satellite feed rebroadcasts OTR. Check the OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP).

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See the WWW page or FTP site for a list of some of them.

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to be listed in this database.

Q9. Whats this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Obler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores.

Q12. Are there any OTR clubs near me?
A12. Check the club listing in the WWW page. We will add clubs as they become known to us.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, Armed Services Radio rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates.

Q14. Is there anywhere I can get a complete listing of all the episodes in a serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publically available source, we can make it available in the Internet OTR file repository.

Q15. Is there anywhere I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Q16. Is there a World Wide Web (html) page or ftp address that I can access for more info?
A16. Yes, there is an experimental WWW page as well as a read only anonymous ftp directory. Try the following:
for WWW: ftp://ftp.crl.com/users/ro/lgenco/otr.html
or
anonymous ftp to: ftp.crl.com, directory: users/ro/lgenco

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: otr-request@airwaves.chi.il.us
Subject: SUBSCRIBE

To unsubscribe, send email
To: otr-request@airwaves.chi.il.us
Subject:UNSUBSCRIBE

Q18. Can I get archived copies of old issues of OTR?
|A18. Yes, there are currently four ways to get archives:

FTP:
Anonymous ftp to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

3951. Boston Radio Watch(9-26-94)

Newsgroup: rec.radio.broadcasting
Date: 1994-09-27 02:27:11 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <367vtv$oh6@vixen.cso.uiuc.edu>
Source record: 37705

* Summer AccuRatings and preliminary summer Arbitrends
didn't really please the management at Boston's soft album rocker
WBOS 92.9FM. The station has stopped gaining momentum it had shown
in the last two years under Granum ownership...

As of today(9-26-94) afternoon jock David O'Leary replaces morning
man Bill Smith who was with AAA WBOS since the start of the
soft album sound about 4 years ago. And, to fill Leary's afternoon
spot Carolyn Morrel moves in from the weekend shift...

[Before coming to 'BOS, Smith used to be a morning voice for
CR WZLX-100.7FM in its pre-Infinity days. As for Leary -- he came
to 'BOS from CHR WXKS-107.9 and now defunct local 'MTV' version --
WVJV-TV66(V66)].

New 'BOS line-up now looks like this(hopefully,this is the last
update for a while..:-) :

David O'Leary 6a-10a
Liz Solar 10-3pm
Carolyn Morrel 3-7pm
Dick Pleasants 7-12pm
Doug Bruce 12a-6a

* ARS is ready to take over its second FM signal in the market at
the end of this week(October 1st?). AOR WCGY-93.7FM(Rock 93.7)
in Lawrence,Mass is likely to undergo some changes as far as on-air
staff is concerned.
Its long-time morning man, Mike Morin, did his last show on
Friday(9/23).
Apparently, ARS management had talks with Tai, a morning DJ from AP
WFNX-101.7FM, about an AM-drive gig at 93.7. This is fueling
speculation that ARS might dump 'CGY's long-time AOR format in
favor AP Top-40.

New Age/jazz, ARRO, oldies are other rumored new formats.

* With ARS take-over of WCGY, Boston will have record a *5* FM duoplies
for a Top 10 market. Here's an updated list :

CR WZLX 100.7FM /AOR WBCN 104.1FM -- Infinity Broadcasting
AAA WBOS 92.9FM /AC WSSH-99.5FM -- Granum Broadcasting
AC WMJX 106.7FM /CW WBCS 96.9FM -- Greater Media
CHR WXKS 107.9FM /CHURBAN WJMN 94.5FM -- Pyramid/Vestar Broadcasting
HotAC WBMX 98.5FM/AOR WCGY 93.7FM -- American Radio Systems

-Mark

3952. Radio AHS - How does it rate?

Newsgroup: rec.radio.broadcasting

Anyone have any information on how the Radio AHS outlets are doing
around the country?

Specifically, I would like to know for each station:

1) Current rating as of latest sweep
2) Audience share
3) How many stations in the market

And if you happen to know, how this compared to the station's previous
format.

Thanks.
Mike

I doubt that the quality one receives on their AM stereo receiver will
ever be equal to that of FM. First, the FCC reqires that the frequency
response range be flattened on AM broadcasts (this is a manmade restriction
that could be eliminated, but only if some AM licenses are rescinded or
the band is widened and stations are placed farther apart on the dial),
and AM is prone to interference from storms, power lines, etc. and AM
signals can be blocked by structures, mountains, etc. Also how do you
guarantee the stability of a stereo signal bouncing off of the ionosphere,
travelling over rough terrain (no, I don't mean unpaved dirt roads :)),
etc. AM stereo is a good idea...no doubt the technology can be improved...
no doubt it will be if the market allows it, but AM stereo will never
be as good in the real world as FM stereo. This is my opinion. I am
not an engineer (although my current title is "software engineer" <G>).

[Boston RadioWatch mode off] :

And, I'm sure WBOS will try to go to bank with Pleasants move...
[His unplugged, unamplified 9p-12 segment is being plugged every 15 minutes,
(or so it seems :-) as I listen to David O'Leary's first morning show]

Removal of likeable DJ Bill Smith still puzzles me. 'BOS is as hardcore
PC station as you'll find thesedays...A move to have 2 female jocks
back-to-back(Liz Solar and Carolyn Morrel) in a male-dominated commercial
FM Boston radio will surely get some press and attention...But to sacrifice
an excellent DJ(I thought Smith gave the station what it still desperately
lacks -- a little personality)to get hype and ratings is bull,IMHO.
I thought at a station where jocks show up for work in suits and ties,
take mandatory drug tests and don't even interact with each other on
or off the air, Smith was a breath of fresh air...Just my $1.00 worth...

-Mark

Count me in. Jay is a genius. Entertaining as hell. The shootout is
great...in the tradition of John "Records" Landecker's Boogie Check and
Captain Whammo...anybody remember them? I do wish Jay would get a bit
more political, though... an "after the rush" thing would be great since
he comes on right after you know who...

Several months ago in Robt. Feder's SUN TIMES column there was a report that KJAZ (just outside of San Francisco) was looking for an outlet here (and in other markets) to broadcast via satellite their jazz programming. Does anyone have an update? Also, it seems that WBEE (1570 am] has begun programming more "smooth jazz" and is going the WNUA route. Anyone have info on this?

of
>them) must cease to operate.

Because of the nature of the independant sideband system (ISB) used in Kahn-Hazeltine AM stereo broadcasting, you can try to tune WQEW in on two receivers at the same time. You will have to play with the tunung alot but you will be able to get discreet left out of one radio and discreet right out of the other. Assuming the song is in stereo, you should be able to get enough left to right separation to hear stereo. I tried this many years ago on WNBC (back when there was music on 660) and son of a gun...it really worked!

For historical purposes I would give it a try before Kahn AM stereo disappears forever.

By the way, has anyone heard Chuck Leneord (from the old WABC days) doing overnights on 'QEW? He sounds great!

regards (73) Joe.

I have a Sony ICF-2001 All-Band (AM/FM/SW) radio in good condition, which I would like to trade for a Sony SRF-A100 AM/FM/AM-stereo radio.

I had one which got stolen.

I really miss it and would love to have another one.

My ICF-2001 is perfect, except for a missing battery cover for the AA batteries (Battery cover for the D cells is intact).

Fot those who are unaware, the ICF-2001 covers 150khz to 30mhz, AM/SSB/CW, 76 - 108 mhz FM. It scans, has memory presete, Bass and trebble controls, antenna trimmer and excellent sensitivity. It is a large-format portable with a large speaker and great sound.

Any takers?

Mime-Version: 1.0
Content-Type: text/plain; charset=US-ASCII
Content-Transfer-Encoding: 7bit
Content-Length: 5177

Some notes from a weekend trip along I-90 from Boston to Rochester
and back again:

WORCESTER: After some initial testing, still no further sign of
WCRN-830. Unknown when they'll get it on the air. WCHC-88.1 is
back from its summer recess. WVEI-1440 is about to change calls
to WWTM, "The Team," and do its own mostly-syndicated sports
talk.

SPRINGFIELD: Actually, Amherst...but someone tell that to WRNX-100.9
Amherst, which is stubbornly refusing to do a proper legal ID.
I taped the station for a full half-hour from :40 till :10, and
the only ID on the tape was "WRNX Springfield." I don't THINK
so! Still on summer recess as of 9/17 were WAMH-89.3 Amherst,
WOZQ-91.9 Northampton, and WNMH-91.5 Northfield.

ALBANY: WROW-590 is running the AP All News format, breaking the
year-long simulcast of WPTR-1540, which has dropped CNN Headline
News for various syndicated talk. On the FM side, WRUC-89.7
Schenectady was still on summer break as of 9/25, but there's some
new FM action. WPGL-90.7 Pattersonville is on-air with a
contemporary christian format. They're getting most of their
audience from two translators, 97.1 Albany and the 93.9 Troy that
was supposed to translate WHVP-91.1 Hudson. The 90.7 signal
itself is pretty bad...headed east it was almost gone by
Schenectady, lost under the hash from WCDB-90.9 Albany. Family
Radio has moved its Catskill WFME translator to 105.3. They
use several stacked Yagis to blast a narrow directional path
25 miles into Albany. WWCP-96.7 Clifton Park is on the 'DRE
net now, of course...just a WWCP legal at the top hour. And
WQBK-103.9 Rensselaer is playing with the big Class B's now that

they have taken over the former WSHQ-103.5 Cobleskill. It's
now WQBJ, and it blasts "Q104" from the Mass. line out to
Herkimer. The NYS Thruway TIS that used to be on 1610 has
moved down to 540. They're an impressive TIS -- the loop
includes traffic info, an I Love NY tourism PSA, and
60 seconds or so of simulcasting the NWS Weather Radio
service. Signal was decent across most of the city,though
I think the tx is at or near exit 24, the I-90/I-87
interchange. Made one brief stop in Albany to see
the new studios of WGY-810/WRVE-99.5. They're
in the One Washington Square office park, off
Washington Ave. Extension near Crossgates Mall. It's
a former law office, but they've done a nice job of
converting it into studios. Nothing too fancy, but
enough to get the job done well. Video available for trade,
of course...

HERKIMER: 92.7 is back up, with satellite oldies as WXUR. They
have Imus in the morning, too. No sign yet of the still-dead
AM 1420. In Little Falls, 105.5 WOWB "Wow FM" is still satellite...
despite rumors that they'd go live. And 100.3 Little Falls
is now translating 102.9 WMHR Syracuse. 91.5 WVHC Herkimer
must have taken a summer break, since they were off.

UTICA: On air is 100.7 WVVC, with contemporary Christian. Cruddy
signal, since they have WKRL East Syracuse on 100.9 cutting them
off to the west. WPNR-90.7 was on for the first time in a while,
with what seemed like an improved signal. 102.5 WKDY is using
those calls just once an hour; they've dropped country for
CHR "Kiss." 93.5 WUUU Remsen is also using the calls just once an
hour; they're now soft-jazz "Warm 93.5." Their signal seemed
worse than usual as well. These stations have gone through
so many format changes the last few years, it's a wonder they've
held any listeners at all. Sister AMs WADR-1480/WRNY-1350 are
still simulcasting, but now it's sportstalk instead of
standards.

SYRACUSE: Or, "Land of the Useless Translators." The 97.7 that
was relaying WNNR-103.5 Sodus in June is now doing WTKW-99.5
Bridgeport, and serving substantially the same area. 96.5 is
on in Syracuse, relaying WVOA-105.1 De Ruyter, and blocking
reception of WCMF Rochester. WVOA has dropped the last remnants
of classical, and was all preaching when I listened, and
completely // 1540 WSIV East Syracuse. Status quo in the Salt
City otherwise -- no sign yet of CPs on 105.9 Syracuse or
102.1 Phoenix. The NYS Thruway is running a TIS in Syracuse,
on 710 kHz. Tx must be somewhere around the I-690 exit,
but the signal was listenable down 690 into downtown,
and then back out 690 and up 481 to Exit 34A.

ROCHESTER: Heard a bit of the satellite sports talk on WCMF-990.
I guess it's better than the FM simulcast, but not much. WIRQ-94.3
was not on the air when I listened Friday afternoon and evening
9/23, nor over the weekend. They'll be squeezed out, apparently,
when the 94.1 Brighton CP gets built. Other than that, little
had changed. No sign yet of 105.5 WASB-FM Brockport,
and perpetually unbuilt is 93.7 WRCD Clyde. Thankfully for my DXing,
there's no Thruway TIS in the Rochester area yet. So 530, 540,
1610 and the rest were all clear...

Of course tapes are available, especially of the changed markets. I'm
getting ever-closer to my goal of current legal IDs and brief
airchecks from EVERY station between Boston and Rochester. It helps
now that I have two tape decks running at any given time!

E-mail me if you'd like to hear any of this...

Today marked the return of Fred Heckman to 1070 WIBC-AM.

Mr. Heckman, a longtime radio newsman, was fired fifteen months ago from WIBC, then owned by Sconnix, because his style was too "old-fashioned." Heckman later filed an age-discrimination suit, which was settled out of court.

Emmis Broadcasting recently bought WIBC, and officials made clear from the outset that they wanted Mr. Heckman back in some capacity.

Mr. Heckman is now "Senior News Analyst." He resumes his daily "My Town Indy" reports, each day after the 8 a.m. newscast. Station promos indicate he will also return to the newsdesk when major stories break.

Mr. Heckman visited morning man Jeff Pigeon's program Friday morning between 7 and 8 a.m. Indiana Governor Evan Bayh sent a fax congratulating Mr. Heckman on his return, and Indianapolis Mayor Steven Goldsmith called the program to congratulate Mr. Heckman on the air. The mood among other callers and station staff that morning could best be described as jubilant at the return of a well-liked air presence, and relief that the WIBC news effort seems to be returning to its former prominence. Previous owner Sconnix reportedly dismantled this news powerhouse, leaving it with an inexperienced staff, broadcasting perfunctory local coverage.

At least one other Indianapolis station gave a tip of the hat -- however backhanded -- to the 70-year-old Heckman. Bob and Tom, morning hosts at 94.7 FM WFBQ (Q95) cracked, after a report of a major accident on I-65, that "they oughta send Heck Fredman down there," or something to that effect.

3966. What about AM on the FM band?

Newsgroup: rec.radio.broadcasting
Date: 1994-09-28 07:35:16 UTC
From: Andy Jacobson <afj@DrMemory.nuc.ucla.edu>
Message-ID: <36b6bk$4tu@vixen.cso.uiuc.edu>
Source record: 37721

As I still see this continuing debate ongoing about AM stereo, I am reminded
of a conversation I had years ago with a brilliant friend of mine
Edgar Reihl, who was working for for a certain audio equipment manufacturer
in the midwest. He observed that there is
really nothing wrong with AM as a mode of radio transmission at all. In fact
it is quite a bit more efficient than FM in many respects. The problem is
the HF band is way too small for it. Consider the possibility of AM mode
transmission in what is now the FM band. As it stands, each FM channel is
allotted 200MHz spacing. If AM were used with say a generous +-20KHz spacing
you could have 5 AM channels for every existing FM frequency. If frequency
response was limited to 15KHz, you would have FM quality broadcast, and if
AM stereo is really any good as it stands, it should be able to make efficient
use of that 15KHz, leaving some side band for other uses.
As for the sky wave and fading, again, these have much more to do with the
band AM is on. The transmission equipment and towers would be much cheaper
and basically the same as FM is now. Any takers?

This is not directed at Cynthia alone, but a gentle reminder for *all* AOL subscribers...when you click on the Send Response button, you are provided with a window in which to place not only your comments, but a prepared header that lists the original poster and article ID, in a format that expects you to "quote" from the original message, like I did above.

If you don't want to quote (and you really should to help out those who join the newsgroup follow what's going on), then erase the prepared header. Otherwise, it appears as though the original poster is making *your* comments.

To make quoting easy for Macintosh users, there is a neat little utility called SignatureQuote (available online by doing a software search). It takes whatever is on the clipboard, formats it and adds the "> " before each line to set off quoted material from your comments. It also lets you quickly add a signature at the bottom of your postings. It's great, and make newssurfing a more enjoyable avocation.

Just a note to help out...I really don't want to single any one person out, Cynthia. :)

I think the operative phrase is "going digital." CHOM-FM does not, as yet,
broadcast a digital signal, but we are in the process of upgrading our
studio equipment and transmitter to be able to accomodate the change. I
believe the target startup date is within the next twelve to eighteen months.

3971. Re: LEYKIS, KENTUCKY, HOMOPHOBIA AND ME

Newsgroup: rec.radio.broadcasting
Date: 1994-09-28 07:35:25 UTC
From: UltimaJock@aol.com
Message-ID: <36b6bt$4ua@vixen.cso.uiuc.edu>
Source record: 37727

dk@crl.com (David A. Kaye) writes:
>I suggest that the station manager in Kentucky knows damned well how many
>gay broadcasters there are, but is more likely trying to court support in
>his local business community -- so he can go to the Elks lodge meeting
>and his fellows would pat him on the back and maybe buy some ads on his
>station.

That still doesn't justify his actions. Bigotry is bigotry, and I have no patience for anyone who bows to it, either because he actually swallows that bilge or simply wants the bigot audience's long green.

>In 23 years of
>being out (I started early), I can think of only one job I may have lost
>for being gay or bi. I was forced out of Channel 31 in Sacramento. No
>biggie -- the company went bankrupt soon thereafter.

"I wouldn't give a hoot in Hell for a man who lost and laughed." Yes, there's irony in quoting George Patton on this issue, but the principle applies. Why should you, or anyone else in this business, be relatively satisfied with the status quo when you KNOW it's corrupt?

>Uh, this kind of attitude is going to get you another job? Nobody seeing
>your post is going to hire you, even if they agree with you, knowing your
>ability to explode at a moment's notice. Broadcasting is one of the most
>stressful careers around; hotheads are not needed.

I truthfully think an apology may be in store for this "hothead" reference. No, I didn't actually expect any job offers after that post, but interestingly I DID receive an E-note from a moderately interested station a couple of days ago, quoting from and agreeing with the original note. And as far as scaring off station execs, any who were offended by my original note deserved to be scared off. I have no interest in working for someone who is afraid of people who can think for themselves. Even Louis B. Mayer, the tyrant of Culver City, admitted to John Huston when the latter was trying to get MGM to make THE RED BADGE OF COURAGE (which Mayer didn't want to make) that he'd rather have an employee disagree with him and stick to his guns than have one simply fold the argument to placate him. MGM eventually made the picture, one that remains legendary in the film industry's history. I wish to God there were more talent in THIS industry with the courage to stick to their guns, and more administrators in THIS industry with the intellect to figure out that not every disagreement with policy is a personal attack. If anyone was offended by that note, THEY NEEDED IT.

>Why are you posting this into a Bay Area newsgroup, when
>rec.radio.broadcasting is the more appropriate group?

Because, even in Northern California, where the LesBiGay community is one of the strongest in the world, even David Kaye found he couldn't maintain a particular job because someone couldn't accept who he loved.

3972. Haiti? station on 1600 khz

Newsgroup: rec.radio.broadcasting
Date: 1994-09-28 07:35:31 UTC
From: PAYRAS@SARA.CC.UTU.FI
Message-ID: <36b6c3$4uf@vixen.cso.uiuc.edu>
Source record: 37726

Last sunday around 02 UTC I noticed a french speaking station on 1600 khz fighting with WLUZ of Puerto Rico and a couple of US stations. The french speaking had just talks on "Haiti Democratique" and similar, no music was played, only talks. Anybody knows where this station is situated, perhaps in the Caribbean area (Dominican Republic?) or maybe Florida?

3973. Return To Radio...Part-Time

Newsgroup: rec.radio.broadcasting
Date: 1994-09-28 07:35:32 UTC
From: Dave Poland <71543.114@compuserve.com>
Message-ID: <36b6c4$4uh@vixen.cso.uiuc.edu>
Source record: 37728

I have 12 years experience as a disc jockey in small and medium size
markets, but chose to get out of the biz four years ago. I'm now interested in
returning to radio, initially on a part-time basis, and I hear that many
stations have a hard time find part=timers who are both talented and dependable.
I would like to find work within 100 miles of Louisville, Kentucky.
In considering this career move, some questions/concerns come to mind:
While I still have an air check from the "old days," aren't PD's going to want a
recent tape? If so, would a tape produced in a studio (not a real Air Check) be
acceptable? I'm particularly interested in working again in Christian or
secular A/C radio...who are some consultants that it might be worth while to
send a tape to? Or should I just approach stations directly?
Comments/suggestions/etc. are most welcome!
Thanks,
Dave Poland

3974. Re: Indianapolis RadioWatcher - More WNAP

Newsgroup: rec.radio.broadcasting
Date: 1994-09-28 07:35:32 UTC
From: quincy2@aol.com
Message-ID: <36b6c4$4ug@vixen.cso.uiuc.edu>
Source record: 37729

In article <360o39$mku@vixen.cso.uiuc.edu>, JIMGREY@delphi.com writes:

<Quoting Ed Hutchison in a letter to the Indianapolis Star:
<"My friends and I don't have a bond with Cat Stevens, Foghat, and Grand Funk Railroad. We care about <the old WNAP because of that station's 'in your face' attitude. ... The insurgent, outrageous, rebel air <staff who knew the establishment despised them, and liked it. In the '70s ... we were smirking with Chris <Connor... jamming with Adam Smasher, and...Buster Bodine...

An interesting letter.

Still, I have to remind Mr. Hutchison and anyone who might agree with him that he (and you) are the "establishment" now...whether you'll admit it or not.

If it was just the air staff of the former WNAP who made the station so successful, then why isn't Cris Connor the top rated afternoon personality in Indianapolis with the country (now oldies) station he programs and hosts (not to mention rap/hip hop Hoosier 96)? Why is Tom Cochran not the top rated news anchor in Indianapolis?

I don't wear bell bottoms, live at home and have to ask dad for the car keys for my Friday night date. I am not the same person that I was in the 70s...and I don't want to be.

Then why should we expect WNAP to be the same radio station?

3975. Engineer needed

Anyone else heard the LovePhones program? Any thoughts?

It's produced at WHTZ in New York and simulcast over WMMS here,
Mon-Thurs at 11. Talk about "love, sex, and relationships"-- or
so the announcer says.. mostly it's teens and young adults
discussing sexual situations, problems, etc. Sometimes funny,
sometimes insightful, often rather graphic. It's on at 11 PM.

3980. WBOS/Bill Smith

Newsgroup: rec.radio.broadcasting
Date: 1994-09-28 07:35:46 UTC
From: Dan Schaffer <dschaffe@lynx.dac.neu.edu>
Message-ID: <36b6ci$4ut@vixen.cso.uiuc.edu>
Source record: 37734

[reponse to Mark Shneyder's Boston RadioWatch of 9-26-94--Item: WBOS shifts lineup.]

I laughed out loud when I read about Smith's getting the ax to be replaced by David O'Leary (and since I was in a CVS trying to read the Herald without buying it I got a lot of looks from the clerks...:)). The two really sound similar to me. Perhaps this is just because *everyone* on WBOS sounds the same, since Mark says that O'Leary used to be at the very personality driven CHR WXKS-FM. It's one of the problems of modern radio management--traditionally, when your ratings aren't what you want them to be you fire the personality, but if you forbid personality, firing people hardly makes a difference.

I agree about Smith's departure being a shame. I saw a few times MC their Copley Square concerts this summer, and he actually looked like he was having a good time (and, yes, his tie was on).

BTW, WBOS now has an e-mail address, which is
WBOSONLINE@aol.com

It can be used for requests, to enter contests, and right now you can ask for the free New Music File CD, which might actually be decent since this is the best segment that BOS has. Artists include Boston folkie favorites The Story.

For the first weekend, however, the jocks were reading it as "WBOS@aol.com", meaning that George Knight, who I think is some sort of assistant-PD (???), got a lot of messages asking to be put in the drawing for Bob Dylan tickets. (I wonder if the jocks will really be monitoring the AOL account? They're promos give that indication)

3981. TechnoFile daily feature on computers and technology

Newsgroup: rec.radio.broadcasting
Date: 1994-09-28 07:35:47 UTC
From: technofile@aol.com
Message-ID: <36b6cj$4uu@vixen.cso.uiuc.edu>
Source record: 37737

The TECHNOFILE is a ninety-second radio feature about computers and technology. Everyone has to deal with many aspects of technology -- from home computers, stereos, and VCRs to automatic tellers, cellular phones, and supermarket UPC scanners -- and we take a daily look at this high-tech world.

While there are a few features produced for the high-end user, there are very few for the novice. For this reason, the TECHNOFILE was created for the average person, and not for the computer programmer or electronics whiz. The TECHNOFILE is for the woman who uses her computer for writing letters or balancing her checkbook, but not much else; it's for the man who has trouble programming his VCR. We take all of the "technobabble" and make it easy to understand for your listeners.

The TECHNOFILE is now available at no cost to your station. Its short format is ideal for news and talk formats; the relaxed, but professional, presentation is great for feature-centered drive programs.

If you would like more information -- or a demo tape -- please respond to the e-mail address below.

Regards,

TechnoFile

E-mail: technofile@aol.com

Date: 1994-09-29 19:50:11 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <36f5pj$5sp@vixen.cso.uiuc.edu>
Source record: 37741

Kansas City Royals baseball will return to KMBZ (980) for the 1995 season, if there is a 1995 season.

The Royals announced the switch from WDAF (610) yesterday (Sept. 28) when it also disclosed the renewal of the club's affiliation with Stauffer Communications for the Royals radio network rights.

The Royals' flagship will continue to be Stauffer's Topeka, Kansas station, WIBW (580), and Royals announcers Denny Matthews and Fred White will return as well.

KMBZ was the Royals' original Kansas City outlet in 1969. It lost the Royals affiliation to KCMO (810) in 1983 and regained the affiliation in 1986.

In 1992, formerly top-rated country music station WDAF was smarting from the rise of FM country rival KFKF to the number-one spot in the Arbitron ratings. "61 Country" seized upon Royals baseball as a way of solidifying WDAF's audience share. The Royals benefited from WDAF's huge coverage area (5 kW non-directional, day and night, from a half-wave antenna).

The strategy worked for WDAF when it regained the number-one spot in the summer 1992 book.

In the past year, it's KFKF (94.1) that has faced pressure on its audience share with the rise of young country rival KBEQ(FM). "Q-104" ditched its 20-year-long heritage as a contemporary hit station in favor of the country format early in 1993. The move has paid off with a #5 spot in the most recent Arbitron (Spring 1994).

KFKF also has hurt its own cause by inexplicably maintaining an LMA with KKCJ (106.5). "CJ 106.5" is programmed as a "hot country" station. Its original purpose in 1992 was to scare other local stations off from trying an FM country format, but that failed when KBEQ (104.3) made its switch.

In effect, KKCJ is now draining audience share from its LMA partner, KFKF.

As a result, WDAF may not need the Royals any more, with KBEQ and KFKF fighting for the number-two position in the country music market.

The Royals and WDAF both said the end of their relationship was amicable. Royals radio network manager Tom Cheatham said he believed WDAF wanted to return to its music-oriented full-service format. A statement from WDAF GM Herndon Hasty confirmed the station's desire to do just that.

*****

The Kansas City Attack indoor soccer team returns to the airwaves after a couple of years away, thanks to an agreement with talk station KNHN (1340).

KNHN will broadcast 40 of the soccer team's home and away games this season.

*****

KCXL (1140) remains off the air, despite announced plans to return to
the air Friday (Sept. 23) as an oldies station. The 500-watt daytimer has
been off the air since May 1992.
*****
From the Dumb Moments in Local Broadcasting File:
KSHB-TV anchor Jim Condelles began a story with this lead sentence:
"Do you remember when the family doctor treated you from birth
until death?"
That was so bad that Condelles quickly ad libbed, "Well, maybe not until
death...."

3987. New England Radio Watcher: WCGY redux

Newsgroup: rec.radio.broadcasting
Date: 1994-09-29 19:50:12 UTC
From: fybush@world.std.com
Message-ID: <36f5pk$5t0@vixen.cso.uiuc.edu>
Source record: 37742

A followup to the WCGY information posted earlier: The station is making a very slow evolution, apparently to an adult-progressive "Generation X" type format, in competition with WFNX.

To recap: Live programming ended at midnight, Monday night/Tuesday morning, with "Carry That Weight" by the Beatles. Dead air followed for 90 minutes, then half an hour or so of new sister station WBMX-98.5 simulcast, with the IDs clumsily potted down :-) Then more dead air for 4 hours, then an automated format kicking in at 6 am.

The automation has run the show since then...and the music mix seems to be slowly moving from the straight ahead classics/current AOR mix of the "old" WCGY to a more progressive format. The only IDs have been "93 (beep) 7 WCGY", although one legal I heard followed that with "Is there anyone listening out there?"

There's still a spot load, and they're even promoting a (live?!?!?) remote tomorrow at a new McDonalds!

Interesting to see where this is headed...perhaps this is all a ruse, and there's a real new format under wraps waiting to be sprung on us all?

The more I see of Sconnix, the more I wonder what planet its management
came from. You don't tinker with a news image that took years to build.

Kansas City daily experiences more evidence of Sconnix incompetence. After
Sconnix took country KFKF(FM) to the top two years ago, it got cocky and leased
out the old KXXR(FM) and put satellite country on it as KKCJ. Ostensibly this
was to keep any other FM station from even thinking about tapping into the
27+-point market share being split up by KFKF and WDAF.

WDAF then went out and got Royals baseball to solidify its position.
Even though 'DAF is an AM station, it quickly regained supremacy with
shares in the 10-11 range. (Having a 610 dial position and day and night
omnidirectional coverage in stereo certainly doesn't hurt!)

In 1993 KBEQ(FM) ditched hit radio for "young country," aiming squarely at
KFKF's key demos (and largely succeeding). To keep up, Sconnix has had to
dump the satellite service and hire announcers for KKCJ. It still
languishes in the market with less than a 2 share and no promotion or
presence aside from the scattered unlighted billboard.

Also note that KKCJ is only one of five country stations in the market (the
others are WDAF(AM), WHB(AM), KFKF(FM), KBEQ(FM)). With other formats
missing ("lite" jazz, adult alternative, modern rock) from Kansas City, why
it needs five country stations -- all largely targeting the same demos! --
is something I do not understand.

(WHB(AM) is a little different; it is going after a regional farm audience
and has a country-music playlist that is much broader (and more

oldies-based) than the typical station in this genre.)

Meantime, WDAF continues to succeed with such a strong music image plus a great spot-news reputation that it's now able to reduce its expenses by not carrying Royals baseball any more.

Even though the old KBEQ had a lot to commend it, I'm rooting for "Young Country 104" to whip KFKF in the near future -- maybe then, Sconnix will wake up and stop diluting its audience over two stations.

3989. Washington, D.C., Radio w Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-09-29 19:50:16 UTC
From: TOMLACKO@delphi.com
Message-ID: <36f5po$5te@vixen.cso.uiuc.edu>
Source record: 37744

Here's the latest in and on the radio in the past 3 weeks.

WASH FM 97.1 (AC format) must pay former staffers Jeff Baker and David Burd their severance pay, this according to an arbitrator. WASH's owners, Evergreen media, will have to pay more than $40,000 to both. This is based on six years of service, advance notice pay and unused personal leave time. Evergreen states they will not appeal the ruling. David Burd is still working in town at WGAY FM 99.5 (Easy AC format). The exact reason Baker and Burd were let go has never been revealed. In October 1993, Burd was fired. And in December, Baker was told to not bother coming back from vacation. In the summer of '93, the last complete book when the team was together, they had a 5.8. So their firing couldn't be blamed on the ratings.

WWRC AM 980 (Talk format) has added Dr. Laura Schlessinger to their afternoon lineup from 1 to 3 p.m. The good Doctor replaced Pat Buchanan who couldn't beat G. Gordon Liddy or Rush Limbaugh in the afternoon ratings wars.

Former WHFS FM 99.1 (Alternative rock) DJ Damian Einstein has been found. He now works for his father's Annapolis, MD., progressive rock station WXZL FM 103.1. After more than 20 years at WHFS Damian took an unexpected leave of absence saying he was tired of tolerating a hostile working environment. WHFS management won't comment on what problems, if any, they have with Einstein. Washington area fans of Einstein won't be able to hear his Monday/ Wednesday/Friday 10 a.m. to 2 p.m. show though, due to WXZL's weak signal. However, station owners hope to work out a deal with a Washington area station to have its signal rebroadcast in our area. WXZL will also be changing call letters soon to WRNR.

WJFK FM 106.7 (Talk format/Jazz nights & Wknds) night time jock The Greaseman will soon be on the NBC miniseries "Jack Reed: A Search For Justice". The Greaseman, whose syndicated show originates from Los Angeles, will play a the role of a biker in the three part miniseries. The Greaseman is the former morning man of WWDC FM 101.1 (Album rock format) where he spent about 8 years at the station.

WTOP AM 1500 (News format) has hired a new general sales manager. He is John Coulter who works in Los Angeles for Evergreen media. He is expected to start at the station in mid October.

Congratulations to Mac Daniels, Music Director of WMZQ FM 98.7 (Country format). Mac is the 1994 Music Director of the Year for

a major market country radio station according to Billboard Magazine.

And WMZQ has named Seth Warner morning man at the country station. Seth replaced popular morning hostess Sandy Weaver who left the station this summer to be with her husband in Georgia. Seth has been at the station for 6 years now.

RUMORS, RUMORS. The Tuesday, September 27, 1994, Washington Post radio column by Jeffrey Yorke mentioned the rumor about Viacom possibly selling WCXR FM 105.9 (Classic rock format). Viacom's Gary McCartie says that no sale is planned at this time but, we've heard that line before. The station has struggled for the past year and a half. It was last year when rumor got out that former owner Westinghouse broadcasting would change the format from classic rock to country. Then Viacom, owners of country formatted WMZQ, gave a Texas station to Westinghouse in exchange for WCXR.

Note the **NEW** address, please.

Hope so! The FCC has adopted the C-QUAM standard and stations
using the KAHN ISB system must stop using it (though I don't have the
effective date of the rule in front of me!). Stations can, however,
continue to use the Kahn PowerSide, which reduces the level of one of the
sidebands, reducing interference to stations on the next channel. It
also encourages people with non-synthesized tuning to tune away from the
reduced sideband, reducing interference to the PowerSide station AND
increasing high frequency audio response, since the IF is then dedicated
to one sideband instead of two. It seems, however, that due to the
non-flat IF response of receivers the carrier level would be attenuated
in relation to the sideband (though maybe this isn't a problem with just
one sideband?) resulting in considerable distortion when received on
envelope detectors.
Anyone out there running PowerSide? Comments on it?

I see two main problems: First of all, FM's vastly superior noise immunity and co-channel interference rejection would mean that the new service would be inferior in these important respects to the old service. A tough sell. More importantly, such a conversion would render obsolete the hundreds of millions of FM receivers currently in use. This will *not* fly...

I agree, AM is very spectrum efficient, especially QAM or ISB.
However, just as I now consider energy and matter to be two different
forms of the same stuff (we can convert back and forth, but the sum
remains constant), I consider bandwidth and s/n to be two different forms
of the same thing. We can combine the two to get a "total information
content" in bits per second (assumming a Bit Error Rate of zero; if it's
non-zero, we need to reduce the channel capacity some to allow for error
correction). With AM (with an ideal product demodulator), the signal to
noise ratio out of the demodulator is equal to the s/n of the channel.
With a "conventional" FM demodulator, the s/n out of the demod is
improved over the channel s/n by 3 beta squared where beta is the FM
modulation index, once the channel s/n exceeds 12 dB. For example, with
a modulation index of two and a channel s/n of 12 dB, we'd expect a
demodulated s/n of 48 dB.
So, what we're doing with FM is trading bandwidth for s/n, which
gets back to the concept of bandwidth and s/n being two forms of the same
thing (info data rate). The same concept is used to get low error rates
at moderate speeds in very wide band transmissions of spread spectrum.
Perhaps we can think of FM as the original spread spectrum technique!

In order to get the needed responce using AM at 100Mhz we would need 40
or 50 khz spacing minimum with something like 100 Khz being more
practicle from an receiver design. Remember that AM is susepatabel to
man made noise. Multipath would be much more unplesant using AM. Stereo
seperation using AM stereo is nothing like FM. There's just noit the
room in the carrier to encode enough info. Finally many FM tansmitters,
BE, Harris, Continital and other use Class C RF Amplifiers which would
not pass AM. In reality FM is much simpler to implement at 100 Mhz and
ge the 15 to 40 Kw transmitter output powers used today. Antenna height
should not change as 100Mhz is still LOS reguardless of mode. Finaly
Antennas and Transmission lines would have to be beefed up. A 25Kw
transmitter on 100.1 Mhz running typical AM +125% / -100% modulation
would need 6" line to hold the Voltage peaks of 1250V at 25A's.

Hey, I'm no engineer...but I have been in broadcasting for better than 20
years...and I currently work for the first radio station to broadcast in
AM Stereo. I would match the sound with any FM station...with a god AM
Stereo receiver, you ca't tel the difference. We tested it with the TV
engineers at our station...they couldn't believe it. So there is really
no reason to move AM to the FM band...ity would really screw up the
current FM allocations...broadcasters would scream.

BUT --- what IS being developed is something even better than AM
stereo....Digtal radio. Testing is being done now...and the quality is
....well... CD pure. AM statons could broadcast off the same
tower...either simulcast current programing or broadcast even something
else...on the AM band...digitally. THAT's somethng to look forward to.

One advantage of FM is something called "capture effect". If you have two co-channel radio station signals, if one is just a few dB lower than the other, your receiver will be "captured" by the stronger signal and you won't know that there is even a co-channel out there. If it was AM, you'll hear quite bad crosstalk interference (ever do DXing the MW AM band at night and hear several distant stations on one freq?).

You could also say that the "capture effect" captures your receiver away from ambient noise. But if the signal levels are too close in strength, capture fails and you get a mess.

Using a directional FM antenna (like the one Radio Shack has) can help increase the strength of your favorite station, and reduce the strength of an annoying co-channel station, thus allowing the capture effect to work for you so you only hear your favorite station.

Don't forget that TV Broadcasting uses AM (minus one sideband) for the
visual portion of the signal.

3997. Re: What about AM on the FM band?

There are two basic advantages to FM as a method of modulation over AM, regardless of what frequency band is used. FM is less susceptible to noise, since manmade and natural noise signals tend to vary in amplitude more than they do in frequency. Also, FM receivers can take advantage of the "capture effect" to suppress intereference when more than one signal is received on a channel. AM radios can't do that.

To my knowledge there have been two attempts to give an AM (actually single sideband) receiver a capture effect. One was the ACSSB (amplitude companded single sideband) mode promoted by the American Radio Relay League a few years ago as a way to conserve spectrum. The other was an SCA transmission method I saw demonstrated that used SSB subcarriers with something like dbx encoding (of course, a variation of this is used to transmit TV stereo L - R information). As far as I know neither of these was a success (although TV stereo does just fine).

I don't know of any way to demodulate AM, stereo or mono, that will give results as good as wideband FM. I understand, though, that some folks in the defense industry have developed a chip that will digitize a modulated carrier, extract the modulation by digital computation, and produce a clean audio signal. I suspect it's a bit too expensive to mass-market.

These same folks tell me they can digitize a modulated FM signal and reproduce the audio perfectly, CANCELLING THE MULTIPATH DISTORTION! Who needs DAB?

It seems that this legislation would certainly have a hard time
passing if it referred to the print media... One thing "carriers" could
do would be to require ALL users to be 18 years or older. Based on the
amount of traffic and the diverse origin of it all, I can't see a carrier
editing everything available saying "this is ok for kids, this is not".

In short, yes and no!

Does the government regulate the content of the Internet? Sure there have been some instances of censorship (I've only heard rumours and don't want to burn a lot of bandwidth on the past). I believe that the Internet will form a significant part of the infobahn and thus will be beyond much effective content regulation.

As for other delivery mechanisms, most content in the past has been broadcast. I believe that much of the infobahn content will be more niche oriented and viewed/used on demand. Okay, the government seems to be saying that this is broadcast, even though only I would be able to see the content. It seems that this is more like a telephone call ... one-to-one. My assumption is that telephone calls (the content) are not regulated.

Of course the government will implement some censorship system to satisfy the public and special interest groups ... and to keep some its employees employed. The key question is whether this censorship will be effective?

>
> Q: Is one's right to freedom of expression unreasonably limited
> if one is only allowed to speak under cover of darkness?

Good question ... the infobahn knows no time or darkness, it's something people must create the illusion of. Also, the infobahn will be trans -national, -continent -etc ... there time will have less meaning. An analogy would be to short-wave radio (broadcasts), but I don't know how they are regulated.

As for the freedom of expression side of this question, I'll have to defer to those more knowledgeable.

Can anyone help with information about Goodtime Oldies, the national Canadian music programme heard through the night on many Canadian stations.

Is there a flagship station?
Address or phone for GTO?
Is a list of affiliates available? (I've heard GTO on CJYQ 930, CHNS 960, CHTN 720 and CFNB 550)

BTW whilst I'm on the air can I pose same question for the Canadian Country Music Radio network, which I've heard on CJFX 580, CHSJ 700 and CHOO 1390.

It's three ownerships ago. WNAP in the 70's was a station
programmed by people who were on the leading edge of what was
then a new idea for FM.
Buster Bodine (Michael Hanks---Brother of WIBC legend Chuck
Riley) has a
very successful carrer in voice overs. The rest of the people
that created that station are currently involved in Boston's
WCLB. Other spinoffs of the idea were WRMF in Florida and KVIL
in Dallas, formatically different stations but with the same
underlying philosophy.
I'll bet that Emmis the current ownership has not thought to
bring back the
Buzzard as a logo (before WMMS there was WNAP's Buzzard, and
how it
got to Cleveland is the Charlie Kendall story). WNAP started
out as this bad
top forty station. Chris Conner at WNAP was a carefully
structed act. Nothing that occured at WNAP (the fantasy
concerts, the year 2093 etc) was not carefully planned.

Hi. I am a radio & TV traffic reporter in Boston. We also have an alternative to waiting for radio & tv reports. We have a FREE telephone service in the area, that will get up-to-the minute traffic & transit info for Eastern Massachusetts/Greater Boston. Anyone in the area is encouraged to try it 617-374-1234. Once again it's FREE SERVICE (excluding any telco long dist charges). It's sponsord in part by tha Mass Dept Of Transportation. The cool thing about is that YOU decide what route you want info on by pressing your touch-tone phone buttons. YOU decide when you want to hear the info...no more waiting & hoping that the guy on the radio (it could be me!) talks about your route home.

Source record: 37661

* Thanks to George Knight here's the final update on a new
AAA WBOS 92.9 FM(aka the Earth Station) weekday line-up :

David O'Leary 6am-10a
Liz Solar 10am-3p
Carolyn Morrel 3-7pm
Dick Pleasants 7pm-12a
Julie Devareaux 12-6a

Doug Bruce was doing overnights while Julie Devareaux was covering
7-12a shift until the arrival of Dick Pleasants last week....

* AOR WCGY-93.7FM was taken over by American Radio Systems early
Tuesday morning(9/27), just a couple minutes after midnight. ARS
fired all the members of on-air staff including Mike Morin, Christine McVie,
Harvey 'The Whar Machine' Wharfield, Andy Carlson, David Michael
and most of the off-air staff.

(Scott F. will probably provide a more complete write-up on the last
30 minutes of 'CGY since he's got most of it on tape. :-)

I only caught the last song which was Beatles' 'Carry That Weight-
The End' from Abbey Road after which ARS began some on and off-air
testing...

Currently, 'CGY is in the automation mode playing AOR tunes with
emphasis on popular modern rock/AP artists(Counting Crows, Pearl
Jam, Blind Melon, Green Day...). They haven't pulled any ads which
is probably an indication that they'll stay with rock with an AP
edge(watch out AP WFNX 101.7! :-)...Stay tuned..

-Mark

Captain Whammo (Jim Channel (sp?) pronounced like the cologne) became a fundamentalist Christian and was on WCFL when it became a right-wing Christian station in the early 80s. They were, of course, bought out by the Loop...on his last day he & Chris Stevens were telling people not to listen to the garbage that would be on the station after they were gone (which was pretty impudent considering that WLUP was GIVING them that day to say goodbye to their audience) and to pray for the conversion of Steve Dahl. I have no idea where Mr. Channel is now.

4009. Re: CAPTAIN WHAMMO!!!!!!!

Newsgroup: rec.radio.broadcasting
Date: 1994-09-29 19:51:12 UTC
From: bdsteve@aol.com
Message-ID: <36f5rg$61c@vixen.cso.uiuc.edu>
Source record: 37664

In article <36b6cq$4v3@vixen.cso.uiuc.edu>, ar577@freenet.carleton.ca (Daniel Shields) writes:

:Does anyone have the 411 on Captain Whammo, who did evenings in
:the mid 70's at WDHF (later called WMET) in Chicago. Last I
:heard of him was in the summer of 1978 when he went to Vegas,
:and, according to Billboard, freaked out because of the lack of
:trees and ended up spinning Mozart, Bach and Brahms in
:Bloomington, Indiana.

Don't know about treeless Las Vegas or classical in Bloomington...but here is what I do know.

Captain Whammo (real name: Jim Channell) became a Christian well over a decade ago. In the mid 80s Jim was afternoon personality and program director of a Christian radio formatted WCFL in Chicago. After that he spent a few years in Ft. Myers Florida doing the same thing for another Christian station there. Most recently, Jim has moved north again, to South Bend Indiana, and is working for a small Christian station there...WHME-FM. (So there is an Indiana connection to this at least!)

Brian

4010. Buffalo/Toronto Radio Watch(9/30)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-01 10:32:08 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <36jdr8$n5n@vixen.cso.uiuc.edu>
Source record: 37665

Happenings in the #40 market:

*First,some corrections of note:David Letterman's top 10 list airs on WBEN(NewsTalk 930)at 6:20 & 8:20,not 7:20 as I said last report. I also meant to say that CHOG(AM 640)in Toronto gave away lots of $$$,not lost. Remember who corrects his errors and who doesn't...:)

*To business:
*Larry Silver,last with CFTR-AM(680 News),has joined CJEZ(Z 97.3)as its AM drive news anchor.

*WGR sports reporter Barry Buetel has added part-time sports duties at WKBW-TV(ch.7,ABC). He may be fill the position left by Brenda Brenon,who resigned last month to move to Boston with her new husband,Boston Globe hockey writer Kevin Dupont.
Speaking of WGR,put this in your Stupid Statement file:Rocco Pendola, filling in for the vacationing Art Wander,said earlier this week that the NFL Sunday Ticket package also covered the Monday night game as well. For Rocco's information,*it doesn't*. It *only* covers Sunday afternoon NBC & Fox NFL games-the Sunday night ESPN/TNT games and the ABC Monday night game aren't covered.
Pendola seems to be acting a lot like Wander,hanging up on callers-among other things.

*Even if the NHL locks its players out,there is still hockey being broadcast. CJRN(710 in Niagara Falls)is back as the station carrying the Ontario Hockey League's Niagara Falls Thunder,with Phil Lester calling the action. (BTW,while DXing last night,I caught the Windsor Spitfires on CKLW-800 in Windsor,Ont.) This could put WGR in a bind,as they carry the Sabres. It's possible that they might pick up Rochester Americans(their top affiliate)games off Sports Radio 990-WCMF in Rochester.

*WBNY(91.3)aired a special on bilingualism in the U.S. Monday night as part of All-Talk Monday(which yours truly handled in 1991-92). Hosted by Cesar Cabrera(an aide to Buffalo Mayor Anthony Masiello)with a panel of guests(one worked on a Spanish-language radio show locally),the show was broadcast live from Buffalo State's Assembly Hall. On a technical basis,it was good-the only drawback was when phone calls were taken,then feedback reigned(due probably to the fact that WBNY is also based in the Student Union,and speakers for the sound).
I felt that it was dry at times,but also interesting. Callers didn't get much of a reaction from the panel,save for one caller who complained that the show was biased,wondering why they didn't learn English.(Gee,I wonder what shows she's been listening to...:))

*WBEN seems to have made some changes,giving Gary McNamara an extra hour to his show-now running to 12noon. It moves Dr.Dean Edell's show to 6pm-dropping 1 hour from Buffalo's Evening News.

TTYL...

C.K.G.(soon to be on more computer networks!)

[Last Update 9-29-94 with the addition of the WWW page. See below]

The AIRWAVES Radio Journal (Formerly published as the Internet Radio Journal) is a periodic email digest dedicated to discussions about all facets of domestic broadcast radio.

Subscriptions to Airwaves are free, and available to anyone who wants one, and who is equipped with Internet (or Internet gatewayed) email service. While the subscription is free, some commercial systems may charge a small fee for reading Internet email. Currently all major email providers have Internet access to one degree or another. Check with your local provider for details.

In addition, all articles in AIRWAVES are ported to and from the Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded in April of 1992, as a means to further discussion of topics pertaining to 'domestic broadcast radio'.

By domestic, we mean broadcasts which are intended, primarily,for reception in the same country/nation in which they originate. AIRWAVES and rrb, are international in scope, and the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

```

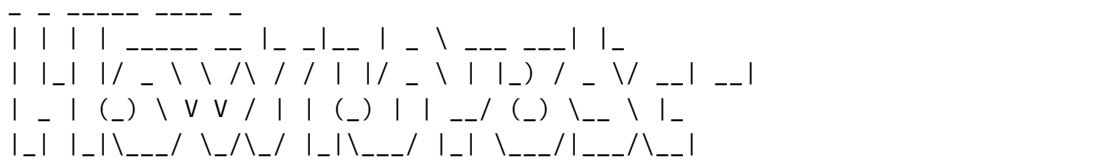
___) | |_| | |_) | | __/ (__| |_\__ \
|____/ \__,_|_.__// |\___|\___|\__|___/
|__/
```

If it has to do with broadcast radio, and not _specifically_ international shortwave, it is welcome here. Occasionally an article which IS primarily about shortwave will be posted if the subject seems broad enough that the readership of AIRWAVES/rrb might be interested, or be able to assist the poster in some way.

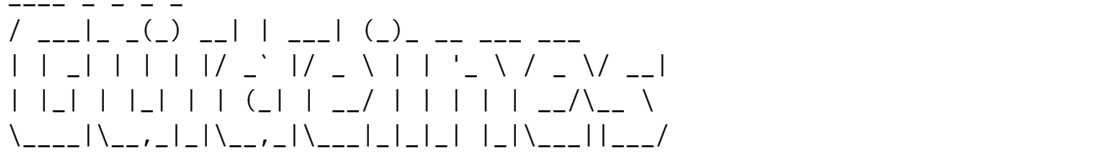
Generally, if a subject 'seems' like it would be of interest to the broadcasting community (which includes those involved in creating, transmitting or listening to broadcast radio) will be published. These subjects include (but are not limited to)..

1) Formats and programming.
2) Engineering & technical matters and interests.
3) DXing (long distance reception) on the standard broadcast bands.
4) Community broadcasting.
5) Pirate broadcasting (especially non-shortwave, domestic pirates).
6) Legislation affecting the industry, and its 'offspring' industries.
7) Technologies affecting the industry, and its 'offspring' industries.
8) General station information. Who is going on and off the air, and why.
9) Radio's historical and cultural significance.
10) Old-time and vintage radio programs and talent
11) Radio's current and future trends.
12) Political and news coverage and its impact.
13) Job openings and help to those seeking work in the industry.
14) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
15) The International Scene and how broadcast radio is shaping up in the various nations of the world.
16) Gabfesting and all matters of general interest to those involved in, or interested in, the general subject of domestic radio broadcasting.



1) Post via rec.radio.broadcasting as you would any other Usenet group. Your articles will find their way to AIRWAVES as well.

2) Email your article directly to articles@airwaves.chi.il.us. Using other addresses to post will needlessly delay your article. You might consider installing an alias in your mailer for emailed articles, especially if you post a lot of stuff. See the end of this file for all applicable addresses.



* If you post a question that is of potential interest to others in
the group, ask that replies be posted, instead of emailed to you.
We all would like access to the answers. If you do receive email
replies, post a summary to the group. This forum is only as good as
it's posters and readers. Keep the info flowing.

* If you email an answer to a question, send a Cc: to the group's
submission address, articles@airwaves.chi.il.us, so we can all learn
from your knowledge. When id doubt... POST POST POST! :-).

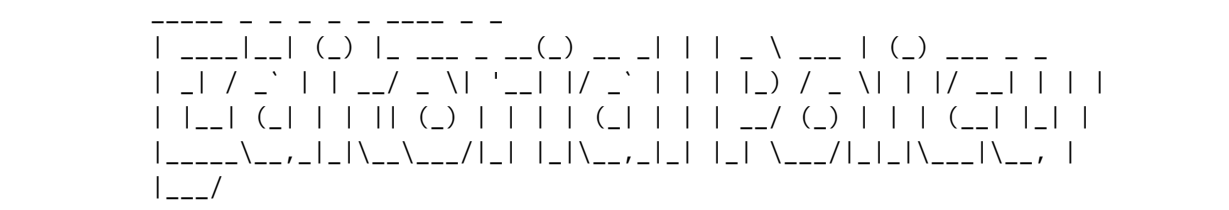
* PLEASE edit quoted text to a minimum! Most users of this
group are fairly regular readers and do not need, or want, to read the
entire text of a recent article in every reply. Of course, if the
thread is not current, more quoted text may be appropriate. Use
your brain (and your editor :->).

* If your message is basically a one or two line "Me Too" or "I disagree"
post, consider emailing it to the poster. However if you go into
some details as to WHY you agree or disagree, then please post it.

* If you are replying to an article in the Airwaves Radio Journal,
simply use your mailer's reply feature, and again, edit the text to
ONLY the article you are replying to, and include the article's name
in the Subject field. Subjects of "Re: Airwaves Radio Journal" are
confusing and may result in needless delays.

* If you post about a local radio station or personality, realize that
most of the readers will know little or nothing about it.
Offer a little background, like location, station format, type of
music played etc.

* Last but not least, avoid flames and personal insults. AIRWAVES/rrb has
a high percentage of broadcast professionals among it's readers. We
try to maintain a reasonably high brain to B.S ratio here.
It is fine to disagree, but please stick to the issues and avoid
personal flames. If you *must* make personal attacks, do it in email.



AIRWAVES and rec.radio.broadcasting, are _very_ loosely moderated.
While not specifically a "Broadcast Professional" (BP) group,
AIRWAVES/rrb does have a large number of "BP's" among its readers.
Therefore we ask that posters to this group at least make an effort
to adhere to some basic guidelines of courtesy and intelligent
discourse. We have discussions here, not shouting matches.

Normally, all legitimate articles will be posted to the group.
However, the moderator/editor reserves the right to edit or refuse
any copy for any reason. Please note that it is not routine

practice to edit or to otherwise modify articles. Usually such editing is limited to excessive .signatures and in some cases overly quoted text. On rare occasions, a brief (less than 6 lines) "Moderator's Note" may be appended to an article for clarification or other reasons. These appends are kept to an absolute minimum and are always placed after the poster's signature or (*very* rarely) at the beginning of a post.

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the stated charter and scope of the group (domestic radio broadcasting) or pertain to 'non-broadcast' radio services, such as cellular, two-way, ham, citizens-band, and such.

* Articles that are too long for submission as-is. If your article is longer than 10k (10,000 bytes), consider splitting it into two parts, or better yet, edit it down to a more reasonable size. Check to see if you can eliminate any quoted text. If you believe that your article is of an especially urgent or informative nature, and you also feel that you cannot reduce the size without damaging the content, let me know and I will try to work with you.

* Articles which are merely multiple repetitions of an identical answer which has already been offered several times.

* Articles which contain 'miles' of quoted and multiple quoted text followed by a few lines or less of original text. Please edit quoted text to a minimum and try to adhere to the *50% rule*, that is 51 (or more) percent of original text to 49 (or less) of quoted text. If the thread is not current, more quoted text is appropriate. Only the worst offenders are omitted, usually I will edit quoted text myself, when I have time.

* Articles that solicit for funds or contain blatant commercial content. (see next section on this)

* Articles which are unwarrantedly offensive, abusive or contentious for the sake of contention. Personal attacks and ridicule are considered such. Discussion, even argument, of issues and opinions are welcomed and encouraged. However personal attacks on individuals (no matter how justified you might feel they are) are not part of our charter.

Note: All articles are auto-replied to as they arrive, to indicate that we have received them. Each piece of mail to the submission address(es) will generate a separate auto-reply message. Most articles which appear reasonable and on topic are published in the Journal/newsgroup. However the Editor/Moderator reserves final judgment on matters of acceptance or rejection of submitted material. When possible, rejected submissions will be returned with a note explaining why the submission was rejected.

* * * * * * *

Articles which appear to blatantly solicit funds from readers
for a 'cause' or a 'project' are generally rejected.

I generally * DO * accept..

o Product reviews: ... provided they are objective and informative and contain
little or no 'motivational' language. Prices should be reduced to a
price 'range' and all inquiries must be directed to the poster -or- an
address of the manufacturer/distributor.

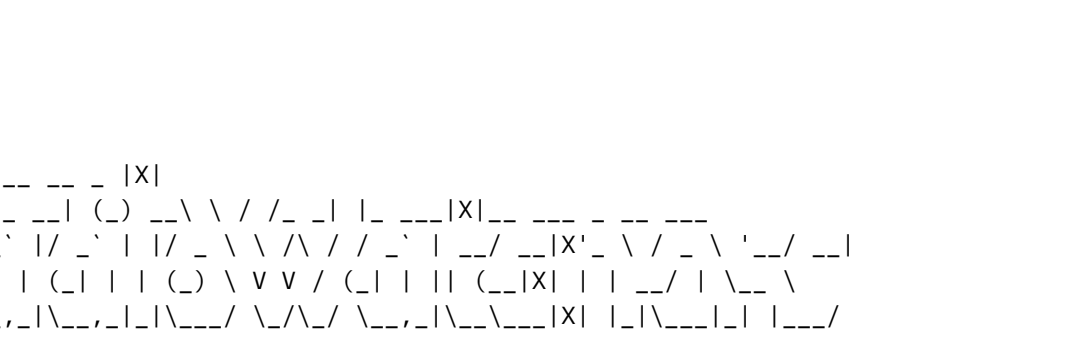
o Personal items: Such as old time radio tapes, a specific piece or two of
equipment etc. sold at a low, hobbiest price.

o Radio-related items for barter/trade: Self explanatory.

o Announcements for non-commercial workshops, conventions, radio related
flea-markets, etc. Pricing <other than small admission charge> and other
specifics (like 'we take your credit card') are considered commercial
content. If you want to publicize here, then you must deal with the
followup mail/calls yourself.

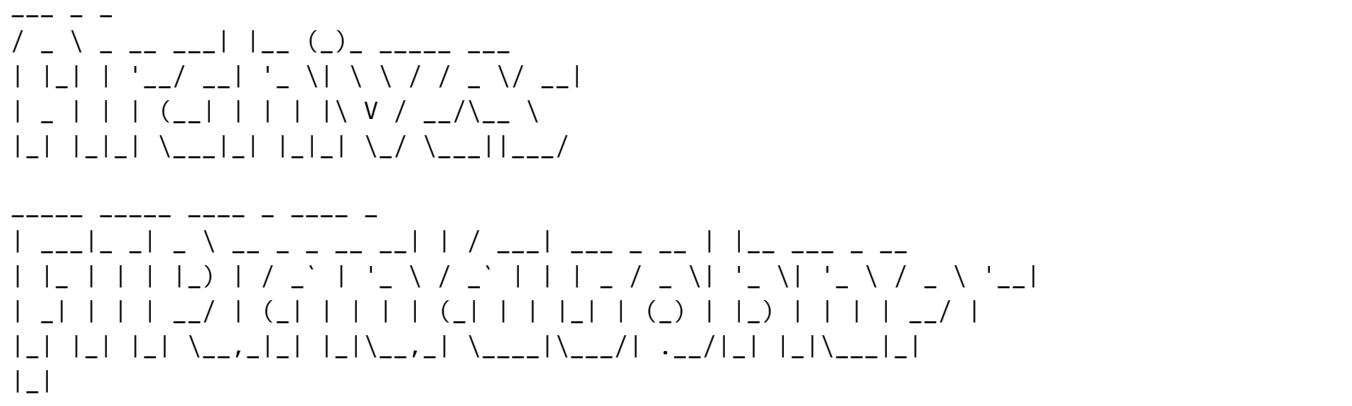
o Personal recommendations of a product/company that appear legitimate.
Especially when it is in response to another poster's inquiry.

In general I will take an 'err on the side of permissiveness' approach to
this. In other words, if your article is credible, informative, reasonably
intelligent, broadcast related, and has something to offer, I will do what
I can to pass it along to the readers. I will only reject the worst of the
lot. the rest I'll try to edit as necessary.



AIRWAVES has a program called RadioWatchers, which is open to any
readers who are interested. Basically RadioWatchers are volunteer
staff reporters who write about the goings-on in their market or area.
RadioWatchers differ from regular posters in that they are considered
part of the AIRWAVES organization, are given priority placement in
the AIRWAVES Journal.

RadioWatchers are expected to maintain at least one posting per month,
more as news warrants. For a complete file on the RadioWatcher
program, send email to radiowatcher@airwaves.chi.il.us and tell us
about yourself.



Archives of past Airwaves Radio Journals are kept for anonymous FTP at the Internet site radio.aiss.uiuc.edu . They can be found in the directory /misc/rec.radio.b-cast. In that directory you will find several sub-directories. They are plainly labeled INTERNET_RADIO_JOURNALS (which contains most issues through 399) and AIRWAVES_RADIO_JOURNAL which contains issues 400 to present. The Journals are arranged in sub-directories of about 100 issues each. In each main sub-directory is a file called 00-INDEX, which contains the issue numbers of all Journals, and the title of each article contained within. The dated every week or so. To determine when the last update was, look at the date on the file called "<-Archive Last Updated At".

If you need help with FTP, write me.

Journals are in Unix compress (.Z) format. The Unix compress utilities are available free from many FTP sites for Unix, DOS and Macintosh platforms. Remember that compressed files should always be sent using the "binary" mode. If you have trouble accessing anything, or if you have any questions about the archives, send email to rrb@radio.aiss.uiuc.edu. If you appreciate the archives, send your notes of appreciation to the site admin, C. Lance Moxley <lance@radio.aiss.uiuc.edu>. He has been very gracious in his willingness to store our archives on his machine.

You may access the archives via gopher, if your site is so equipped. Gopher is a very fast, easy, menu-driven system requiring no remote logging in, and which will deliver the issues in uncompressed form, as well as permitting you to read or scan the files before downloading them to your host system

To use the gopher system, type the following at your shell prompt...

gopher radio.aiss.uiuc.edu 7070 <return>

... then follow the simple menus. It is really easy. If you can use
a mailer or news reader, you can easily use gopher.

Note that our gopher has a non-standard port number (7070) You must
type the gopher command exactly as it appears above.

```
__ __ _ _ __ ___ _ __ __ _
\ \ / /__ _ __| | __| | \ \ / (_) __| | ___ \ \ / /__| |__
 \ \ /\ / / _ \| '__| |/ _` | \ \ /\ / /| |/ _` |/ _ \ \ \ /\ / / _ \ '_ \

   \_/\_/ \___/|_| |_|\__,_| \_/\_/ |_|\__,_|\___| \_/\_/ \___|_.__/
```

Yup, now AIRWAVES/rrb has a WWW page. It has links to the archives of
AIRWAVES, Kid Media and the new OLD TIME RADIO newsletter called OTR.
It also has dozens of other communications and non-communications
links. If you can use the web, please give it a try. It is much
easier than FTP and more versital than Gopher and FTP put together.

We welcome new links to add to the web page.

To access the page, point your browser (Lynx is good cause there are
no images as of yet) to this address...

http://radio.aiss.uiuc.edu/~rrb

Please report any problems or inactive links.

```

```

Send ALL requests to rrb@radio.aiss.uiuc.edu

A poster has supplied us with a three part file of media fax numbers.
You may obtain them via the usual FTP or Gopher means, or via the
email server. Follow above directions, but put one of the following
commands in the Subject of your mail. We take no responsibility for
the accuracy or currency of the information. One file request
per letter. If you want all three, send three pieces of mail.

FAXDIR-1 - - - - - - Organizations beginning with letters A - H
FAXDIR-2 - - - - - - Organizations beginning with letters I - M
FAXDIR-3 - - - - - - Organizations beginning with letters N - Y

Soon we will be expanding this service to permit email access to the
entire archive site. Stay tuned for further developments.
Remember that only mail addressed to the archive
address will be processed by the server.
- rrb@radio.aiss.uiuc.edu
-

-=*=- ENJOY THE GROUP! -=*=-

I hope you enjoy the group. Remember, it is only as good as it's
contributors. So don't be shy :-). If you have a question, or answer,

even if you are not sure, post - post - post.

I am open to suggestions on how to improve this group. Send them via e-mail to wdp@airwaves.chi.il.us -or- rrb@radio.aiss.uiuc.edu.

Thanks to all who have, and continue to, participate.

We now return you to your regularly scheduled newsgroup :-).

Scott D Fybush in RadioWatcher: I-90 Boston<->Rochester
Mentions the follwoing:

<WORCESTER: After some initial testing, still no further sign of
<WCRN-830. Unknown when they'll get it on the air. WCHC-88.1 is
<back from its summer recess. WVEI-1440 is about to change calls
<to WWTM, "The Team," and do its own mostly-syndicated sports
<talk.

This morning at ~8:10 during IMUS, an ad for an adult video store [with over 4000 commercial and amature videos for sale and rent] on rt 146 in Milbury MA, an ad for Rotmans Furniture, Worcester and an ad for the Business to Business Expo at the Worcester Centrum cut in. Back to regular program in progress with no announcement. Same thing at 8:15, same customers, middle ad different. Still pushing WEEI Boston while not mentioning WVEI. Maybe someone is getting those ad $$ in early... { I have one car with a manual tune radio. Today was the day to drive it so I couldn't cross check with WEEI or WWRX Providence.

We are a commercial, non-profit, student-owned and student-run
radio station in Charlottesville, VA. At our most recent board
meeting we approved a budget of just over $121,000 for 1995.
This is accomplished by only having one paid employee, not
having breakliners, and lots of broken equipment. It is not
the ideal way to run a station, but we do OK. Feel free to
contact me with any other questions.

In article <36f5q8$5uh@vixen.cso.uiuc.edu>, honzman@aol.com (Honzman) writes:

> BUT --- what IS being developed is something even better
> than AM stereo....Digtal radio. Testing is being done
> now...and the quality is ....well... CD pure. AM statons
> could broadcast off the same tower...either simulcast
> current programing or broadcast even something else...on the
> AM band...digitally. THAT's somethng to look forward to.

Fred's hit it square on the head. If the owners of these little tiny AM stations can just hang on, their properties will be worth 10 times as much and more in the near term. Just ask Viacom. I used to work for them, and it's in their business plan.

It's the 1's and the 0's...they don't have to be as clean as the sound they represent; as long as you can tell them apart, you can digitize them into something that sounds great. Imagine tuning in to DigitalAM, and having *no* multipath, *no* picket fencing, *no* cross-channel interference, and delivered on a stream of data that will cause then out-of-date conventional AM radios to sound like an untuned cable station...loud static, that is actually a high speed stream of...1's and 0's.

I can't wait...what a comeuppance for those FM pukes! :)

4016. New England Radio Watcher: WCGY -> "Eagle 93-7"

Newsgroup: rec.radio.broadcasting
Date: 1994-10-01 10:32:19 UTC
From: fybush@world.std.com
Message-ID: <36jdrj$n5u@vixen.cso.uiuc.edu>
Source record: 37671

As of 3pm Friday, WCGY has adopted its new format. Turns out to be 70's rock -- just like "ARRO," but they're not paying CBS for that name. Instead it's "Eagle 93-7," with calls to be named later. (For now the legal ID is "This used to be WCGY Lawrence Boston. Now it's EAGLE 93-7.") No jocks yet; they're launching automated and will presumably go live later on.

They have a sense of history, too...one liner mentions "Music from the days when BTO, ELO, and 'RKO all rocked." (WRKO-AM 680 was the top-40 giant in town from 1967 until the late '70s. The new "Eagle 93-7" is co-owned with WRKO under the American Radio Systems flag.)

Prime competition is Infinity's WZLX-100.7, with a slightly broader repertoire of classic rock. This move also stops CBS from taking its oldies WODS-103.3 to ARRO.

I have the last 15 minutes of the automated WCGY and the first 75 minutes of the new Eagle 93-7 on tape, if anyone wants a trade...

On another note: Worcester's 1440 AM did not change from WEEI Boston-simulcast WVEI to local/satellite sports WWTM Friday morning as scheduled. Instead the switch will happen Monday morning 10/3. Just what I needed...I'll have to drive 30 miles west _again_ to grab the switch. In the meantime, 1440 is NOT ID'ing at all...just a straight simulcast of WEEI-850 Boston, with no legal ID other than "WEEI Boston." If anyone at the FCC still cared, 1440 could get busted.

News-Moderator: Approval required for posting to rec.radio.broadcasting
Lines: 20

Are there any readers of this news group who are 40 or over?

If so, what format do YOU like? Have YOU ever received a ratings diary?

Is there anything on the radio that YOU like? If so, where and what?

What yould YOU like to see in a format?
Assuming you could have it, how would you get the message to the advertisers
that YOU and YOUR GENERATION are out there, listening and buying since we
know that such a format probably won't do well in the ratings (at least
around here - in the Boston area).

..or am I the only one in this area (Eastern Ma) who can't find anything
on FM that I can listen to for more than a few minutes.

Steve (just 40) Cloutier

FROM NEXUS-IBA, in Milano, Italy:

** "HELLO THERE" Special Edition of Oct. 2, 1994 **
(on the air between Oct. 1 and Oct. 7, 1994)

** VOA's "120 Day Plan" for the consolidation of International Broadcasting **

| As explained in an interview with VOA personnel, this plan could bring to
| the closure of VOA and RFE/RL sites around the world. Resources will be
| diverted to make more emphasis on the programme production and distribution
| by other media other than VOA's Shortwave stations (transcription, DBS,
| leased time on local AM and FM stations).

Hi There from Milano, Italy:

We are back on the air with our regular listeners' contact program after the summer break. Your comments and receptions reports, and questions are always welcome at our PO Box address or via e-mail for the usual edition of the "Hello There". This week we cross the Atlantic, and speak with John Vodenik, Technician and Unions Representative at VOA relay station in Bethany, Ohio, who explains what VOA may have in mind for the future, as far as Shortwave transmissions around the world are concerned.

Official VOA representatives in Washington declined to comment on the plan, so we are passing on what news is available at the moment, hoping that more information becomes available "first hand" in the coming weeks.

As Jeff White, of Radio Miami Int'l said in an interview on the HT a few months ago: "similiar decisions may be more than welcomed by smaller stations like ours, as this will open more HF frequencies, and we will be able to attract more listeners on shortwave" (grin).

Surely, we feel sorry for all those who may loose their job, and wish they could continue broadcasting to the world.

--

All that on the weekly fifteen minute "Hello There", the IRRS-Shortwave's listeners mailbag programme, on the air over IRRS-Shortwave on 7,125 kHz starting Saturday Oct. 1, 1994, at the following times (all times are CET, Central European Time = UTC+1):

DAYS Central European Time UTC+1 FREQ. 7,125 kHz
----- --------------------------- -----------------
Saturday: 07:15, 09:15, 15:15, 17:00 (first edition)
Sunday: 07:00, 09:15, 15:30 (repeats)
Monday: 07:15, 08:15, 20:00 (repeats)
Friday: 08:00, 13:30, 17:00, 20:00 (repeats)

_____
"H E L L O T H E R E !"

One of NEXUS-IBA's most popular non-relay programmes, a listener contact show where we acknowledge reception reports and comments on programmes, as well as present items of general interests to the Shortwave listeners, including books and magazine reviews. We also encourage active listener participation by inviting everyone to send us a cassette recording telling us about themselves and where they live. Or, as an immediate means of filing reception reports or personal participation, our telephone service is available 24 hours-a-day, seven days-a-week (+39-2-266 6971). Like all Shortwave broadcasters today, IRRS-Shortwave very much encourages listeners to let us know how they are receiving us, but equally importantly, we also need to hear their programme comments, which are very valuable in helping our members produce better and more attractive programming.

73,

Alfredo E. Cotroneo

4023. Six AM radio stations shut down in Quebec

Newsgroup: rec.radio.broadcasting
Date: 1994-10-01 10:32:34 UTC
From: rene@igs.net
Message-ID: <36jds2$n6e@vixen.cso.uiuc.edu>
Source record: 37678

Six French-language AM radio stations in Quebec shut down today without warning at 11:00am, a result of the merger of Quebec's two big networks, Le Reseau Telemedia and RadioMutuel.

I don't have the list of stations that shutdown (or "consolidated their operations"), but one of those stations is CKCH-970-Hull (10kW/5kW), which shut down after 61 years of operation.

Apparently, the remaining stations from Telemedia-Radiomutuel will be starting a complete new schedule on Monday.

I am currently watching SportsPlus Extra on the Quatres Saisons television network, and they are doing a special phone-in asking the question, "The fusion of Telemedia-Radiomutuel: Less service for the radio listener?" My French is not that great, but most of the viewers who called in seemed to agree that the merger will hurt radio listeners the most.

I'll try to get that list of stations posted, if no one else posts it sooner.

4024. WCXR Classic Rock... Gone!

Newsgroup: rec.radio.broadcasting
Date: 1994-10-01 10:32:34 UTC
From: mh5260@cutter.ship.edu
Message-ID: <36jds2$n6f@vixen.cso.uiuc.edu>
Source record: 37679

1:00 AM, October 1, 1994.

I just turned on WCXR (licensced to Woodbridge, VA) here in Washington, DC and they have changed their format. No more classic rock at WCXR... it is now playing upbeat Jazz. Their liner is "You've found the new Smooth Jazz 105.9". Their call letters have not changed, yet.

As you may or may not know, WCXR has always had poor ratings, but things got even worse last year with the advent of Arrow 94.7. In the last ratings survey, Arrow had a 2.6 or 7 and WCXR was down in the 1.5's. It has been rumored for a long time that WCXR would change its format and here it is, right as the winter ratings period begins. Further, Washington lost its jazz outlet with the advent of Oldies 100, WBIG. At that time, the former station members and their listeners said they would get jazz back in DC and it looks like this is it.

My question now is, how well will Arrow 94.7 do with the alienated WCXR listeners? Only time will tell.

Any interesting change in DC Radio.

Sincerely,
Mike Hale

If you were broadcasting in AM stereo in 1968 before XETRA Tijuana, how come you never said so? I never heard KDKA promote this at night when I listened from Oregon. XETRA 690 had a stereo promo about every hour to go with their "beautiful music" format. This was the Kahn ISB format. When did KDKA start? I believe a Baltimore station did early AM stereo as well.

BDSteve mentioned that Captain Whammo is now working for "a small Christian station [in South Bend, IN] ...WHME-FM."

WHME is part of a large ministry empire owned by LeSea, which is, more or less, owned by Rev. Lester Summerall. Geez, it's been awhile, but I think I have his name spelled right. At any rate, LeSea owns WHME-FM, WHME-TV in South Bend, and WHMB-TV in Indianapolis. LeSe also owns one mother of a big church in South Bend.

From: JJB92@aol.com
Message-ID: <36nkcu$amf@vixen.cso.uiuc.edu>
Source record: 37683

The more things change, the more they stay the same.....Mancow Muller, morning jock at WRCX reached into his bag of tricks and found a successful item. Mancow was "buried alive" in the parking lot of Chicago's Hard Rock Cafe. Mancow had pulled a similar stunt while in San Francisco when he was entombed in an ice block. Over $15,000 was raised for a charity. Mancow emerged from his grave to the cheers of a crowd which gathered to cheer him on. Also at RCX, the station was fined over a stunt whereby Mancow sidekick "Turd" collected roadkill which listeners brought to a parking lot. Mancow was also heavily criticized by cityy of Chicago law enforcement when he directed "Turd" to go to an overpass and drop a cinder block on listeners cars. While nothing was done, city officials, stung by unrelated criticism of their handling of actual incidents were not amused.

Steve Dahl has reupped with WMVP. While his base salary has dropped, the contract is full of incentives which are tied to his ratings. Steve's performance and ratings have improved since Bruce Wolf was added to the show and they went away from straight sports talk. The show is much more similar to the Steve and Gary program then to traditional sports talk.

Look for changes at WMAQ. Jim Frank has stepped down from his job as Program Director and will be a full time news anchor. Chris Witting, former news director at all news WBBM-AM, is the acting PD. The station has dropped the CNN updates at the top and bottom of the hour. WMAQ is all news during the day and sports talk in the evening. The station is also home of the Chicago White Sox and Chicago Bulls.

Ed Volkman and Joe Bohanon, (Eddie and JoeBo) formerly of WBBM-FM have resurfaced at WIOQ in Philadelphia. They are up against Paul Barsky, former zoo master at WYTZ is also in Philly at WPLY. Also at B96, a new VP and GM has been appointed. Don Marion held a similar position at CBS owned KRQR in San Francisco and takes over the reins at B96.

Bob Dearborn, former jock at stations ranging from WCFL to WJJD has resurfaced at KKSN in Portland.

Forget the rumors of a format change at WPNT. Lorrin Pulagi is the new Operations Director at The Point, a similar position that held at WRQX in Washington DC. The station has reaffirmed its committment to adult contempory.

The whatever happenened to file.....Seka, former porn star has landed a Saturday night at WLUP-FM to discuss sex and the like. You can call Seka from 11pm to 2 am.

Joe

As per a request, here are the 12+ Spring '94 ARB numbers:
(Fall '93 in parenthesis)
1) WZXL /AOR 9.1(9.3)
2) Boss 97/WBSS/Dance CHR 6.0 (6.3)
3) WMID-FM /Rock 40 5.6 (4.1)
The Touch/WTTH/U/C 5.6 (5.3)
5) Cool 98-3/WKTU/Oldies 5.4 (3.4)
WAYV /Hot A/C 5.4 (4.7)
7) WRDR/MOR 5.2 (5.1)
8) WFPG-FM/Soft A/C 5.0 (10.5)
9) WMID/Talk 4.3 (3.9)
WOND 4.3 (3.9)
11) WKOE/Country 3.7 (2.8)
12) WMGM/Sunny 103.7/A/C 3.5 (2.0)

Notes:
WFPG-FM dropped almost half it's audience from the last book -- down from a 10.5 & The #1 slot in Fall '93 book. Biggest hit came in the lower demos. They've already laid off a couple of sales people. WAYV switched to a Hot A/C format and has stolen some of FPG's audience. Cool 98.3/WKTU seems to own outside the A.C. area--their signal is weak in the city itself. WMGM/Sunny 103.7 also benefited from FPG's decline--up 1.5.

Here's AM drive 12+
1) WOND 8.8 (6.8)
2) WZXL 7.7 (8.6)
3) WAYV 5.6 (4.4)
WBSS/Boss 97 5.6 (5.6)
5) WMID-FM 5.1 (3.7)
6) WMID 4.7 (3.2)
7) WKTU 4.6 (2.9)
8) WFPG-FM 4.1 (11.1)
9) WRDR 3.9 (5.6)
WTHH/The Touch 3.9 (4.3)
11) WMGM 3.1 (2.1)

You will note a big hit on AM drive for WFPG.

Tripp Rogers

At the radiostation where I work we are planning to install the Dalet Digital Media System. With this system we intend to use PCX 7 soundcards from the french company Digigram.

I`m curious about other`s experiences with this system. Is it good enough ?

I am also interested in how much these soundcards costs in other parts of the world. In Norway we have to pay about 3750 dollars each. Are there other soundcards that can be used as well (Musicam/MPEG) ?.

Please email me as I have some trouble receiving this conference.

MICROPOWER BROADCASTING
THE FREE SPEECH MOVEMENT OF THE 90'S

One of the most defining threads of political. cultural and social history is freedom of expression. In almost any circumstance, the degree of overall freedom present is directly proportional to the degree of strictures placed upon freedom of expression and who controls or maintains the mediums of expression. Whether it was the underground resistance to the Star Chamber or the free speech fights of the Wobblies, the desire to communicate with one's feelings, ideas, thoughts, etc. has remained undiminished throughout history. Subject to licensure for the first 500 years of its existence, the printing press of Gutenberg's day has been transmuted into the micropower transmitters of the 1990's. With an agency, the FCC (Fostering Corporate Control), totally in the grip of media monopolies who number less than 30 but own over 50 percent of the media resources, we have reached an intolerable situation where the peoples' airwaves have been turned into an instrument of social control engendering crass consumerism, and obescient response to the crudest of political flim-flammery.

An owner of a printing press could have had his or her hand chopped off, or worse, for printing material considered to be seditious or critical of the ruling elite. Although micropower broadcasters have not been subject to a similar fate, they are being threatened with huge fines ranging from $10,000 to $20,000 and, in some cases, their entire household has been ransacked by local FCC agents and police. Clearly, free speech and other constitutional rights are under a state of siege. With the current anti-crime hysteria and what passes for "public debate" in the hands of the corporate monopolies and their mouthpieces such as Rush Limbaugh, an aggressive campaign of taking back the airwaves is the only hope of creating democracy in this country. It is our intent and purpose to see thousands of transmitters taking to the air in an all out, no holds barred movement of electronic civil disobedience. When was the last you refereed to as a citizen and not a consumer by the media ?

One has to ask the question, what is the underlying premise behind who has rights to the airwaves which, like so many other natural resources, have been plundered and raped by the corporate interests who desire to line their pockets to the extreme detriment of the planet and all who reside on it ? Why should just a few be allowed to dominate what should be a resource of the many ? It is just the further diminishment of public space and resources which are fenced off and declared private property of the corporate elite. If the power levels were brought down to some reasonably sane limit, like 100-1000 watts on FM for example, many more people and communities could have a voice. Consider the cancer

cluster risks alone from having megawatts of RF radiating from vertical antenna farms such as Sutro Tower in San Francisco.

If we are a country founded on democratic principles, with a government created to ensure and guarantee to all the rights enumerated in the Bill of Rights along with life, liberty and the pursuit of happiness why have we reached such an intolerable situation where any reasonable analysis will show the total lack of any democratic process. And why do we meet such fierce resistance when tried to exercise any of these rights, such the right to vote, to speak in public parks, or to receive a just and fair wage ? The question is, should the airwaves be used as a primary means of fostering a democratic, pluralistic, and vibrantly diverse society through a free and open exchange of ideas, news, information, art and culture or should they be a concession stand for narrow, anti-democratic corporate interests working hand in hand with a government whose main goal is domestic pacification, control and the maximization of private profit ? Who does the government really work for, the people or the plutocrats ? Of, by and for the people does not seem be an operative principle at this time.

Spectrum scarcity is largely the fault of the FCC. Take a look at your TV tuner. Notice all those vacant UHF channels. In most areas the UHF band is wide open. Yet, even though low power TV has been created as a legitimate category, the FCC has flatly refused to grant licenses in the 50 major urban areas where there is plenty of room on the UHF band. In 1980 the FCC forced many low wattage (10 watt) , class D FM stations to either increase their power to a minimum of 100 watts and adhere to tighter technical requirements or go off the air. This was done largely at the behest of the Corporation for Public Broadcasting (another contradiction in terms), the agent orange of grassroots radio, who had been lobbying the FCC since the early 1970's as part of their drive to "professionalize community radio. It was the combined hope of both the FCC and the CPB to drive a number of stations off the air. What happened was that everyone scraped their pennies together and increased their power and operating budgets with a net result of crowding the spectrum more than before and having to rely more and more on bringing professional fund-raisers and managers on board to meet the larger budgetary requirements - thus began the slow death of real community radio in this country. Why does the FCC grant 90 mile fringe protection to many giant operators ? As stated above, bring down the power limit to a reasonable level, the broadcasters will scream. Let them, they have had 60 years to make an obscene amount of profit from the peoples' resource.

We are creating an alternative to the FCC, the Free Communications Coalition - the peoples' FCC. An umbrella organization which intends on helping ensure good technical standards and support for micropower broadcasting, basing itself on a community and grass roots volunteer model using mediation and open discussion to foster responsible micropower broadcasting. Further, it is working toward the full democratization of all means of communication whether it is electromagnetic space or cyberspace in conjunction with any & all groups or individuals who are

working toward this common goal. We would like to see many of these issues addressed and resolved at the community level. We hope to create a talent and resource pool of individuals who can provide the necessary technical expertise whether it be legal, electronic, organizational, etc. to aid in establishing micropower broadcasting as a fully functioning entity whose purpose is to break the stranglehold on the free flow of information, ideas, news, culture and art.

Your involvement is critical to the success of this endeavor. If you would like further information on micropower broadcasting and the Free Communications Coalition, send us either your email address or snail address and you will receive our most current newsletter. Since we ran extra copies of our Sept/Oct newsletter, actually it is a full size 8 page tabloid, we can send you copies for distribution in your community. A donation would be appreciated to cover the cost of sending the bundles of newsletters. Our full line of kits is listed in the newsletter as well. Let us know how we can help you take back the airwaves in your community.

4034. Florida radio news & rumors

Newsgroup: rec.radio.broadcasting
Date: 1994-10-03 00:48:41 UTC
From: Andrew Reninger <andrewr@gate.net>
Message-ID: <36nkd9$an4@vixen.cso.uiuc.edu>
Source record: 37689

Two rumors from Florida:

1) Ron & Ron's deal with the Paxson stations (WZTA Miami, WJRR Orlando and WAIA Jacksonville) is about to end, and will not be renewed. This rumor has been denied by a friend of mine at Paxson/Orlando, who sez Ron & Ron have four more years in their contract. But I've heard the rumor from two different sources in the last week. So who knows? One thing's for sure, if Ron & Ron suddenly dissapear in Orlando or Miami the immediate winner will be Howard Stern. Ron & Ron aren't on Paxson's Tampa station, instead, they're on Cox's WSUN-AM 620.

2) Cool 105.9 in Orlando (WOCL/DeLand) is about to enter into a duopoly with another station, probably in the next week. Rumor is it'll be classic-rock WHTQ "Q96" whose parent company, TK Communications, just sold it's Dallas stations and is rumored to be selling off the rest of its stations. If it's true, Cool 105.9 will probably stay 60-s based oldies, while whatever they call WHTQ will become a 70-s oldies station.

Steve, I'm among that post-forty group, but I'd be hard put to pledge allegiance to any particular format, probably because of the many years I've spent in the trade. In my youth, I was all for Top40, in my adolescence all for Progressive Rock, and when I became the PD at a country station, I found I was all for that, too. The result: now I'm an inveterate button-puncher. I'll listen to anything for a little while, just out of curiosity about the craft of the performers.
It seems to me that a 3A or variation thereof would do well in Eastern MA, considering the eclectic musical tastes of the residents of that area. As for getting the word out---the sheer number of residents in that area makes that a daunting task. Maybe sandwich boards would be a good place to start...
Yours for better radio always,
Courtney Haden

Notes 'R Us (CLOUTIER@Eisner.DECUS.Org) wrote:

: Are there any readers of this news group who are 40 or over?

Yes. I'm in my early 40s.

: If so, what format do YOU like? Have YOU ever received a ratings diary?

I like modern rock (Depeche Mode need not apply though), NPR-style public radio, eclectic public radio, jazz, chamber music, Patsy Cline/Conway Twitty axis of country music, newstalk, and world beat, also 40s big bands and old Atlantic label blues. I've never turned down the chance to listen to polka or rachero music either.

I have received 2 diaries in my life, one for Nielsen when I was a teen, and one for Arbitron maybe 10 years ago. This may be limited because I'm on so few mailing lists. However, I know of people in my age group who have gotten diaries in the last 3 or 4 ratings periods.

: Is there anything on the radio that YOU like? If so, where and what?

Yes. Most of what I mentioned above are available somewhere on Bay Area radio.

: Assuming you could have it, how would you get the message to the advertisers
: that YOU and YOUR GENERATION are out there, listening and buying....

If they don't know about the Baby Boom (people born between 1946 and 1964) by now, they'll never know. Ever since we were in grade school the researchers have talked about us and how we'd either ruin America or make it wonderful.

CJSB is now simulcasting "106 point 9, The Bear" which is attempting to go head to head with "Chez 106" (106.1) in Ottawa. Plenty of bus cards advertising the station and there are already T-Shirts and Sweatshirts for sale in record shops. When I listened last weekend, CJSB had a straight simulcast, although I did hear one CJSB ID dropped in when the FM had a carted ID. Sounds like the station is trying to make light of the fact that CHEZ is playing too much "classic rock" for adults and not enough of today's music. Heard their PM drive announcer mention that he got a fax which was sent to him by accident. Turns out that it was a fax requesting some Aerosmith and Led Zeppelin songs that was supposedly intended for CHEZ. The announcer called up CHEZ and told the receptionist that "The Bear" had received a fax intended for CHEZ in error and then speculated that CHEZ wouldn't be playing any of the songs anyway...

So now Ontario has a Bear (Ottawa), a Hawk (103.1 in London/St. Thomas), a Fox (99.9 in Sarnia), a Phoenix (88.5 in Newmarket) and a Wolf (101.5 in Peterborough). And there's a Buzzard just across the lake in Cleveland.... I suppose it's only a matter of time before an "alternative rock" station decides to become "The Crow"!

Speaking of "The Phoenix", Newmarket's CKDX-88.5 appears to now be live from 6 a.m. to 6 p.m. and then relays GOOD TIME OLDIES (GTO) overnights.

> > 59,

An interesting turn of events! CKYC (formerly CKEY) and CJCL (formerly CKFH) have both had interesting and somewhat similar histories. CKEY-590 at one time in the early part of the 1960s was the "other" Top 40 station in Toronto (behind CHUM-1050). Then CKEY went on to become the "other" MoR/News-Talk type station (behind CFRB-1010). CKFH-1430 tried to compete with CHUM-1050 for the Top 40 market in the late 1960s and early 1970s. Ironically, the station that finally triumphed over CHUM-1050 was CFTR-680! Now CHUM-1050 is oldies and CFTR-680 in all-news. CKFH also had flings with C&W, and Music of Your Life before settling in as an all-sports station. The shift to 590 makes sense. I seem to recall that Mississauga's CJMR-1320 was carrying Maple Leafs hockey a couple of years ago because nobody could hear CJCL in the western suburbs! On the other hand, if you tried to use a public telephone on Toronto Island (near the CJCL transmitter site) you could hear CJCL on the phone lines as well as on 1430!

One thing that I don't think has been mentioned about the CIAO/CKYC/CJCL frequency shift. CIAO at one point was CHIC-am. CHIC tried at one time in the 1960s an "all female DJ" format, and in the late 1970s tried a disco format.

As far as the frequency swapping is concerned, some people will probably remember the extensive movement in the 1970s in Southern Ontario. At one point, Kitchener's CKKW was on 1320 and CHYM was on 1490; Richmond Hill's CFGM (now CHOG) was on 1310, Hamilton's CJJD (now CHAM) was on 1280, Sarnia's CKJD (now CKTY) was on 1250, and Galt's (now Cambridge) CFTJ (now CIAM) was on 1110. CHYM moved to 570 and CKKW moved to 1090 enabling Port Elgin's CFPS (1490) to sign on and enabling CFTJ (CIAM) to move to 1320. Sarnia's CKJD (CKTY) then moved from 1250 to 1110. When CFTJ (CIAM) moved again to 960, CFGM (CHOG) moved from 1310 to 1320. Ultimately, CFGM (CHOG) moved down to 640 allowing daytime only CJMR (Mississauga) to leave 1190 and go fulltime on 1320. Supposedly, Ontario's other daytimer CKOT-Tillsonburg will be leaving 1510 for 1200. Oh yes, and when Hamilton's CJJD (CHAM) moved from 1280 for 820 it ultimately opened up 1280 for Toronto's airport station CFYZ (although CFYZ started out on 530 with Fort Erie's CJFT).

If I'm not mistaken, the 1960s featured some frequency shuffling amongst CHFI (CFTR), CHIN, Simcoe's CHNR and Niagara Falls' CJRN, but I'll leave that to somebody else.

Final note, the CRTC granted allocated 1360 kHz for Walkerton Ontario at some point in the 1970s. I guess this one will never come to fruition.

4038. Re: WCXR Classic Rock... Gone!

Jazz? Then what's the explanation for their "countdown" to their new format?
I was switching around the dial and heard WCXR's tick-tock sound with an
alternating male and female voice reading off the names of different artists.
One mix that struck me was the naming of Aretha Franklin followed by Nine Inch
Nails. I thought they were switching to an alternative mix station!

From: hkrobinson@aol.com
Message-ID: <36nkdi$anj@vixen.cso.uiuc.edu>
Source record: 37696

In article <30foqs$obe@vixen.cso.uiuc.edu>, wdp@uiuc.edu (Bill Pfeiffer) writes:

Hey....I love smooth jazz, if it were not for the effort to make this music more contemporary, and more appealing to the masses, jazz wouldn't exist.

The concept behind smooth jazz, is a format that plays rock with a jazz favor, and jazz with a rock favor. You have to give the public what it wants and rock has been the nation's most popular music form for years.

I think smooth jazz is great, it bridges the gap between easy listening and soft AC, and CHR and Urban.

I have heard WNUA recently, and like its counterpart in Cleveland WNWV, I think both are a refreshing alternative in the marketplace. And make no mistake about it ...it is jazz. But you have to make adjustments to survive. Country music has been the most successful at this, using the best elements of 60's rock, and today's AC to come up with a more popular sound, that winning an increasing number of converts.

In the discussion of KPPC (1240) Pasadena, it might be interesting to note that an article came out in the last issue of the LOS ANGELES RADIO GUIDE about KPPC. It did explain KPPC in the early days of the 20's and 30's and gave a wonderful insight about the little station with it's transmitter in the basement of the church.

These days, KPPC shares the same address as KMAX-FM (107.1) Arcadia. However KPPC is listed by M street as being owned by Universal Broadcasting, while KMAX is owned by Douglas Broadcasting. I do not know if they are the same company.

(BTW, KPPC isn't the only station I've heard of with their transmitter at a church. Interestingly, the last station I worked for, KWG (1230) in Stockton, has it's transmitter in a back room of a local church. And also had an old fashioned "T-Type" antenna for many years, until 1989)

Source record: 37697

I have a quick question: When is the new (1995) M Street Directory supposed to be available. I (faintly) remember that last year it was sometime around October. Anyone with any info?
Bill -- I jotted down some info from last year that said something to the effect of: "call (212) 473-4668 and ask for Pat McCrummen and tell them that you read about the Directory in AIRWAVES." Is this still true? I didn't order last year, but I'd like to this year and any information provided would be helpful.
E-mail, post here, or both -- whatever you'd like... Thanks.

Chris Bessert

programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
|Q16. Is there a World Wide Web (html) page or ftp address that I can
access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
|Q18. Can I get archived copies of old issues of OTR?

------------------------------------------------------------------------------

Q1. What is "OTR"?
A1. OTR is an acronym for "Old Time Radio", a term loosely applied to
radio programs broadcast from the dawn of broadcasting to the early
1950's. Alternate names are "radio nostalgia", "golden age
radio", etc. Usually this applies to radio drama, mystery
stories, and adventures.
```

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

|Q5. Are OTR shows rebroadcast? If so, where and when?
|A5. Yes, several AM and FM radio stations and three satellite feeds rebroadcast OTR. Check the OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP).

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See the WWW page or FTP site for a list of some of them.

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to be listed in this database.

Q9. Whats this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Obler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores.

Q12. Are there any OTR clubs near me?
A12. Check the club listing in the WWW page. We will add clubs as they become known to us.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, Armed Services Radio rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates.

Q14. Is there anywhere I can get a complete listing of all the episodes in a serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publically available source, we can make it available in the Internet OTR file repository.

Q15. Is there anywhere I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Q16. Is there a World Wide Web (html) page or ftp address that I can access for more info?
|A16. Yes, there are two WWW sites, as well as two anonymous FTP addresses and a Gopher. The two WWW sites are independent, and contain different information, but each can be accessed from the other. The FTP directories eacn contain different files & information. My ftp site holds OTR station lists, catalogs / libraries, bibliography, etc. The Airwaves ftp site holds archived copies of the OTR digests as well as other files relating to Airwaves and rec.radio.broadcasting.

(1) My site:

World Wide Web URL:
ftp://ftp.crl.com/users/ro/lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/ro/lgenco

(2) AIRWAVES E-Publishing's Site:

FTP:
Anonymous ftp to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: otr-request@airwaves.chi.il.us
Subject: SUBSCRIBE

To unsubscribe, send email
To: otr-request@airwaves.chi.il.us
Subject:UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of OTR?
|A18. Yes. The OTR Digests and Index are updated 3 times a week, and are accessible through the WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

4044. Howard Stern Radio Listing - Short Form [monthly post]

Hi John,

Houston's KUHF-88.7 isn't that hard to receive. I usually could get them on a portable radio. For my large stereo when I lived their, I just plugged in my rabbit ears TV antenna and got most of the Houston, Austin, and Waco stations. If you have TCA cable, they carry KUHF on their FM hook up. As much as TCA charges for the tiny amount of stations you get (I get 2.5 as many channels now for the same amount in Plano), you might as well get all you can out of them.

Austin's KUT-FM-90.5, and Killeen's KNCT-FM-91.3 for that matter, are harder to pick up since their signals aren't that strong in Bryan/College Station, and B/CS is close to other stations on the same signal (KSHU-90.5 Huntsville, KPVU-91.3 Prairie View). Of course, local KAMU-FM-90.9 is a NPR affiliate.

I worked with Jim "Captain Whammo" Channel from at WDHF/WMET from 1976 until his departure. Last I heard, he's working at a contemporary Christian station in Indiana, owned by LeSea Broadcasting. He may still host a syndicated Christian countdown program, but I haven't heard it in a while.

By the way, Jim's story was dramatized on "Unshackled" several years ago -- with Jim playing himself (it also includes a short "Captain Whammo" aircheck); you can get the tape from Pacific Garden Mission in Chicago.

Call your local NPR station for more information.

West Coast Live Mail Server: **********

This Internet list server was established to help maintain
contact with our audience. We intend to use this list to
distribute a weekly show bulletin to let you know who's scheduled
for upcoming shows. The audience may use this list server to
contact the show. We appreciate your feedback.

Subscriptions: **********

You (the audience) are now empowered to subscribe or unsubscribe
to our list any time you wish. To receive complete instructions
for modifying your subscription, send a dummy email message to;

West_Coast_Live-Request@netcom.com

ON AIR Audience Adventures: ***

We still take Audience Adventures over the Internet. No, that's
not true. We no longer have Audience Adventures. We now have
"Audience Plausible Stories". Sedge reads many of these over the
air, just after the show's mid-break. Please address these to;

West_Coast_Live@netcom.com

and use "Audience Plausible Story" as the Subject. Messages sent
to this address lose the original From (you) address, so we can't

reply directly to you. What we can do is bounce these back to the mail list server, so that everyone else can read your adventure. So remember, Audience Plausible Stories should be plausible and legible. Please include a signature (name and email address) in the body of your message.

Reservations to Live Shows: ****

By popular demand, we are taking reservations to live shows by email. The procedure is still in the experimental stage, so please read this carefully. Reservations must be backed up with a credit card number, but we don't wish to risk disclosing credit card numbers over the Internet. You may email your request for reservations to;

West_Coast_Live-Approval@netcom.com

by Thursday evening prior to the show. Use "RSVP" as the Subject. Please specify your name, phone number(s), the number of seats to reserve, and your seating preference. Do NOT email us your credit card number, since no one can ensure the confidentiality of email over the Internet. We will call you back by phone to confirm your reservation and we will request your credit card number at that time. Your reservation is not guaranteed until we make this voice contact.

Reservations may still be made by phone to (415) 664-9500, or by FAX to (415) 664-9596, with a VISA or MasterCard, by Friday evening prior to the show.

Now Supporting Outgoing FAX: **

We're expanding this exercise in audience outreach by participating in a global experiment integrating the email and facsimile communities. We are now able to send email to most FAX machines. We've been experimenting for the last few days and are reasonably happy with the results. One thing some recipients may notice is that the FAX cover sheet may include advertisements. West Coast Live does not necessarily endorse any products or services appearing on these FAX cover sheets. These ads are provided by the owner of the Internet FAX server being used. They're not responsible for the content of our FAX message, and we're not responsible for the content of their cover sheets. Since they don't charge us for use of their FAX server, it seems like a good deal all around. Over the next few weeks we will be merging our list of audience FAX numbers into our list of audience email addresses.

Reaching Humans: **********

We're still learning how to use this mail server, so here's out best explanation: First of all, you can still reach Sedge Thomson directly at Sedge@netcom.com. Please be aware that Sedge

is voice activated (hence the microphone). Don't expect a timely response to email sent directly to Sedge, as he's currently overwhelmed with his email inbox. Many of these incoming messages are from NETCOM's email deamon, asking Sedge to process his inbox. A timely response is ensured by sending the mail to the moderator at;

Owner-West_Coast_Live@netcom.com

Mail sent to this address retains the From (you) address, and is forwarded to the mail list server moderator. This is (I am) a real person (although without a life), who is ASCII activated. You will get a timely response. The moderator may forward your message to Sedge if it needs his attention.

Downloading Updates to this Information:

You may download an update to this information document by sending the following email message to;

LISTSERV@netcom.com

Message Contents:

INFO West_Coast_Live
END

Whole Earth 'Lectronic Link Conference:

For those of you on The WELL (well.sf.ca.us), we welcome your participation in the West Coast Live - Discussion topic (#374) in the Radio conference (g radio).

Airwaves Radio Journal: **********

The Airwaves Radio Journal has been very kind by including our weekly bulletins in their Internet email digest. This publication is a digested version of the rec.radio.broadcasting USENET group. It's devoted to local broadcast radio from all over the nation. Their subscription desk can be reached at;

Subscribe@airwaves.chi.il.us

USENET: **********

West Coast Live weekly bulletins are also being posted to the following USENET groups;

ba.broadcast

alt.radio.networks.npr

rec.radio.broadcasting

rec.radio.noncomm

Tips of the Week: **********

Public Transportation from the Peninsula:

Take CalTrain #133, which arrives at 4th & Townsend at 8:01 am. Hop onto MUNI 30 Stockton (Jefferson Loop), and take it to Laguna Street. From there it's a 3 block walk to Fort Mason.

You'll have time to stop for a quick breakfast in the area, or just relax in the theater lobby. We have Peet's coffee.

Where to find a cafe latte at Fort Mason:

Cooks and Company, in Landmark Building B, makes one of the best cafe lattes in town. The Tassajara bakery in Landmark Building A has the best baked goods. Both open at 8:00 a.m. on Saturday mornings.

At the Cowell Theater, we have Peet's coffee and baked goods.

Where to park your bicycle: ****

If you decide to ride your bicycle to the show, bring your bike to the box office, and we'll help you lock it up back stage.

Where to sleep over: **********

Let's say you need a place to crash for the weekend, but you're not a personal friend of David Brass; Fort Mason is the home of the San Francisco AYH Hostel at Fort Mason (415) 771-7277. This hostel, located just a few hundred yards from the Cowell Theater is world renown as one of the best deals in San Francisco. If they're booked up, the Golden Gate AYH Hostel at Fort Barry is just across the bridge in the Main Headlands (415) 331-2777.

WCL (short sleeve) T-shirts: ***

We've had a few requests for short sleeve West Coast Live T-shirts. That's not a problem. For no additional charge, our volunteers will be happy to cut your sleeves to any desired length.

Cowell seating chart: **********

If you're intimidated by the Internet, don't bother with this tip.

Send an email message as follows;

To: Owner-West_Coast_Live@netcom.com
Subject: Please Send WCL seating.gif

and we will auto-reply with a seating chart for the Cowell Theater. Actually, you'll get a multi-part response of an UUENCODEed file, which must be reassembled. You'll get some assemble instructions, but if you don't know how to UUDECODE, don't bother with it. We're happy to help you find your seat at

the live show.

Photo of WCL shirt: **********

If you're intimidated by the Internet, don't bother with this tip.

Send an email message as follows;

To: Owner-West_Coast_Live@netcom.com

Subject: Please Send WCL shirt.gif

and we will auto-reply with a photo of the official West Coast Live shirt. Actually, you'll get a multi-part response of an UUENCODEed file, which must be reassembled. You'll get some assemble instructions, but if you don't know how to UUDECODE, don't bother with it, or just use Anonymous FTP. We're always happy to help you find your seat at the live show.

TELNET to atomic clock: ********

West Coast Live stays on schedule for only moments at the beginning and end of the broadcast. You can set your clock to the (USA) government's atomic clock via the Internet with the following command;

telnet time_A.timefreq.bldrdoc.gov 13 ; time

4049. Alternative radio in general and a KSCA review.

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 02:08:05 UTC
From: Marty Kuhrt <marty@symark.com>
Message-ID: <36qde5$hmo@vixen.cso.uiuc.edu>
Source record: 37603

Hello from LA.

In a previous Sunday's LA Times Calendar section (9/25) there was also a long article about Cris Douridas, KCRW and why an 'esoteric' music or jock choice programming station probably couldn't make it commercially. KCRW is the Santa Monica Community College station that plays a wide mix of diverse music. That article also had interview tidbits from other LA radio deejays that used to have some programming choice; Jed the Fish (KROQ jock for 16+ years) and Jim Ladd (LA radio veteran who worked KMET). It was a very interesting article about programming and the viability of non mainstream radio. If you have interest in that sort of thing, and have access to the LA Times (any library will probably do) then I highly recommend this article.

In that issue there was also a review of LA's AAA station, 101.9 KSCA. The article applauds the station's ability to segue from U2 to Tori Amos to Elvis Costello and make it sound like a coherent set. It also praises it's effort to bring a more sophisticated musical mix to LA. The two main complaints about the station concerned lack of jock talent/interest and a rehash of the standard complaint I hear about every 'alternative' station, "the stuff they play isn't alternative enough". The overall mood of the article was that the station needs tuning before people will be tuning in.

I tend to agree. I've tried to listen to the station but I found it impossible to keep tuned in for very long. If they are trying to address the apathy of the GenX crowd, then they've succeeded. I don't think it's enough to just throw different cuts out there and put in 'liner-reading-back-announcer' type jocks. When in Chicago I listened to WXRT, and while it plays stuff that's not exactly Top40, it was done in a way that made me curious about what was going to be played next. I was compelled to listen, even if the current selection wasn't to my liking, because it I wanted to know what was next. Listening to KSCA is like listening to a automated station from an alternate universe of boring people. Just because it's recorded by a non mainstream artist doesn't make it inherently interesting.

I've always thought that there would eventually be a radio format that addressed the musical tastes of people like myself. Thirtysomething people that were initially brought up being spoonfed the pablum of Top40 only to find, in college perhaps, that there was a whole world of 'other' music out there. KSCA isn't it.

4050. Atlantic City

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 02:08:06 UTC
From: "MacHarg, Ken" <kmacharg@mhs.hcjb.com.ec>
Message-ID: <36qde6$hmt@vixen.cso.uiuc.edu>
Source record: 37604

Thanks for the posting of the Atlantic City ratings. I used to spend summers there working on the shore. You see, there was this young lady from there....We just celebrated our 29th anniversary! Anyhow, the purpose of this post is to inquire about WFPG AM. It used to be an excellent full-service station. What is its status today? I notice it does not appear at all on the ratings list.
My father-in-law helped put the first station on the air in Atlantic City, with, I think, the call-letters WPG. It was on one of the piers (not Steel Pier). While not a direct forerunner of WFPG, there was a trail of connection in the early days.
Thanks for the help. --Ken MacHarg

>A couple of postings regarding AP Radio Network News--I think two of those
>stations carrying the AP News Network feed are owned or LMA'ed by
>Bonneville Broadcasting, which may explain the reason for the overlap.

Bonneville does own KIRO, and has deal to buy KING. However, AP licenses
stations individually, so both have purchased right to carry the service.

One other news item: Gary Price has left as operations manager at
WJJD (big bands /nostalgia) WJMK (oldies with heavy '60's top-40
emphasis). There have been rumors of a change at WJJD which has
Clark Weber doing local talk during AM drive and G. Gordon Liddy
from 10a-2p.

4053. Field Test Results - "In-Band DAB"

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 02:08:14 UTC
From: d-schutz@pipeline.com
Message-ID: <36qdee$hn9@vixen.cso.uiuc.edu>
Source record: 37607

The September 26th issue of Radio Business Report (RBR) indicates that the first field tests of USA Digital's In-Band DAB systems for BOTH AM and FM were "an incredible success and muzzle skeptics."

The FM test was conducted in Chicago using the facilities of CBS's WBBM-FM. The freedom from multi-path interference, even in the "Loop" was termed virtually complete.

The AM test was conducted using a special "test" station in the Expanded AM band on 1660 KHz in Cincinnati. In that case the USA-Digtal signal operated with a power level on only 72 watts. Alan Box, head of NAB's "DAB Task Force" termed the AM fidelity as: "well beyond current FM (analog) quality."

A bus was used to ferry various industry executives around for the demonstrations. A complete report on the test results will be presented next week at NAB's Fall Radio Show in L.A.

For those of us who have been following this topic for sometime, there is another in-band system in the wings awaiting tests, this one is from AT&T.

It now appears that the issues regarding the technical feasibility of an in-band DAB system have been pretty well resolved. The big question is whether the consumer electronics industry can muster enough "excitement" to spur significant sales of ANY type of DAB receivers?

I am somewhat skeptical of sales prospects in the near-term.

Any one here ever heard of or work for any stations owned by Entercom?

4055. DX FM radio (how far can it go)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 02:08:16 UTC
From: neiger@ariel.ucs.unimelb.EDU.AU
Message-ID: <36qdeg$hne@vixen.cso.uiuc.edu>
Source record: 37609

Here's a question for your techies.

How far can an FM radio signal go. I leanrt that it is limited by the line of sight however I can receive a distant FM station (about 200km away) even though I have not a hope in the world of seeing their transmission tower.

I believe that they are transmitting from a tower 700m above sea level and I can receive them in Melbourne (which is about 50m above sea level and flat).

The other question...why can it only be received in discrete areas.
For example I can receive it clearly (stereo) in one region in my lounge room (a region of about 1m). There is no "beam" it just appears in a region of space and outside of that region there is nothing (except for for an extremely weak crackling signal). In that region I can receive the station with a simple antenna.. outside I cannot receive it with a large antenna in the roof.

Please email as I am really curious

David

> If so, what format do YOU like? Have YOU ever received a ratings diary?
Non-commercial, as typified by WPKN (Bridgeport) WUSB (Stony Brook)
WBAI (New York) WFMU (?, NJ) WZBC (Newton?)
(Boston radio, on the whole, is awful [for me])
Yes. Once in my youth.

> Is there anything on the radio that YOU like? If so, where and what?

Joe Frank, when someone will carry him.

> What yould YOU like to see in a format?
See station list above.

> Assuming you could have it, how would you get the message to the advertisers
> that YOU and YOUR GENERATION are out there, listening and buying since we
> know that such a format probably won't do well in the ratings (at least
> around here - in the Boston area).
Fugetabowdit! To attract advertisers, you need listeners. To attract
listeners, you can't have a discriminating format.

> ..or am I the only one in this area (Eastern Ma) who can't find anything
> on FM that I can listen to for more than a few minutes.

No. FM in the greater Boston area is the pits!
I've been using books-on-tape for my commute.
```

In article <36jdrj$n60@vixen.cso.uiuc.edu>, CLOUTIER@Eisner.DECUS.Org (Notes 'R Us) writes:
- Are there any readers of this news group who are 40 or over?

42

- If so, what format do YOU like? Have YOU ever received a ratings diary?

Oldies now, Top 40 when I was playing them for a living.

- Is there anything on the radio that YOU like?

Not much.

- If so, where and what?

Well, there's this oldies station but it's on FM. Kinda looses the nostalgic feeling when a summer T-storm goes by and you don't hear the static crashes on the radio. And the "personalities" leave a lot to be desired. No personality involved at all. Follow the clock, play the list, read the cards. Say something original? The format is too strict for that. Somewhere, sometime, all the consultants got together and decided that to have a successful station you had to follow "The Formula" [tm] with NO variation. Sad.

- What yould YOU like to see in a format?

Back in 19<mumble-mumble> when I was working for the #1 rocker here we used to say the only format the competition hadn't used to try and knock us off was punk-religion. I've always wondered what it would sound like :)

- Assuming you could have it, how would you get the message to the advertisers
- that YOU and YOUR GENERATION are out there, listening and buying since we
- know that such a format probably won't do well in the ratings (at least
- around here - in the Boston area).

Heh... good question. I wish I had a good answer for it. Time was when you could walk through a local mall and tell what the popular station was by listening to what the stores were playing on their systems. Now most of 'em play CD's with all the allure of a chainsaw on overdrive.

- ..or am I the only one in this area (Eastern Ma) who can't find anything
- on FM that I can listen to for more than a few minutes.

Same here. I'd rather play tapes and usually just grab the network news feed at the top of the hour from one of the stations still running it. Even THAT's changed. All of our locals are chopping the cast at the 3:30

break after the network spots run, jamming in 2 or 3 local stories in minute-and-a-half, stuff in the obligatory local spots and back to "The Formula".

Gak.

When it comes to being 40, I am "over." Hint: my children are in their thirties.
>
>If so, what format do YOU like? Have YOU ever received a ratings diary?
Format? Classical and old (pre-1950) Jazz. I once got a ratings diary for TV, which amused me, because I didn't even own one at the time.
>
>Is there anything on the radio that YOU like? If so, where and what?

We have one classical music station here (KMFA---this is Austin) that I listen to. News I get on BBC (shortwave). When I lived in Ames, Ia. I listened to WOI regularly. And when I lived in Mass. I listened to WCRB, much of the time, and WGBH less often. For years, I had a clock attached to an old tube receiver that woke me up to Robert J. Lertsema---what ever became of him? I stopped that when they took him off WGBH.
>

I think that you'd have to convince many of my generation to listen to the radio first.
>
>..or am I the only one in this area (Eastern Ma) who can't find anything
>on FM that I can listen to for more than a few minutes.
>
Well, Steve, it's gotten to the point that my car now has a tape player in it. It's getting to the point that even shortwave has nothing but Christians, rock-and-roll, and talk.

Yes, my generation is "out there," but we were grown up before rock-and-roll showed up, so simply tuned out starting in the fifties.

I still remember some interviewer who wanted to know what station I watched for the news, who was flabbergasted when I told her "none." She couldn't believe it when I told her I read the newspaper!

4061. Observations on the new WCXR

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 02:08:35 UTC
From: mh5260@cutter.ship.edu
Message-ID: <36qdf3$hol@vixen.cso.uiuc.edu>
Source record: 37615

After listening the the newly cool jazz formatted WCXR (Woodbridge Washington, DC), I'd like to make a few observations:

-The format seems to be a mix of "hot/electric" jazz and some light rock songs with a jazzly flare to them. So far it sounds good and also very much like the old Jazzy 100 from a couple of years ago.

-No jocks yet. However, I seriously doubt that they are running automated. I think that they are probably running it this way to match WJFK's (106.7 FM/1300 AM) cool jazz format that is played when they are not running talk (overnights and weekends). It has no jock and neutral liners for legal ID and other stuff.

-Down at WARW (Arrow 94.7), they are really sticking it to the WCXR format change. Most of the liners mention the WCXR format change and invite listeners to come down the dial and listen to Arrow 94.7. Others welcome old WCXR listeners to Arrow 94.7. Arrow is also IDing itself as Washington's *only* station for all rock and roll hits of the 70's and more.

Very interesting changes here in Washington. If anyone else has any insight, I'd be interested to hear it.

Sincerely,
Mike

PS- Could someone describe to me the full switchover to cool jazz at WCXR? When did they stop playing classic rock and what was their last song? And was there any type of special show at the end of the classic rock format (something reviewing the history of the station, DJs saying how nice it was to work at the station, etc?) Thanks.

HKROBINSON (hkrobinson@aol.com) wrote:

: Hey....I love smooth jazz, if it were not for the effort to make this
: music more contemporary, and more appealing to the masses, jazz wouldn't
: exist.

Eh? Jazz has existed since the 1920s, through the 30s and 40s. It got hip for white folks in the 1950s and early 60s. During all of this it took until 1959 for KJAZ to come on the air and dedicate its programming to all jazz -- and not this "smooth jazz" stuff, but real straight-ahead jazz. Since then other stations have played jazz, so that it's now a staple in many cities, and is usually presented by a college station today. KMHD in Gresham (Portland), Oregon, has created a well-respected jazz festival around it. And none of this is "smooth jazz" either.

Today's "smooth jazz" is inoffensive elevator music. Sure, it has its place, and I wouldn't denigrade the KKSFs of the world, HOWEVER, jazz would continue to exist without these stations. Just because real jazz may not be on the radio in your town does not mean it doesn't exist in your town. Check out the jazz clubs. Check out the African American neighborhoods, the Juneteenth festivals, etc. You'll find that jazz is alive and flourishing, and pretty much on its own, without much help from radio.

I turned in some Texas updates from a trip to Houston and Brownsville after Labor Day and they were just about to send off the material to make the 1995 directory. They told me they are shooting for the end of October to release the 1995 directory.

The weekly MSJ's show they are taking orders...

Changes for the directory include adding a hot AC format and seperating adult alternative from modern/new rock.

From: gbsaylin@ucdavis.edu
Message-ID: <36qdfb$hp3@vixen.cso.uiuc.edu>
Source record: 37619

Why are music orientated stations so restricted, especially OLDIES.
It seems most oldies stations only play 500 different titles. There are
easily over 25,000 that made the Billboard Hot 100 from 1955-1970!!

To those who argue you will lose listeners, STOP LYING!!!!!!!!!!!!!

For example, for every zillionth time The Supreme's "Someday We'll Be
Together" is run into the ground, what about all the other Supremes
songs, THE LESSER KNOWN ONES, that were part of our musical past?
SONGS LIKE "Breath Taking Guy" and "When The Lovelight Starts Shining.."??

You won't lose listeners, but probably gain.

Don't worry about UNFAMILARITY. An oldies station that plays 25,000
instead of 500 oldies WILL STILL HAVE THE SAME FEEL and be REFRESHING to
boot!!!

Oneday, I will start one and know it will be successful. 99% of listeners
want this.

Stern is apparently doing pretty well in Orlando, the only other market where he's up against Ron & Ron. But he's on an FM talk station (no music). This 70's things (on WBGG, Stern's station in Ft Lauderdale) is the hot new trend in radio, I guess. Like "mix" was a few years back, and "hot hits" was before that.

Source record: 37622

I just resubscribed to this newsgroup this morning, and so I trust Bill won't post this if it has been covered before.

Originial information that had been distributed indicated that Ross Perot's Sunday night radio program was to start last night (October 2). I didn't hear it on several of the stations that were supposed to have it. I later heard the host on WABC announce that her show would end at 8 PM next Sunday due to Ross coming on, so apparently the "debut" of his show has been delayed a week.

At home I have a short list of major stations that are carrying it, and presumably a number of local outlets will also pick it up. I can make up a soft copy of the list if enough people are interested, but suffice it to say a large number of the "clear channels" will have it (WABC, WGN, WJR, WRVA, plus a bunch in the western half of the US).

WCPV 101.3 FM, licensed to Essex, NY, has started regular programming. They originally started broadcasting on Wednesday, August 24, 1994 three days after WEXP (105.1) signed on. At that time and until this morning, WCPV has been running "under experimental test authority" for up to six or seven hours a day. They were rebroadcasting their sister station Q-106 (WHDQ from Clairmont, NH.) featuring "Imus in the Morning, New and Classic Rock all Day." WCPV has studios in Burlington, VT with transmitter across lake Champlain in New York. They also run "Imus in the Morning, Classic Rock all Day" and call themselves "Champ 101.3" after the mythical Nessie-like Lake Champlain Monster of the same name. Champ is also the mascot for the Burlington, VT Expos AAA minor league baseball team. WCPV has had a bit of trouble staying on the air today due to "STL receiver problems" but will have the situation cleared up by Tuesday, 10/4. This now makes a total of six (not even counting Canadian signals) AOR related stations just in the confines of northeastern New York and Northwestern Vermont (see list below)...that's one for every preset on my Toyota Radio!

There have also been rumors afoot that WCPV has acquired the call sign WDOT. This was the call of the 1400 AM (changing to 1390) top 40 leader for years in Burlingtion, VT. The call sign was also on 96.1 FM (now WDEV-FM, formerly WSBH-fm) in Warren VT at the Sugarbush ski resort.

Burlington, VT - Plattsburgh, NY area radio listing:

620 WVMT Burlington, VT (oldies, talk)
1070 WNWX Plattsburgh, NY (daytimer - mostly dark sometimes simulcasts WKDR)
760 WCHP Champlain, NY (daytimer - REL)
960 WEAV Pattsburgh, NY (AC - Simulcast WGFB)
1230 WJOY Burlington, VT (EZ/Big Band)
1340 WIRY Plattsburgh, NY (MOR ?)
1390 WKDR Burlington, VT (talk)

88.7 WWPV Colchester, VT (St. Michael's College)
90.1 WRUV Burlington, VT (Univ. of VT)
91.9 WCFE Plattsburgh, NY (Public Radio)
92.1 WMNM Port Henry,NY (Oldies)*
92.9 WEZF Burlington, VT (AC)
93.9 WPLT PLattsburgh, NY (SUNY Plattsburgh)
95.3 WXXX S. Burlington, VT (CHR)
98.9 WOKO Burlington, VT (Country)
99.9 WGFB Plattsburgh, NY (AC)
100.9 WGTK Middlebury, VT (Classic Rock)*
101.3 WCPV Essex, NY (Classic Rock / Imus)

101.7 WVMX Stowe, VT (Classic Hits)*
102.3 WLFE St. Albans, VT (Country)
103.3 WGLY Waterbury, VT (Rel)
104.7 WNCS Montpelier, VT (AAA)
105.1 WEXP Plattsburgh, NY (Adult Rock and Roll)
106.7 WIZN, Vergennes, VT (AOR)
107.9 WVPS Burlington, VT (Public Radio)
* Poor signals over most of Chittenden and Clinton counties.
Regards, Joe.

4070. Kansas City Radio Watchers (10/3/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 15:52:55 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <36rton$g5h@vixen.cso.uiuc.edu>
Source record: 37625

News and observations from here (Kansas City) and there (Central Missouri)....

****

News/talk KMBZ (980) in Kansas City appears to be putting news back in its format. Within the past two weeks, the Bonneville station has reinstated afternoon newscasts and now has newscasts through 10 pm every half-hour.

While the content of many of the newscasts appears to be wire copy, still with scant evidence of street reporting, the station at least is trying to establish a local news presence it had neglected.

Since 1990, KMBZ has had local news only during morning drive and one street reporter covering the entire metro area for the rest of the day.

The news leader in Kansas City radio continues to be country/full-service WDAF (610) -- however, its newscasts focus heavily on murders, fires, and traffic accidents.

****

Meantime, the new afternoon talk show host at Bonneville's duopoly partner KCMO(AM), one of several this year to go through the revolving door at 810 on the dial, is making headlines.

Rick Roberts (not a relative) began to negotiate an Independence firefighters union economic boycott of the Kansas City suburb on the air last Friday (Sept. 30).

While a city official was being interviewed by Roberts, the firefighters union president called and offered to hold another meeting. Both sides will meet again Oct. 12.

Independence firefighters are opposing that city's efforts to impose new work rules. Public employees in Missouri are prohibited by law from striking.

Roberts also recently held a meeting of ex-gang members and community leaders during his afternoon talk show, in an effort to curb violence in Kansas City's urban center.

****

The owner of Columbia's KFMZ (98.3) reported to the Missouri Department of Corrections on Friday (Sept. 30) for evaluation and determination of his eventual destination in the Missouri prison system.

Michael Rice, owner of Contemporary Media, was convicted in July on eight felony counts of sexual misconduct with minors. Rice has still managed to retain control of KFMZ and stations in Eldon, Mo. and Terre Haute, Ind.

Rice is presently at a prison facility in Fulton, Mo., where he will be evaluated before being sent to the prison where he will serve out his prison term. Rice could be eligible for parole as soon as

three years from now.
****
And now, a message for whoever's doing the engineering these days at University of Missouri-Columbia student station KCOU(FM)--I know you guys read this because I occasionally get e-mail from you:
< < < < S T O P O V E R M O D U L A T I N G ! > > > >
The station sounds worse than any early-80's contemporary-hit station ever did. You're going to drive listeners back to AM if you keep this up. People might even end up listening to KTGR(AM)'s nighttime 10-watt signal. Even Stephens College's wobbly KWWC(FM) sounds better than KCOU now (pretty amazing since KWWC has a permanent hum in one channel and even manages to make LPs sound as though they're out of phase -- don't ask me how they do it).
KCOU sounds like junk. It doesn't have to. Please fix it. Thank you.
****
St. Louis heritage rocker KSHE(FM) is now re-emphasizing its music tradition. During listening this past weekend, I caught numerous references to
"20-song music marathons" and the new "Rock and Roll Morning Show" featuring "more rock and roll than any other morning show." And during the Sunday morning "classics" show, longtime KSHE personality John Ulett was hardly saying anything other than song titles and artists and "Rocktober" contest winners.
The Sunday morning KSHE show goes head-to-head with another longtime St. Louis rock radio personality, "Radio Rich" Dalton, who has his show on classic rock KSD-FM. Both are fine programs; 'tis a shame they're on at the same time.
****
KSHE is also taking part in what appears to be a clever promotion. In St. Louis' Union Station, the station has joined with a restaurant to open the "KSHE Real Rock Cafe," modeled along the lines of the Hard Rock Cafe restaurant chain. The station is doing some live broadcasts from the Real Rock Cafe; not hard to do since KSHE's studios are nearby in the Union Station Annex.
****
Here's something different: KLWN(AM) Lawrence, Kansas founder Arden Booth, who still reads *poetry* every day at 11.30 am on the full-service/AC station. The program is called "Poetic License."
I'm not much on poetry (in fact, I don't like it at all) but I'll have to say that KLWN doesn't seem afraid to stretch out and do something different.
Booth's son Hank is the present general manager of KLWN and modern-rock KLZR(FM) in Lawrence, a city of more than 60,000 that's home to the University of Kansas.
****
Coming up this week is the 69th anniversary of Columbia news/talk station KFRU(AM). Stephens College brought the station to mid-Missouri on Oct. 7, 1925. During the Depression, when the station operated at 630 kHz, KFRU was sold and passed through several owners before landing

in the grip of the St. Louis Star-Times.
The Star-Times swapped the desirable 630 kHz frequency with KXOK in St. Louis in 1940. In 1945, the Star-Times sold KFRU to local owners; it has remained locally owned ever since. KFRU is now at 1400 kHz and still going strong as part of a duopoly with KARO(FM) and soon with KBXR(FM).
After achieving market dominance as a rock-and-roll station in the 1960s, KXOK went into decline and, earlier this year, reemerged as "Christian" hate-talk-radio station KJSL.

4071. Washington, D.C., Radio Watch...more on WCXR.

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 15:52:56 UTC
From: Tom Lacko <LACKO@ENH.NIST.GOV>
Message-ID: <36rtoo$g5i@vixen.cso.uiuc.edu>
Source record: 37626

Well, it's official. As reported in Airwaves #842 and #844, Classic Rock 105.9 WCXR has changed format to Jazz. "Smooth Jazz" made its debut on Friday September 30, 1994, just after noon. The move shouldn't surprise anyone in the D.C. area. WCXR came on the scene about 8 and a half years ago with a Classic Rock format that took the area by storm. It gave Rocker WWDC, DC 101, a strong fight in the ratings for a few years but times and tastes have changed dramatically. Here are WCXR's Arbitron ratings of listeners 12+ from the last six ratings periods.

Spring 1994 1.6
Winter 1994 1.9
Fall 1993 1.9
Summer 1993 2.5
Spring 1993 2.6
Winter 1993 2.1

The ratings from the Summer of '94 have not yet been published but, I'm guessing they were poor once again.

The Smooth Jazz format returns to the air full time for the first time in 15 months. Last summer Contemporary Jazz station WJZE FM 100.3 was sold by United Broadcasting to Colfax Communications for about $18 million. Despite Jazzy 100's respectable ratings (2.7 in the Fall of '92 and a 3.0 in the Winter of '93), Colfax decided to charge after Oldies station WXTR, X-tra 104, with full force and focus on the oldies audience. Fans of WJZE had to tune in to WJFK FM 106.7 for their jazz on the weekends. Also playing contemporary jazz at that time, aside from a few public stations, was WLTT on Sundays from 9 a.m. to 3 p.m.

In November 1993 when WLTT changed formats and call letters, they teased fans of the Contemporary Jazz format by changing from Light Rock to Jazz for 5 hours. They then changed to their current ARROW format featuring mostly rock & roll oldies from the 70's.

The station's call letters will be changing any day now to WJZW. And my moles tell me that the current pre-recorded bumpers being played between songs will be replaced by live jocks beginning Monday, October 10. Interestingly enough, todays WASHINGTON TIMES (10/3/94) states that there have been no changes in air personnel. But I haven't heard any live voices since Fridays change. We'll have to wait to see who decided to stick around and who hit the road. One also wonders if any old WJZE jocks are available and willing to come back to Washington.

Now, at long last, we can dissolve the Committee to Bring Back
Jazzy 100!

I am concerned about this and would like to know when these tests were conducted over WBBM. I noticed that WBBM was splattering into a station at 95.9 (WKKD) sometime ago. It sounded like they were overmodulating or something. You could hear them doing that on either side of thier carrier. I used several receivers and had the same result. I really hope that this was not the result of the tests mentioned above. Just curious of the test days.

Re: whereabouts of David Paul & WSB

David has not been on the air here (at least) in the last three
months that I have been down here. I can check with my boss
(Ron Sailor) who has a number of connections over at WSB.

At this point, WSB is running reruns of Neil Boortz's program
from the prior morning in the 11P-2A slot, and Ludlow Porch
from 2A-5A.

They own KITS in San Francisco, a modern rock station, and have owned it
for at least 25 years that I remember (it used to be classical, then
Spanish language KBRG). I believe they're based in Chicago.

I was offered afternoons at Entercomm's Y108/Pittsburgh a few years ago
but turned it down to stay somewhere sunny and warm. Entercomm owns a
very successful AC in the Gainesville, FL market, too, as well as an
oldies station in the Tampa Bay market, and some other stations around
the US.

Why do you wanna know?

I am 45, White, Middle Class, Married with 3 sons (12, 13, 14). I have never
been asked to participate in a ratings diary.
>
>Is there anything on the radio that YOU like? If so, where and what?

I listen to Talk Radio (WNIS AM 850, Norfolk, VA) for the variety of opinions.
I also host a one-hour call-in on computing.

>
>What yould YOU like to see in a format?

A mix of 80's/90's with NO rap and no heavy metal. Throw in some of the "oldies",
mix up a couple of hours of local talk, mood music on a Saturday night.

>Assuming you could have it, how would you get the message to the advertisers
>that YOU and YOUR GENERATION are out there, listening and buying since we
>know that such a format probably won't do well in the ratings (at least
>around here - in the Boston area).

Give away two-dollar bills for a couple of weeks to the listeners and see
where they show up. Let the advertisers know that if the have some, there's
a very good chance that it came from your station.

>..or am I the only one in this area (Eastern Ma) who can't find anything
>on FM that I can listen to for more than a few minutes.

I spent a week in Eastern MA, working at DEC and wore the tuning knob off
of the rental car. The band is full og mush.

Just my humble opinion....

I have been told both by aquaintences and total strangers, that I have a "radio voice". I have a lower pitched voice, and I am an articulate speaker.

So, it occured to me, why not try 'voice overs' for radio commercials, promo's, station I.D.s, etc.. Problem: I don't know anyone in the radio business. Thus, I have no idea how to get started. I would greatly appreciate any advice anyone had to offer.

Thank you in advance for your time!

Here's what's happening from the sands of Diego:
Oct. 4, 1994

KFSD frequency for sale? It was reported in the Friday, Sept. 30, Escondido Times-Advocate that KIOZ/Par Broadcasting was going to "buy" the 94.1 frequency for $20 million dollars. KFSD, San Diego's commercial classical station, is one of the few that broadcasts at 100kw. (FCC usually limits full power FMers to 50kw in this neck of the woods) KIOZ has been wanting to up their power; but has been met with stiff opposition from KCLX-FM at 102.9.

KCLX, (102.9, 32kw) jumped from classic rock to a "beach" format. The switch came on Sept. 19.

The San Diego Gulls, first reported here to have games on an Escondido station, are now "home" on KCBQ-AM (1170, 50kw-D, 1.5kw-N). I previously reported that the 'Gulls were on KSPA, Escondido.

A lawsuit by radio w/pictures KUSI to oust the Mexico based Fox affiliate was slated for Sept. 26. The SD Tribune article announced the lawsuit claimed KUSI was using the "foreign broadcast permit" and wanted XETV to drop the Fox feed. The lawsuit covered both spectrums of the fifth estate.
But, as I scanned the three leading daily's last week, there were no reports. Will keep ears/eyes glued. [XETRA-AM claims to be the "second most listened to sports station in America, after WFAN. Probably true, tight format, and a boomer signal.

KFI (640 AM, 50kw U) outstanding news department is nowhere to be heard on weekends! The Cox station has started to play "AP" network news at the top of the hour. {I thought KFI had the best news on any southern California station, but . . .

For a new and San Diego county expanded radio log -- with radio w/pictures, please e-mail me.

The really important question that has not been answered about the Seattle AP Radio situation is this:

Do all three stations believe that they are serving the Seattle public by duplicating (triplicating?) this service? Or is it just a cheap way to fill up time and generate some small amount of revenue?

The sad part of all this is that all three of those stations--KING, KIRO and KOMO have long traditions of community service and quality radio.

4087. Entercom (Entertainment Communications)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 23:34:24 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <36soq0$4c7@vixen.cso.uiuc.edu>
Source record: 37642

Gabriel Pritz <gpritz@delphi.com> asked:

> Any one here ever heard of or work for any stations owned by Entercom?

Entercom owns oldies station KLDE (94.5) in Houston, Texas. Before March 1986, this station was classical KLEF. It had been in the format for many, many years.

KLEF donated its LP and CD library to the University of Houston's KUHF (88.7), which dumped its jazz format in favor of classical.

The format switch was extensively covered on TV and by both newspapers. The Houston Chronicle, in particular, suddenly discovered the existence of radio after many years of ignoring it. The Memorial Drive tea-and-crumpets crowd was very, very upset by the change. KLEF was the most pretentious of stations and definitely went after the upper-crust, high-income demos.

Entercom also owns KITS (105.3), modern-rock pioneer LIVE 105, in San Francisco.

Aside:
The KLEF format switch happened the same week that KARO, Columbia, Mo., changed formats from beautiful music to hot AC. A similar level of outcry was heard in Columbia (so much so that GTE admonished KARO for the volume of phone calls generated that week). KLEF's original call letters were... KARO.

PREPARING FOR RENEWAL - PART II
MAIN STUDIO RULE COMPLIANCE

License renewal time is a good time for broadcasters to ensure that their stations are in compliance with some of the Commission's more important rules. In this second part of our multi-part series on preparing for license renewal we remind broadcasters of their obligations under another important Commission rule - Section 73.1125 - the Main Studio Rule.

Under Section 73.1125, all broadcasters must maintain a studio within the principal community contour of their station (the 5 m/Vm contour for an AM station, the 3.16 m/Vm contour for an FM station and either the 74, 77 or 80 dBu contour for a TV station, depending on the channel). In addition, Section 73.1125(c) states that each station shall maintain a local telephone number in its community of license or a toll-free number.

Often times, a broadcaster would rather located his or her main studio in an area that is more beneficial to generating business, but such a location is not permitted because it does not fall within the station's principal community contour. Therefore, sometimes a broadcaster will attempt to maintain a main studio in compliance with the FCC's rules as well as an

additional "auxiliary studio" in the more desirous location. However, broadcasters that attempt such a move must be careful to ensure that their "main studio" does not fall out of compliance with the Commission's requirements.

In order for the a studio to be considered by the Commission to be a "main studio" it must have enough equipment to produce and transmit programming. Therefore, when a station does not maintain such facilties at its alleged "main studio" the Commission will issue a forfeiture. The key then is for the station to maintain enough equipment at its main studio facility so that at any time it could produce and transmit programming from that location.

By far the most complicated and difficult main studio rule requirement is staffing. The Commission requires that a licensee maintain a "meaningful management and staff presence" at its main studio. Recently, the FCC defined this term to mean that a management and staff presence must be maintained during the station's normal business hours. By management, the FCC lists the following positions: a corporate officer of the corporate licensee; general manager; station manager; program director; chief engineer (with managerial duties); news director; sales manager; personnel manager; facilities manager; operations manager; production manager; promotion director; research director; controller; and chief accountant. A title, alone, is not sufficient; the person, whatever the title, must have managerial duties. By staff, the FCC means a secretary, receptionist, engineer, announcer or other staff person.

The next question is: How much of the time does the management and/or staff person have to be physically located at the main studio? At a minimum, all of the following are required:

1. During normal business hours, Monday through Friday (8:30 AM - 5:30 PM or, at a minimum 9:00 AM - 5:00 PM) at least one person (manager or staff) must be physically present at the main studio to answer the phone, greet visitors, etc.; and

2. Both a manager and a staff person must report to the main studio each day (Monday through Friday) and spend a "substantial amount of time there." The same manager or staff person need not report each day. There can be different managers or staff persons on different days. The manager or staff person need not be chained to his/her desk, but may leave on station business, however, on that day, he/she must have the main studio as his/her "home base" and when he/she leaves, there must be in attendance at least one other person (staff or manager).

Unfortunately, the Commission has never defined the term "substantial amount of time." It is clear that a manager or staff person must be physically present at the main studio each day. To at least meet the "spirit" of the FCC requirements, however, it is recommendable that the person be present at least 3 to 4 hours each day. It should also be noted that the same person cannot qualify as both a manager and staff person. There must be at least one manager and one staff person, each business day (Monday through Friday). The Commission also does not define the term "home base". However, it appears that the FCC means that on that day, the person is working out of the main studio and that his/her absence during the day is either on station business or is incidential to his/her main studio base (ie: a dental appointment; car repair; lunch, etc).

Every broadcast station must have a main studio and meet these requirements, even though most or all of its programming originates from an auxiliary studio, satellite or if the operation of the station is fully automated. Failure to maintain a proper main studio would make a broadcast station an easy target for license renewal trouble.

4089. Do you like your local FM's ?

4093. Syndication question

Newsgroup: rec.radio.broadcasting
Date: 1994-10-04 23:34:42 UTC
From: g91l4576@warthog.ru.ac.za
Message-ID: <36soqi$4d2@vixen.cso.uiuc.edu>
Source record: 37648

>From February 1995 (that's right around the corner) I'll have a show available for syndication. It is a College Chart compiled by student radio stations here in South Africa. We're currently setting the whole thing up, lining up studios, a production team, clearing music rights etc etc etc. Can anyone point me in the right direction with regard to making it available to syndicators overseas i.e. UK, USA, Australia, Canada, Europe. I know the chart is not directly relevant to foreign stations, but will feature a lot of South African artists in a great blend with overseas acts. With the exchange rate being what it is it should be relatively cheap for stations to pick it up overseas so it might appeal to stations that enjoy "world music".

Is there a publication somewhere that lists syndication brokers I can contact? Or is it better to approach stations direct, in which case how do I find these stations? The show promises to be very popular here in SA with the campus stations I've spoken to being very interested in contributing and a lot more out there I'm still getting hold of...Any tips would be most welcome. Feel free to e-mail - no point in clogging up bandwidth.

Thanks

Tony

>sometime ago. It sounded like they were overmodulating
> or something.

RBR's September 26th issue states "...the tests were conducted
last Wednesday..."

I would thus place the date as September 21st.

The article also states; "In Chicago the USA Digital signal
has been operating "under" the licensed analog signal of
CBS-owned WBBM-FM for almost two months."

Personally, I think the only answer to the issue of
interference would be via the use of a good, calibrated, RF
spectrum analyzer.

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World

1994 October 05

Table of Contents: **********
1. Table of Contents: ********** 1
2. Overview: ********** 1
3. The upcoming schedule: ********** 1
3.1. October 8th: * At Santa Rosa * 1
3.2. October 15th: ********** 1
3.3. October 22nd: ********** 2
3.4. October 29th: ********** 2
3.5. October 30th: ****Field Trip**** 2
4. Special Offers: ********** 2
4.1. Drawing for Free Tickets!: NOT! * 2
4.2. Free Coffee: ********** 2
4.3. T-shirt Drawing: ********** 2
5. Downloading Additional Information: ****** 4
6. How to Reach Us: ********** 4

Overview: **********

This is the weekly schedule for West Coast Live, San Francisco's Live Radio Show to the World (actually just public radio). Each week we give away two free tickets to the live show by a drawing over the Internet. Read below for details.

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

October 8th: * At Santa Rosa *

Special live remote broadcast from our Santa Rosa/Rohnert Park affiliate KRCB.

* The Limelighters, folk quartet.
* Jim Boggio Quintet, blues band.
* Gaye LeBaron, columnist.
* Anne Lamott, author.
* Chaskinakuy, Andean sound via Sonoma county.
* Claire Peaslee, naturalist.

* True Fiction Magazine (formally Pulp Playhouse).

October 15th: **********

Returning to the Cowell Theater at Fort Mason in San Francisco.

* The Bobs, fantastic a capella.
* Stephen Yerkey Band, jangly guitar rockers.
* Meredith Tromble, a view from the studio.
* Naa Kahidi, Tlingit legends.
* Josh Kornbluth, monologist.

October 22nd: **********

* James T. Kirk, "rebirth of cool" jazz.
* Frederick Chiu, classical pianist.
* A most incredible mystery guest.

October 29th: **********

* Lady Bianca, soulful blues vocalist.
* Shirley Taylor Haizlip, author, "The sweeter The Juice".

October 30th: ****Field Trip****

West Coast Live benefit Open Studio Tour with Meredith Tromble. Hunter's Point Naval Shipyard 10am to 2pm, lunch included. Call (415) 664-9500 for reservation information.

Special Offers: **********

Drawing for Free Tickets: NOT! **

For the last 40 weeks, we've been doing a drawing for free tickets. Well, the drawing is going on hiatus, but will arise next week as "The New and Improved Internet Free Ticket Offer", with new rules. Read this spot next week for details.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.
Rules: **********
Official West Coast Live T-shirts or sweat shirts only.
For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.
This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an
official West Coast Live T-shirt.
Rules: **********
To enter this drawing, you must drop a business card into
our fish bowl. Any scrap of paper with your name, address,
and phone number may be substituted for a business card.
One entry per person each month. You must be present to
enter.

4096. Ottawa/Canada airchecks wanted

Newsgroup: rec.radio.broadcasting
Date: 1994-10-05 22:33:01 UTC
From: fybush@world.std.com
Message-ID: <36v9it$fds@vixen.cso.uiuc.edu>
Source record: 37550

Maybe posting this will get it through; I seem to be getting a lot
of mail bounces when I try to send to certain Canadian addresses...

Anyway --

There are a few Canadian airchecks that I'd like very much to have
in my collection. I will gladly trade for any current Boston
market material (finger fybush@world.std.com for a market list),
or I'd be happy to send my list of older and out-of-market
airchecks that are available for trade)...

I'm specifically looking for the end of CJSB-"54 Rock" and the start
of CKSB-FM. I'd also like very much to get the end of the
Telemedia network (CKCH/CJMS/CJRS/CJRP etc). Also, the
CBC switch to FM from a few years back...and the end of CKO if
anyone has that.

I'm also up for just doing some current market-trading -- Canada
or otherwise. Just let me know what you've got to trade or can
tape for trading and I'm game!

-=Scott Fybush - fybush@world.std.com=-
Finger me for a current Boston market list!

>Why do you wanna know?

Because, I WORK for WKTK-FM, in gainesville, the "very successful" AC station, and love it! I was wandering if there were any fellow Entercom employees out there! We're #1! WE'RE #1!! YEAH! Ooops, sorry. I lost control. "From the Gulf to the Atlantic and up and down I-75, I'm Gabriel Michaels Coast to Coast on 98.5, KTK-FM."

Here in Middle America, we have a surplus of country stations: regular country, young country, hot country, citified country, you name it.

At one time, Leavenworth station KTRO(FM) (now KQRC(FM)) programmed "beautiful country" (this was back 1981 or so).

Yet, until KTDF(FM) went on the air last month in Manhattan, Kansas (home of Kansas State University and Fort Riley), that market had NO country station!

There are other odd omissions here and there. Columbia, Missouri (home of the University of Missouri and two smaller colleges) has not had a CHR station for more than two years. Yet it has two AAA stations (one noncommercial, KOPN(FM)).

(Even stranger for a city that once promoted itself as "College Town USA," Columbia has no over-the-air PBS TV service available!)

Kansas City has neither a modern rock nor an AAA station (although modern rock is available spottily from nearly KLZR(FM) in Lawrence, Kansas).

(One would think that, with Kansas City's history as a jazz and blues center, an AAA station could tap into that heritage and really be something special. The closest we get now are four hours a night on the University of Missouri-Kansas City's KCUR(FM) and a Sunday night blues show on classic rock KCFX(FM).)

Likewise, despite the longstanding presence of Mexican-American communities in Kansas City, Mo. and Kansas City, Kansas, there is no Spanish-language programming other than two hours per evening on community-access KKFI(FM).

Well...here in State College, PA, the FM dial is definitely in need of
repair! I'd say we need (1) a full time college student run station
(alternative and other "student" music)- though this may be alleviated
next spring (but the date may be delayed), (2) a modern rock station
(less important if (1) is fullfilled), (3) an AAA station, and (4) even
though I'm tired of this format, this area is lacking a fully album rock
station. Here's a sample of the dial (many stations come in marginally-
I only included primary and medium-strong secondary stations...many of
the weak stations that are barely receivable are either AC, country or
religious anyway)...

calls are omitted, since I can't remember half of them...

88.7 local translator of San Fran, CA religious station (I don't know why)
89.9 religious- State College, primary
90.7 *OFF AIR* proposed student station at Penn State
91.5 public radio- Penn State, primary
92.1 AC- Lock Haven, secondary
94.5 local translator of 98.1 country
95.3 AC- Bellefonte-State College, primary
97.1 classic rock/album rock- Univ. Park-State College, primary
(note: this station is heavily playlisted, rarely plays anything
different or exciting, lots of 70's-80's)
98.1 country- Altoona, primary/strong secondary
99.5 AC/top 40- Mt. Union, secondary
100.1 top 40- Altoona, secondary
101.1 AC/mix- Tyrone-State College, primary
103.1 top 40- State College, primary
103.5 AC- huntingdon, secondary
103.9 Oldies- Bellwood-Altoona, secondary
106.3 MOR/AC- Huntingdon, secondary
107.9 *OFF AIR* proposed station, format TBA (Port Matilda, should be primary)

As you see...nothing much to see here...though if you don't mind heavy fuzz and fading in and out, there are about 7-8 other stations around...

Glad I'll be moving soon...
Brandt

: Rock(3), Spanish(3), Oldies(2), Easy & CHR (1 each).

lessee... Cleveland-Akron-Canton has three AC's (oh, sorry, WHBC in
Canton probably qualifies too -- four AC's), 4 full- or part-
time modern rockers, 2 full- or part-time Top 40's... I want
less variety. :) (By part-time I mean they play x or y or z
as a major portion of their programming but not all the time.)
Oh yeah, forgot the two country stations.

And I used to love Cleveland because being (at the time) the
10th biggest market meant there was gobs of variety among
different stations.... :)

We don't have an AAA. Would it go over? Dunno.

We don't have a Z-rock anymore. Ok, ok, I wouldn't mind having Z-rock
back as it is definitely better than The Wave which took its place.
And I wouldn't mind having an AAA here just to see what would happen
to it. It would certainly be different. I like the modern rock format
too but some of the limited playlists stink.

On the good side we do have a very strong Fine Arts station which
you can hear in Erie PA and probably all the way south to Columbus
(though I haven't tried it in Columbus). And we have a neat public
radio station which plays jazz! So all is not dead and boring in
this market (although we only really need one modern rocker, thank
you...)

>
I have never received a ratings diary but have been tele-surveyed.

I agree with previous posters who have basically turned away from the
medium. I get the sense that listeners are held in contempt by
most programmers, particularly of talk stations. This is evidenced
by a) sloppy on-air production b) dumbed-down news delivery and
an overabundance of happy-talk and lifestyle reporting and c) lousy
audio.

Fortunately, the SF Bay Area has reasonable variety. High on the list
are KKSF (smooth jazz), KBAY (modern EZ), KKHI (classical), KCSM (jazz)
and KKSJ (big bands). For news, KQED and and far less frequently, KPIX
when they're doing news instead of lifestyle fluff.

If I had only two choices - no other options - they would go like this:

1) A professional, impartial, all-news station. A good example is WCBS
Newsradio 88, as it was formatted circa 1976. WCBS had an
impressive stable of reporters, very, very smooth on-air talent (even
overnights), well-executed on-air production, distinctive jingles
and clean audio. (I have no idea what WCBS sounds like today)
The closest living example is KNX in Los Angeles.
The farthest living example is KCBS in SF, where the audio is distorted,
the air talent is anything but smooth and the jingles are tedious, brash
and plodding.
2) For music, I'd take a station with the air talent of WNEW in New York
or the old KSFO in SF,
coupled with the excellent on-air production that used to exist on
KFRC in San Francisco when it was "Magic 61." The music mix would

be comprised mainly of big bands, jazz and swing, lots of Sinatra,
Stan Kenton, etc.

: WJFK's (106.7 FM/1300 AM) cool jazz format that is played when they are
: not running talk (overnights and weekends). It has no jock and neutral
: liners for legal ID and other stuff.
Jocks will start on the air on Monday....they are currently being
"prepped" to the jazz format (i.e. performers, songs, etc, getting that
"smooth jazz feel down). They are listening to tapes from other jazz
stations throughout the country to get the "feel" perfected. The jocks
will be the same as from the old CXR (now WJZW).

: PS- Could someone describe to me the full switchover to cool jazz at
: WCXR? When did they stop playing classic rock and what was their last
: song? And was there any type of special show at the end of the classic
: rock format (something reviewing the history of the station, DJs saying
: how nice it was to work at the station, etc?) Thanks.

The last song was (I think) a song entitled "The End" and after it
played, they started a clock ticking...well...it was annoying, but
intriging as well. In any case, no history of the station ala WAVA's
end a few years back. And yes, DC has become very interesting.....

>From a press release just out today...we're pretty excited about it! :)

ONLINE TONIGHT NOW HEARD ON UNITED AIRLINE'S USA TODAY SKYRADIO

October 5, 1994 -- Washington, DC (OLT PR) -- OnLine Tonight with David Lawrence, the country's fastest growing computer oriented radio talk show, has added USA Today's SkyRadio in-flight broadcast service, heard on United Airlines' domestic flights, as their latest affiliate.

The show will air live on Sunday evenings between 8 and 10PM ET, 5 and 7PM PT. Passengers on many United domestic flights will be able to tune their in-flight audio feed to USA Today SkyRadio's Viewpoints channel to listen to the show; picking up the GTE Airphone in front of them will put them directly in touch with OnLine Tonight. "We're excited about SkyRadio joining the great group of affiliates we've assembled," said host David Lawrence. "They add about 900,000 listeners to our base each month, and they're precisely the kind of listeners we want: technology-friendly travelers who want to be informed and entertained." Holland Cooke, Operations Director for USA Today SkyRadio said, "OnLine Tonight with David Lawrence caught our attention because it is so far above and beyond what other types of shows like this are doing. The content, the presentation, and its fit with our typical listener makes this a slam dunk. We're thrilled to have them on our team."

USA Today SkyRadio offers three channels of news and information to United's friendly skies: a pure news channel, a sports oriented offering, and one channel that gives the listener news and talk. "Some of our shows are by necessity tape delayed. However, much like Larry King Live, OnLine Tonight with David Lawrence has a lot of fun with its audience. We felt that to carry it live was a foregone conclusion," noted Cooke. Lawrence added, "We've promised Holland that we'll get his listeners on the air quickly. We know it's still a bit pricey to call on the phones on the planes, but we think listeners will find it worth the effort. We'll also gear some of the fun we do on the show around our new USA Today SkyRadio listeners." Lawrence promised that this weekend's show will feature contests and prizes solely for their newfound audience.

OnLine Tonight With David Lawrence is a nationally syndicated radio show based in Washington, DC and has affiliates across the United States. Its two-hour Sunday night talk show format covers personal computing and electronic entertainment, and features news, reviews, listener phone calls, industry interviews and fun and games. Hosted by radio veteran David Lawrence, its cast includes Rita Daniels, resident DOS/Windows expert and Peter Burns, news anchor. For more information, use keyword OLT

on America Online, or call Matt Coates at 202/337-3111. To participate live on the air, call 1-800-39-ONLINE between 8 and 10pm Sunday nights. To hear the show over the telephone, call the OnLine Tonight ListenLine at 1-800-846-4-OLT (V/MC, .30/min)

>easily over 25,000 that made the Billboard Hot 100 from 1955-1970!!

It seems like most programmers get into "top 40" oldies rather than top 100. I have lived in the Bay Area since 1983 and I remember an FM station in the Stockton Modesto area that went off the well-beaten tracks of "Satisfaction" and "Johnny B. Good", and played lesser known selections from the 50s and 60s. The DJ at this station had his own collection of 20,000 records, and I heard some bits of rock history I never knew existed. Sadly, he was dumped in favor of a syndicated oldies show that played the usual suspects. KOFY in San Francisco went from Spanish language format to oldies, and they did try to play some more unusual ones, but they weren't making money and went back to Spanish language.

Still I wish you luck in setting up a format like that... If you do, I'll buy a beam antenna and point it to Davis :)

PREPARING FOR RENEWAL - PART II
THE MAIN STUDIO RULE

PREPARING FOR RENEWAL - PART II
MAIN STUDIO RULE COMPLIANCE

License renewal time is a good time for broadcasters to ensure that their stations are in compliance with some of the Commission's more important rules. In this second part of our multi-part series on preparing for license renewal we remind broadcasters of their obligations under another important Commission rule - Section 73.1125 - the Main Studio Rule.

Under Section 73.1125, all broadcasters must maintain a studio within the principal community contour of their station (the 5 m/Vm contour for an AM station, the 3.16 m/Vm contour for an FM station and either the 74, 77 or 80 dBu contour for a TV station, depending on the channel). In addition, Section 73.1125(c) states that each station shall maintain a local telephone number in its community of license or a toll-free number.

Often times, a broadcaster would rather located his or her main studio in an area that is more beneficial to generating business, but such a location is not permitted because it does

not fall within the station's principal community contour. Therefore, sometimes a broadcaster will attempt to maintain a main studio in compliance with the FCC's rules as well as an additional "auxiliary studio" in the more desirous location. However, broadcasters that attempt such a move must be careful to ensure that their "main studio" does not fall out of compliance with the Commission's requirements.

In order for the a studio to be considered by the Commission to be a "main studio" it must have enough equipment to produce and transmit programming. Therefore, when a station does not maintain such facilties at its alleged "main studio" the Commission will issue a forfeiture. The key then is for the station to maintain enough equipment at its main studio facility so that at any time it could produce and transmit programming from that location.

By far the most complicated and difficult main studio rule requirement is staffing. The Commission requires that a licensee maintain a "meaningful management and staff presence" at its main studio. Recently, the FCC defined this term to mean that a management and staff presence must be maintained during the station's normal business hours. By management, the FCC lists the following positions: a corporate officer of the corporate licensee; general manager; station manager; program director; chief engineer (with managerial duties); news director; sales manager; personnel manager; facilities manager; operations manager; production manager; promotion director; research director; controller; and chief accountant. A title, alone, is not sufficient; the person, whatever the title, must have managerial duties. By staff, the FCC means a secretary, receptionist, engineer, announcer or other staff person.

The next question is: How much of the time does the management and/or staff person have to be physically located at the main studio? At a minimum, all of the following are required:

1. During normal business hours, Monday through Friday (8:30 AM - 5:30 PM or, at a minimum 9:00 AM - 5:00 PM) at least one person (manager or staff) must be physically present at the main studio to answer the phone, greet visitors, etc.; and

2. Both a manager and a staff person must report to the main studio each day (Monday through Friday) and spend a "substantial amount of time there." The same manager or staff person need not report each day. There can be different managers or staff persons on different days. The manager or staff person need not be chained to his/her desk, but may leave on station business, however, on that day, he/she must have the main studio as his/her "home base" and when he/she

leaves, there must be in attendance at least one other person (staff or manager).

Unfortunately, the Commission has never defined the term "substantial amount of time." It is clear that a manager or staff person must be physically present at the main studio each day. To at least meet the "spirit" of the FCC requirements, however, it is recommendable that the person be present at least 3 to 4 hours each day. It should also be noted that the same person cannot qualify as both a manager and staff person. There must be at least one manager and one staff person, each business day (Monday through Friday). The Commission also does not define the term "home base". However, it appears that the FCC means that on that day, the person is working out of the main studio and that his/her absence during the day is either on station business or is incidential to his/her main studio base (ie: a dental appointment; car repair; lunch, etc).

Every broadcast station must have a main studio and meet these requirements, even though most or all of its programming originates from an auxiliary studio, satellite or if the operation of the station is fully automated. Failure to maintain a proper main studio would make a broadcast station an easy target for license renewal trouble.

>From the 10/05 edition of the Chicago Tribune...

WGCI-FM'S LEAD OVER FIELD GROWS IN LATEST RATINGS

Urban contemporary WGCI-FM 107.5 retained its No. 1 ranking in the Arbitron quarterly report for Chicago area radio stations released Tuesday. The Gannett-owned outlet increased its lead by one full audience share point over runner-up WGN-AM 720.

In the spring, WGCI led the book with a 7.0 audience share to 6.9 for Tribune Broadcasting's WGN. In the summer, WGCI's share was up 6 percent to 7.4, while WGN, without Cubs games to broadcast since Aug. 12, dropped 7 percent to 6.4. Even Bob Collins, while staying No. 1 in the AM drive-time slot, had his share drop from 11.7 to 11.1.

"I'm pleased to note they like the radio station rather than just its parts," said WGN general manager Dan Fabian, adding the station had a similar audience share last summer. "If you pull out (the Cubs play-by-play) and don't take a hit, you're pleased. That was about 40 percent of the book."

Jumping into a tie for third place from sixth place was alternative rocker WKQX-FM 101.1. The Emmis Broadcasting-owned station, the closest thing Chicago has to a Top 40 outlet, had a 4.3 audience share for the summer, up 13 percent from last spring's 3.8 share, and tied CBS-owned WBBM-FM 96.3.

Another surprise came from smooth jazz WNUA-FM 95.5, which leaped 44 percent from a 2.5 share and a No. 19 ranking in the spring to a 3.6 share and the No. 8 spot.

Rounding out the top 10 are WUSN-FM 99.5 and WLIT-FM 93.9, tied for fifth; WBBM-AM 780, seventh; WVAZ-FM 102.7, ninth; and WLS-AM 890, 10th.

The all-sports wars may be flagging due to the baseball strike and the NHL lockout. WSCR-AM 820 dropped from a 1.6 audience share to a 1.4, but easily maintained its lead over WMVP-AM 1000, which slipped from a 1.0 to a 0.9. In the meantime, WMAQ-AM 670, without the White Sox, saw its nighttime, all-sports programming tumble from a 4.4 share to 3.1.

WFMT-FM 98.7 took the classical music format lead over rival WNIB-FM 97.1. WFMT moved up to a 1.4 share, while WNIB remained at 1.1, the same share both stations had in the spring.

As for individuals, Mancow Muller seems to have jump-started the new WRCX-FM 103.5, increasing its morning share from 1.9 to 2.4 and from 2.0 to 2.3 among the 25-54 demographic group. And while Steve Dahl's WMVP share dropped from 2.2 to 2.1 this summer, his 25-54 demographic jumped from a 3.2 share to 3.5.

Personnel moves: Bob Goldman has been hired by CLTV to replace

Joby Smith as a sports anchor, beginning Oct. 24. Goldman has been a sports anchor/reporter at CBS affiliate WKYT-TV in Lexington, Ky., the past five years.
Marketing news: WTTW-Ch. 11 enters the retailing business by opening the "WTTW Store of Knowledge" in conjunction with the L.A. PBS station, which pioneered the concept. Two Chicago-area stores are planned for 1995 with two more in 1996, all in shopping areas such as suburban malls and Michigan Avenue.
Hear and there: The WBBM-AM 780 morning team of John Hultman and Felicia Middlebrooks celebrates its 10th anniversary Thursday. . . . WPNT-FM 100.3 morning sidekick Abby Polonsky appears briefly as an extra on "Seinfeld" at 8 p.m. Thursday on WMAQ-Ch. 5. . . . "Tommy" composer Pete Townshend visits with Bob Stroud at 2:30 p.m. Thursday on WCKG-FM 105.9 . . . WNIB-FM 97.1 begins a 13-week series of broadcasts from the Salzburg Festival at 9 p.m. Friday. . . . "Image Union" showcases five entrants from the Chicago International Children's Film Festival at 10 p.m. Saturday on WTTW-Ch. 11.

>From the 10/05 edition of the Chicago Tribune...

WGCI-FM'S LEAD OVER FIELD GROWS IN LATEST RATINGS

Urban contemporary WGCI-FM 107.5 retained its No. 1 ranking in the Arbitron quarterly report for Chicago area radio stations released Tuesday. The Gannett-owned outlet increased its lead by one full audience share point over runner-up WGN-AM 720.

In the spring, WGCI led the book with a 7.0 audience share to 6.9 for Tribune Broadcasting's WGN. In the summer, WGCI's share was up 6 percent to 7.4, while WGN, without Cubs games to broadcast since Aug. 12, dropped 7 percent to 6.4. Even Bob Collins, while staying No. 1 in the AM drive-time slot, had his share drop from 11.7 to 11.1.

"I'm pleased to note they like the radio station rather than just its parts," said WGN general manager Dan Fabian, adding the station had a similar audience share last summer. "If you pull out (the Cubs play-by-play) and don't take a hit, you're pleased. That was about 40 percent of the book."

Jumping into a tie for third place from sixth place was alternative rocker WKQX-FM 101.1. The Emmis Broadcasting-owned station, the closest thing Chicago has to a Top 40 outlet, had a 4.3 audience share for the summer, up 13 percent from last spring's 3.8 share, and tied CBS-owned WBBM-FM 96.3.

Another surprise came from smooth jazz WNUA-FM 95.5, which leaped 44 percent from a 2.5 share and a No. 19 ranking in the spring to a 3.6 share and the No. 8 spot.

Rounding out the top 10 are WUSN-FM 99.5 and WLIT-FM 93.9, tied for fifth; WBBM-AM 780, seventh; WVAZ-FM 102.7, ninth; and WLS-AM 890, 10th.

The all-sports wars may be flagging due to the baseball strike and the NHL lockout. WSCR-AM 820 dropped from a 1.6 audience share to a 1.4, but easily maintained its lead over WMVP-AM 1000, which slipped from a 1.0 to a 0.9. In the meantime, WMAQ-AM 670, without the White Sox, saw its nighttime, all-sports programming tumble from a 4.4 share to 3.1.

WFMT-FM 98.7 took the classical music format lead over rival WNIB-FM 97.1. WFMT moved up to a 1.4 share, while WNIB remained at 1.1, the same share both stations had in the spring.

As for individuals, Mancow Muller seems to have jump-started the new WRCX-FM 103.5, increasing its morning share from 1.9 to 2.4 and from 2.0 to 2.3 among the 25-54 demographic group. From: gdallal@world.std.com
Message-ID: <36vpup$or9@vixen.cso.uiuc.edu>
Source record: 37568
Cross-posted to: rec.music.bluenote,rec.radio.broadcasting

It's here. A newsgroup for the fans of the ol' Big Broadcaster and the music featured on the Big Broadcast. I suppose there'll be some who'll want to focus on the ol' Big Bandstander and the music featured on the Big Bandstand, but big band music has its own newsgroup while classic pop and jazz has none, so I hope the bulk of posts will tend toward classic pop and jazz. But I know the group will have its way regardless of any inclinations I might have, which is the way it should be.

The text announcing the creation of alt.fan.rich-conaty follows . . .

for fans of the Big Broadcaster

Rich Conaty has been playing classic pop and jazz for the past 22 years: 20 years at WFUV at Fordham University, and for the last 2 years on WQEW in NYC. Tapes of his shows have been sent all over the country (world?) to fans who know there's nowhere else to get a weekly fix of the popular music from the 20's and 30's.

alt.fan.rich-conaty has many purposes: First, to sing the praises of and answer many unanswered questions about the Big Broadcaster himself. What happened with Anita? How are the cats doing? Second, to discuss the music he plays on his shows. Some are rare recordings from his personal collection. Others are available on CD reissues. Unfortunately, he rarely tells us which is which. Perhaps, this group can help strip away some of the veil of secrecy. Third . . . well, we'll make it up as we go along.

Well...here in State College, PA, the FM dial is definitely in need of
repair! I'd say we need (1) a full time college student run station
(alternative and other "student" music)- though this may be alleviated
next spring (but the date may be delayed), (2) a modern rock station
(less important if (1) is fullfilled), (3) an AAA station, and (4) even
though I'm tired of this format, this area is lacking a fully album rock
station. Here's a sample of the dial (many stations come in marginally-
I only included primary and medium-strong secondary stations...many of
the weak stations that are barely receivable are either AC, country or
religious anyway)...

calls are omitted, since I can't remember half of them...

88.7 local translator of San Fran, CA religious station (I don't know why)
89.9 religious- State College, primary
90.7 *OFF AIR* proposed student station at Penn State
91.5 public radio- Penn State, primary
92.1 AC- Lock Haven, secondary
94.5 local translator of 98.1 country
95.3 AC- Bellefonte-State College, primary
97.1 classic rock/album rock- Univ. Park-State College, primary
(note: this station is heavily playlisted, rarely plays anything
different or exciting, lots of 70's-80's)
98.1 country- Altoona, primary/strong secondary
99.5 AC/top 40- Mt. Union, secondary
100.1 top 40- Altoona, secondary
101.1 AC/mix- Tyrone-State College, primary
103.1 top 40- State College, primary
103.5 AC- huntingdon, secondary
103.9 Oldies- Bellwood-Altoona, secondary
106.3 MOR/AC- Huntingdon, secondary
107.9 *OFF AIR* proposed station, format TBA (Port Matilda, should be primary)

As you see...nothing much to see here...though if you don't mind heavy fuzz and fading in and out, there are about 7-8 other stations around...

Glad I'll be moving soon...
Brandt

From: johnstp@aol.com
Message-ID: <36vpv1$orp@vixen.cso.uiuc.edu>
Source record: 37571

New York radio programmers were tipped off when WPLJ showed up #1 (12+). Turns out that Arbitron inflated their Males 18-24 figure by 500% (they had a 37.1).

Arbitron quickly realized the mistake and put the book on "hold" as well as the Nassau/Suffolk book.

Arbitron says the miscalculations are limited to one station and one demographic.

In other news, American Pop Standards station, WQEW-AM, turned in an impressive 2.1 share (12+). It's the first time they've been over a 2 since they went on the air in December, 1992, and the first time they beat WNEW-AM's final rating of a 1.8. (WQEW had a 1.7 (12+) in the Spring book)

4117. OnLine Tonight now heard on United Airlines

>From a press release just out today...we're pretty excited about it! :)

ONLINE TONIGHT NOW HEARD ON UNITED AIRLINE'S USA TODAY SKYRADIO

October 5, 1994 -- Washington, DC (OLT PR) -- OnLine Tonight with David Lawrence, the country's fastest growing computer oriented radio talk show, has added USA Today's SkyRadio in-flight broadcast service, heard on United Airlines' domestic flights, as their latest affiliate.

The show will air live on Sunday evenings between 8 and 10PM ET, 5 and 7PM PT. Passengers on many United domestic flights will be able to tune their in-flight audio feed to USA Today SkyRadio's Viewpoints channel to listen to the show; picking up the GTE Airphone in front of them will put them directly in touch with OnLine Tonight. "We're excited about SkyRadio joining the great group of affiliates we've assembled," said host David Lawrence. "They add about 900,000 listeners to our base each month, and they're precisely the kind of listeners we want: technology-friendly travelers who want to be informed and entertained." Holland Cooke, Operations Director for USA Today SkyRadio said, "OnLine Tonight with David Lawrence caught our attention because it is so far above and beyond what other types of shows like this are doing. The content, the presentation, and its fit with our typical listener makes this a slam dunk. We're thrilled to have them on our team."

USA Today SkyRadio offers three channels of news and information to United's friendly skies: a pure news channel, a sports oriented offering, and one channel that gives the listener news and talk. "Some of our shows are by necessity tape delayed. However, much like Larry King Live, OnLine Tonight with David Lawrence has a lot of fun with its audience. We felt that to carry it live was a foregone conclusion," noted Cooke. Lawrence added, "We've promised Holland that we'll get his listeners on the air quickly. We know it's still a bit pricey to call on the phones on the planes, but we think listeners will find it worth the effort. We'll also gear some of the fun we do on the show around our new USA Today SkyRadio listeners." Lawrence promised that this weekend's show will feature contests and prizes solely for their newfound audience.

OnLine Tonight With David Lawrence is a nationally syndicated radio show based in Washington, DC and has affiliates across the United States. Its two-hour Sunday night talk show format covers personal computing and electronic entertainment, and features news, reviews, listener phone calls, industry interviews and fun and games. Hosted by radio veteran David Lawrence, its cast includes Rita Daniels, resident DOS/Windows expert and Peter Burns, news anchor. For more information, use keyword OLT

on America Online, or call Matt Coates at 202/337-3111. To participate live on the air, call 1-800-39-ONLINE between 8 and 10pm Sunday nights. To hear the show over the telephone, call the OnLine Tonight ListenLine at 1-800-846-4-OLT (V/MC, .30/min)

Source record: 37574

A station playing 25,000 songs? Death.

Check into what most successful stations are doing and you'll find only a few hundred titles. There are many examples of stations around the country doing great with only a handful of titles. Do you have any examples of a station doing well with 2000 titles? 10000 titles?

Fact is, in research projects I've been a part of, people want to hear a familiar song when they tune in. Most stations can't afford to play a song that only hit #58 in 1964 (I will, however, admit the enjoyment some feel when they hear a song that hansn't been played on the air too often and burnt into the ground).

Most people have a few hundred songs that are familiar to them and they like. Get people to listen to a station when they only like 1/3 of the music played would be difficult in today's multi-faceted competitive environment.

: I have been told both by aquaintences and total strangers, that I have a "radio
: voice". I have a lower pitched voice, and I am an articulate speaker.

: So, it occured to me, why not try 'voice overs' for radio commercials, promo's,
: station I.D.s, etc.. Problem: I don't know anyone in the radio business.
: Thus, I have no idea how to get started. I would greatly appreciate any advice
: anyone had to offer.

Jon, interesting question. If you have:
A lot of time going to audition
a desire to hear the words "you're not right" hundreds of times a year
enjoy having people tell you how to speak
are reads to put tons o' miles on your car each year

Then come and join us! Really, the job is rewarding for me.

Your first step should be to really decide if you can be committed to it.
It's usually not something you can put just a few hours into and reap the
rewards. You have to invest the time going to audition after audition
hoping that the producer will like your sound compared to hundreds of
other guys with "deep sounding voices" or whatever.

After that, you'll need an audition tape that shows your versatility
(tape should be under 5 mins, and just contain snipits of sample
commercials. Some will say make the demo around 1 minute!)

Send the tape to local agencies and pray pray pray!

(FYI, I do voiceover work in Philadelphia and New York, and for a number
of radio stations around the country...including your own B-96 in Chicago!).

---Identity crisis at WIBC?
News/talk 1070 AM WIBC can't seem to figure out what it wants to call itself. I reported recently that it seemed to be moving away from its longtime name "ten-seventy WIBC" to "ten-seven-oh WIBC". This week, during newscasts, anchors and reporters are saying "news radio ten-seventy WIBC", while talk hosts, traffic reporters, and others bounce between "ten-seventy" and "ten-seven-oh." WIBC, by the way, has added a short-term regular feature to the Jeff Pigeon morning show: daily news and analysis of the OJ Simpson proceedings by someone whose name I forget, but is supposed to be in the know. Thank goodness these reports happen at 7:30, when I'm in my car and listening to Bob & Tom anyway.

---WFBQ's Bob and Tom to broadcast 12 straight hours
94.7 FM WFBQ morning hosts Bob Kevoian and Tom Griswold will do their morning show from 6 a.m. to 6 p.m Friday during an auction to benefit the Leukemia Society. Bob and Tom promise that they will replay their most popular bits from their 10 years at the station. Governor Evan Bayh will award the pair Indiana's highest award, the Sagamore of the Wabash, at a black-tie event on Oct. 13, for their charity efforts. The duo have managed to raise more than a million dollars for charity during their 10 years in Indianapolis.

---A Live Voice Heard on WNAP!
But don't panic, it's only traffic. 93.1 FM WNAP continues to run jockless. They have added live traffic reports during morning drive. I've already gotten bored with the format -- which seems to have edged away from the straightforward rock of their first days, toward a more 70's top-40 mix.

---WFYI to Honor Local Blues Artists Carr and Blackwell
90.1 FM WFYI will honor local blues artists Leroy Carr and Scrapper Blackwell from 3 to 4 p.m. Saturday with two segments of the _So Many Roads_ series.
Eric Clapton covers two Carr songs, "Blues Before Sunrise" and "How Long Blues," on his latest release, _From the Cradle_.

---WSYW to Add Mike Pence Show
810 AM WSYW will add conservative talk show host Mike Pence's syndicated show starting Monday at 9 a.m. Pence's show, available from Network Indiana, was dropped in June from 1260 AM WNDE.

How's THAT for a small world? I used to be "Buzz" Jackson at B-94.5 Orlando - before that some time ago I worked in Tallahassee with a Heather someone who went to 'KTK, is she still there? In Orlando once in a while I used to get a call from one of the parttimers there, too, I forget his name.

Now I'm at WRMF in West Palm Beach - we're #1, too!

: 88.7 local translator of San Fran, CA religious station (I don't know why)

Presumably one of Family Radio's eight zillion translator stations worldwide. OK, so it's only like 30 or so. The main FM station is KEAR-FM San Francisco, and they show up on both AM and FM here in Sacramento.

Which reminds me... say, Mr. Harold Camping... wasn't the world supposed to end last month? It's October 6th now... why haven't you given up your licenses? ;)

You guys listing 20 or 30 stations, and whining about lack of
anything to listen to should just all go away. Really. Here's
my compliation of stations I can receive here in Cullowhee, NC.

89.7 Translator for WCQS, Asheville. Classical Format
90.5 WWCU Campus station for WCU. Undescribable, Irregular Format.

I don't care for classical music, so, I'm left with WWCU, which
only operates when classes are in progress.

But, on the bright side, I don't have to worry about keeping all
my memory buttons programmed. All you need is one.. My wife
can't fuss at me for flipping the dial between channels like
she does when I'm in control of the tv remote.

Speaking of TV..Well that's another story. We have almost
as much to choose from here on broadcast tv. It's really great.
Some days when the clouds are low, and the wind is blowing just
right, I get a faint image on channel 6 out of knoxville tn
to go along with the other channel..

We did buy a dish, and it's a real life saver here. There are
a number of excellent radio services available via satellite.

Oh well.
I guess I'll hush now. I feel much better.

>There seems to be a lot of comments about the local FM's being the Pits.
>What would you do, If you could to fill the hole in the Programming in
>your radio market ?

In a smaller market like Prince George BC, the FM choices are pretty slim
91.5 CBC Radio
94.3 CIRX Rock and Classic rock
95.5 Radio-Canada
101.3 C101 Country

However, I'm from Vancouver, and it would seem that there'd be a good
selection of stations on the FM band in a city of 1.7 million...nope!
93.7 CJJR Country
94,5 **OPEN**
95.3 CKZZ Dance and pop
96.1 **OPEN**
96.9 CKKS "Continuous soft favoites"
97.7 CBUF Radio-Canada
99.3 CFOX Rock and classic rock
101.1 CFMI Classic rock
101.9 CiTR UBC's campus station--somewhat unpredictable, but some very
good shows. Trouble was, it was restricted to 1.8 kW. It's also where I
volunteered last year :)
102.7 CFRO Vancouver co-operative radio.
103.5 CHQM see 96.9 for details
105.7 CBC Stereo -- mainly classical, but there's modern rock in the wee
hours of the morning...

I should note that CKST-AM 1040, Vancouver's modern rock station until
October 1993 DID attempt to apply for the 94.5 frequency in late 1992
but the application was denied. Too bad, really, as there'd finally be a
decent station there that could actually reach the entire area.

Source record: 37587

It's important to understand that while you may consider radio an art, or lifestyle, the people who own radio stations consider them a business!!! They have invested several million dollars, and want--no EXPECT--a return on their investment.

They can't afford to take risks with music. It's tested, and re-tested, and any song that gets a high negative response doesn't get played. The feeling being that people won't tune out if they don't hear a song they like, but they will tune out when they hear a song they dislike.

A station playing 25 thousand (or even 5 thousand) different songs would certainly come up with a lot of "gems" that we haven't heard in a while, but there would also be a lot of "stiffs" that would drive anybody to another station.

If you think this is just a buch of greedy owners, looking to maximize their profits, you're wrong. While owners have investments to protect, and general managers are trying to keep their jobs...the higher the ratings of a station, the better the climate is for everybody there, including the on air people and office staff.

This is what the public wants, as determined through ratings and research. If it isn't, the marketplace will take care of things, and sombody else will come along with a better idea, and it will succeed. However, people have tried stations with massive playlists and, as a rule, they don't work.

I hear the same complants about the oldies station in the Chicago area.
The 70's oldies station (Y-108) has even a bigger challenge. They have to
keep variety going on only a decade of top-40 rock.

From: rene@igs.net
Message-ID: <372k6c$7lq@vixen.cso.uiuc.edu>
Source record: 37589

Several people have asked me through e-mail why the six AM stations in Quebec shut down on Friday, September 30 at 11:00am EDT. The way I understand it is: The French AM stations in Quebec (owned by Telemedia and Radiomutuel) were under great financial strain competing with each other, so the two companies have consolidated their AM operations into a new network called RadioMedia. The six stations would have meant there were two RadioMedia stations in each of the six cities.

From: laughkids@aol.com
Message-ID: <372k6p$7mc@vixen.cso.uiuc.edu>
Source record: 37596

According to the radio column in the Post, a DJ came on and announced a block of Doors songs. That was followed by one song, "The End." The DJ then came on to say something along the lines of: it's the end of WCXR.

No, they didn't play any special retrospective show to end it all. Geez, they've only been on with this format for, like 5 years. They're not WABC or something.

Anyway, the Post also suggested that they'll be doing without DJs for a while and will add them in later.

They don't want talk to get in the way of the music at first (why clutter the sound with personality, after all).

* Summer '94 ratings for the Boston market look like this :

In the 12-plus :

Format Owner

1. WBZ AM 1030 7.7 -- News/Talk[David Brudnoy]/Sports Group W
2. WXKS 107.9FM 7.2 -- CHR- KISS 108 Pyramid Brdcstng
3. WJMN 94.5FM 5.9 -- CHurban - 'Jam'n 94-5' Pyramid Brdcstng
4. WODS 103.3FM 5.3 -- All-Oldies 'Oldies 103' CBS
5. WMJX 106.7FM 4.9 -- AC 'Magic 106.7' Greater Media
6. WBCN 104.1FM 4.7 -- AOR/Talk(Howard Stern) 'The Rock' Infinity
7. WZLX 100.7FM 4.6 -- Classic Rock Infinity
8. WRKO AM 680 4.5 -- All-Talk(Rush)/Red Sox Baseball American Radio Syst.
9. WBMX 98.5FM 4.4 -- 'Hot' AC 'Mix 98.5' American Radio Syst.
10. WSSH 99.5FM 2.9 -- Soft AC 'WISH 99.5' Granum Brdcstng

In the 25-54 :
Format Owner

1. WODS 103.3FM 7.8 -- All-Oldies 'Oldies 103' CBS
2. WZLX 100.7FM 6.3 -- Classic Rock Infinity
3. WXKS 107.9FM 6.1 -- CHR- KISS 108 Pyramid Brdcstng
4. WBMX 98.5FM 6.0 -- 'Hot' AC 'Mix 98.5' American Radio Syst.
5. WBCN 104.1FM 5.8 -- AOR/Talk(Howard Stern) 'The Rock' Infinity
6. WMJX 106.7FM 5.3 -- AC 'Magic 106.7' Greater Media
7. WBZ AM 1030 4.9 -- News/Talk[David Brudnoy]/Sports Group W
8. WJMN 94.5FM 4.4 -- CHurban - 'Jam'n 94-5' Pyramid Brdcstng
9. WBOS 92.9FM 3.9 -- AAA Granum Brdcstng
10. WSSH 99.5FM 3.2 -- Soft AC 'WISH 99.5' Granum Brdcstng

In the 18-34 :
Format Owner

1. WXKS 107.9FM 12.5 -- CHR- KISS 108 Pyramid Brdcstng
2. WJMN 94.5FM 8.3 -- CHurban - 'Jam'n 94-5' Pyramid Brdcstng
3. WBCN 104.1FM 7.9 -- AOR/Talk(Howard Stern) 'The Rock' Infinity
4. WZLX 100.7FM 6.8 -- Classic Rock Infinity
5. WMJX 106.7FM 6.6 -- AC 'Magic 106.7' Greater Media
6. WBOS 92.9FM 6.3 -- AAA Granum Brdcstng
7. WBMX 98.5FM 5.2 -- 'Hot' AC 'Mix 98.5' American Radio Syst.
WFNX 101.7FM 5.2 -- AP Phoenix Media
9. WAAF 107.3FM 4.3 -- AOR/AP Zappis Communications
10. WODS 103.3FM 3.2 -- All-Oldies 'Oldies 103' CBS

* New people in town :

- Greater Media's AC WMJX 106.7FM has finally ended its long search for a new morning voice. GM Peter Smyth has settled on a popular Pittsburgh radio personality Gary Dickson,39, who'll begin on MAGIC 106.7 on Monday, October 17th...Dickson was with WWSW-FM in Pittsburgh for the past 7 years. He takes over a slot which has been vacant since April when popular Boston radioman Tom Bergeron went to NYC to host a live morning show on F/X cable channel...

- Charles River Broadcasting's all-classical WCRB 102.5FM has named Mario Mazza as its new PD. He replaces John Dodge who moved to Seatle to head KidsStar Network. Mazza was with all-calssical WNCN-FM in NYC for 12 years until the station switched formats late last year....

* New station on the air :

WCGY-93.7FM has officially changed formats on Friday(9/30) afternoon. 87 hours after it was officially taken over by American Radio Systems, Eagle 93-7 was launched. New CR format consists mostly of '70s all-hits with a couple of early '80s mixed in here in there(not to nitpick but John Lennon's 'Double Fantasy' was released in late 1980...).

93-7 is currently jockless. ARS has launched a major promotional blitz with TV spots and print ads...New call letters are expected to be unveiled very shortly...

93-7 introduced a new listener feedback line(617-931-1293) where listeners can record their comments regarding the new format...[some of them are replayed between bumpers so you can actually hear yourself on the radio if you call...]

Eagle's 93-7 main competitor is Infinity's CR WZLX 100.7FM. It should also indirectly or directly compete with Infinity's AOR WBCN 104.1FM, CBS' all-oldies WODS 103.3FM and to some part Granum's AAA WBOS 92.FM...

* Boston's only AP outlet WFNX 101.7FM turns 11 years old this weekend... 'FNX people are breathing a lot easier on their birthday because strongly considered switch by 93.7 to AP last week didn't happen...

* American Radio Systems' Hot AC WBMX 98.5FM is holding its second annual FallFest fair on the Boston Common this Columbus Day Weekend...2-day event will feature arts,crafts and free music(around 40 bands)...Major performer will be Huey Lewis and The News on Saturday,(10/8) at 5pm(note: the group will only be doing a cappella numbers. They willl not bringing any equipment with them to avoid major expenses for the 25-minute performance...)

4144. AMARC Europe launched

Newsgroup: rec.radio.broadcasting
Date: 1994-10-07 17:19:55 UTC
From: Bruce Girard <resystom@web.apc.org>
Message-ID: <373vvr$ir@vixen.cso.uiuc.edu>
Source record: 37500

>>>AMARC-EUROPE>>>NEWS RELEASE>>>AMARC-EUROPE>>>NEWS RELEASE>>>

Community radio broadcasters launch European NGO

European community radio broadcasters meeting in Ljubljana, Slovenia from September 15 to 18 agreed unanimously to establish a European non-governmental organisation to advance the work in Europe of AMARC, the World Association of Community Radio Broadcasters. "One Europe - Many Voices", the AMARC Pan-European Conference of Community Radio Broadcasters, attended by 120 delegates from 33 European countries, adopted a Charter for Community Radio in Europe and approved a constitution for AMARC-Europe, the name of the new organisation.

The Charter affirms the role of community radio stations in promoting "the right to communicate and the free flow of information and opinions". Karol Jacubowicz of the University of Warsaw and keynote speaker at the conference, described community radio as "a new vision of democratic communication - the only hope that I can see of media being run according to democratic principles and a model that hopefully, in the future, will serve for other mass media".

AMARC-Europe has as its objectives to promote and support the development of community radio through research and representation, training, programme and personnel exchange, co-productions and solidarity between community radio broadcasters in Europe and with other regions of the world. AMARC-Europe has already been invited by the Council of Europe to submit its views to the fourth European Ministerial Conference on the Mass Media taking place in Prague in December.

Conference delegates heard presentations from independent media projects in Serbia, Croatia and Bosnia-Herzegovina. The conference condemned the use of the media to incite to hatred and as a warmongering instrument and called on the international community to support independent media which promote tolerance and pluralism in situations of conflict and war particularly in the countries of former Yugoslavia.

The conference expressed its support for the development of community radio in Austria following the ruling by the European Court of Human Rights that the Austrian state monopoly in broadcasting contravenes Article 10 of the European Convention on Human Rights securing the right to freedom of expression and information.

Conference delegates also expressed their solidarity with Radio Panamericana, an independent Uruguayan station after hearing reports that the station had recently and suddenly been closed by the Uruguayan government after the station's reporting of the shooting of demonstrators in Montevideo, the Uruguayan capital.

Women participating in the conference took steps to strengthen a European network of women in community radio and the conference agreed to incorporate proposals from the AMARC-Europe Women's Network into the programme of work for the new organisation. Women delegates from Ireland and Macedonia were nominated to represent AMARC-Europe at the European Regional Preparatory Meeting for the United Nations sponsored Fourth World Conference on Women in Beijing, 1995.

Delegates to the conference were also concerned by current proposals for digital sound broadcasting technology which could pose a threat to the long term existence and development of independent community radio stations. The conference called upon the International Telecommunications Union and the European research consortium, Eureka 147, to ensure that digital sound broadcasting would be accessible and affordable for community and local radio services.

For many delegates to the conference it was a first opportunity to meet with and share experiences with community radio broadcasters from other countries. A series of workshops and training sessions explored the means by which such links can be extended and developed through programme exchange, news networking, electronic communications and training partnerships.

The conference also provided many informal opportunies for discussion as well as entertainment, with the high point being the Balkan Party and Radio Cabaret. Music, poetry and performance by local Slovenian artists together with exiles from the war in Bosnia and Herzegovina was intermingled with improvisations and impromtu performances from conference goers and broadcast live by Radio Student across the city of Ljubljana.

A follow up event to the AMARC Pan-European Conference will take place at the AMARC World Assembly to be held in Senegal in January 1995 when European members of AMARC will elect the first Council of AMARC-Europe, adopt a plan of action for the development of the organisation and discuss North-South projects with AMARC members from Asia, Africa and Latin America.

To all;
Sorry if there is any redundancy in this posting. I put this on this newsgroup the other day. I saw it show up on my little computer screen the next day, but then MYSTERIOUSLY it vanished. I couldn't find it anywhere in the newsgroup. Of course, that *might* just be on my server or something. Anyway, here goes:
Can anyone give me any info on Citadel Communications Corp.? I know they own 29 stations, but are they a stable operation? I am looking specifically for info on their Salt Lake City talker KCNR AM 1320. How's it sound? Has the airstaff been pretty stable of late? Etc. etc. Any info anyone can give me on thic company will be greatly appreciated. Thanks in advance. Oh, by the way, my name is not really "Dot Warner". That's my roomie's nickname and I'm using her account.
Bob Pagani

Hey Robert:

KBBT is a fine station. I listen to it all the time. But did you know
that they are owned by KUFO? Yes, and KBBT has no live Dee Jay's!
All their material is recorded on reel-to-reel and is played back at a
later date. But I am sure you are not the only listener around here
with a stereo AM reciever. They are, however, kinda hard to come by.
Robert Casey (wa2ise@netcom.com) wrote:

: I sort of wonder, maybe I am the only listener with an AM stereo radio
: (a Sony ARF100 connected to my stereo amp) in this town. I'll have to
: write a letter to KBBT telling them that their AM stereo sounds fine.
: Called them some time ago, would you believe the phone receptionist
: didn't know about it. Well, on second thought, maybe not so unbelievable...
: I can maybe imagine the scene at the KBBT offices: "Hey, look! there
: really is an AM stereo listener in town!".

: :-)

Well, I'M here bright and early this morning - been here since 6:45am. I promised to tell a 4th grade class in Leeds School near DeForest all I know about broadcasting this morning so I needed to prepare my microphone and oscilloscope to show what their voices look like to a transmitter. Then I'll go into how Jonny Danger gets from South Madison to their Walkmans, then I'll get into making atomic bombs, then I'll show the relevance to radio (there actually is one) and then I'll get into wave theory (its fun) and then they get their refrigerator Magnets (the highlight of the hour).

One of my weekend engineers is their teacher. Have a great day.

Educationally Yours,

Allen

Hello, my name is Ryan Ball. I am very interested in starting an FM music radio station in Portland, OR. I have previously used a small 100 mW transmitter to make a station, but stopped after recieving the Part 15 rules and regs from the FCC, stating that FM wireless microphones, which my transmitter actually is, in a kit form, cannot have an external media source connected to it, aside from the internal electret condensor microphone. So I stopped, because I had a full-fledged station connected to it. I had a mixer, turntable, a few cassette decks, etc. connected to it. But I have always been interested in building a real station, licensed and everything. I have an approximate quote of 20-25 thousand dollars, which I figured using new equipment, and an exiter with an output power of 100 Watts, and a 2-bay educational omnidirectional antenna with a gain of about .9 dB. I was thinking of nameing it KFGR, because I live in Forest Grove, which is about 20 miles west of Portland. I was wondering if anyone out there knew if there was a market in Portland for Alternative rock/variety music. I was also wondering if anyone knew if there is a way I could come up with 25 grand, and if there was an available FM frequency in Forest Grove. I am planning, if I can come up with the money, to broadcast from an old building that used to hold a radio station in the 50's adn another one in the 60's, which is now vacant. I met the lady who owns it, and she wants to rent it to me. It has a perfect tower in the back, still standing and solid, of about 80 feet in height. I REALLY want to get this station rolling. If there is anyone out there who can help me, please do so. Thank You.
Sincerely,
Ryan Ball
Electronics enthusiast

It seems to me there are two ways to approach radio programming: as a science or an art.

The "scientist" among programmers believes every song, news story, liner and jingle has natural properties that make it attractive or repulsive to a particular target audience. He will try to quantify these properties and analyze them statistically, then use the results in a logical algorithm (often a computer program) to produce a sound that he predicts will be most effective in attracting that audience. Some of these folks are very successful (e.g. WPXC, Hyannis, MA); others crash and burn.

The "artist", by contrast, sees the universe of musical possibilities as a gigantic palette from which he will create a masterpiece of sound that his audience will find "compelling and addictive" (words of John Dodge, former WCRB, Boston PD). He relies on his ears and his gut. I worked at KDON-FM in Salinas, CA about ten years ago when it was programmed like this (by PD Kirk Clyatt). The results were a 13 share and a great sounding station.

Personally I believe it's not possible to reduce musical tastes to hard numbers, and that computers are better at scheduling commercials than music. Nevertheless, I'm writing a classical music scheduling program for WCRB (Boston) which I believe will be a step above all the others I've seen.

4154. radioprep list

I am managing an exciting Internet show prep service. The radioprep mailing list. This is a forum for those who daily toil preparing for their air shift. To be frank, it's not a list for those "kind of interested in radio" or for those who are fans/listeners of radio. it's aimed at working air personalities and radio show producers whose target audience is 25+. We are inviting on board radio professionals who do daily show prep and can contribute as well as take from the list.

It's simple to join and it's potiential is great.

And how much does it cost you to add this feature to your current online status? NOTHING! Of course . . . it really depends on where you receive your email . .. some systems, I'm not mentioning any names, charge to receive 'net mail. So beware you will be getting lotsa mail!

To subscribe to Norm Gregory's radioprep mailing list sent a message to our listserver:

majordomo@halcyon.com

(what ever you put in the "Subject:" line is ignored.)

In the message text put this single line:

subscribe radioprep

That's it!

You then will be notified, via return email, of being added to the radioprep list.

When you want to POST a message on the list, and you DON'T have be a list subscriber to post, send mail to:

radioprep@halcyon.com

And everyone on the list will get your message.

Thanks.

Norm Gregory, 95.7, KJR-FM, Seattle.

4156. Kansas City Radio Watchers (10/7/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-08 03:25:44 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <3753fo$sbq@vixen.cso.uiuc.edu>
Source record: 37511

Francisco Franco is still dead, and so is 500-watt daytimer KCXL.
Two weeks ago, Independence computer technician Pete Schartel announced the station would return to the air with a satellite-fed oldies format.
However, the station, which Schartel purchased from the Small Business Administration, has not returned to the air. It has been off the air for nearly 2-1/2 years.
Schartel has cited "computer problems" as the reason for the delay.
****
Longtime Kansas City radio newscaster Bob Mead has found a new spot on the dial.
Mead, who was a newsman for WHB(AM) during its heyday as a Top 40 powerhouse, is now the midday anchor for KMBZ(AM).
After four years of neglecting its news operation, the Bonneville-owned news/talk station has recently begun to reemphasize news. KMBZ now has newscasts every half-hour during weekdays up to at least 10 pm.
Mead has also worked for another Top-40 powerhouse, KBEQ-FM (now a "young country" station) and for former KMBZ news/talk rival KCMO(AM).
KCMO was purchased by Bonneville last year.
****
Radio Aahs, based in Minneapolis, will be available in Kansas City in a little more than three weeks.
Children's Broadcasting Corporation, owner of Radio Aahs flagship WWTC(AM) and of Kansas City contemporary gospel station KCNW(AM), will enter into an LMA with the owner of stations KBEA(AM) and KXTR(FM).
Robert Ingram will lease KBEA to KCNW, according to an article in the Oct. 7 issue of the Kansas City Star.
The Star article did not explain why the company owning KCNW did not just change the station's format rather than leasing another frequency.
Appearances of both stations in Kansas City Arbitron surveys are rare.
The Star also did not indicate whether operations at classical station KXTR would be affected. KXTR has enjoyed a surge in ratings over the past year; however, owner Ingram is now in his 70s.
KBEA is presently a "Music of Your Life" station with some talk programming during the evening. Its signal at 1480 is pathetic both day and night.
KCNW has a 5,000-watt daytime signal at 1380; however, last year, it moved from a directional antenna in fast-growing Johnson County, Kansas to a nondirectional antenna at its studios in Kansas City, Kansas. The change meant reducing nighttime power to 30 watts.
The KBEA LMA and format change is scheduled to take effect around November 1st.

GET PLUGGED IN TO THE ENTERTAINMENT AUTHORING CONFERENCE

Silicon Graphics is proud to present Silicon Studio '94: The Entertainment Authoring Conference, November 8-10, 1994, at the Westin Bonaventure Hotel in Los Angeles, California.

What is it?
ENTERTAINMENT - film, video, broadcast, games, interactive television, CD-ROM titles, advertising, location-based entertainment, print media, and a variety of other diversions.

AUTHORING - the activities and processes that create those diversions: writing, mixing, editing, scoring, programming, illustrating, animating, publishing, and more.

CONFERENCE - an international gathering of interesting and important people to share secrets, combine ideas, and chart the future of the techniques, business practices, and technologies that will guide new entertainment revolutions.

Who will be there?
Creatives, developers (both software tool and title developers), business executives, and industry influencers from the following areas: digital post-production, broadcasting, publishing, special effects for film, CD-ROM publishing, game development, electronic publishing, location-based entertainment, animation, virtual reality, advertising, software tool companies, cable television, telephone companies, and more.

General sessions, breakout sessions, and a technology showcase will highlight new business opportunities and solutions in emerging media markets. Real-life studies, behind-the-scenes seminars, development tricks and techniques, here-and-now demonstrations, and hands-on exhibits will be featured, as well as partners and customers who use Silicon Studio solutions today.

If you want to learn more about the recent explosion of digital media and interactive entertainment and want to find out more about Silicon Graphics' strategy in this market place, register today and get plugged in!

Questions? Call the conference hotline at (800) 685-2578, or send e-mail to eac@sgi.com.

TO REGISTER

U.S. and Canada call: (800) 685-2578
All other areas call: (508) 440-9700

*Individual rate $595
*Group rate (2 or more registering at the same time) $495

Register early - limited space available! Receive a discount of $100 off the regular registration price by registering before October 14, 1994. (This applies to the group rate also!!)

4161. KIRO-FM/Seattle changes

Newsgroup: rec.radio.broadcasting
Date: 1994-10-08 03:25:53 UTC
From: Chuck Taylor <ctay-new@seatimes.com>
Message-ID: <3753g1$scf@vixen.cso.uiuc.edu>
Source record: 37516

In Friday's Airwaves, someone asked about David Brenner being dropped by talker KIRO-FM in Seattle. It's true, starting Monday.

Dr. Laura Schlessinger moves from late afternoon to Brenner's noon-to-3 slot, so her show will be live. And Tom Leykis will fill the 3-to-6 slot. Also joining KIRO-FM on Monday is Jim Bohannon. His program will run tape-delayed from 10 p.m. to 1 a.m.

Both Leykis and Bohannon had been on KING-AM, which last month dropped talk and picked up AP's All News Radio format, at least for the time being. KIRO Inc. is buying KING-AM. There will be a call-letter change after FCC approval and, perhaps, a format change as well.

I saw another comment here about All News Radio being on three Seattle stations. It's true, but KING-AM is the only one running it 24 hours. KIRO-AM uses AP on weekends and KOMO-AM uses it overnight.

Until KIRO Inc. takes posession of KING-AM and makes any changes it has planned, it's hard to say how the news-talk market here will shake out. Immune to all this so far is No. 1-rated news-talker KVI-AM, the Limbaugh station.

>Thanks.

I am surprise that Rush Limbaugh was not canceled earlier on the Armed Forces Network, (if he is canceled at all). Regardless of what you or I think about the president, he is the commander and chief of the Armed Forces, I can't understand how the Armed Forces Network can broadcast a talk show that humiliate the commander and chief and then expect the troops to go into battle.

I guess that they saw the light when the troops landed in Haiti about the same time that they stopped broadcasting his program.

Nope. If another FM is authorized for the Portland area it will likely go to KKEY, which seems to have the inside track on this, due mainly to their nightttime coverage problem. FCC has been known to give perference to existing stations which (1) have coverage problems and can't fully compete in the market, or (2) have a good record of community service. KKEY has both of these (whatever people think of their choice of programming).

: can come up with the money, to broadcast from an old building that used
: to hold a radio station in the 50's adn another one in the 60's, which is
: now vacant. I met the lady who owns it, and she wants to rent it to me.
: It has a perfect tower in the back, still standing and solid....

That's all nice and everything, but you need to consider that you need to be able to keep that station on the air for a YEAR even if no money is coming in the door. That $25,000 will getting eaten up just in electricity and rent the first year -- you still need to think about music royalties (I've seen that go as high as 20% of the budget at some stations), fees to your local and Washington attorneys, and staff. Staff is easily 50% of your budget right there. You have $25,000 today. Just sit back and think of every possible expense you could have and you're looking at more like $300,000, and that's just for bare-bones automation.

I'd suggest that if you're really serious about this, get a professional investment capital broker behind you and somebody who is an *expert* in sales, because in a highly competitive market like Portland you'll need every dollar you can get in the front door.

Ask around and see if you can find that guy who did the "Northwest Talk Radio Network" a few years ago and dumped nearly $1 million into that deal. He has a forklift company out in the SE area near Gladstone. All he was doing was offering 2 talkshows for 6 hours a day to 7 stations. He didn't even have the expenses of running a station, just a satellite channel for 2 hours, yet he lost his shirt -- couldn't sell the time. It can be a tough business.

The sad part about this is that most people simply will not tolerate anything they haven't heard before. The vast majority of people don't really like anything more than the top of the top. Music isn't important to them, and it's really a shame. Ever hear an aircheck of a radio show from 25 years ago? I'll bet you never hear 80 percent of the songs any more. A few years ago I deejayed a dance at a large university. I played nothing but the Who, Stones, Zeppelin, and Springsteen all night. They loved it, and hired me back again. I don't think that would have happened if I had played "Summer Means Fun" by the Fantastic Baggys. I've always advocated giving the 500 most overplayed "oldies" a ten year rest and moving on to something else, but you'll never see it happen as long as there are bills to pay.

KBBT and KUFO have always been under common ownership, going back to when they were KOIN and KOIN-FM. You mention about all the programming being recorded reel-to-reel, which frankly amazes me, since usually only the songs are and the voicetracks are done separately, usually (though not always) from cart machines. KBBT is an AM station at a time when AM music stations aren't doing well, so it doesn't surprise me that they're not live. But so what? For Portland to have a modern rock station at all you should be thankful. Heaven knows, it could be another KPDQ.

4173. Buffalo/Toronto Radio Watch(10/8)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-09 02:01:22 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <377iti$cvv@vixen.cso.uiuc.edu>
Source record: 37528

Happenings in the #40 market:

*Another correction of note:I previously said that Dan Williamson &
Maureen Holloway were handling mornings until Rob Christie & Audie Lynds
arrived,but I failed to mention what station. It's Toronto's Mix 99.9 .

*WNUC(107.7,Wethersfield;new country)can now be heard on 2 translator
stations. They recently got the FCC OK to set them up.
107.7 FM,on occasion,can't come in clearly in downtown or in some of
the northern suburbs-so it's being simulcast on 105.3 and 107.3 FM. John
Casciani,'NUC's owner/GM,said that it had "some trouble getting into some
downtown buildings because of the way the signal bounces"(its main antenna
is in the Wyoming County town of Wethersfield). In the Northtowns,it was
distorted due to how the main antenna is positioned.
Both translators are at 50 W. 105.3 is based on top of Buffalo General
Hospital,giving it a stronger signal for a 5-mile radius including
downtown;while 107.3 is on top of the Center of Williamsville building
(in the Amherst area),giving it a 3-mile radius.
Casciani,who's been looking into the project for 2 years(with most of
the time spent looking for frequencies that wouldn't interfere with other
stations),said the new translators would work with "smart radios",which can
scan and find a format,not just a specific station. He said,"If we're on
the dial 3 times,it gives us a better chance of being picked up." However,
they were running IDs that don't mention their translators.

*Some observations on CKEY(FM 101 The Planet)from Kevin Hosey were in
the Oct.3 issue of Nightlife. He said that every station was going to be
doing good and bad things while starting up a new format,and The Planet was
no exception. The mistake,he felt,was hiring Jon Summers as its top
announcer(wondering if George 'Hound Dog' and Danny Neaverth were unlisted.
They aren't-it's just that 'Hound Dog' has been dead for a while and Danny's
still at Oldies 104.),adding "If the station is proclaming itself to be
alternative,even if it's the dreaded adult alternative format,it's got to
hire someone who hasn't worked in this market for so many years and isn't
associated with an oldies format(actually,AC)." (What about Kerry Grey or
Mancow Muller as the top dog? They seem to be in the right age range.)
However,he did credit The Planet for promoting several shows and
playing local music in rotation,noting "what a concept:a commercial radio
station right in this market promoting and supporting local and
alternative music." He added that while patting themselves on the back,
CKEY should have noted that WBNY has been doing the same job for over 10
years and promoted shows of loacl & national interest in the past.
(One more thing:he said that it was adult alternative. Maybe adult
progressive would be the best term to describe it-I think the best parallel
could be Chicago's WXRT-FM-they don't seem to delve too deeply into their

music library.)

*Both WGR and WBEN fed the fire that is the Bills-Dolphins rivalry on Thursday.
WGR had on Ft.Lauderdale Sun-Sentinel writer Gary Stein,who became Public Enemy #1 for his comments about Buffalo in his columns. Callers threw abuse at him,and he threw it back. Chuck Dickerson,who had Stein on his show,said he'd have him back on. Why? Is it that important to have on a trash-talker?
Meanwhile,WBEN had a simulcast of Bryan Cox's show from WQAM in Miami (a sports talker). That was a bit more classy,with the call mix about equal between Miami-area callers and Buffalo-area callers. There were articles about it-write and I'll e-mail it.

TTYL...

rdcole@crl.com (Ron Cole) wrote:
>There seems to be a lot of comments about the local FM's being the Pits.
>What would you do, If you could to fill the hole in the Programming in
>your radio market ?

Here in Philadelphia, "Top 40" radio (in its 'intended' form) is obsolete. Top 40 radio died a little over 2 years ago - when the former Eagle 106 WEGX-FM (now "Smooth Jazz 106.1 WJJZ") changed from an "All-Hit" status to a more toned down Adult Top 40/Hot AC format (ie. "NO rap! NO hard stuff!.."). And then, that died..and we were left with "Smooth Jazz".

Nowadays, we have these 2 hit radio stations that are *pretty* close to being considered Top 40 (or "CHR", if you will) - there's Y-100 WPLY-FM which does a 'Modern rock/CHR' format (big hits from Stone Temple Pilots, Counting Crows, etc.)...and Q-102 WIOQ-FM which does an 'Urban/CHR' format (*always* playing R. Kelly, Tevin Campbell, Snoop Doggy Dogg...over & over & over again!)

What frustrates me is that Philly no longer has ANY one station that plays *all* of the above-mentioned artists...So, now, people with musical tastes like mine
have to be flippin' around almost constantly! All I want is "All The Hits"!! :)

Well, here is a listing of Philadelphia's commercial FMs (with a "*" next to the ones that are included in my "flippin'"):

92.5 WXTU "Country 92"
93.3 WMMR Album rock
94.1 WYSP Classic rock
95.7 WFLN Classical
96.5 WWDB Talk
98.1 WOGL Oldies
*98.9 WUSL "Power 99" Urban contemp. (Duopoly with WIOQ)
*100.3 WPLY "Y-100" Modern rock/CHR (I'll admit that my musical tastes have leaned somewhat in this direction
since I
started working for this station :))
*101.1 WBEB "B-101" Adult contemp.
*102.1 WIOQ "Q-102" Urban/CHR (Duopoly with WUSL)
*102.9 WMGK "Magic 102.9" All-70s hits
*103.9 WIBF Simulcast of Long Island's modern rocker WDRE
*104.5 WYXR "Star 104.5" Adult contemp. (Duopoly with WJJZ)
*105.3 WDAS Adult urban contemp.
*106.1 WJJZ "Smooth Jazz 106.1" (Duopoly with WYXR)

Hello to friends and colleagues from Ecuador. We here at shortwave radio station HCJB could use your help. We are starting to look forward to the Christmas season and would like to obtain special programming for the holiday. We are interested in drama, music, documentaries, etc. Given the nature of our station (Christian) we are not particularly interested in Frosty the Snowman type stuff, but programs with a Christian slant. For example, we are already planning/hoping to air "The Christmas Carol".
Because we do not receive "Broadcasting" magazine or other advertisements, and what we do receive usually comes to late to be of use, here is my request: If you see an advertisement or announcement for special Christmas programs, could you let me know? Just drop me a note with the address/fax of whatever producer, and we will follow-up from there.
Thanks to each. We appreciate your help. --Ken MacHarg

4178. ** !! ATTN: JAZZY 100 FANS! DON'T BE CONFUSED !! (re: WCXR)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-09 02:01:31 UTC
From: M14563@mwvm.mitre.org
Message-ID: <377itr$d0q@vixen.cso.uiuc.edu>
Source record: 37533

* * * !!! JAZZY 100 FANS, DON'T BE CONFUSED !!! * * *

Contrary to popular belief, the new "Smooth Jazz" 105.9 IS *NOT* the new JAZZY 100! It is important for all former JAZZY 100 listeners to realize that the change in format of WCXR 105.9 to a new 'jazz' format was inspired by but is *NOT* in any way associated with the on-going efforts to get the JAZZY 100 format back on the air, launched by both the Committee to Bring Back JAZZY 100 and the former program director of WJZE-JAZZY 100, Bob Linden.

Due to the continual plummeting ratings of WCXR over a number of months, and the fact that WCXR *must* be sold within a year's time, management of WCXR took a hard look at what could be done to boost the station's ratings in order to maximize the final asking price when the station is finally sold. What you are hearing right now on WCXR is a result of a move made by management based somewhat on the success rate of the former WJZE-JAZZY 100 and the market demand of listeners in the Washington D.C. area. This new format can best be described as 'EASY LISTENING' and NOT "JAZZY". What you will *NOT* be hearing is the *popular* and *successful* JAZZY 100 format that was created and managed by Bob Linden.

****
****
*** AGAIN, THE NEW FORMAT IS A *TEMPORARY* MEASURE TO TRY TO ***
*** EASE THE IMPACT OF WCXR'S *POOR* SHOWINGS IN THE RATINGS !!! ***
****
****
*** !!! REMEMBER, WCXR MUST BE SOLD WITHIN A YEAR'S TIME !!! ***
****
****

Viacom, owners of WCXR and WMZQ recently purchased Paramount Pictures and as a result, FCC regulations required that they sell one FM and one AM station, so that they would fall within the FCC guidelines which restrict the number of broadcast media a company can own in a given market. WMZQ is the second highest rated station in this market while WCXR is a 'bottom-dweller'. Thus the impending sale of WCXR is a 'no-brainer' and the 'Smooth Jazz' transition is nothing but an attempt to shore-up ratings to protect the final sale price of WCXR. Sale talks are carded to begin in January, 1995.
(- Washington Post, "Business" Section, Spring 1994)

The GOOD NEWS is that the Committee to Bring Back JAZZY 100 and Bob Linden are still hard at work to acquire the next "JAZZY 100" radio station and to get the TRUE JAZZY 100 format back on the air. To find out how close

we are to getting JAZZY back on the air, we are asking all JAZZY 100 fans
to pick up the next issue of Bob Linden's "JAZZY MUSIC SCENE" which will
be available for *FREE* at all "KEMP MILL" and "The Wiz" record stores,
participating jazz clubs, and other JAZZY locations throughout the
Washington, D.C. area. And, don't forget to keep in touch with us at the
new Bring Back JAZZY 100 24-hr hotline (202) 387-1003.

If you have a comment regarding WCXR's new "Smooth Jazz" format and/or
if you'd like to make a comment expressing your support for the return of
the "REAL" JAZZY 100, please post a threaded reply to this newsgroup.
Or, feel free to send comments to our internet news coordinator, Mark Goldberg at

goldberg@oasys.dt.navy.mil

** Thank you all for your continual support. Remember, you're helping
us Bring Back the *REAL* JAZZY 100 to the Washington, D.C. area! **

Ryan Ball wrote:

:Hello, my name is Ryan Ball. I am very interested in starting an FM
:music radio station in Portland, OR.

Good luck, but there are a few things to consider:

A) Is there a frequency allocation available for that town (city)?

B) If not, you will have to petition the F.C.C. to open one. The problem with that is, that if one is opened, it will be open for everyone to apply for, not just you. Keep in mind that 20 miles from a market the size of Portland will attract a lot of attention from big money people. 25 grand, while a lot to you and me is peanuts compared to the money spent by some broadcasting companies for a liscense in that area. By comparison, it is like urinating in the Pacific Ocean. You feel better, but nobody notices (except for a few nearby fish).

C) You would have to come up with a lot more than 25 grand just to try and fight off all competitors to the liscense, let alone the equipment. Also keep in mind that you have to pay consultant engineers to work out the signal pattern, and see that your proposed signal would not enfringe on a station that is already on the air. These people are very important, and don't come by cheaply.

D) Don't worry about new equipment. Get the liscense first, and get some good, used equipment. Keep the overhead as low as possible. If you keep your head about you, you can spot some good buys from other stations that are updating their facilities.

E) With an FM station, you would have to have a bigger tower than 80 feet. And with your intended power of 100 watts, your signal may not stretch to the city limits of Forrest Grove, let alone get into Portland. This is one of the reasons why Consultant Engineers are so important. Also, with a signal that small, you will have your work cut out for you attempting to get advertisers. After all, they pay the freight!

Good luck to you!

:of who he lets on, and have you ever noticed that once the caller get's
:his or her point out he hits the mute button and they never come back!

While he may be selective about who he let's on, he is polite to those who disagree with him as well as those who agree. As far as the "mute" button comment is concerned, at least they are allowed to get their point across, which is more than I can say for a lot of other talk show hosts. The biggest abusers of the "mute" button are Jim Bohannon, and his predecessor, Larry King, who both were down right rude to anyone who disagreed with them.
About the most polite of all the talk show host there are on network radio, is CBS's Gill Gross. Not only polite to callers, but very interesting, regardless of what part of the political spectrum you happen to be on.

4185. How Do I Syndicate My Show?

Newsgroup: rec.radio.broadcasting
Date: 1994-10-09 02:01:46 UTC
From: xgo@netcom.com
Message-ID: <377iua$d1a@vixen.cso.uiuc.edu>
Source record: 37540

All right, I know this question has been asked a million times and there is probably no clear cut answer for this question. But might as well try. I have an idea for a drive-time type of show that I think could do well (very cheap and easy to produce and the talent is ready to work on this). Anyone have any suggestions as to who could help me get my demos out to people who could have the clout to get it on the air anywhere?

Thanks.

I heard that voice-overs was a "cut-throat" business and that those who were "inside" did everything they could to keep others out. But judging by Sean's reply, I was fed wrong information.

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the noncommercial, electronic newsletter for folks who
enjoy collecting and listening to nostalgic radio programs is proud to
announce the acceptance of charter subscriptions.

OTR was founded after discussion in Usenet newsgroups and email
exchanges, indicating the desire of a number of Usenet users to
have a forum dedicated to the hobby of listening to old-time radio
(OTR) programming.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the anticipated topics include (but are not limited to):

Lists of AM radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during
the "golden age of radio", would like to learn more about programming
on the "TV without a tube" that fascinated your parents, or would like
to contribute your topical expertise, send in your subscription
request now.

Are you interested in the "Modern Day" radio dramas and how they
compare and contrast to the 'Golden Age" of radio? If so, then OTR
is for you.

Subscribers will receive periodic emailings of contributed articles.
in a daily digest format (as news warrants). You may enjoy reading

OTR while listening to your favorite radio dramas. An enjoyable
example of sensory multiplexing :-).

-o-o-o-o-o-o-o-o-o-o-o-o-

To subscribe, send an email message in the following format:

To: otr-request@airwaves.chi.il.us
Subject: SUBSCRIBE

You will receive a 'welcome' message with even more information.

OTR is brought to you courtesy of -Airwaves Radio Journal
and Lou Genco, who actually remembers some of the original programs |-).

4188. Chicago Radio Watcher:Summer Arb

Newsgroup: rec.radio.broadcasting
Date: 1994-10-09 23:47:27 UTC
From: JJB92@aol.com
Message-ID: <379vef$lcj@vixen.cso.uiuc.edu>
Source record: 37545

Arbitron released its summer survey results earlier this week. Here are the ratings followed by the average share of listeners from 6am until midnight. Spring ratings are in parenthesis:
1. WGCI-FM 7.4 (7.0) (Urban contemporary)
2. WGN 6.4 (6.9) (Talk, sports, news)
3. WKQX 4.3 (3.8) (Alternative rock)
WBBM-FM4.3 (4.9) (Dance music)
5. WUSN 4.2 (4.4) (Country)
WLIT 4.2 (3.7) (Adult contemporary)
7 WBBM-AM4.1 (4.2) (All news)
8 WNUA 3.6 (2.5) (Smooth jazz)
9 WVAZ 3.5 (3.4) (Urban contemporary)
10 WLS-AM 3.4 (3.2) (Talk)
11 WLUP 3.2 (3.1) (Entertaining talk)
12 WOJO 2.8 (2.8) (Spanish language)
WRCX 2.8 (2.7) (Rock)
14 WXRT 2.7 (2.6) (Alternative rock)
15 WJMK 2.6 (3.5) (Oldies)
WPNT 2.6 (1.8) (Adult contemp)
WCKG 2.6 (2.6) (Repetative rock)
18 WJJD 2.5 (2.6) (Big band/talk)
19 WYSY 2.4 (2.6) (70's music)
20 WTMX 2.2 (2.6) (Adult comtemporary)
21 WMAQ 2.0 (1.9) (News/sports talk)
22 WJPC 1.5 (0.8) (All RAP)
23 WSCR 1.4 (1.6) (SPORTS DAYTIMER)
WFMT 1.4 (1.1) (CLASSICAL/FINE ARTS)
24 WGCI-AM 1.3 (1.2) (Mowtown/Black Oldies)
26 WNIB 1.1 (1.1) (Classical)
WAIT 1.1 (1.8) (Nostalgia Daytimer)
28 WYCA 0.9 (0.8) (Brokered Religious
WIND 0.9 (0.7) (Spanish)
WMVP 0.9 (1.0) (Sports/Steve Dahl)
31 WLS-FM 0.8 (1.3) (Talk)
WVON 0.8 (0.8) (Black Talk)

Comments and interesting results:

"Alternative" rock has become mainstream rock. WKQX, Chicago's "New Rock Alternative" has jumped into 3rd place, distancing itself from competitors WXRT, WLUP and WRCX. Afternoon host Steve Fisher trailed only Doug Banks (WGCI) and Johnathon Brandmeier (WLUP) in the PM drive time. We will see how long people continue to listen until the repetative nature of the format grates on people.

Mancow Muller delivered higher ratings to WRCX (formerly WWBZ). Muller, the top rated jock from San Francisco, increased morning drive ratings from 1.9 to 2.4.

The Ian Punnett experience, formerly of Nashville and now heard on perennial rating bigfoot, WGN doesn't appear to be fitting in with the listeners. The station's afternoons results declined to 3.8 from a 4.1 in the Spring. Punnett did share his time his Chicago Cub baseball which certainly didn't help his case. Punnett was brought in to appeal to younger crowds which advertisers prefer.

All news battle: WBBM-AM continues to lead over WMAQ. MAQ continues to tweak its lineup to combat BBM.

All sports battle: The baseball strike appears to have hurt listenership at both all sports stations: WSCR and WMVP. SCR,which broadcasts during daylight hours only, bested MVP 1.4 to 0.9.

One man carrying a station: Steve Dahl, mornings on WMVP, pulled in a 2.1 rating. While some dubbed him as a flop, a look behind the numbers reveals an impressive display of drawing power. Steve's show receives little promotion yet he pulled a 2.1 rating. The rest of the station delivered a .6 (middays) and .5 in the PM drive. The station drew an overall .9. Put another way, the station pulled in a weekly average of 220,200 listeners per week. Steve attracted 131,500 of those listeners, 60%.

Further signs of the decline of Western Civilization: WLS-AM's morning show of Don and Roma (a married couple which tries to act like they are not married) was fourth in the morning drive. The show, which has the depth of a sheet of paper, recorded a 4.3 share. Never underestimate the taste of the Chicago listening audience.

What if they shut off a station and nobody noticed: WLS-FM, formerly a simulcast partner with the AM station recorded a .8 rating. Former KQX talk master Robert Murphy pulled in an "impressive" .6 share. Internet regular Jay Marvin noted the station knew it would take time to establish an audience. Hope Capital Cities is a patient group Jay. Real patient.

All 70's format WYSY, supposedly the new hot format in radio, dropped to 2.4 from 2.6. Watch for the decline to continue as the novelty of the format wears off.

WGCI-FM stretched its lead over WGN to a full rating point in the battle for top honors in Chicago radio. WGN's main concern? Their listeners continue to pass away and younger listeners have shown little interest in listening to an endless array of commercials and silly talk.

I tried to cover the highlights of the ratings; if anyone has specific questions or wants more info, please E-mail me.

Thanks,

Joe

4189. Washington, D.C., radio watch. 10/08/94.

Newsgroup: rec.radio.broadcasting
Date: 1994-10-09 23:47:28 UTC
From: TOMLACKO@delphi.com
Message-ID: <379veg$lck@vixen.cso.uiuc.edu>
Source record: 37543

The ratings for the Washington, D.C., area were released to most stations on Friday, October 7, but they haven't been published yet. As soon as I get my special fax from my secret source, I'll post the numbers here.

When listening to Don & Mike on Friday, Don read off their latest ratings. And they look like this.

WJFK Washington FM 106.7

Listeners aged 12+: 6.3 (A record high for both D&M & WJFK!)
D&M's ratings are higher than any other WJFK show. Including Howard Stern, G. Gordon Liddy and The Greaseman.
Listeners aged 25-54: 7.0 #1 Rating in this demographic.
Men 18+: 7.8 #1 Rating in this demographic.
Men & Women 18-34: 15.0 #1 Rating in this demographic.
Men 25-54: 9.4 #1 Rating in this demographic.

WJFK Baltimore AM 1300

Listeners aged 12+: 3.7 (up from a 1.9)
Men 18+: 5.0 (up from a 3.1) #3 Rating in this demographic.

According to Don the Baltimore ratings weren't all in yet. He said he'd announce them next week when they come in.

Impressive numbers for a show on a station with a lousy FM signal north of D.C. And no TV or newspaper advertising. WJFK AM was a dark station that also has had no print or TV advertising.

When Don & Mike first started at WJFK/Washington 3 years ago, their station was in 32nd place in the overall ratings, listeners aged 12+, with a 0.5.

//

I saw the note in AIRWAVES #856 from wendel@cua.edu about WWRC AM 980 increasing its power to 50,000 watts. All I can tell you is I STILL can't pick up the station at my home in Frederick, MD., which is only 30 miles north of D.C. Perhaps something didn't go right or they're pointing the signal in the other direction. I'll look in to it and report what I learn in a future post.

Last week WWRC added Joe Madison to its schedule. He's hosting a nightly 2 hour talk show from 10:00 p.m. to midnight. Bruce Williams fans will be disappointed to hear that the station has cut one hour of Bruce's Talknet show. That was only way the station could squeeze Madison in to their lineup.

//

I've been getting a lot of email messages concerning WCXR and their Friday, September 30, format change. For the record, the last song played on the air in their Classic Rock format was: THE END by the Doors. Their first song in the Smooth Jazz format was: SMOOTH OPERATOR by Sade.

Remember, on Monday, October 10, WCXR (soon to be WJZW) will bring back live announcers. I've heard that they've kept all the former Classic Rock jocks on board. As soon as a lineup is announced, I'll post it here.

Steve Kosbau is still Program Director at WCXR/WJZW.

//

Congratulations to Jamie Bragg, newscaster at WTOP AM 1500 (All news format). Jamie is getting a Lifetime Achievement Award to be presented to him at the AIR (Achievement In Radio) awards on Thursday, October 27. He has be working at WTOP for 37 years.

//

Ross Perot's new Sunday night radio show will be on the air here in Washington on WMAL AM 630. The show will air from 8 p.m. - 9 p.m. each Sunday night.

Source record: 37546

After reading postings about AM Stereo broadcasting I started looking for receivers with that capability, as of this time a had no joy, nobody knows about this format or any receiver maker and type that are sold presently.

I need your help, can someone send me a list of receivers that have AM stereo capability, make and mode number please (Sony ARF100), it will help me ask for specific information when I continue with my search.

I need a list of the AM stereo stations in my area, my location is Cincinnati, Ohio

Jack.

4192. continental U.S. Coverage

Newsgroup: rec.radio.broadcasting
Date: 1994-10-09 23:47:36 UTC
From: Scott <scottmccloud@delphi.com>
Message-ID: <379veo$lcq@vixen.cso.uiuc.edu>
Source record: 37547

Hypothetical: If I wanted to cover the continental U.S. with a program from 7 pm to Midnight, CST, with a minimum number of stations - what would be the minimum number. I'm assuming AM clear channels. Any suggestions as to specific stations which might be able to do the trick?

Also, I came across a reference to Mexican station XERF in a history on Rock n Roll. The suggestion was that XERF could - and did - cover the ConUS with the flick of the power switch. Its at 1570 kz. True? Potentially true?

Thanks

In Portland, OR, the FM dial is pretty dull. There's a classic rock station at 92.3 KGON, and an oldies station that keeps calling itself "KISN" even though its real callsign is KKSN (they do a quick legal id in the middle of a commercial block a few minutes before the hour), standard oldies. And a very boring station "K103" that plays soft 70's and lite oldies. The local Burger King plays them over the PA. And a few religious and country stations. I'm a commercial modern rock listener, and the local modern rocker is KBBT on AM (I'm possibly their only AM stereo listener :-)). I'm thankful they exist, hope their ratings are good enough to encourage them to continue this format.

Well, this is a small town, after all.

: What would you do, If you could to fill the hole in the Programming in
: your radio market ?

In South Florida, we haven't had a full-time jazz station since WBUS went off the air 19 years ago. The public radio station (WLRN 91.3) has some jazz, the station that replaced 'BUS plays some jazz. My favorite, classical music station WTMI (93.1) plays jazz after midnight.

Howard Stern is now on WBGG (105.9) which many years ago was an oldies station. Now they play music of the 70s. I'd rather hear dead air. At least they have Howard, so it's not a total waste.

Yeah, but I would *love* to live someplace where the bands are relatively quiet and I had room for MW/SW antennas. Here in S.F., the big central transmitting tower puts beaucoup RF into everything. Some folks here music on their toasters. Any unshielded high impedance device gets swamped with TV sync buzz. Last time I checked, my VTVM registered a volt or two when I just held onto the probe!

BTW, everybody, could we excercise a little restraint in quoting? Just a line or two to remind us of what you are talking about is usually all you need. Lots of bandwidth being squandered IMHO.

>successful 99% of listeners want this.

Your argument is a sound one, but, people will tune out a station which plays too much unfamiliar music. I was listening to a 70's show this morning and heard 'Rocky' by Austin Roberts--a song you never hear, but it was played for spice. In this manner, your large playlist will work. While you lament the 500 song playlist, most listeners listen to hear the familiar songs.

Tripp Rogers

They (longer, more varied playlists) don't work, because people have
been force-fed formulaic pop for too long. I'm sure there would be a lot
more open minds out there, if more interesting music was given a chance.

If you feed someone nothing but Chinese food, they damn well won't ask
for Pizza, or know what it tastes like.

Stations certainly have a right to make money, I just wish there was more
room for diversity and experimentation.

John

Source record: 37409

Okay, a huge playlist doesn't work, but instead of several thousand records, just increase the list from the usual 500 - 800 to say 1500 or so. There should be more than enough good songs (or songs that don't suck) to pick from from the weekly top 10 lists of the last 30 years. Maybe cautiously start slipping in a few on a rotation that gets them played say half as often as the usual oldies. Sell station management the idea of adding a few "fresh" (ie, not played for a long time) oldies to perk up the sound of the station. Invite requests from listeners (assuming you can "lose" that request for "Billy don't be a Hero", "Candyman", "Seasons in the Sun" (a jock in the princeton NJ area really hated that song) and such.

More about "Seasons in the Sun" and that Princeton jock: About ten years ago, WPST was a top 40-ish and a bit of early modern rock format. And they had an oldies lunch hour that took requests. Don't know how "Seasons in the Sun" came up (probably someone called in to ask for it), but the jock really hated that song. It's really a nothing special typical mid 70s top40 song. This jock even asked people to send in their copies to him, so he could then toss them in the air from the transmitting tower (next to a DMV inspection site). Heard that the writer and/or singer of "Seasons in the Sun" respond by saying something like that it was just a simple story about a love affair and that it didn't deserve such criticism. (ie, it doesn't suck that bad!). This thing went on for a couple of weeks. The jock one day decided to name himself "Terry Jacks" (the song singer of "Seasons ..") and I called the request line and said "You just gotta play your big hit".

Is it me, or was 1974 a particularly lousy year for top 40? Almost no good oldies from that year, it seems.

4205. Phila. Morning Show gone "belly up?"

Newsgroup: rec.radio.broadcasting
Date: 1994-10-09 23:48:03 UTC
From: David Inman <inmand@delphi.com>
Message-ID: <379vfj$ldv@vixen.cso.uiuc.edu>
Source record: 37410

I am looking for some information on what happened to the popular Phila-
delphia morning show called "Harvey in the Morning" on WMGK. This was
a very popular show that had been around a while and they basically
yanked it off the air to play '70's music. Go figure.

Naturally there has been no mention about the reorganization or what
happened to the radio personalities who were much loved by their
listeners. Any info would be useful.

Please reply mail and thanks in advance for your help.

A recent post reminded me to make this request of all posters to this group.

Please - Please - Please when you are following up to an article in r.r.b or AIRWAVES take a few seconds to edit out all but the essential quoted text. Just enough to give context to your words.

This group has quite a few regular posters/readers, many of whom are professionals in the broadcast industry. Since we are, for the most part, regulars here, quoted text is more of a bother than an aid in reading and understanding.

I have been sending some of the worst offenders back to the sender for editing, and editing as many of the rest as I can, but it is your job as a poster to see to it that your posts are as quote-free as possible.

Usenet has a 50% rule. 49% or less of quoted text. We would like to meet or *beat* that goal. Please take the time to remove all but the *essential* quoted text from your posts. It will make your posts more readable and make rrb more noise-free (not to mention making my job easier <grin>).

Bill

This kind of logic is what is really wrong with modern day America,
and shows a lack of understanding about the Military and the (alleged)
functions of government. Yes I know this is radio and not politics,
but when I read a post like this it both amazes and disappoints me
profoundly.

See, Dennis, what Jack said is something youngsters like yourself don't
understand. As Jack said... it does not matter what you and I
think of Clinton. He *IS* the commander-in-chief of the armed
services. His word *is* bond, within constitutional limits, of
course. For the Armed Forces network to sanction the one-sided
attacks and negative spin-doctoring of a Limbaugh, being broadcast on
its service is very strange indeed.

It is surely an act of mass hypnosis the way the entire country has
turned into "Clinton Feeders" and has totally vilified him as the
ultimate enemy of the people. Rush has been at the forefront of that
movement. I have no great *love* for Mr Clinton, but I do have
respect for the office of the presidency, and for the awesome
responsibility it entails. It is easy to sit on the side lines behind
a microphone and tear into Mr Clinton and put a negative spin on
everything he tries to do. You beat the drum long enough and
unrelentingly enough and it will have a negative effect on morale in
the military AND the civilian country as well. Limbaugh is just a
modern day Tokyo Rose (for those who remember) demoralizing the
troops.

Why must we all feel so self righteous and arrogant, not just against
the negative acts of a president, but to the point of losing respect
for the office he holds, and the responsibility he carries for all of
us.

} I would be surprised if Rush was canceled by AFRTS, since Rush is more
} popular with the troops than Slick Willy.

It is not about popularity. The military is about respect for superior officers. Clinton (I hate it when the sheep have to parrot terms like "Slick Willy" and feel like they have come up with something original) *IS* the quintessential superior officer. He is to be respected, if not for his personal integrity, then for the rank of commander-in-chief. Fostering disrespect and down-right contempt for one's commanding officer should not be the function of the AFRTS. I would feel the same way if it ere a Bush Basher (while Bush was president) on AFRTS.

Get a grip, Dennis. World politics is not a game. If Americans are so gung-ho against the president, and actively *hate* him, how is he going to do ANYTHING positive in the worlds? If you don't like Clinton, vote him out. Until then, can we back off of our personal vendettas and give *our president* a chance to do his job?

Sheesh.

John Shelly (xgo@netcom.com) wrote:

: Anyone have any suggestions as to who could help me get my demos
: out to people who could have the clout to get it on the air anywhere?

Place it on a local station first, get the ads sold, get testimonials
from the station, its advertisers, and listener, THEN go around to get it
syndicated. Unless you have a syndication track record, it's very hard
to get something syndicated. Oh, and you'd likely have to barter it,
meaning that you'd have to sell about half the ads yourself and then give
the program free to the stations so they can sell the other half.
Stations don't like to pay money for programming if they can help it.
Syndication is tough, but it *can* be done.

4214. Sacramento Radio Changes

Newsgroup: rec.radio.broadcasting
Date: 1994-10-10 18:14:55 UTC
From: mward@crl.com
Message-ID: <37c0av$nnu@vixen.cso.uiuc.edu>
Source record: 37419

A number of changes, many of them revolving around my employer, KFBK ("News Radio 1530"). To wit -

* The Tom Sullivan local talk show expands from 2 to 3 hours beginning October 17th. Tom had been running from 1 to 3 PM, and now will run from 1 to 4 PM. He's a well-known local stockbroker who also doubles as KFBK's business editor, and business editor for KCRA-TV 3.

* The now-3 hour afternoon drive news block will be hosted by Rick Van Cise, who comes to KFBK from KOMO-AM/Seattle, with previous stints at KIRO in the same city. Current afternoon drive host Kitty O'Neal will move to the news anchor's role on the same show.

* Current afternoon drive news anchor Gregg Fishman leaves the show to head up a new statewide news network, to be started by KFBK owner Chancellor Communications...based here in Sacramento. Gregg is also a reporter for the station in his pre-drive time hours, and will continue to contribute material for KFBK.

* Tracy Romine has been hired as a morning reporter. He comes to KFBK from KVON/Napa. Despite published reports, he doesn't exactly *replace* Ellen Hyatt, who left us to take the news director position at San Francisco's Shadow Broadcasting (you can hear her afternoons on KSFO/560 these days)...she was assignment editor as well as a reporter. The assignment editor's role is being filled by executive editor Don Andrews. Also reporting during morning drive is Mark Seelig (ex-KPAY/Chico).

Other news from around the market...

* Smooth Jazz 101.9/KSSJ has hired a new morning drive host. He's Jim Hall, who did morning drive for years on the old country-formatted KRAK-AM 1140. He lost that slot when the station became KHTK/Hot Talk 1140. Hall won't be going by his "Big" Jim Hall moniker, though he is, at least the last time I saw him, towering well over 6 feet.

* KHTK has revamped its afternoon drive sports talk show, bringing Grant Napear over from soon-to-be-Spanish KSAC All Sports 1240, and pairing him with ex-KFBK sports director Tim Roye and ex-NFL'er Jack Youngblood. Of the three, only Youngblood was in the slot before. KSAC, meanwhile, is still carrying UC Davis football. They're slated to change languages sometime next month. I still say they should go all-Spanish sports. Can you say "GOOOOOOOOOOOAL!!!!!!!"? ;)

* A Bee article by radio columnist Dan Vierria reports rumors of the end of KHTK's "Tonya". She hosts a show described as a "personal relationships" program, which has apparently gotten *very* personal at

times. (I have yet to hear the show.)

* Though KFBK has still to hire a permanent host for Sports Talk (7-8 PM weekdays), my personal favorite is Bee sports columnist R.E. Graswich. Bob usually pairs up with former Bee sports writer (and current news columnist) Dan McGrath on Friday nights, and the show's quite lively. Check it out.

>from 7 pm to Midnight, CST, with a minimum number of stations - what would
>be the minimum number. I'm assuming AM clear channels. Any suggestions as to
>specific stations which might be able to do the trick?
>

I would suggest the following...

WBZ Boston 1030
WWL New Orleans 870
WLS Chicago 890
KSL Salt Lake City 1160
KFI Los Angeles 640

Just a few holes would remain which could be filled up with small regionals.

WCBS New York 880 might be even better than WBZ. They are easily copyable
over the entire East Coast from Coral Gables to Labrador every night.

Actually, you could substitute for practically all of the above stations.

The preceeding has been the PERSONAL correspondence and communications
of...

: Neil Rogers on WIOD and am wondering what to expect.

Howard Stern is on mornings at WBGG, 105.9 in Miami. The station reaches north to 45th Street in West Palm Beach. Nothing more needs to be said about mornings...

...but you will find a very pale imitation on WZTA (94.9). Ron and Ron are twice the people but only half the talent.

Neil is overrated as far as I'm concerned. He's no Rush Limbaugh. Lots of fart noises and rambling. If you really want to hear VERY VERY bad radio, check out the weekend lineup on Neil's WIOD (610 AM). It's like listening to the Chevy Chase show on Fox. It's actually that bad! Literally the worst radio I've ever heard!

For alternative music there's a station operating at night out of a high school in Broward County. I'll get the calls. They're very low on the dial...I think 88.9.

You can also check in with Star 95.5 in West Palm Beach. The station reaches a bit south of Oakland Park Blvd. in Ft. Lauderdale and is clear in Boca Raton. It's a CHR, but we (I work Sunday nights) play a lot of alternativbe music. I think you'll be happier with the BRoward station, though.

Talk stations: 610-WIOD, 1230-WJNO.
Music stations: for alternative or rock try WZTA 94.9 or WSHE 103.5. For hard rock you might try 103.1 from Indiantown, it puts an OK signal into Palm Beach county. For Top-40 or hit music it's either WHYI 100.7 or WPOW 96.5, for adult contemporary it's 97.9 WRMF or 97.3 WFLC.

Plus a dozen spanish stations and other nationalities including Hatian, Nicaraguan, etc.

Andy at WRMF

Well, the upside is that here in the Rochester area we have a good
number of college radio stations to choose from.....
88.5 WRUR -- University of Rochester
89.1 WBSU -- Brockport State University
89.7 WITR -- Rochester Institute of Technology
90.5 WBER -- School district in Penfield (The call letters are part of some
acronym that escapes me at the moment)

UNFORTUNATELY, I live in the RIT dorms, on the 8th floor, 2 buildings
away from the WITR transmitter, so I get blasted with a GIGANTIC amount of RF.
The result is tremendous amounts of cross modulation and intermodulation that
cause interference to all of the above stations and completely blocks out WGMC
(90.1), a local jazz station. WITR even causes interference to itself on my
Toshiba walkman because the signal mixes with WVOR (100.5) and produces stray
IF signals at 10.8 MHZ.
As for what I like about the stations, WRUR has some OK shows, although
I haven't listened to them a lot since the station was forced to go off the air
and then to return with reduced power because of some goofy interference
problems with a pull-box fire alarm system.
WBSU also seems to play some stuff I like, at times.
I listen to WITR as much as I can, especially because I volunteer there
as an engineering assistant and air personality. The WITR philosophy goes
all-out for diversity, although most of the requests I get during my show are
for eMpTy-V mallternative tunes. Given that fact, I try to play as much Punk
rock music as I can get away with, and as much independent label releases as is
humanly possible. Unfortunately, I never seem to receive any response to the
Punk music, except for when I play something with Jello Biafra in it.
I used to like WBER, but I'm not all that partial to it anymore, as
it seems the management is ruining the station by making it too poppy. By
that, I mean that almost any time I tune to that station, I hear grunge music
and anytime that a certain artist gets played, I can make a safe bet as to
what song will get played. Geez...I thought that radio, especially
non-commercial radio, was supposed to play stuff, at least every once in a
while, that listeners might not have heard before or might not have in their
personal musical collections...But then, what people really want to hear is the
same overplayed stuff that they've already heard for the thousandth time, so
what was I thinking!???
Not being able to hear WGMC isn't a great loss to me, since I'm not a
big fan of jazz, and there are a bunch of other stations that play jazz
anyway...WXXI (AM 1370), WRUR, WBSU (Don't quote me on that one), WITR, and
WJZR (FM 105.9).
Commercial radio doesn't particularly tickle my pickle. Here we have
WCMF (96.5 and, until recently AM 990), which plays "classic" rock but somehow
manages to keep the playlist varied enough so that it doesn't get stuffy.

Also, one can sometimes hear blues tunes on this station. WRQI (95.1 and 95.5) is a semi-generic classic rock station that carries the Howard Stern Show.
So, in short, what we have here is:
88.1 WFRW Religious, out of town, crappy signal
88.5 WRUR University of Rochester, reduced power, mediocre signal
89.1 WBSU Brockport State University, good signal
89.3 WHMN Religious, crappy signal
89.7 WITR Rochester Institute of Technology, currently running at half power because we fried our antenna and are waiting for the delivery of a new one...don't ask about the signal strength
90.1 WGMC Jazz, mediocre signal
90.5 WBER Pennfield School district, good signal
91.5 WXXI Classical, strong signal
92.5 WBEE Country (ugh), strong signal
93.3 WEZO Easy, strong signal
95.1 WRQI Generic rock & Howard Stern, good signal
95.5 ???? Translator for WRQI
96.5 WCMF Rock & Blues, strong signal
97.9 WPXY Pop (@#%%%^@@@!!!), strong signal
98.9 WKLX Oldies, good amount of distortion, strong signal
99.7 WCZV Religious, out of town, good signal
100.5 WVOR Easy, good signal
101.3 WRMM Easy, strong signal
102.7 WDCZ Religious, good signal
103.9 WDKX Urban, good signal
105.9 WJZR Jazz and miscellaneous instrumentals, good signal
106.7 WMAX Yuppie progressive rock, medium budget, good signal

That's a lot of stations, but all the commercial stations, with the exception of WCMF are just too damn predictable for my liking!!

Now, here's something slightly off the topic...Somebody from State College posted in this thread and mentioned Altoona stations. Can you get WFBG (AM 1290)? They were quite popular in the 80s, but circa 1989, they were bought out by Empire Broadcasting, who thought that they could...ummmmm....fix things. Well, when I drove through Altoona, I heard 'FBG playing some pathetic satellite-fed oldies format---IN MONO!!!!?! Tell me, are they playing this all the time, or just on weekends?

Enough babbling for now,

Big Al

When Tip O'Neill died, Imus played a tape sent in by O'Neill's chauffeur.
It was a recording of O'Neill reciting a poem to his chauffeur, and
the chauffeur had sent it in.

I looked for the poem for a long time, thinking it was probably by
Robert Frost, without success.

So finally I wrote Imus and asked what the poem was, now almost a year later.

After a week the following came in the mail, in laser-writer script:

Around the corner I have a friend,
In this great city that has no end;
Yet days go by, and weeks rush on,
And before I know it a year is gone,
And I never see my old friend's face,
For life is a swift and terrible race.
He knows I like him just as well
As in the days when I rang his bell
And he rang mine. We were younger then
And now we are busy tired men;
Tired with playing a foolish game,
Tired with trying to make a name.
``Tomorrow,'' I say, ``I will call on Jim,
Just to show that I'm thinking of him.''
But tomorrow comes - and tomorrow goes,
And the distance between us grows and grows.

Around the corner - yet miles away....
``Here's a telegram, sir...''
``Jim died today.''
And that's what we get, and deserve in the end:
Around the corner, a vanished friend.

What are the chances that people like only what they're fed? Sometimes, you
expose people to something new, and they *will* go for it.

I think radio is in a vicious cycle: they don't like it, they've never heard it, so
they don't want it, so we don't play it, because they don't like it...ad nauseum.

John

I would consider myself someone who likes the rare/unfamiliar stuff. I do see the point though that if nothing familiar is played, then people will flip the dial. What might be interesting to BOTH groups is if maybe out of 13 or so songs played per hour, 7 are familiar, 4 are fairly rare, but not outrageously so (like for an oldies/70's station, "Rocky" would fall into this category...or for a commercial modern rock station, an Indie song that gets played on college lists but maybe not commercial lists would be here) and then the other 2 songs are completely daring and unconventional, like for an oldies station, some very obscure or even "collector's item rate" song. That keeps the listeners that are interested in the music itself (versus the types that like familiar background noise that probably don't care if there are 2 rare songs per hour)...of course, for an oldies station that would keep the music director fairly busy since he/she'd have to go beyond the Joel Whitburn Top 40 book for sources of music...for an alternative or modern rock station, there's probably nothing easier than finding daring music since there's so much new different stuff (as well as stuff that's no longer different too) always coming out.
Anyway...just a thought...though maybe not the first time this has been thought up...

Later...
Brandt

This is uncalled for, especially in a broadcast conference. However, it is mainly Rush Limbaugh himself who has made it nearly impossible for Bill Clinton to govern, even though he has supported a Republican agenda all the way: NAFTA, Haiti, support for the former Soviet countries are all Republican platform -- in fact it was the Bush administration which drafted NAFTA. However, Limbaugh is playing for a position of power in the Republican party now, and will do anything to help his party. Funny that such disrespect for the Presidency comes from a man who has gone on record as proud that his family has served in the armed forces.

Point well taken here. Just want to throw something else in:

Just curious, wasn't Franklin Roosevelt and his wife Eleanor vilified in their time? My father tells me a story of how during WWII, some Marines egged on Japanese soldiers by calling the Emperor some choice names. The Imperial Army troops regarded the Emperor as sacred and led a suicide charge into the Marines fire. Later the Japanese tried calling FDR names in earshot of the Marines...the reply came: "Yeah, you're right he's an ***, he sent us over here."

I've seen Nixon, Carter, and Reagan made fun of on Saturday Night Live, and I remember Gary Trudeau of the comic strip "Doonesbury" was not allowed on a USO tour of the Persian Gulf area over his treatment of George Bush. I spent eight years in the Air Force and no matter what any comedian, commentator, or fellow soldier said about the Commander in Cheif, I would still do my job.

Somehow I think a lot of the irreverance for the president is a part of tradition. No, I don't think Armed Forces Radio should participate any more than the base paper. Me? I don't believe in speaking ill of my leaders, does no good for my attitude. Just throwing in a few things I've observed.

(I can't quote prior text with this software!!!)

In response to your question of how to cover most (if not all) of the continental US in the evening hours, I would suggest (as you alluded to) a network of clear channel stations. The Interstate Radio Network is doing something similar to that right now by using several clear channel stations.

My rough suggestion would include KNX - Los Angeles (I think they are on 1010AM), KSL - Salt Lake City on 1160, KOA Denver on 850, WLW Cincinnati on 700, WSB Atlanta on 750, WLS Chicago on 890 (or WGN Chicago on 720), KDKA Pittsburgh on 1120 and WBZ Boston on 1130.

If you were interested in adding Canadian coverage, I would probably add CFRB Toronto on 1010 and CBM Winnepeg on 990. Drop in WCCO Minneapolis on 830 for the additional coverage into Canada, and I think you would be set.

(I'm sure someone has several others that would probably do better than some of the stations that I have mentioned, and if so, I'll stand corrected.)

Message-ID: <37c0d5$nuq@vixen.cso.uiuc.edu>
Source record: 37439

I was in the Ft. Wayne area a couple weeks ago and noticed that WOWO seemed to be doing split IDs...ie separate legal IDs on the AM & FM, which as far as I could tell with only an analog radio was otherwise a total simulcast. Does anyone know why they do this? It seems like it would be a hassle for whoever was on the board, not to mention the increased margin for error.

Do they screw up often & put the wrong ID on the wrong station? Do they run different spots on AM & FM? How do they pull this off...do they, say feed the AM from the program channel of the board and the FM from audition, thereby requiring 2 complete air chains, processors, etc?

Inquiring minds would like to know.

Steve

4235. New England Radio Watcher: WBIV 1060/WBMA 890

Newsgroup: rec.radio.broadcasting
Date: 1994-10-11 06:11:34 UTC
From: fybush@world.std.com
Message-ID: <37daam$8sr@vixen.cso.uiuc.edu>
Source record: 37441

This is a slightly vague posting, because details about this thing
are still, well, slightly vague. But in the interests of getting the
news out quickly:

1) Longtime CP WBMA-890 Dedham MA (10kw day, 1kw night, DA-2) came on
the air sometime during or just before the weekend of 10/8-9/94.

2) WBMA is co-owned with, and is operating from the Ashland MA
transmitter site of, WBIV-1060 Natick MA (25kw day, 2.5kw night,
DA-2).

3) WBIV is mostly dark now...except at night. It seems the leased-time
ethnic programming is now moving back and forth between WBMA-890
during the day, and WBIV-1060 at night.

This is obviously some sort of temporary setup, since the word that I've
been getting is that the WBIV calls and format were to move completely
to 890, and 1060 was then to go dark at least until a buyer could be
found. 890, BTW, has a CP to increase to 25/2.5 DA-2, COL Wellesley
Hills MA.

Oh, and apparently any sale of 1060 will *NOT* include the right to
use the Ashland transmitter site. This has many people thinking 1060
will go dark, since the area around 1060's COL of Natick consists
of *very* wealthy homes and *very* expensive land, and plenty of
potential NIMBY objections to the minimum-5-tower DA array that
1060 needs to protect KYW and the for-the-moment dark CJRP Quebec.
Odd that WBIV's owners are now leery of a diplex, since 890 was
supposed to come on from that site *diplexed* with the then-
separately-owned 1060. And there was once a CP for 740 WJIB
Cambridge (now a 250w/5w ND) to increase to 2500w D-DA and *also*
diplex off the Ashland site.

No word yet on how long the 890/1060 split operation will continue.
Perhaps there's an engineering problem yet to be resolved with the
890 night pattern?

The history in all this, for those who care:

The 890 CP was originally granted to Family Radio (this was before
the world ended, mind you :-) FR didn't have the cash to build,
so they originally set up a trade that would give WBIV the 890,
in exchange for WBIV having to pay construction costs on 890 and
giving FR the 1060. Now FR is somehow out of the picture completely.
Apparently WBIV's owners simply bought the CP from Family. For that
matter, WBIV's ownership is a bit unclear until such time as
I can get down to the station and flip through the public files.

WBIV's history is odd, too. It went on the air in 1972 as WGTR, a local Natick station, owned by John Garabedian, the top-40 jock. Originally a 2500 watt daytimer, WGTR soon got "experimental" authority to go to 25000/2500. For the last 2 decades, the station has been "experimenting" with the higher power, in a so-far unsuccessful attempt to avoid interfering with KYW. In the mid-80s, WGTR went to a talk format as WTTP, and around 1990, Garabedian got out, the studios moved out of Natick and into Boston, the calls went to WBIV, and the station went to leased time.

OK, _my_ head is spinning. To be continued as this straightens out a bit.

QUICK BITS: Still no new calls on "Eagle 93-7," ARS's former WCGY-93.7 Lawrence-Boston. They're advertising in the trades for a PD. And ARS has also flipped its WZMX Hartford, also 93.7, to 70's rock. They're not "Eagle," still "Mix." Unknown as yet whether ARS plans any sort of simulcast operation on the co-channel 70s rockers...WFNX-101.7 (AP) celebrated its 11th anniversary with a huge party at all the Landsdowne street clubs. Hole headlined...And WBMX-98.5, ARS' Boston Mix outlet, sponsored a weekend festival on Boston Common. Huey Lewis and the News headlined, a cappella.

SENEGAL: Arson suspected in the fire at the "Sud FM Sen Radio"
radio station

ORIGINATOR: West African Journalists Association (UJAO), Dakar

Arson is suspected in a 5 October 1994 fire at the "Sud FM Sen
Radio" private radio station. The room which holds all the
telephone and electrical wiring linking the studios of the
station to its transmitter and the services of the "Sud
Communication" group was set on fire.

The press freedom monitoring arm (SDLP) of the UJAO denounced
this criminal act, calling it a flagrant attack against press
freedom and freedom of information. The perpetrator(s) and those
who ordered the fire made an attempt to silence the voice of "Sud
FM". SDLP/UJAO expressed its solidarity with the "Sud
Communication" group which promotes "Sud FM Sen Radio" and
publishes the "Sud quotidien" daily.

Graham, I also have had a hard lesson or two about Aussie radio. I was hired to consult the programming of the old 2NX in Newcastle NSW. We took it to a youth oriented all hit music format and changed the call letters to X-13. When the station got an FM permit we became X-107.

Granted, it was far too Americanized to have made it down under. We had one up ratings book on the AM side and were killed on the first FM book.

Weekends on the ABC talk radio network, an investment advisor, Bob Brinker, holds court. I came across his show recently and was wondering what long time listeners think of him and how his advice has fared. He seems to be more than the typical investment advisor hosting a local show. He rarely mentions his newsletter unless someone mentions it first and he doesn't recommend load funds. However, before investing more time, I would appreciate the benefits of your experiences with him and his show.

The concept is good...but the more valid question is: How do I cover the US at night *with stations that run syndicated material*? This wipes out a lot of possibilities. To give the one closest to my own heart, WBZ would be out of the equation. All of 'BZ's programming is live and local. Our PD doesn't look at syndicated programs longer than 60-second features. Period. The same applies to stations like WCBS New York (all-news), WBBM and WMAQ Chicago (ditto), WOWO Fort Wayne (live and local except for a few weekend-night oldies shows), etc.

So you'd have to start looking at some of the second-tier stations that *do* run syndicated, or better yet leased-time programs. WWVA Wheeling comes to mind, as does WLAC Nashville. WGY Schenectady on 810 and WHAM Rochester on 1180 are all-satellite all night. And that's just the east coast!

In other words: just because the signals are out there doesn't mean you can get on them!

But...you can cover the continental US and far beyond with a single station at a low cost...if you want to go shortwave. Stations like WWCR in Nashville and WRMI in Miami are all leased-time and are always looking for new programs. It's cheaper and easier to promote than trying to get a dozen or so 50kw's like WLAC and WWVA lined up. OTOH, people need special receivers to get the station, unlike with MW.

-=Scott Fybush - fybush@world.std.com - Not the opinions of WBZ=-

M14563@mwvm.mitre.org wrote:

On the WCXR vs. Jazzy 100 issue:

When I made my original post annoucing the format change at WCXR, I did not mean to infer that Jazzy 100 had switched to WCXR. It may have sounded like that, but I didn't mean that. Just wanted to clear that up.

A couple of other things:

-What is to say that the current format at WCXR is not something preceeding a true "Cool Jazz" type format like Jazzy 100 had? If, in fact, WCXR must be sold by Viacom, what is to say that the formers of Jazzy 100 talk to the new owners of WCXR about a switch to true "Cool Jazz". I think the current format would be a good seque into the old Jazzy 100's format.

-Also, acoording to a Radio Column in The Post from several weeks ago, it said that WXTR (currently Oldies) is making a last ditch effort to regain some share from WBIG. I see here another chance for Jazzy 100 if WXTR fails. However, this station could *theroethically* simulcast the new Alternative station that a former of WHFS has started.

Some food for thought.

-Mike

KXAM recently picked the show up. Del Hull is the new GM there (formerly of
KUKQ) and he seems to be shifting KXAM in the talk direction.

4245. Radio Show Exchange Using Maven

Newsgroup: rec.radio.broadcasting
Date: 1994-10-11 06:11:53 UTC
From: sun!peterson@uunet.uu.net
Message-ID: <37dab9$8ti@vixen.cso.uiuc.edu>
Source record: 37451

My college radio station is looking to exchange radio programs (1 hour) over the internet with other colleges using Maven. We have a Mac on an ethernet network connected to our broadcasting board. We have tried sending an on-air broadcast to different Macintoshes around campus and it seems to work pretty well.

Basically, all you need is a line-level signal from your broadcast booth into a Macintosh on a network capable of accessing the internet. The Maven software is shareware.

It does take up quite a bit of band-width, so the broadcasts will have to be late at night. Right now I am interested in running a few short tests to study sound quality. Is anyone interested?

Please contact me via e-mail at peterson@lclark.edu.

Thanks,
Leland Peterson,
Music Director,
KLC Radio

PS Credit for this idea goes to a guy named Paul that works at the station.

>John

My view is that since radio is in business to make money, and the way money
is made is by playing popular stuff that people get into (so that the stuff
sells),
then, basically -- if it didn't sell then, it probably won't sell now.

I know it kind of sounds oversimplified but - something only sells if
people like the way it sounds...if they didn't like it then, they probably
don't want
to hear it now. You don't even have to go as "deep" as oldies radio...The
duo Go West had a minor pop hit about 1.5 years ago called "What You Won't
Do For Love" (a remake of an old Bobby Caldwell tune). The thing is that
you probably won't be hearing this song on the radio ever again..because it
was only a minor hit...Most CHR's won't consider putting this song in their
"oldies rotation"
(even if they *did* play it when it was 'hitting') because people will probably
still hear the song (probably while they're flipping through the dial) and say
"HUH??"...and, to tie in what Sean said before, if they don't recognize
this "oldie", they'll probably just keep flippin'!

4248. 150 Mexican Federales Raid Street Radio Station - Solidarity Needed

Newsgroup: rec.radio.broadcasting
Date: 1994-10-11 06:12:00 UTC
From: frbspd@crl.com
Message-ID: <37dabg$8ts@vixen.cso.uiuc.edu>
Source record: 37454

STREET RADIO STATION, TELEVERDAD, RAIDED BY 150 MEXICAN FEDERAL POLICE

SOLIDARITY SUPPORT ACTIONS NEEDED

Today, we received the following email from Mexico City. We urge you take whatever action you can to show your support and solidarity for "peoples' radio" in Mexico. In San Francisco a demonstration of solidarity and support will take place on Monday, October 17 at 5 PM in front of the Mexican Consulate offices on Market St. - the Flood Building, 870 Market. If you have similar offices or facilities in your city we urge you to take similar actions. Letters of support and solidarity can be sent directly to Mexico City via the following email address:

cssmex@dante.lbl.gov

Phone and FAX numbers of appropriate Mexican officials and offices will be forthcoming for those who wish to express themselves directly to the Mexican Government.

Under UN Human Rights Accords, people have the right to communicate with each other in any manner they so chose without government interference. Cleary this is a violation of human rights under those accords. Particulary so since the major Mexican broadcast media is under the control of just a handful of ruling elite, not unlike the situation here in the United States.

Free Radio Berkeley and the Free Communications Coalition are working on both a national and international campaign to take back the airwaves from coprporate control through public education and electronic civil disobience - the placing of low wattage radio transmitters on the air. We are working directly with both the people in Mexico City and the EZLN in Chiapas, supplying them with transmitters and technical support.

Thank you,

Stephen Dunifer
Free Radio Berkeley / Free Communications Coalition

From: Claudia Scheinbaum <cssmex@dante.lbl.gov>
To: frbspd@crl.com
Subject: Re: your mail

Last Sunday, October 9th, around 150 members of the Fedearl police
called in Mexico Policia Judicial Federal, at 1 a.m. took by force
all the equipment of the station Televerdad. Fortunatly no body is
injured or kidnapeded.
Televerdad was a independent radio station that was transmiting since
September 9th.
The Federal Police rebed the transmiter, the antenna, four taperecorders,
around 52 casettes, microphones, mixers, etc.
As you know in Mexico, the radio is controlled by 12 families. The law
protects them and do not give any possibility for an independent radio
station.
By now, we still have an other station called "Radio Pirata".
that is broadcasting Satuirdays from 12 to 3 p.m.
We are going to have some political demostrations this week.
We are asking for solidarity from abroad.
It will be great if Free Radio Berkeley, and other stations
send a letter to Newspapers in Mexico, asking for
freedom of speech, democracy and solidarity to
independent radio stations such as Televerdad and Radio Pirata.
You can send me the letter by E/mail....I can translate it and
then you can send it to La Jornada which is the most independent
Newspaper in Mexico.
We wll appriciate your solidarity....

Claudia.

P.S. It will be great if you can send me by FAX the 300 amplifier
circuit.....
Instead of stoping transmitions we want to answer with more "power".

There's been some discussion about why Rush gets to stay on AFRN.

I saw a little item in Esquire (?) recently that might shed some light.

The article was a tour of "Rush Rooms" around America (you know, those restaurants that serve up 3 martini lunches, steak and Rush Limbaugh at lunch). The Rush Room here in Washington is at a place called Blackie's House of Beef.

The reporter mentioned that the majority of the customers were from the Pentagon. This is worth mentioning since Blackies is downtown and the Pentagon is across the river in Virginia a good, long subway or car (good forbid!) ride away.

You don't have to be Oliver Stone to figure out that if the Brass is willing to travel 30 minutes out of their way every afternoon to listen to Rush bash the Commander-in-Chief, His Plumpness will remain on Armed Forces Radio as long as he likes.

I'll warn you at the top: please stop me if this becomes a rant.

Commercial radio programmers are the biggest bunch of sheep there are. They are the worst! Whatever is "in", they'll program it. They don't ever lead. They ALWAYS follow.

Unless you are fortunate enough to live in one of those very, very few markets where someone is motivated by something other than safety and sales, you're SOL.

You will not find programming that you like on commercial radio. It cannot exist.

Commercial programmers don't have it in them to try anything creative.

I have the first AM stereo walkman Sony made---it was switchable from Kahn
to C-Quam. It works great! Radio Shack also used to make an AM Stereo
tuner that could be hooked up to your component system (I have one of
those too --- it also works great)!

But I know of no stand-alone AM Stereo receivers made today. Even when
they were being produced, store clerks didn't have a clue. Most American
made cars come with AM stereo receivers. If you find an AM stereo station
--- you can hear how good it sounds. It's as good as FM --- in some cases
better (no picket-fencing). But alas --- AM Stereo is almost
dead...therefore, no receivers are being produced. Manufacturers are
waiting for the next development --- Digital radio...stay tuned!

: Can anyone give me an idea of what radio stations will pay for such
: a program. Any feedback will be helpful. David Pirie.

If it's directed toward a public station, maybe $10 a show, maybe more if it's in demand.

But if you're directing it toward commercial radio, probably nothing. Commercial stations prefer to barter -- they'll take the show for free, you sell half the ads and make the other half available for them to sell. Only when a program gets really popular can the producer get real money from the stations for it.

But back to public radio, if you can get it uploaded weekly to the NPR satellite, then send notices to NPR stations via their DACS message system, you stand a much better chance of at least getting a station to listen to your show and consider it for broadcast.

My first radio show was on a student Cable station. I had a shift from Midnight to 3AM on Saturday. When I wanted a request I always used old Disney songs from the B-sides of "Long-playing Stories", the kind where TinkerBell waved her magic wand to tell you turn the page.

Two of the better ones were: "Whale of a Tale" from the flipside of "2000 Leagues Under the Sea", and "The Siamese Cat Song" from "Lady and the Tramp".

I usually had a request by the second verse of "We are siamese if you do please..." ;)

SEEKING VINTAGE RADIO PROGRAMS!

From Any Year

East Stroudsburg University (ESU) in Pennsylvania is looking to expand its collection of vintage radio programs donated to the university by Robert Brunet. The collection currently is at about 3,000 hours of programs.

East Stroudsburg University is building the collection for two main reasons: (1) To establish a vintage radio library that can be used by scholars conduction research and fans wishing to listen to programs; and (2) to broadcast old-time radio programs on the campus radio station (WESS, 90.3FM, 1400 watts).

If you're interested in contributing vintage radio programs or old radio memorabilia to the collection, please contact:

Rob McKenzie, Ph.D.
University Advisor to WESS Radio
Assistant Professor of Speech Communication Studies
Fine Arts Building
ESU
East Stroudsburg, PA 18301
Phone: 717-424-3886
Internet: McKenzie@esu.edu

[Moderator's Note: For those interested in Old Time Radio, there is a mailing list called OTR (Old Time Radio). You can join by sending mail to otr-request@airwaves.chi.il.us, and place the word SUBSCRIBE alone in the subject. It is a fairly active daily digest list, whit many many qualified OTR people on it. Bill]

4257. Re: A different WOWO question

Newsgroup: rec.radio.broadcasting

STEVEORD@delphi.com writes:

>I was in the Ft. Wayne area a couple weeks ago and noticed that WOWO seemed
>to be doing split IDs...ie separate legal IDs on the AM & FM, which as far
>as I could tell with only an analog radio was otherwise a total simulcast.
>Does anyone know why they do this? It seems like it would be a hassle for
>whoever was on the board, not to mention the increased margin for error.

Naaah, it's easier than that. There's one cart machine *after* the board.
One channel has the AM ID, the other channel has the FM. One channel is
fed out to the AM processing chain, the other channel to the FM processing
chain. There was something similar running at KSFO(AM)/KYA-FM San Francisco
until the stations were sold separately just under a year ago. Both stations
played the same oldies with the same jocks...but there were KSFO jingles
only on the AM, KYA jingles only on the FM.

Why do they do this? Probably so as not to confuse all of us in the WOWO
hinterlands, where "WOWO 103 FM" is a non-entity. Notice that even on the
FM, the only time you hear the FM mentioned is in that top hour ID. Otherwise
it's always "1190 WOWO." Oh, and the simulcast is sometimes broken for
separate sports...like Komets hockey on 1190, Purdue sports on 102.9.

>Do they screw up often & put the wrong ID on the wrong station? Do they run
>different spots on AM & FM? How do they pull this off...do they, say feed
>the AM from the program channel of the board and the FM from audition,
>thereby requiring 2 complete air chains, processors, etc?

Obviously there's no chance of screwing up, as long as each ID is recorded
on the proper channel of the cart. And there are 2 complete air chains
anyway, for the times when they break simulcast. It's been a while since
I got my tour of the studios, so details are hazy.

A plug here: If you too care about saving WOWO's 50kw signal blanketing
the East, it's none too soon to drop a postcard to the WOWO Listeners
Guild, PO Box 1183, Randolph MA 02368. We'll send you information
about how you can join with us to show the FCC that there are listeners
out here who still care about the AM clear channels. The fight's not
over yet.

-=Scott Fybush - fybush@world.std.com - Solely my personal opinions=-

OTR programs?
Q16. Is there a World Wide Web (html) page or FTP address that I can
access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of OTR?
Q19. What is the best way to archive OTR programs?
------------------------------------------------------------------------

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely
applied to radio programs broadcast from the dawn of broadcasting
to the early 1950's. Alternate names are "radio nostalgia",
"golden age radio", etc. Usually this applies to radio drama,
mystery stories, comedy and adventures.
```

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations and three satellite feeds rebroadcast OTR. Check the OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP).

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See the WWW page or FTP site for a list of some of them.

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to be listed in this database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Q12. Are there any OTR clubs near me?
A12. Check the club listing in the WWW page. We will add clubs as they become known to us.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, Armed Services Radio rebroadcast many Mutual Radio transcriptions at a later date.
| Your tape may be of one of these later dates. Alternately,
| somebody might have made a mistypopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Q16. Is there a World Wide Web (html) page or FTP address that I can access for more info?
A16. Yes, there are two WWW sites, as well as two anonymous FTP addresses and a Gopher. The two WWW sites are independent, and contain different information, but each can be accessed from the other. The FTP directories each contain different files & information. My FTP site holds OTR station lists, catalogs / libraries, bibliography, the most recent FAQ, etc. The Airwaves FTP site holds archived copies of the OTR digests as well as other files relating to -Airwaves- and rec.radio.broadcasting.

(1) My site:

World Wide Web URL:
ftp://ftp.crl.com/users/ro/lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/ro/lgenco

(2) AIRWAVES E-Publishing's Site:

FTP:
Anonymous ftp to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: otr-request@airwaves.chi.il.us
Subject: SUBSCRIBE

To unsubscribe, send email
To: otr-request@airwaves.chi.il.us
Subject:UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of OTR?
A18. Yes. The OTR Digests and Index are updated three times a week,
and are accessible through the WWW pages mentioned above, or from
the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A20. The most popular way seems to be reel-reel tapes, using each of
the four tracks to record monophonically. Cassettes are generally
fine for portability / ease of use / exchange, but they suffer
from several problems when used as a long-term storage medium. The
Hi-Fi VHS tape is gaining in popularity because of its six-hour
storage capability and relatively robust mechanical construction.

4259. Kansas City Radio Watchers (10/11/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-12 01:37:11 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <37fek7$9sq@vixen.cso.uiuc.edu>
Source record: 37464

A central figure in the programming of Kansas City's top country FM stations has decided to leave radio.

KFKF(FM) program director Don Crawley will become director of music ministries for a United Methodist church in downtown Kansas City, according to a report in the Kansas City Star.

Even though Crawley's father was a Disciples of Christ minister in Columbia, Mo., Crawley told the Star he does not plan to become an ordained minister. Crawley is quoted as saying "my interest is in areas other than radio. Certainly radio was a wonderful career for me for 24 years."

Crawley began his radio career at Columbia's legacy full-service station KFRU(AM). Upon coming to Kansas City, he became one of the masterminds behind the rise and continued success of full-service country station WDAF(AM), "61 Country."

In most ratings surveys in Kansas City conducted during the 80s and 90s, WDAF has held the number one spot (listeners 12+), often with shares exceeding 10 in a competitive market.

Two years ago, Crawley moved to 61 Country's archrival KFKF(FM).

While KFKF did manage to beat WDAF in one book (12+), and often ranked number one 25-54, other factors soon came into play that affected KFKF's ratings performance.

First, WDAF acquired the Kansas City rights to Royals baseball, solidifying its full-service image.

Second, longtime CHR station KBEQ-FM ditched the format in 1993 in favor of a "young country" format. "Young Country Q-104" has steadily eroded KFKF's share of the market.

It is not known yet how WDAF, KFKF, and KBEQ-FM fared against one another in the relatively meaningless summer survey. Kansas City figures have not yet been released, to my knowledge.

(In my opinion, Crawley's decision to leave the business definitely is a loss for Kansas City radio.)

****

Careful listening to the Kansas City Bonneville talk-station duopoly seems to reveal the chain's strategies in building up audiences.

Longtime Bonneville station KMBZ(AM) clearly is playing up its news image. It hasn't had much of a news image in nearly four years, but it's finally taken steps to remedy that situation with more newscasts and street reporting.

Especially encouraging is the return of anchor Dan Verbeck to street reporting. Verbeck is especially well respected in Kansas City's legal community for his reporting on court cases.

Other than syndicated shows (e.g. Limbaugh), most of KMBZ's other talk shows are sports-oriented. Former KCTV sports anchor Don Fortune

holds down afternoon drive with a talk show that holds even my interest -- and, just like Mr. KFI, I definitely was born without the sports gene.

All the local issue-oriented talk shows now are on duopoly partner KCMO(AM). KCMO also carries much less local news than KMBZ, and the two stations don't seem to be sharing local stories at all. KCMO is also carrying the Tom Leykis show during early evenings.

****

A couple of random, accidental observations on the AM dial Monday night:

-- A traffic information service (TIS) station was observed at 1610 kHz, testing with the calls WPBE684. I estimate it is six miles due north of my location. Some radios in the house can get it; others can't. This may not be the best frequency to choose with KPRT broadcasting from a site in east-central Kansas City at 1590 kHz.

-- Spanish normally is not heard at 1170 in this part of the world. Normally I get kind of a weak signal from KVOO in Tulsa (back of the pattern). But this Spanish signal, around 10 pm, was strong. My Spanish-language abilities mostly reside in the basement of my mind any more, but I managed to recall enough to pick out the ID of 'CARACOL.' This appeared to be a relay of the Colombian all-news radio network. It only lasted about ten minutes. Via private e-mail, Scott Fybush has reported to me that there has been quite a bit of propagation from the south lately so it could be a wild winter for those who DX (which I normally don't, but I couldn't resist that one....) I believe this is the southernmost station I have heard, ever.

--

On this morning's broadcast, WNOV's Richard Carter and Commander Michael McGee announced that, while talk stations WTMJ and WISN dropped in the latest Arbitrons (with WISN's caustic afternoon right-winger Mark Belling taking a particularly steep drop), their CARTER/McGEE REPORT has more than tripled WNOV's morning share (from 0.7 to 2.2) after only five months on the air without substantial advertising or promotion. (In fact, the biggest source of outside promotion CARTER/McGEE got was, ironically, a three-hour trashing in September---by Mark Belling on WISN.)

Greetings! (my first post on AIRWAVES!)

Tuesday (11 Oct 1994) Washington Post "On the Dial" (Radio) column reports that Lorrin Palagi, program director of WRQX/Mix 107.3 in Washington, leaves the station this Friday to move to WPNT-FM (hot AC) in Chicago. Palagi changed the station from CHR "Q-107" to "Mix" about six years ago (station is an ABC O&O).

Palagi leaves a station at the top of the market in most categories. The Post, quoting recently released ARBs for the Summer, says "Mix 107.3" is # 1 in 25-54 (beating Stern/WJFK and Simpson/WPGC, following in that order); 6am-Midnight, the Mix pulled a 6.2 share, edging out WPGC's 6.1.

Elsewhere, spent some of my Columbus Day listening to "Smooth Jazz 105.9" (WCXR-WJZW). They now have jocks and traffic reports, mostly staff from 'CXR. Mostly the standard contemp jazz playlist, with some Gloria Estefan/Elton John/etc. "jazzish" tunes dropped in now and again. Most notably, the station needs to retune their audio processing to stop pumping the bass (as is appropriate for a classic rock station), and tweak the high end to play up the "sparkle" found in lots of jazz tunes (as Jazzy 100 did so well before they changed). Otherwise, should be interesting to see if Viacom is in it for the long haul, or prepping the station for eventual sale to meet FCC regs (as mentioned elsewhere here).

Cheers,
Max

4262. San Diego County Report

Newsgroup: rec.radio.broadcasting
Date: 1994-10-12 01:37:17 UTC
From: ChrisCarm@aol.com
Message-ID: <37fekd$9t9@vixen.cso.uiuc.edu>
Source record: 37467

San Diego County report for Oct. 11, 1994:

San Diego Radio Guide threw in the towel in August; and the publication is no more. The bi-monthly edition reported the goings-on about SD and Baja California radio; but could not find the readership or subsciption base. The same company launched the Los Angeles Radio Guide, and has put out two issues.

With election next month, the start of the campaign ad season swings into -- wait. The San Diego Tribune reported that some radio stations are turning away political ads. The main reason why is an upturn in the economy. Ad space is tight, and most local politicians don't have the money for high-priced ads.

KFMB-AM's morning team of "Hudson and Bauer" have been on the air since 1976. But, as reported in the Tuesday edition of the San Diego Tribune, Mac Hudson's bout with alcohol, drugs, and the "high life" have taken a toll on one-half of the radio team. The "Living Section" had a front page spread on him.

Bauer's wake-up call came when he spent five days in the hospital in the intensive care unit. Then, according to the SD Tribune, he went back on the air too soon, and was "listless, and mirthless."

The paper reported that rumors about the morning show on KFMB AM might go through a change; as this is possibly the last year for the H&B team. While ratings for SD county haven't been published, upstart KOGO with Don Imus' morning show are reported to have "stolen" listners on the AM band. Imus' vein of humor fits well into the conservative-based county.

The National Association of Broadcasters "World Media Expo" kicks off this week; and I am fortunate to have a pass. I plan on going Saturday and plan on a full report next week.

For a complete list of San Diego County based radio stations and radio w/pictures, please e-mail me!

The summer ratings were in this mornings paper so, here they are.

Washington, D.C., ratings of listeners age 12+

Summer '94 Spring '94 +/-

1. WPGC-FM (95.5) Urban 8.8 9.8 -1.0
2. WMZQ-AM/FM (1390/98.7) Cntry 5.8 5.2 +0.6
3. WRQX-FM (107.3) Mix/AC 5.2 5.1 +0.1
4. WHUR-FM (96.3) Urban 4.7 4.5 +0.2
5. WMMJ-FM (102.3) Urban/AC 4.6 4.9 -0.3
6. WASH-FM (97.1) Soft AC 4.4 3.4 +1.0
7. WJFK-FM (106.7)Stern/Don&Mike4.3 4.6 -0.3
8. WHFS-FM (99.1) Alternative 4.1 3.3 +0.8
TIE WMAL-AM (630) Local&Net Talk 4.1 4.6 -0.5
9. WKYS-FM (93.9) Urban 4.0 4.1 -0.1
10. WWDC-FM (101.1) AOR 3.8 3.5 +0.3
11. WGAY-FM (99.5) Soft AC 3.7 3.8 -0.1
12. WBIG-FM (100.3) Oldies 3.5 3.6 -0.1
TIE WGMS-FM (103.5) Classical 3.5 3.1 +0.4
13. WTOP-AM (1500) News 3.0 3.7 -0.7
14. WARW-FM (94.7) ARROW/70's 2.2 2.5 -0.3
15. WWRC-AM (980) Local&Net Talk 1.9 1.2 +0.7
16. WCXR-FM (105.9) Classic Rock 1.7 1.6 +0.1
17. WXTR-FM (104.1) Oldies 1.5 1.3 +0.2
18. WYCB-AM (1340) Religious 1.4 1.2 +0.2

The following stations weren't listed the paper so, I'm assuming that their ratings weren't higher than a 1.0. I have not yet received information on morning and afternoon drive. When they come in, they'll be posted.

WOL-AM (1450) Local talk ? 1.9
WWDC-AM (1260) Big band ? 1.1
WAVA-FM (105.1) Religious ? 1.1
WIYY-FM (97.9) AOR-Baltimore ? 1.0
WTEM-AM (570) Sports ? 0.8

No real shocking information in this book. WASH FM's big jump can probably be attributed to the former W-Lite listeners still trying to find a new home.

WCXR did gain a tenth of a point but that, obviously, isn't enough to gain any advertising revenue. Hopefully the Smooth Jazz format combined with its great signal can turn this station around.

X-tra Oldies 104, WXTR, continues to fight a losing battle with WBIG FM 100.3. WXTR is currently going through a major TV blitz in an attempt to let listeners know they're still around. Their signal, in my opinion, has been their downfall.

And finally, Washington's only all sports station continues to struggle to find a niche. It appears that they couldn't get higher than a 1.0 in overall numbers despite having the Redskins and Imus in the morning.

>Jay Marvin noted the station knew it would take time to establish an
>audience. Hope Capital Cities is a patient group Jay. Real patient.

Relax it's only the first book and the station was on in the new format a grand total of 90 days. Will this thing work? Who knows. But in this town, in talk, you have to be ready to go at least a year to two years. Talk is one of the hardest formats to build.

Jay Marvin
WLS FM

P.S. If stations programed book to book there would be a lot of changes in this town every couple of months!

4265. NYC Summer Book-an omen for talk radio?

Newsgroup: rec.radio.broadcasting
Date: 1994-10-12 01:37:25 UTC

In article <379vfb$ldj@vixen.cso.uiuc.edu>, Trog22@aol.com writes:

(on the NYCsummer Arbitrons)

One thing that concerns me (admittedly in part because I make my
living from talk radio) is the apparent erosion of the news/talk format
in terms of AQH. It looks like ALL the talkers, without exception, are
losing share in most dayparts, with WABC off a full point from last
summer and WOR also down (though not nearly as drastically). What
is causing it? Is the format wearing out, or is it just that people are
starting to get tired of the monotonous right wing slant of the format as
it's practiced by most stations in most markets? And where are the
former talk listeners going?
We haven't seen our summer numbers yet (we hit a peak last fall
and stayed flat since, while our format competitors were in a steep
slide through the spring)...but I wonder, is this pattern repeating itself
through the top 50 markets? Is the format itself starting to wear out its
welcome, or does it simply need some fresh personalities and ideas
to rejuvenate itself the way AOR and CHR seems to do about every
decade or so? Fellow radio pro's, your opinions please....
Bob Smith, midday host WXXI/1370 Rochester NY

JJB92 (jjb92@aol.com) wrote:

: Weekends on the ABC talk radio network, an investment advisor, Bob
: Brinker, holds court. I came across his show recently and was wondering
: what long time listeners think of him and how his advice has fared.

Often he lets his politics get in the way of his advice. It's clear he's a Republican-brand conservative, so while he was advising a balanced budget during the Bush years, today he seems to be talking against the moves Clinton has made to do exactly that.

He advised against investing in California real estate at the time when it was high. Good advice -- it sunk 25%.

He advised buying lots of stocks, especially mutual funds, through "dollar cost averaging" (putting the same amount of money into stocks each period). This may or may not be good advice, because I've *never* heard him talk about the *other* side of the equation -- you have all sorts of bookkeeping nightmare because you're buying so many different stocks at so many different prices that you need to be a financial expert to know when to sell what blocks of stocks to realize the best profit. If you don't do it right, it can backfire and cost you *more* than if you'd just waited to buy low and sell high.

: seems to be more than the typical investment advisor hosting a local show.
: He rarely mentions his newsletter unless someone mentions it first and he
: doesn't recommend load funds.

Well, no-load funds to have management fees attached -- nothing is free. But generally, if he didn't let his politics and some of his simplistic answers get in the way, I'd say he's the best they've got. But, one word of his OWN warning I suggest you take heed: "Become your OWN financial advisor." In other words, don't rely on him to advise you either, but take information from a lot of sources and make up your own mind.

My record? In the past (we're going back lots of years) I bought and sold Microsoft, Carter-Wallace, Commodore Computer, Pacific Bell, Apple, and CBS, and made money each time. Partly it was skill, and partly it was luck. Today, I'd be scared to touch *any* stock, even if I did have the money to invest.

4267. Arbitron to Recall Columbus, OH Summer ARB?

Newsgroup: rec.radio.broadcasting
Date: 1994-10-12 01:37:32 UTC
From: robwild@aol.com
Message-ID: <37feks$9ut@vixen.cso.uiuc.edu>
Source record: 37472

To: Broadcast Professionals
Fr: Rob Ellis, Program Director WRVF
Columbus, OH (Wild Country)
Dt: 10/11/94

Let me share with you a letter from WRVF Vice President and General Manager
Manager to Jay Guyther, Vice President, Sales and Marketing Radio Station Services of the Arbitron Ratings Company.

Mr. Guyther:

I represent OmniAmerica Group stations WHOK and WRVF in Columbus, Ohio. In recent months, it has come to our attention that certain improperties may have
been committed with regard to the usable in-tab diaries returned to Arbitron for
the Summer '94 survey. Based on the information we have gathered from various sources, it is our understanding that employees of a local company,
which also owns subscribing stations, have filled out diaries and returned them
to Arbitron representing extraodinary and unrealistic listening preferences
dedicated to their employer's station or stations.

We view this action as a total disregard for all the rules and regulations set forth
by Arbitron and suspect ratings distortion. We find this action to be totally
out of compliance with regard to fairness of its other subscribers. We demand
that you recall the summer book survey or place on hold until all usable in-tab
dairy returns have been called and questioned in regards to the name of their
employer.

Your immediate attention to this matter is requested. I can be reached at 614-847-9595.

Sincerely,

Mark Hanson
VP/General Manager
WHOK/WRVF

4268. Continental Coverage

Newsgroup: rec.radio.broadcasting

Back maybe 15 years ago or so Herb Jepko, a talk show host aiming at retired people, pretty much blanketed the country using only KSL and WHAS. Perhaps there were some dead spots with that, but it seemed to work well at that time.
Recently HCJB was approached by a broadcaster in the US who wanted to use our shortwave signal to fill in the gaps, especially since his program is on a number of daytimers which will now be signing off before his program comes on. While we turned him down, shortwave would be an alternative to fill in where even the big 50,000 watt stations don't cover. --Ken MacHarg

Scott D Fybush (fybush@world.std.com) wrote:

: In other words: just because the signals are out there doesn't mean
: you can get on them!

Not only that, but who's listening? Some stations simply don't get listeners late at night, but stay on the air anyway because their listeners set their clock radios to wake them up the next *morning*, which is the highest-audience time for most stations, especially the news or talk AMs. Nobody's going to set their clock radio to a dead channel, even if the station is there the next morning.

Source record: 37475

Robert Casey <wa2ise@netcom.com> wrote:
>In Portland, OR, the FM dial is pretty dull.

I couldn't have said it better myself.
Let's see, in Portland we get:

92.3, 101.1 - Classic Rock
94.7, 95.5, 100.3, 103.3, 105.1 - AC (some soft, some "adult top 40")
97.1 - Oldies
101.9 - "AAA"/Smooth Jazz

Note that the new top40/rock music is entirely vacant. In some of the
suburban/rural areas, we pick up 104.7 from Eugene, a top 40 station
which plays some modern rock music, and every once in a while 101.1
will play a new rock song by a group like Pearl Jam or Dream Theater.

I am going to graduate school in Seattle now and here
we get much more:

89.5, 90.3, 90.9, 91.7 - School owned "progressive rock"
92.5, 96.1, 106.9 - AC
93.3 - Top 40 (some urban, some modern)
95.7 - The 70's
97.3 - Oldies
99.9 - "Pure Rock"
101.5 - Adult Top 40
102.5 - Classic Rock
103.7 - "AAA"
107.7 - Modern Rock

Does anyone know why there is this vacancy in a market like Portland
(metro pop. approx 1.4 million) when merely 3 hours up Interstate 5
in Seattle (metro pop. approx 2.2 million) there is almost an
overabundance? Portland is a little smaller, but I don't think it is
THAT much smaller.

One other note, Les Sarnaf (sp?) and Craig Walker, if still there, are
two outstanding morning DJ's in Portland on 101.9 and 103.3
respectively.

Jim

Howdy,

We are about to go on the air with a new non-commercial station.

We need music.
Lots of music.
All types of music.

But we don't have much money.

We'd like to get record service started from as many companies as possible
before we go on the air.

So, my questions are:

1. Is there a list of addresses that we can get ahold of electronically?

2. Does someone have an old CMJ Directory they'd be willing to mail us?

3. Any other suggestions as to how to get Music Company addresses?

Please E-mail me, or respond in this News Group.

Thanks in advance,
Jesse Spears

(on Rush and disrespect for Clinton)

David, you point out that "such disrespect for the President comes from a man who has gone on record as proud that his family served in the armed forces." Ironically, he obtained a dubious medical deferment (for a condition that did not exempt my own father from a 1-A classification during the Korean War period) from a friendly doctor with GOP connections...for something called a 'polynoidal cyst', which is not normally a disabling or dangerous condition at all. Thousands of others served in Vietnam with such conditions, but because Rush had connections (his father and grandfather ran the Missouri GOP for many years) he ducked the draft. He admitted the facts of this himself on the air once, though he claimed the condition was much more serious than it really is. Rush is the LAST person on earth qualified to criticize someone else for ducking the draft. As someone who went into the pool and took his chances with the draft draw without asking for any special breaks, frankly I resent it, and miss no opportunity to point out the hypocrisy...

I don't listen to Limbaugh (and haven't since a few weeks after he went on the air nationally) because I find him shrill, strident, and unentertaining. But I *saw* him recently (within the last year or so) on ABC-TV when he was a guest on ABC-TV's "This Week with David Brinkley." On that show, I recall him saying something like, "I only let callers on my show who make ** ME ** look [or sound] good."

That sounds consistent enough with Mr. Marvin's statement to satisfy me.

Bill
:Clinton to govern,

Are you serious? Since when has ANY talk show host had that much power?
Time for a reality check. I suppose people need someone to blame when
they can't do the job.

: in fact it was the Bush administration which drafted NAFTA.

True. And doesn't it seem kinda strange that on Larry King's CNN show
that Al Gore referred to Rush as a "Great American" for backing NAFTA when
he debated Ross Perot? Or is selective memory coming into play?
What's really uncalled for are personal attacks against a someone who
happens to like a particular talk show host. I noticed that Bill does not
allow such attacks against others that post here, unless in this case, he
is doing the attacking.
Oh, and by the way, you can have respect for the office, and yet have
little respect for the person holding it.

repolk@aol.com wrote:

:Well stated Bill. Dennis apparently has no earthly idea of how the
:military operates. Personal feelings have to be set aside and an order
:obeyed. I am sure there was more than one private who hated his lieutent
:but went into combat anyway.

On the contrary! I know full well how the military operates. The
point is not how the military operates, but whether Rush's show was
cancelled by AFRTS. If you have an ax to grind, fine. But stick to the
original subject.
AFRTS knew full well in advance what kind of show Rush has, and what
material he uses. To complain now is more than a little late in the game.

:BTW, the very fact that Rush has not been banned from Armed Forces Radio
:shows that someone gives the fighting man of this country more credit
than
:Bill does. As much as I dislike some of his comments, the soldiers are
:there to protect his right to say them as well as Bill's right to send
:messages on the internet...

I agree. I don't agree with everything Rush says, but he has every
right to say it. Along with the 98% or so of the media who are on the
other side of the political spectrum.......

(on Rush's careful control of his callers)

Jay, I've noticed the same thing (I do check out my format competitors).
One thing that comes across on Rush's show, is how almost every day he loads the show with ditto-heads and various and sundry sycophants.
It's degenerated into an orgy of non-stop Clinton-bashing. Whatever you may think of Arkansas Bill (and I admit I kind of like him despite his flaws) it gets pretty monotonous after a while. I like to mix it up with cal-
lers myself. I know you do too, having been a frequent listener to your old night show on the AM side. It makes more exciting, higher energy radio if there's contrast and conflict. Seems to me a lot of PDs are going to look at sagging station numbers and figure out the same thing in the next couple of books---some have already---but will they do it in time to avoid a real national decline for the format?

Funny how "respect for the military" is location-specific. You see, endangering US military lives is WRONG according to Rush and the GOP party line...but it's RIGHT in Iraq (oh, but that's because George Bush started that action...).

Rush will talk about ANYTHING if it's to HIS advantage...and that of the Republican party. Same thing now with Ross Perot now that his nemesis George Bush is out of there (though nobody's really listening to Perot).

laughkids@aol.com says:
>Commercial radio programmers are the biggest bunch of sheep there are.
>They are the worst! Whatever is "in", they'll program it. They don't
>ever lead. They ALWAYS follow.

As a former PD of mine used to say, "Give the listeners what they want."
When he came on board, the station was an AOR suffering from identity
crisis -- it was trying to be all things to all rock listeners. It was
diverse in its playlist, but too much so. When he narrowed the range of
songs, and added more of the "staples": Zep, Skynyrd, et al, why, by
golly, audience 12+ increased by 40% in the next book.

Sitting in my office here, I could tune in a station that played some
unfamiliar stuff, or a station that asks me to stretch a bit to appreciate
its programming. It wouldn't be hard to do. But I end up listening to
the classic rock / AOR station most of the time, because it's most
comfortable in the background as I work. I think I'm pretty typical
of the average listener out there. I don't have time to *pay attention*
to the radio, nor do I want the *noise* of a format biased heavily to the
unfamiliar.

If people listed "listening to the radio" as a pastime or hobby, like
"watching TV" or "working on the car" or "collecting stamps" or whatever,
it'd be different. Music radio has become mostly a background filler,
something to keep your ears busy while you're doing other things. That
drives these cautious formats.

Truly I say unto you: If money could be made by broadcasting pigs
squealing 24 hours a day, someone would already be doing it. This stuff
is very heavily researched. Men in suits know all the numbers. It
creates mediocrity, admitted. But it's mediocrity that keeps listeners
tuned in longer. Crazy!

4283. You are missing the whole point (Was: sheep...)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-12 01:38:07 UTC
From: MAGOODELL@STTHOMAS.EDU
Message-ID: <37felv$a1q@vixen.cso.uiuc.edu>
Source record: 37488

I have been receiving this service for a couple of months now and am truly suprised to see the number of people who have yet to grasp the whole concept of how a station programs it's music.
Many comment have been made about CHR and Oldies stations that have a heavy rotation on a few songs and refuse to expand their 500 song playlist to include a thousand or so more. Hello?
Do you have any idea what adding 1,000 songs will do to a rotation and listener appeal. You aren't talking about minor changes, those are total formatabandonments. In radio, you don't talk about "tweaking" your sound by adding 1,000 or even 500 songs. You talk in increasing/decreasing category rotation by seconds and minutes, and as little as a dozen songs in a certain daypart to rotate in, very subtely, a special nuance.
Smaller stations perhaps will do such things because of their lack of understanding of listener's habits but any major market radio station has an understanding of years and years of industry market research that proves that that type of scatter-brain programming is best left to the unprofessionals.
Understand that a major market station is talking about thousands of dollars when they mess with that format and that rotation. Such decisions are made only after evaluating listeners, research and usually, the Arb's.
The single biggest argument that says that what radio is doing now is the right way is the simple fact that they are doing it. If it didn't work-theywouldn't be there. If it didn't work, heavy rotations wouldn't be the heart of most popular music stations today.
Most formats that refuse to play heavy rotations (mostly AOR, new age, and alternative) are formats that appeal to smaller niches and find their listeners stay with them for a few years until they grow out of that target audience.
Popular CHR's and AC's that use the heavy rotation have a history of longer listening times in relation to age of the listener and hours of the day.
In summary, the proof is in the pudding. We all have great ideas that we would like to see tried out in our market-I certainly do. However, the age old complaint of increasing playlists has been tried and retried. What does does work is what is working on radio stations today.
Probably the very fact that you subscribe to this service places you outof the running for many of those heavy rotation stations. Your likely to be more thoughtful than the typical radio listener. Many of them don't pay any attention to the things that drive you nuts. By definition, we are all likely not to fit into any broadcasters idea of an average listener.

I'm interested to hear your comments on this issue. Please don't tell me the old favorite, "Yeah but, me and all my friends hate those stations!" This singular statement is by far the most common and carries not a stitch of value to anyone but you and your friends (with the possible exception of your mothers.)

Matthew Goodell
St. Paul, MN

I think it's live but I will check. Has anyone else noticed that WHAS
may actually seem a little worried about the latest challenge from WWKY?

fybush@world.std.com (Scott D Fybush) wrote:
: Naaah, it's easier than that. There's one cart machine *after* the board.
: One channel has the AM ID, the other channel has the FM. One channel is
: fed out to the AM processing chain, the other channel to the FM processing
: chain. There was something similar running at KSFO(AM)/KYA-FM San Francisco
: until the stations were sold separately just under a year ago. Both stations
: played the same oldies with the same jocks...but there were KSFO jingles
: only on the AM, KYA jingles only on the FM.

This brought back some memories. Until March of this year, I worked as announcer/news person/board op for WQKT-FM 104.5/WKVX-AM 960 in Wooster, Ohio, about 40 miles out of Akron. Well, the FM was affiliated with just about any Cleveland sports team network you could think of... Indians, Cavs, Browns, as well as Ohio State out of Columbus.

Occasionally, we had to move the Indians (and lesser times, the Cavs and Browns) over to AM 960, because of local high school or college sports on the FM. One night, one of those games was going on over on 'QKT, with a Tribe game on 'KVX (all 30-some watts of its night power ;). The high school game ended on the FM, and our sports director put out the word to have the FM join the AM's broadcast of the Indians game in progress.

I was the board op that night, and figured out how to do it, seamlessly. The AM board fed the FM air signal in the Audition channel, when a certain switch was selected. So, I put most of the board's pots into both Program (WKVX) and Audition (WQKT), which fed the game and all commercials into both stations. When it came time to fire a liner with the station's name, or the game opens/closes/etc., I split off two cart machines... cart 2 fed into Program (AM) and cart 3 into Audition (FM). I put the AM liners into cart 2, the FM into cart 3, and fired them both at the same time. ;)

No one had any idea what was going on.

Ask me about the day I board op'ed a live music hour on the FM, and an Indians game on the AM, both at the same time from one studio. ;)

Mike, still proud of his achievements, a year later (chuckle)

Hi , just a curious question... I visited the states and Canada recently and
I was wondering why only the odd FM frequencies were used eg 97.3, 97.5 .7 .9 etc
Seems to me this wastes half the band, why not use the even numbers as well
as in done in europe? Is there a good reason or is it just historical and its
always been done that way?

Neil Robertson

4292. 10 Watt FM EBS Tests

Newsgroup: rec.radio.broadcasting

Message-ID: <37hfge$nk7@vixen.cso.uiuc.edu>
Source record: 37359

Yes indeed, 10 watt non-coms are required to have EBS monitoring equipment and log the recpetion of weekly tests from their required monitor station.

In addition, they must conduct a weekly test each week, in the following form: Follow the EBS script, except the Tone portion is left silent. However, if you have the tone generating equipment, use it. 10 watt Fm stations are not required to have the tone generating equipment.

However, NEVER use recorded tones. This is a big No-No, and got some stations in trouble in past years, as WCBS in New York comes to mind for Hurricane Bob.

So, depending on your state, as NY state drops the first part, it would be
Script
Silence (where the tones would go)

[Moderator's Note: Can someone write a comprehensive answer file for the question of syndication? I am getting a lot of these and would like a FAQ answer to send out. Send to my personal box, wdp@uiuc.edu. Bill]

I have 2 questions relating to two different aspects of radio, both involving entring the radio industry.

First, wwhat is the "best" way to syndicate a radio specality show? A friend of mine does an excellent comedy show three hours every week. He is interested in syndicating it, and would like to know some good chanels to work through. All information would be useful.

Second, how does a producer/tech find entry level work in radio? I've worked as a college producer/tech and commercial tech. Does anyone know of stations or production houses looking for work? Again, all information would be useful.

Thank you for all time, energy, bandwith, and MhZ.

That definitely is unusual, though not unprecented. I remember occasionally (when I lived in Lawrence, KS) receiving a mixed-language station (which included a little bit of English) from the Netherland Antilles in the S.E. Caribbean...not too far from Colombia. It was at 800 on the AM dial, which usually has either this Mexican station across the border from El Paso or a Windsor, ON- Detroit station. I do remember them talking about their 1/2 million watt transmitter and their ability to reach parts of Europe (which I would doubt that they can do that on any regular basis).

I do know that there's a list of AM worldwide stations somewhere in the library...might be handy when those "Deep DEEP south" stations come in... especially with the language barrier...

Later...
Brandt

Bingo! Mark got to the "Boston RadioWatcher" handle before I did,
so I grabbed "New England" ;-) And seriously, I do travel in all
six New England states relatively often, so until such time as
we can find Hartford and Portland and Burlington Radio Watchers, I'm
covering those areas as best I can. And unlike Mark S., I _do_
report such non-Boston news as comes my way.

Now then...I'm scratching my head trying to figure out which of
my "colleagues" has shown up as "m1bz"?...

} From: dennisn77@aol.com (DennisN77)
}
} What's really uncalled for are personal attacks against a someone who
} happens to like a particular talk show host. I noticed that Bill does not
} allow such attacks against others that post here, unless in this case, he
} is doing the attacking.

Er, Dennis, I didn't attack *you* at all. And certainly none of my comments had anything to do with your 'liking a particular talk show host'. My comments were spured by what appeared to be a classic example of 'ditto-speak'. Parroting the catch phrases of said talk show host (Slick Willy... c'mon, Dennis you are more creative than that) and missing the entire point of Jack Mor's post in regard to the commander-in-chief of this nation.

Your comments, not *YOU* were the target of my critique. When an otherwise intelligent person sees the need to play back a ROM of cliche's, be they Limbaughisms or PC gobbeltygook, I sometimes feel the need to respond. I see very little difference between Rush-like thinking and the PC extremists he opposes. Both encourage their faithful to reduce their thought patterns to knee-jerk, cliche' pre-packaged labels rather than taking the extra time to analyze each situation for what it is.

Both the left and right wing extremists accuse the other of being wrong, both have their own little agenda, both accuse the other of being the 'problem' in the world. Limbaugh believes in (or at least promotes) the notion that their are only two ways to think. Conservative (the good guys) and liberal (the devil incarnate). All of the problems in the world are simply the doing of some nameless, faceless, shadowy conglomerate called "The Liberals" (whatever the hell that means), and all thought is boiled down to binary choices, cliche's and glib sarcasm.

Instead of multi-faceted choices applied to a multi-faceted world, dittoheads (not to be confused with Limbaugh Listeners) spew forth a party line consisting of 'wide-brush' labels which their hero has implanted in their brains. TAXANDSPENDDEMOCRATS - Slick Willy, Commie Lib, Feminazis.. Environmental Wackos, you name it. Eventually, the complex world is reduced to very simple 'no-brainer' binary choices. Those who offer alternative views are easily dispatched to the "Liberal" wastebasket of the mind. No need to consider the alternatives, it is 'typical liberal garbage'.

Of course, the 'liberal' lunatic fringe is just as out-of-touch and anti-free-thought with their Political Correctness (which Limbaugh,

BTW, accurately labeled "Political Cleansing" ... But that's another article <grin>).

> 98% of the media that is on the other side of the political spectrum...

Yes, Mr Limbaugh is great at saying that there is some great liberal media out there. Well except for NPR (which is decidedly liberal in its slant) I fail to see where all this 'liberal mass media' is at.

My experiences is that the world of electronic media is about the most conservative group of business people in the world. Heck, they don't even want to add a few new records to an oldies playlist for fear of losing listeners. Do you call *that* liberal? Or is everything to the left of Limbaugh considered liberal?

So, Dennis, don't take the easy way out and accuse me of being two-faces where attack is concerned. I am not saying that you are a moron, merely that your commentary smacks of 'ditto-speak' material. You are welcome to believe how you choose, I would not try to limit your thoughts. But I know that you are capable of more than repeating the catch phrases you hear on a radio program. That is why I spoke as I did.

Bill

PS: Dittoheads differ from Rush Listeners in that dittoheads 'live, eat and breathe' Limbaughisms. Rush Listeners are far less fanatic. They listen to the man because he is entertaining and occasionally informative, but are capable of making up their own minds and formulating language of their own to express their opinions.

4303. Rush's modus operandi...

It would be nice if more stations would consider "destination" shows,
and not just because I am marketing one (Exposure). There *is* a segment
of the population that listens to music as a hobby. Take our show's target
demo as an example:

Male, professional, 25-44, many are or 'wanna-be' in the music business,
many are in tech/computers and spend a *lot* of money on CDs/rare LPs.
This is a potentially lucrative demo. But we find that stations (commercial)
don't want to take a chance on even a 2-hr slot, tucked away in a slow
weekend daypart (Sunday night 7-12pm, for example). How much risk does
that entail, especially since we offer to help the station find local sponsorship
for the show, within the interests of our target demo.

Is there a hint of frustration in some of my posts? Am I talking along the
lines of self-interest? Yep. But I am also one of those people. I listen to
radio on occasion, for background "noise". But I also spend a lot of time
listening to CDs and Tapes in place of the radio, and this is fairly typical
of 70s-80s style prog fans. No, we're not living in the past. There is a large
crop of new, indie prog being produced, and it is *amazing* music. I just
wish the commercial radio market would step out, for two hours a week,
and showcase something that the "musical hobbyists" could tune in to.
Otherwise, our radios are going (largely) unused.

>
>As a former PD of mine used to say, "Give the listeners what they want."

Well, here at KBVR, we give the listeners what they want, 24 hrs a day,
and what they want is a break from all the other overplayed crap. We
program music that nobody has ever heard of, and our ratings are higher
than stations with 5 times our wattage.

Our station manager has decided to add classic rock to the format for 4
hours on Fridays, and we have had many, many people call and complain
because we aren't giving them the new stuff they want to hear.

>
>Sitting in my office here, I could tune in a station that played some

You should try listening to the unfamiliar and educate yourself! It
doesn't take much. Who wants to be an average listener? Aspire to be
better than average.

>jimgrey@delphi.com

What complete and total crap. Mediocrity does not keep listeners.
Mediocrity drives them to non commercial radio because we are the only
ones with enough guts to break the mold.

The model number of the Denon tuner is TU-680NAB. It was designed for the NAB and is distributed through them to the industry--most recently for $400. I got one. It is very deluxe. On strong signals casual listeners will think they are hearing FM. When I listen to KKSJ in San Jose (50 miles from my home in S.F.), it is very obviously *AM* Stereo.

The Sony model number appears to be SRF-42. I am having a devil of a time trying to find one in the S.F. Bay Area. I have got the name of someone at Sony special products who is supposed to be making them available to radio stations. He is on vacation this week, so I will try again next week. I ask about it every time I pass a consumer electronics store--hoping the distributors might begin to hear there is a demand for it.

Just for fun, I called KKSJ this afternoon (Of the four AM Stereo stations in the Bay Area, KKSJ seems to be the only one promoting AM Stereo). I asked program director, Steve Sills(?) where he was sending listeners who asked about AM Stereo radios. "I wish I knew," he said. I gave him the info on the Sony guy with a suggestion that the station offer the radios to listeners--if they could get hold of any.

>with a stereo AM reciever. They are, however, kinda hard to come by.

Actually, it's recorded on 8mm videotape in PCM stereo. Unfortunately,
the rest of the broadcast chain isn't all that great, so it doesn't
sound as good as it might.

KINK-AM (nee KGW) 620KHz and KEX-AM 1190KHz are also AM-stereo, and both
have much better sound quality, if the programming fits your style...

Also, for those in the Portland area I have spotted the SRF-42 (Sony AMAX
compliant AM-stereo walkman) at G.I. Joe's (local general merchandiser,
for those not in the area). Previously it had only been spotted at the
"Sony Only" store.

: Hi , just a curious question... I visited the states and Canada recently and
: I was wondering why only the odd FM frequencies were used eg 97.3, 97.5 .7 .9 etc
: Seems to me this wastes half the band, why not use the even numbers as well
: as in done in europe? Is there a good reason or is it just historical and its
: always been done that way?

By default the FCC has settled on this arrangment. Using the Even
channel would gain nothing. The spacing is based on adjacent channel
interferance paramaters so I doubt that being able to use the even
numbers would allow more stations.

Quoting from Noel Holston, Minneapolis Star Tribune media columnist:

Don't be surprised if hell freezes over this morning, or if you look up in the sky and see a 'V' formation of pigs flying south.

One of the other great unlikelyhoods has already come to pass. WCCO Radio (830 AM) is no longer the Twin Cities' most listened-to radio station. Rock station KQRS has dethroned the Good Neighbor of the North, at least for the time being.

According to Arbitron's summer survey, KQRS (92.5 FM and 1440 AM), which simulcasts its signal, together averaged a 13.1 percent share of listeners 12 and older, the most basic and comprehensive measurement that Arbitron takes. WCCO-AM was second with 12.6 percent. WCCO has never before been second. Ever.

WCCO General Manager Rand Gottlieb called the slippage 'disappointing but not surprising.' He attributed it to the Major League Baseball strike.

KQRS General Manager Mark Steinmetz, however, noted that 'CCO did have Twins games for almost nine weeks of the 13-week sweeps period. "It'll be interesting to see what happens in the fall," he said. "That'll be the real test."

Efforts by WCCO managers in recent years to attract new, young listeners with more provocative talk-show hosts have had some success. The station showed some gains in adults 25-54. But those same moves have alienated some of the older listeners who make up its core audience.

Arbitron's 12-plus statistics, essential though they may be for bragging rights, are not the numbers on which stations base the cost of commercial minutes. Advertiser are interested in more specific target audiences, such as men 18 to 34 or people 25 to 54. KQRS, as it happens, is the runaway leader in both categories, almost doubling its nearest competitors. WCCO is the leader in attracting people 35 to 54.

KQRS' Steinmetz had other reasons to be ecstatic Monday. KQ ranked first with listeners 12 and older in the 6am to 10 am weekday slot that includes the morning drive shows. That means KQ's morning gang, led by Tom Bernard, beat 'CCO's.

KEGE-FM (The Edge), the other Twin Cities station that Steinmetz manages for ABC/Cap Cities, finished third in the 12-plus standings. The Edge, which plays new, alternative rock, has been on the air for less than a year. Its 6.5 percent share makes it the highest rated alternative rock station in the country, Steinmetz said.

Rounding out the Top 10 in 12-plus listeners in the Twin Cities were:

KDWB-FM (101.3) - CHR/Dance - 6.2
WLTE-FM (102.9) - Adult Contemp. - 5.7
KSTP-FM (99.5) - Adult Contemp. - 5.5
KQQL-FM (107.9) - Oldies - 5.4
KEEY-FM (102.1) - Hot Country - 5.0
WBOB-FM (100.3) - Hot Country - 4.6
KSTP-AM (1500) - Talk, including Limbaugh - 4.6

Sorry, no comparitives available from last book. I know I had that clipping around somewhere...

I'm sorry to see this happen to The Neighbor, but the signs have all been there. It's like watching a good friend slowly die...and no one is doing anything about it.

Best,

Steve Griffith

I don't have any problems with a 500 song playlist, as long as it is not the same 500 songs week after week after week after week after week....

The main problem I have with most commercial stations is that they play so much crap.

I worked at a student radio station for a few years as part of the Music Selection Committee (I did Rock and Blues). I would listen to everything in my genre and make recommendations as to what to make available to the DJs, and what to toss out/trade/sell/give away.

One of the best indicators that a Single/Album was going to be really bad was receiving A LOT of copies (6 or more). These were usually the worst CDs we got. Not always, but the Correlation was high.

These were also the singles that showed up on the local Radio Station the next week (not always, but once again: high correlation).

My guess is that either the PD didn't listen to these albums, and added them because they came from a major label (almost always came from one of the Major suppliers).

Or if he/she did listen to them, they wouldn't know good music if it jumped up and bit them on the Butt.

I listen to CDs, mostly.

Message-ID: <37iiq7$kah@vixen.cso.uiuc.edu>
Source record: 37382

10/12/94 - Today the FCC released a text which will allow broadcasters the right to limit political access for qualified candidates for federal office to time limits in accord with what the station normally allocates for commercial programming. Thus, radio stations will not be required to sell odd blocks of time to candidates where such blocks are not part of the normal programming or commercial format of the station.

In ruling on the matter, the FCC stated:

Broadcasters should be required to make available to federal candidates only the lengths of time offered to commercial advertisers during the year preceding a particular election period. We also believe that stations must make program time available to federal candidates in the same lengths they have programmed the station in the year preceding an election whether or not such lengths of programming time have been sold to commercial advertisers. A station's decision to program odd lengths of time should be treated in the same manner as its decision to sell odd lengths of time.

It will be interesting to see the effect this change has on the upcoming election season.

I didn't bring up Rush's phony medical complication because I didn't want to get started on broadcaster/evangelist Pat Robertson and HIS getting assigned to a supply ship when he was about to be drafted for war duty. It goes on and on like this -- the most gung-ho war mongers are those who themselves never served in a war.

I'm reminded of the WWII veteran who came up to Bill Clinton after a speech in which Clinton was taunted about his lack of war record. This elderly gentleman approached Clinton and told him, "Don't let them get you down. I served in the War. It's no place to be."

: Rush is the LAST person on earth qualified to criticize someone
: else for ducking the draft.

Exactly. Rush is an entertainer, not a philosopher or a political policy maker. It's sad that he has let success go to his head and is trying every way he can to take down the Clinton presidency -- even though Clinton is doing everything in his power to emulate the Bush presidency, including another Gulf War. These are strange times indeed.

Limbaugh Responds to FAIR

"Reign of Error: From aids to ozone, from Whitewater to the Bible,
Limbaugh seems to be able to dissemble and disinform on virtually
any subject." _ report from Fairness and Accuracy in Reporting
(fair), listing "dozens of [Limbaugh's] statements and writings it says
are inaccurate," Associated Press, June 28, 1994.

"Limbaugh's Reign of Error" was printed in extra!, the
publication of Fairness and Accuracy in Reporting. "fair" was
launched in the summer of 1987 with the financial assistance of The
New World Foundation (nwf) which gave fair a $2,500 grant that
year, according to nwf's 1987-1988 annual report. The Chair of
nwf's board in 1987 was Hillary Rodham Clinton. (Mrs. Clinton, a
board member since 1982, resigned in March of 1988.)

What follows is a rebuttal to the fair allegations printed by
the Big Five print media outlets: the Associated Press, The Los
Angeles Times, The Washington Post, The New York Times and usa
Today.

RESPONDING TO FAIR's CHARGES
PRINTED BY MAJOR PRINT MEDIA OUTLETS

Fairness and Accuracy In Reporting's charges
(as reported by the Associated Press, June 28, 1994):

1. Student loans
LIMBAUGH: "Banks take risks in issuing student loans and they are entitled
to the profits."
FAIR: "Banks take no risks in issuing student loans, which are federally
insured."
REALITY: Banks do take risks in issuing student loans and are entitled to
their profits.

"The federal government instituted the guaranteed student loan
program to provide incentives to banks to make risky loans to students with

no assets, no credit records, no full-time jobs and no permanent address. This is enormous risk. The government helps mitigate this risk. But, the government will only pay off defaulted loans if banks have followed a very careful, very detailed, very exacting set of procedures of servicing and collecting student loans. If banks don't follow the guidelines precisely, they won't be reimbursed by the government and they are left high and dry. That is risk." _ Fritz Elmendorf, Vice President for Communications, Consumer Bankers Association [by interview].

So, as I said: When banks take that kind of risk, they are entitled to their profits (even now, however, Congress is instituting new rules and regulations that are cutting the profitability of bank-issued student loans.)

2. American health care
LIMBAUGH: "If you have any doubts about the status of American health care, just compare it with that in other industrialized nations."
FAIR: "The United States ranks 16th in life expectancy and 21st in infant survival among industrialized nations, according to the CIA's 1993 World Fact Book."
REALITY: America's health care system is the best in the world.

According to Dr. Elizabeth McCaughey: "The [Clinton] Administration often cites two statistics _ America's relatively high infant mortality rate and its lower life expectancy _ to support the need for the Clinton health bill. But these have almost nothing to do with the quality of American medical care. Both statistics reflect the epidemic of low-birth-weight babies born to teenage and drug-addicted mothers, as well as the large numbers of homicides in American cities and drug-related deaths. In fact, if you're seriously ill, the best place to be is in the United States. Among all industrialized nations, the United States has the highest cure rates for stomach, cervical, and uterine cancer, the second highest cure rate for breast cancer and is second to none in treating heart disease." _ Dr. Elizabeth McCaughey, John M. Olin Fellow at the Manhattan Institute, "No Exit," The New Republic, February 7, 1994.

3. Forest acreage
LIMBAUGH: "Do you know we have more acreage of forest land in the United States today than we did at the time the Constitution was written?"
FAIR: "In what are now the 50 U.S. states, there were 850 million acres of forest land in the late 1700s vs. only 730 million acres today."
REALITY: Enormous tracts of trees were destroyed by settlers in this country, without being replanted. Today, reforestation is a critical component of the U.S. lumber industry. Furthermore, with increasingly sophisticated measuring methods, the more sure we are about the rapidly increasing rate of forest growth in the continental United States. These are the current facts: In 1952, the U.S. had 664 million acres of forest land. In 1987 the number had climbed to 731 million acres, according to the most recent numbers available in the U.S. Statistical Abstract, 1993-1994 edition.

"According to the U.S. Forest Service, annual timber growth in the U.S. now exceeds harvest by 37 percent. Annual growth has exceeded harvest every year since 1952. In 1992, just 384,000 acres _ six-tenths of 1

percent of the National Forest land open to harvesting _ were actually harvested. As a result of growth steadily exceeding harvests, the number of wooded acres in the U.S. has grown 20 percent in the past twenty years. The average annual wooded growth in the U.S. today is an amazing three times what it was in 1920. In Vermont, for example, the area covered by forests has increased from 35 percent a hundred years ago to about 76 percent today." _ Joseph Bast, Peter Hill and Richard Rue, Eco-Sanity: A Common Sense Guide to Environmentalism (Madison Books: 1994), p. 23.

4. Chelsea Clinton
LIMBAUGH: "You know the Clintons send Chelsea to Sidwell Friends private school...a recent eighth-grade class assignment required students to write a paper on Why I Feel Guilty Being White.' My source for this story is cbs News."
FAIR: "cbs denied running such a story and a Sidwell spokesman said it never happened." In its New York Times advertisement, fair calls this an example of a "groundless assertion."
REALITY: In fact, cbs Morning Resource, a wire service for radio talk show hosts run by cbs Radio Networks, reported the story on January 6, 1994. The operations director of an Ohio radio station faxed the cbs wire story to my New York studios, which I read on the air. Playboy magazine (February 1994) and Heterodoxy magazine (September 1993) had both already published the story, and in fact were the sources of the cbs wire story. And my own research has uncovered what every media outlet that uncritically repeated fair's charge could have learned by investigating (but did not bother): that _ despite Sidwell Friends' denials _ the story was, in fact, true.

On cnn's "Reliable Sources" (7/10/94), Ellen Hume said: "I don't respect someone who is clearly telling myths and pretending that he's got facts behind him. Occasionally [Limbaugh will] do something like say that the Sidwell Friends School had some test for Chelsea _ some essay Chelsea Clinton had to write about why I don't like being white, or why I'm embarrassed to be white, and then he cites a source like cbs News. That simply isn't true. None of that was true. So where is this coming fromand where do you draw the line at a mistake, which we all make, and a deliberate distortion of the fact to pander to myths that people wish were true?"

I responded to this charge in a usa Today column (7/14/94), documenting my information, and insisting that to suggest I pulled the story out of thin air or lied about cbs as its source is patently untrue.

The following week on cnn's "Reliable Sources," Ellen Hume back-pedaled. "[I]n deference to Rush, I would like to make a clarification, which is that there was a story that he put out on the radio, that Chelsea Clinton had had to write some essay about how she hates being white. This was not a true story. Rush, as far as I know, never apologized for broadcasting it, but he did say he got it from cbs. It turns out that the bad guy here was cbs, not Rush. They had a tip sheet that actually put the story out, so I say, Rush, you're off the hook on that one." (7/17/94)

But it was a true story. In a July 16, 1993 article titled "Hillary's Friends" in Washington City Paper (a D.C. newspaper with a circulation of 90,000), reporter Bill Gifford wrote: "Off the record, some parents will admit to discomfort with the school's multicultural excesses. The eighth-grade essay assignment on Why I Feel Guilty About Being White,' for example. Or the treatment accorded a sixth-grader who stood up, at a school-wide meeting held during the L.A. riots, to express his fear of the rioters (he was later forced to apologize to his black classmates).Other parents quietly fault the school for pandering to its black students, who nowadays are more likely to be the sons and daughters of blue-chip lawyers and entertainment moguls than bus drivers or janitors. The world hasn't witnessed such aristocratic self-abnegation since Robespierre was lopping off heads. It's completely riven apart by a collection of neurotic individuals who are worried sick about being seen as politically incorrect,' fumes a parent of one of Chelsea's classmates. But these same people seem possessed by the urge to mention, at the first opportunity, that their kids Got In."

My office did what no other journalist did: we tracked the story to its root, and talked to the original reporter. He confirmed the story. The paper's editor, Jack Shafer, who knows the reporter's source, agreed: "Yes, I stand by the story."

Amazingly, the reporter says that fair never called him before they ran with the story. They called him after they published the charge _ at which time the reporter says he told fair the same thing he told my office, that he stands by the story and it's true. Yet fair has never retracted its charge, corrected its record, or apologized for its error.

5. Beer and alcohol taxes in 1993
LIMBAUGH: "You better pay attention to the 1993 budget deal because there is an increase in beer and alcohol taxes."
FAIR: "There were no increases in beer and alcohol taxes in the 1993 budget."
REALITY: Beer and alcohol taxes were indeed considered for the 1993 budget deal. fair gives no context to the quote, nor a date on which I supposedly said it. I could have been referring to:

1) Clinton's 1993 budget plan. The idea of taxing beer and alcohol was a trial balloon floated early by the Administration and discussed (as were the myriad other Clinton trial balloons) on my programs. Bob Woodward's book, The Agenda, reports: "Friday morning, the team gathered in the Governor's Mansion again. Sperling, looking for more revenue to pay for the new spending, had suggested additional new taxes on inheritance, securities transfers, alcohol, and tobacco" (p. 46). "Bensten had a single sheet listing various possible taxes. It includedtaxes on cigarettes and alcohol" (p. 88). The final budget did not raise beer and alcohol taxes, but it did include the much-debated gas tax, which affected every product shipped by truck _ including beer and other alcoholic products.

2) Clinton's 1993 health care financing plan. "Increasing sin' taxes _ federal taxes on tobacco and alcoholic beverages _ is being considered as a way to help pay the $30 billion to $90 billion needed annually to provide health care coverage for everyone. A February 1993 Congressional Budget

Office study found $40 billion could be raised from 1994 through 1998 by doubling federal tobacco taxes and raising alcohol taxes by $2.50 per proof gallon. Effect of those hikes: 6-pack of beer _ current rate: 33 cents; raised rate: 81 cents." _ Judy Hasson, "Clinton Budget Plan: Opposition lies in wait for health-care reformers," usa Today, 2/22/93.

6. Gas lines and Jimmy Carter's foreign policy
LIMBAUGH: "Those gas lines were a direct result of the foreign oil powers playing tough with us because they didn't fear Jimmy Carter."
FAIR: "The first _ and most serious _ gas lines occurred in late 1973-early 1974, during the administration of Limbaugh hero Richard Nixon."
REALITY: I wasn't discussing the 1973 gas lines. I was discussing the gas lines that Jimmy Carter was responsible for _ because he ran such a pathetic foreign policy operation.

According to Daniel Yergin, Pulitzer-prize-winning author of The Prize: The Epic Quest for Oil, Money & Power, "the policy of the United States, Iran's most important ally, was in confusion, disarray and shockThe United States never sent [Iran] a clear, consistent signal,' one senior official recalled. Instead of oscillating back and forth between one course of action and another and never deciding, we would have done better to have flipped a coin and then stuck to a policy.' The cacophony from the United States certainly confused the Shah and his senior officials, undermined their calculations, and drastically weakened their resolveAt midday on January 16, the Shahboarded a plane and left Tehran for the last time, carrying with his luggage a casket of Iranian soilOn February 1, [the Ayatollah] Khomeini arrived back in Tehran in a chartered Air France 747The American defense attache provided a succinct summary of the situation in a message to Washington: Army surrenders; Khomeini wins. Destroying all classified'The old regime was gone in Iran, and the new one was in power, though most uneasily; there were already bitter struggles for control. And from Iran, as if it had been shaken by a violent earthquake, a giant tidal wave surged around the world. All were swept up in it; nothing and no one escaped. When the wave finally spent its fury two years later, the survivors would look around and find themselves beached on a totally new terrain. Everything was different; relations among all of them were altered. The wave would generate the Second Oil shock, carrying prices from thirteen to thirty-four dollars a barrel, and bringing massive changes not only in the international petroleum industry but also, for the second time in less than a decade, in the world economy and global politicsAnd suddenly, almost overnight, upwards of a billion gallons of motor fuel were sucked out of gasoline station tanks by America's frightened motoristsThe gas lines marked the beginning of the end of the Presidency of Jimmy CarterThe signing of salt ii, in negotiation for seven years through three administrations, might have been celebrated as a landmark achievement. But not then. It simply did not count. The only thing that mattered was the gas lines _ and they were Carter's fault" (The Prize, p. 679-94).

7. U.S. military/Bosnia
LIMBAUGH: "For the first time in military history, U.S. military personnel [in Bosnia] are not under the command of United States generals."

FAIR: "How far back do you want to go?' asked Commander Joe Gradisher, a Pentagon spokesman. Americans served under Lafayette in the Revolutionary War and under other foreign commanders in both world wars."
REALITY: "Rush is right. If an American is shot down in Bosnia, he will have been sent on that mission by an Egyptian bureaucrat, Boutros Boutros-Ghali, because Ghali is the one who approves the use of air strikes. You've got a really convoluted command structure over there in which the U.S. has basically ceded authority to U.N. bureaucrats. What's going on with U.S. troops in Bosnia is fundamentally different than other peacekeeping operations that the U.S. in involved in." _ Larry Di Rita, former staff officer on the Joint Chiefs of Staff and currently Deputy Director for Foreign Policy and Defense at The Heritage Foundation [by interview].

The U.S. Constitution (Article II, Section 2) states: "The President shall be the Commander-in-Chief of the Army and Navy of the United States." The Constitution does not say: "unless U.N. Secretary General Boutros Boutros-Ghali thinks otherwise." U.S. military personnel have served with forces from other countries throughout history, such as in World War I and II, but U.S. generals have always been at the top of the command structure. Dwight Eisenhower's title, for example, was Supreme Allied Commander because he, an American, was in charge of all operations involving U.S. forces. The danger today, whether in Somalia, Bosnia, Rwanda, Haiti or elsewhere, is that the Clinton Administration is ceding political and military authority to the United Nations.

fair's charges as reported by The Los Angeles Times on June 29, 1994 (except for those covered elsewhere in this response):

1. Rodney King
LIMBAUGH: "The videotape of the Rodney King beating played absolutely no role in the conviction of two of the four officers. It was pure emotion that was responsible for the guilty verdict."
FAIR: "Jury Foreman Says Video Was Crucial in Convictions,' read an accurate Los Angeles Times headline the day after the federal court verdict (4/20/93)."
REALITY: fair cites the headline of 199-word article on page 4 of the "B" Section of The Los Angeles Times to "disprove" my point, and ignores the well-documented role of emotion in each of the Los Angeles trials.

I made two points. First, I discounted the role of the videotape in the jury's decision, despite the jury foreman's claims. Second, I gave added weight to the emotion of the overall experience of being a "King juror," a commitment few in the Los Angeles area wanted. My conclusions _ clearly in the realm of opinion _ can be supported by contemporaneous media reports.

Role of the Videotape: The Wall Street Journal (April 19, 1993, article entitled, "Split Decision: Verdict in King Case Owes Much to Lessons of State-Court Trial") lends credence to my point. It reported that "if their case was made tougher by that added intent' requirement, U.S. prosecutors had the significant strategic edge of having seen a run-through. In particular,

they benefitted from knowing that the notorious 81-second videotape of Mr. King's beating had been perceived as ambiguous in places by the first jury, and that more evidence would be needed to translate into legal terms what the tape said in visceral terms."

The Journal also pointed out that: "In general, observers said, prosecutors were less confident in the videotape and were willing to take a chance on evidence that might have seemed risky last year. For instance, early on, they called bystanders who had given state investigators accounts of the incident that didn't precisely match the videotape. But even though the details were attacked by defense lawyers, the observers' eyewitness testimony about the use of force was compelling. One woman, who had watched the beating from her apartment, choked up as she described officers kicking Mr. King any way they could get a lick in.'"

This discounting of videotape evidence occurred in the fall 1993 Reginald Denny trial as well. "Jurors Show Seeing Is Not Believing," by Philip Wasserman, 10/21/93, Wall Street Journal, reported: "The decision of the jury in Los Angeles to acquit Damian Williams and Henry Watson of the most serious charges against them stemming from their beating of Reginald Denny highlights the shortcomings of using videotape as the basis of a prosecution. Like the brutal videotape in the first Rodney King trial, the horrifically compelling tape in the Reginald Denny trial was unable to provide the prosecution with the evidence it needed for convictions on the most serious charges. That shouldn't come as a surprise. In several high-profile cases in the past few years, videotape has been no substitute for compelling eyewitness testimony. The jurors apparently had no problem deciding that Messrs. Williams and Watson were the men on the tape. But the silent video scenes, shot from the ground and the air, were not enough to convince the jury that the defendants had the specific intent to commit the most serious crimes they were charged with. Ultimately, the 47 minutes of videotape could show jurors only what the defendants were doing, not why."

Emotion: The Washington Post, like The Los Angeles Times, used the jury foreman's comment in its headline. But rather than just writing 199 words, The Post used 917 words (on page 4 of the "A" Section) to stress the emotional intensity of the jury's deliberations. The April 20, 1993 Post led its story by describing "seven days of deliberations so emotional that one man had to seek medical attention for stress."

The Post further reported: "The interviews revealed disagreement on some key points of the trial. One white male juror said King's testimony was not very' important. But a black woman said she thought his appearance was crucial because it made him a human being.' The foreman of the jury said he was so moved by the testimony that he cried when he heard it."

The Post continued: "I can say that the jury system works,' the black woman, a postal worker in her twenties, told kabc-tv. But, she said: One time I was sitting there and I thoughtwhere am I? Am I at an aa meeting or am I in a jury room? It was just that emotional.' The emotional climax of the deliberations came last Tuesday, according to one account, when emotions boiled over. Tuesday it got so heated in there that one of the

jurors had to get out of the room,' a white male juror told ABC's Good Morning America.' On the news, I understood later they said one of the jurors got sick. No, he couldn't take it in there.' U.S. Marshal Craig Meacham confirmed parts of that account today. He said that the juror began feeling ill Tuesday, but participated in the deliberations Wednesday morning. By lunchtime he asked to see his doctor and, Meacham said, was treated for a rash brought on by stress and fatigue."

Further, in an article entitled, "No Punitive Damages for King; Stressful Situation' For Jurors, City," usa Today reported on June 2, 1994: "The divisiveness, pain, anger and emotional toll the 1991 Rodney King beating has unleashed here was visible again Wednesday in the faces of nine jurors as verdicts were read in a downtown federal courtroomThe jury forewoman sniffled and wiped tears from her face. Others stared straight ahead, visibly shaken. Another, the only black juror, looked angryThe forewoman, a professional mediator, read a statement: "It was a very stressful situation for many of us."

2. C.C. Myers
LIMBAUGH: "There was one key element that made this happen. One key thing: The governor of California declared the [freeway] a disaster area and by so doing eliminated the need for competitive bidsGovernment got the hell out of the way." and "They gave this guy [contractor C.C. Myers] the job without having to go through the rigmaroleof giving 25 percent of the job to a minority-owned business and 25 percent to a woman."
FAIR: "There was competitive bidding: Myers beat four other contractors for the job. Affirmative action rules applied: At least 40 percent of the subcontracts went to minority or women-owned firms. Far from getting out of the way, dozens of state employees were on the job 24 hours a day. Furthermore, the federal government picked up the tab for the whole job."
REALITY: fair's "edit" of my statements amounts to misrepresentation.

I talked on my radio and television shows for days _ and read from a number of articles _ about the fascinating chain of events that led to the opening of earthquake-damaged highways and bridges days, weeks, and, in some cases, months before they were expected to open. In doing so, I repeatedly made three main points: 1) The private sector _ using market incentives _ was responsible for repairing California's roads and bridges so quickly; 2) Government, usually a hindrance and drag on public works projects, made it easier for private companies to do their work by approving no-bid contracts and cutting red tape, and the government did so despite the fact that it was footing the bill; and 3) Contractor C.C. Myers was an American hero for taking advantage of market incentives and government restraint to accomplish what he did.

I was right on all three points, and the record supports me.

1) The private sector and market incentives: "To ensure speedy work, officials set up incentives and penalties: For every day ahead of schedule that work was finished, the company would receive $200,000, and it would be penalized at the same rate for lateness. Caltrans officials based the amount of the incentive bonus on a complicated set of estimates of the daily cost to Los

Angeles of having interrupted freeway service. Of all the contracts awarded, the incentive was largest on the Santa Monica," reported The Los Angeles Times on April 6, 1994.

The Times added: "This Santa Monica project demonstrates what can happen when private sector innovation and market incentives replace business as usual,' said Los Angeles Mayor Richard Riordan, who joined Wilson and Caltrans officials at the news conference. This is the way government should be carried out all the time, not just in emergencies.'"

2) Government restraint: "On the day of the quake, working at times by flashlight in a downtown office that lost its power, supervisors began approving emergency no-bid contracts to remove damaged bridges and shore up shaky ones. And in less than three weeks, they issued the first contracts for major reconstruction of the Santa Monica Freeway and fallen stretches of the Golden State Freeway," reported The Los Angeles Times on February 16, 1994.

The Times continued: "Instead of waiting as long as a month between bid openings and the execution of a contract, state officials are opening bids and approving contracts on the same dayAnd on dozens of smaller jobs _ to remove debris, bring down damaged bridges and shore up shaky structures _ Caltrans has dispensed with competitive bidding entirely. Department officials are picking contractors to do the work on a standard pay schedule. Some of these no-bid jobs are worth more than $1 million."

On April 6, 1994, The Los Angeles Times reported: "The high-speed construction was made possible by crews working around the clock, seven days a week, and by state officials cutting through red tape." Though the government did cut through red tape, it did not waive affirmative action rules. But, given the enormous amount of time I spent on this topic, this very minor misstatement hardly qualifies as a threat to the republic.

3) C.C. Myers: My comments on Myers were drawn from the following article, "The Santa Monica Freeway, Open Again: The Man Who Put the Pedal to the Metal Construction; Clinton Myers is a bootstrap millionaire who speeded up the job by never taking no for an answer," by Nora Zamichow of The Los Angeles Times (4/13/94):

"When the railroads told contractor Clinton Myers that it would take three weeks to deliver steel beams needed for rebuilding the Santa Monica Freeway, Myers spent $119,000 to rent his own trains to carry supplies from Arkansas and Texas. When the ironworkers said they were tired from working 10-hour days, seven days a week, Myers, a bootstrap millionaire, hired more. Day and night, Myers pushed, prodded and urged the workers. A man in constant motion, he stopped only when the freeway opened. Then he gazed at the structures, which still have wood framing attached, and pronounced: No one will ever touch what we have done, no one will ever come close.' And then, he added: But I could do it in 10 days less if I were to design and build it.'

"On the Santa Monica Freeway, Myers immediately made sure all the crews and subcontractors knew his goal. He demanded every boss's home number and he was not shy about calling day or night. When he first told me his plans to finish mid-April, I thought he was trying to light a fire under me. I'm thinking, Yeah, right, finish in April,' said Dean Bubion, president of Tri-City Reinforcing Corp., the subcontractor that handled the steelwork. But as Bubion quickly learned, Myers meant it. When you want something bad enough, you've got to go for it,' said Myers, 56."

As I said, an American hero.

3. Feminism
LIMBAUGH: "Women were doing quite well in this country before feminism came along."
FAIR: "Before feminism, women couldn't even vote."
REALITY: I was referring to contemporary militant feminism, not women's suffrage. My statement is pure opinion, and my assessment that the true backlash in this country is against militant feminism is an opinion I can well defend.

"Every revolution has its losing side. In the sexual revolution, evidence continues to mount that the supposed winners _ liberated' women _ are in some cases turning out to be the losers. Instead of the freedom and equality they thought they had achieved, too many find themselves shackled by unplanned pregnancies, abortions, single motherhood, infections or infertility," wrote Christian Science Monitor columnist Marilyn Gardner in her April 8, 1993 article entitled, "Sexual Revolution _ Women Pay the Cost."

"I feel the same as I did when I was 19 years old during the women's liberation movement,' Ms. [Anita] Blair [a lawyer who began the Independent Women's Forum] says. Except this time I want to go out and burn my dress-for-success' suit's floppy bow ties.' She would be right, says Clark University philosophy professor Christina Hoff Sommers, author of Who Stole Feminism? (Simon & Schuster). The majority of women are not represented by the feminists,' Ms. Sommers says. The majority of women are not at war with men, and while grateful for the opportunities that have been made for them, they are turned off by the feminists' relentless male-bashing,'" reported The Washington Times on December 16, 1993 in an article entitled, "Putting a New Face on Feminism: Fed-Up Women Giving Mainstream a Voice."

"[Washington Post columnist Sally] Quinn's argument was a muscular one. She wrote that the established feminist leaders and the National Organization for Women are the domestic equivalents of Communist Party apparatchiks in the Soviet Union: ideological dinosaurs, remote from the needs of their constituency and that they should step down and let other people take over. The truth is,' she wrote, that many women have come to see the feminist movement as anti-male, anti-child, anti-family, anti-feminine. And therefore it has nothing to do with us.'" _ from a February 5, 1992, Washington Times column by John Leo.

"To the extent that contemporary feminism abandons its true mission to focus on oppression and self-absorption, it creates social ills more destructive than those it seeks to remedy. By giving rise to expectations that can never be met, it condemns women to despair, and consigns them to permanent victimhood.' Feminism of this sort clouds women's judgment; it renders them incapable of distinguishing between needs and wants, between real injustices and garden-variety irritations," wrote Katherine Kersten in Policy Review (Spring 1991).

4. Anita Hill
LIMBAUGH: "Anita Hill followed Clarence Thomas everywhere. Wherever he went, she wanted to be right by his side, she wanted to work with him, she wanted to continue to date himThere were no other accusers who came forth after Anita Hill did and said, Yeah, Clarence Thomas, he harassed me, too.' There was none of that."
FAIR: "Hill could not have continued to date Thomas, since they never dated. Two other women, Sukari Hardnett and Angela Wright, came forth in the Thomas case with similar charges."
REALITY: My comment about Hill dating Thomas actually demonstrates my recall of the Thomas-Hill episode _ specifically that the record shows Anita Hill had a genuine affection for Clarence Thomas and repeatedly invited him to her apartment for drinks (a fact Thomas, not Hill, offered for the record).

In his book, The Real Anita Hill, David Brock writes: "In describing her relationship with Thomas, Hill said nothing about any contacts with him outside the office. According to her account, their relationship was strictly professional and had been confined to the workplace. When Thomas later testified, however, he disclosed that when Hill worked at Education, he occasionally offered her rides from the office to her Capitol Hill duplex, since they lived near one another in the Southwest section of the city. This revelation raises the question of what transpired on these occasions _ which overlapped with the period in which the worst harassment had supposedly occurred _ and why Hill omitted them from her testimony. According to Thomas, Hill accepted the rides and sometimes invited him into her apartment, where the two engaged in lengthy discussions about their backgrounds, life in Washington, politics, and policy. What I said was, when we were at the Department of Education, there were, as I recall, a number of instances in which I gave her a ride home, and she asked me just to drop in to continue discussion, and I would have a Coke or a beer or something and leave.'On one occasion, Thomas said, Hill asked him to help hook up new stereo equipment, hardly something that an employee would request of her boss unless the two were on good terms and had a relationship outside the office" (p. 294).

As for "other women" accusing Thomas of sexual harassment, there were none. fair is simply repeating standard liberal mythology. At this juncture, Anita Hill remains Thomas's "sole accuser," writes David Brock (p. 21).

Specifically regarding Angela Wright, Brock writes: "In a May speech at Stanford University, npr's Nina Totenberg said: Angela Wright

was the so-called other woman who made allegations against Clarence ThomasAngela Wright, in a sworn deposition, said that Clarence Thomas had sexually harassed her.' Yet Totenberg was wrong on two counts: The Wright statement was not sworn, and _ one good reason why it warranted little attention during the hearings _ it did not charge Thomas with sexual harassment. The campaign to rehabilitate and publicize comments of a woman who never came forward and never charged Thomas with sexual harassment continued" (p. 255).

And who was Angela Wright? Brock writes: "Wright was soon fired from her job on Capitol Hill for intemperate and erratic behavior in the office, and she went to work for the Republican National Committee [rnc]At the rnc, Wright's reputation did not improve. Former office mates remember having to restrain Wright from pouring boiling hot water from a coffeemaker out a window onto a crowd of pro-choice demonstrators outside the committee's offices. Wright frequently made suggestive commentsand told male co-workers that she liked to walk around her house in the nude" (p. 260).

Specifically regarding Sukari Hardnett, Brock writes: "In addition to resurrecting and mischaracterizing [Angela] Wright's charge against Thomas, [U.S. News & World Report] also claimed that a third sexual harassment charge had been lodged against Thomas by Sukari Hardnett. This was also false. Hardnett, a former legal assistant to Chairman Thomas, submitted an affidavit to the Judiciary Committee on October 14, the day before the Senate vote on the nomination. Women know when there are sexual dimensions to the attention they are receiving. And there was never any doubt about that dimension in Clarence Thomas's office,' Hardnett wrote. She provided no specifics to describe this dimension,' however. She also stated plainly: I am not claiming that I was the victim of sexual harassment.' Hardnett said she eventually resigned from the eeoc because she found working on Thomas's staff unpleasant.' Diane Holt, however, said in a written statement to the Judiciary Committee that Hardnett was fired from the staff after failing on more than one occasion to pass the bar exam. Co-workers of Hardnett during the period said she never complained to anyone about the working environment in the agency" (p. 416).

5. James Madison
LIMBAUGH: Quotes James Madison: "We have staked the futureupon the capacity of each and all of us to govern ourselves, to control ourselves, to sustain ourselves according to the Ten Commandments of God."
FAIR: "We didn't find anything in our files remotely like the sentiment expressed in the extract you sent to us,' David B. Matter, associate editor of The Madison Papers, told the Kansas City Star (1/16/94). In addition, the idea is entirely inconsistent with everything we know about Madison's views on religion and government.'"
REALITY: The quote is not Madison's. But the misattribution of this statement (an error, not "a lie") has been made by many over the years. (An early citation is found in a 1939 book by Harold K. Lane, Liberty, Cry Liberty.)

But as for the other point _ that "the idea is entirely inconsistent with everything we know about Madison's views on religion and government" _ fair's source is wrong. Sample these fully documented quotes by Madison:

"...we have all been encouraged to feel in the guardianship and guidance of that Almighty Being whose power regulates the destiny of nations, whose blessings have been so conspicuously dispensed to this rising Republic, and to whom we are bound to address our devout gratitude for the past, as well as our fervent supplications and best hopes for the future" (James Madison's First Inaugural Address, delivered March 4, 1809).

"It is the duty of every man to render to the Creator such homage and such only as he believes to be acceptable to him. This duty is precedent, both in order of time and in degree of obligation, to the claims of Civil Society" (cited in Forrest McDonald's Novus Ordo Seclorum: The Intellectual Origins of the Constitution, published by the University Press of Kansas in 1985, p. 45).

"Religion, or the duty we owe our Creator, and the manner of discharging it, can be directed only by reason and conviction, not by force or violence; and, therefore, that all men should enjoy the fullest toleration in the exercise of religion according to the dictates of conscience, unpunished and unrestrained by the magistrate, unless under color of religion any man disturb the peace, the happiness, or safety of society, and that it is the mutual duty of all to practice Christian forbearance, love and charity toward each other" (cited in Gaillard Hunt's James Madison and Religious Liberty, published by the Government Printing Office in 1902, p. 166).

"The belief in a God All Powerful, wise and good, is so essential to the moral order of the World and to the happiness of man, that arguments which enforce it cannot be drawn from too many sources nor adapted with too much solicitude to the different characters and capacities to be impressed with it" (cited in A.D. Wainwright's Madison and Witherspoon: Theological Roots of American Political Thought, published by the Princeton University Library in 1961, p. 125).

6. Native Americans
LIMBAUGH: "There are more American Indians alive today than there were when Columbus arrived or at any other time in history. Does this sound like a record of Genocide?"
FAIR: "According to Carl Shaw of the U.S. Bureau of Indian Affairs, estimates of the pre-Columbus population of what later became the United States range from 5 million to 15 million. Native populations in the late 19th century fell to 250,000 due in part to genocidal policies. Today the U.S.'s Native American population is about 2 million."
REALITY: The facts support me. fair is repeating the liberal myth that American Indians were systematically wiped out by white genocide. In See, I Told You So (from which fair takes my statement), I myself point out that while "there were certainly atrocities against Indians by white people," the full picture indicates that "life was far from utopian for these people" and that "there were just as many _ and probably to a greater degree of savagery _ committed by other Indians" (p. 68).

As for Indian population in the New World, Robert Royal, author of 1492 And All That: Political Manipulations of History, writes: "Estimates of pre-Columbian population figures have become heavily politicizedwith scholars who are particularly critical of Europe often favoring wildly higher figures. High starting points make Indian deaths by disease, warfare, and mistreatment all the greater. David Henige has dubbed this Native American Historical Demography as Expiation.' Yet despite their mistreatment by Europeans and devastation by European diseases (large numbers of Indians died as disease passed along trade routes, 80 percent without ever seeing a white man), some Indian groups are more populous today than in 1492. There are now more than 30 million Indians in Latin America alone, and there are several times more Iroquois in North America than at first contact." _ Robert Royal, "Hello Columbus: America Was No Paradise in 1492," Policy Review, Fall 1992, p. 44.

As for instances of "genocidal policies," Royal asks: "Genocide? Where? I don't know of any instances of Indian genocide. Mistreatment, yes. Warfare, yes. Deaths related to diseases caught from Europeans, yes. But systematic genocide, policies of genocide, no. Where are these policies? Where is the proof? The fact is, activists who spout off such claims of genocide have no proof. It's amazing what they can get away with" [by interview].

fair's charges as reported by The Washington Post July 1, 1994 (except for those covered elsewhere in this response):

1. Whitewater coverage
FAIR: Limbaugh has said, "I don't think The New York Times has run a story on [Whitewater] yetthere has not been a big one, front-page story, about this one that we can recall."
REALITY: My full quote, cited in the fair's own report, reads: "I don't think The New York Times has run a story on this yet. I mean, we haven't done a thorough search, but I _ there has not been a big one, front-page story about this one that we can recall. So this has yet to create or get up to its full speed _ if it weren't for us and The Wall Street Journal and The American Spectator, this would be one of the biggest and most well-kept secrets going on in American politics today." The date I said this: February 17, 1994.

My point, that as of February, much of the mainstream press had not played up Whitewater details while conservative publications had covered the scandal prominently and advanced the story, is correct. I plainly state that I don't recall if The New York Times has run a front-page story. And the fact that I overlooked one Times article that ran eleven months earlier is hardly indicative of a "reign of error."

My quote came exactly nine days before The New York Times ran another major news story on Whitewater and followed that with an editorial the following day blasting the Clinton Administration in a piece entitled, "Slovenly White House Ethics." New York Post critic Hilton Kramer then noted: "If we may judge from the catch-up reporting in Saturday's New York Times and the paper's fire-and-brimstone editorial on Sunday, it looks as if the scandals plaguing President Clinton and the First Lady are rapidly

approaching disaster. Given the way the paper has shamelessly downplayed the Clintons' follies in the past _ even as the press was coming up with more and more sensational revelations _ I think we can assume that the situation has gotten to be too hot now to be ignored, even by the Times."

2. Gulf War I
LIMBAUGH: On the Persian Gulf, Limbaugh has said "everybody in the world was aligned with the United States except who? The United States Congress."
FAIR: Both houses of Congress voted to authorize the U.S. to use force against Iraq.
REALITY: Congress eventually went along with President Bush's policy _ but they had to be dragged along, kicking and screaming since a majority in Congress and the Democratic leadership were against military action month after month. This is my point, easily understood in the context of my view that the Democratic Congress was almost always opposed to what George Bush favored. Congress didn't even vote "yes" on a resolution to authorize military force until January 12, three days before the deadline for war, and after three days of intense and emotional debate.

Bob Woodward, in his book The Commanders, wrote that on January 6, 1990, Defense Secretary Richard Cheney argued the President not take his case before Congress at all for fear of having Democrats vote "no" on authorization to use force against Iraq. "Cheney was deeply suspicious of the Democrats, who controlled Congress. He thought they would love to slam the door on the administration's effortsThe next day, on January 7, [House] Speaker [Tom] Foley announced that the House would begin debate later in the week on a resolution authorizing the use of force. He personally opposed the use of force until economic sanctions were given more time, but he said that he believed the authorization would pass by a narrow margin." That is precisely what happened. In the Senate, in fact, the vote was a mere 52 to 47.

Here are a few salient quotes from leading Democrats at the time, taken from The Congressional Record:

"If we rush to war, it will be a nightmare in the Persian Gulf. Our country will be torn apart, and very little good will happen in the United States or in the world for a long, long, long time." _ Sen. Paul Wellstone

"It'll be brutal and costlyThe Administration refuses to release casualty estimates, but the 45,000 body bags the Pentagon has sent to the region are all the evidence we need of the high price in lives and blood that we will have to pay." _ Sen. Edward M. Kennedy

"Is Kuwait worth the life of a GI? Not at all." _ Sen. Ernest F. Hollings

"Nothing large happened. A nasty little country invaded a littler but just as nasty country." _ Sen. Daniel Patrick Moynihan

3. Gulf War II
LIMBAUGH: Explaining why the Democrats wanted to "sabotage" President

Bush with the 1990 budget deal: "Now, here is my point. In 1990, George Bush was president and was enjoying a 90 percent plus approval rating on the strength of our victories in the Persian Gulf War and Cold War." (Told You So, p. 304)
FAIR: In October 1990, when the budget deal was concluded, the Gulf War had not yet been fought.
REALITY: My point, that George Bush was riding high in the polls on the strength of his handling of foreign policy (the Persian Gulf and managing the twilight of the Cold War) and that this popularity was sabotaged by the Democrats in the 1990 budget deal, is supported by the record. Eighteen days after Kuwait was invaded by Iraq (Aug. 2, 1990), Bush's approval rating on the crisis was at 82 percent, according to a usa Today poll. His overall approval rating was at 76 percent, according to a cbs News/New York Times survey. By November 13, a month after the budget deal vote, Bush's approval rating on handling the Persian Gulf crisis had fallen to 51 percent (see "Bush Support Slim," usa Today, 11/13/90). His overall approval rating that month, according to cbs/ny times, was down as well _ to 60 percent. According to pollster Frank Luntz, this 16-point drop in the overall rating is one of the sharpest two-month declines in modern presidential history.

Wrote David Broder on November 4, 1990, before the U.S. invasion had begun: "The era of good feelings President Bush engendered after the nastiness of the 1988 campaign lasted for more than a year, punctuated by broad public support for his military actions against Manuel Noriega and Saddam Hussein, and the celebrations of the fall of the Berlin Wall and the freedom of Eastern EuropeBut then Bush put himself at the very center of the most frustrating of all Washington problems, the budget deficit. He built a bipartisan summit _ and dove off its peak. By dumping his tax pledge, he separated himself from most of his party's candidates, and the budget deal he obtained _ after much grief _ was not one that many voters cheered." _ "The Year of Voting Dangerously," in The Washington Post, 11/4/90.

Ironically, on the day that Kuwait was invaded, two quotes referring to the 1990 budget deal appeared in The Washington Post that fully support my contention that the Democrats knew full well that they were sabotaging President Bush:

"We are watching the Bush presidency unravel,' said Democratic National Committee Chairman Ronald H. Brown." (Washington Post, 8/2/90)

"Democrats agreed to help the president, Panetta said, but we did not pledge that every time the Republicans slit their wrists, we'll slit ours.'" (Washington Post, 8/2/90)

FAIR's charges in a New York Times advertisement July 6, 1994 (except for those covered elsewhere in this response):

1. Canadian health care
FAIR: "Rush's groundless assertions on issues of public importance include most physicians come to the U.S. when in need of surgery.'"

REALITY: My full quote, found in fair's own report, is this: "Most Canadian physicians who are themselves in need of surgery, for example, scurry across the border to get it done right; the American way. They have found, through experience, that state medical care is too expensive, too slow and inefficient, and, most important, it doesn't provide adequate care for most people."

Canadian medical care is expensive, slow, and inefficient. Wrote Heritage Foundation health care policy analyst Edmund Haislmaier in a 1991 Policy Review article entitled, "Northern Discomfort: The Ills of the Canadian Health System": Canada's "health care system has been fully nationalized for the past two decades. In a 1989 cover story entitled Sick to Death,' the Canadian news magazine McLean's described [Charles] Coleman's case [who, at 63, had his coronary bypass surgery postponed 11 times and died eight days after the surgery was finally performed], as well as numerous other examples of a national health care system in crisis. Dr. Phil Gold, then-chief physician of Montreal General Hospital, complained, I'm living from hand to mouth and waiting for disaster each dayI don't know when someone will die for lack of a bed or the proper equipment." As for "most" physicians scurrying over the border, this is an obvious humorous exaggeration to be sure, but it is hardly "groundless." The Canadian media itself reports on fed-up doctors coming to the U.S. Note this headline in the London [Ontario] Free Press on June 28, 1994: "Cutbacks, Frustration, Pushing Doctors to U.S." The article states: "Frustrated by restrictions, cutbacks, and loss of respect, the number of doctors actively seeking work south of the border is on the rise _ and Americans are embracing them with open arms. I have never heard of as many doctors who have their names with recruiting agencies, or who have gone to the States to look around as I have for the past six months,' says [a member] of the London District Academy of Medicine, who has practiced in that city for 23 years." The article also stated, "In the U.S., which traditionally attracted Canadian specialists, the biggest demand now is for family physicians, says Jim Merritt, president of the Irving, Texas, based Merritt, Hawkins and Associates, one of the largest American physician recruitment firms."

W. Gifford-Jones, himself a Canadian doctor, wrote a column for The Evening Telegram (St. Johns, Newfoundland, Canada) entitled, "Public's Appetite Too Ravenous for Free Medical Care.'" He stated: "Mrs. Clinton take note. Many hospital beds in Canada have closed due to a lack of government funding. Operating rooms stand idle at certain times in a desperate effort to save money. Cutbacks are evident in every hospital service. It's meant that some Canadians have become more familiar with the U.S. But they're not tourists on their way to the Grand Canyon. Rather, they've crossed the border for bypass surgery and other procedures to avoid long waiting lists in Canada. But not only patients cross the 49th parallel. Some of the best physicians and surgeons have fled south, due to inadequacies in the system. One doctor who moved to Buffalo, N.Y., told me, Now I'm considered part of the solution. In Canada I was considered part of the problem.'"

Furthermore, scores of wealthy and well-connected Canadians come to the United States for surgery because they cannot get timely, quality service in Canada's own nationalized health care system.

In 1993, Joanna Miyake and Michael Walker of the Frasier Institute, a Vancouver, Canada-based think tank, published a 1993 study entitled, "Waiting Your Turn: Hospital Waiting Lists in Canada." They wrote: "More people in Canada will die this year of cardiovascular disease than of any other single disease. Because cardiovascular disease is a degenerative process and the decay of the cardiac surgery candidate is gradual, under a system of rationed supply some cardiovascular surgery candidates tend to be bumped by patients with other conditions that require immediate careThe result has been lengthy waiting lists, often as long as a year or more, followed by public outcry, prompting short-term funding. For instance, last year we reported that Newfoundland's waiting list for coronary bypass surgery was a year long."

Miyake and Walker, discussing how patients deal with such waiting lists, continue: "U.S. hospitals have also provided a convenient short term solution to excessive waiting lists for cardiac surgery. The British Columbia government contracted Washington state hospitals to perform some 200 operations in 1989, after public outcry over the six-month waiting list for cardiac bypass surgery. Wealthy individuals are sometimes choosing to avoid the waiting lists by having their heart surgery performed in the U.S. In fact, a California heart surgery centre has advertised its services in a Vancouver newspaper. Our survey suggests that 5 percent of patients enquire about surgery outside of Canada and 1.5 percent actually have their heart surgery performed outside of the country." _ Joanna Miyake and Michael Walker, "Waiting Your Turn: Hospital Waiting Lists in Canada," 3rd Edition, Critical Issues Bulletin, Frasier Institute, 1993.

What is more, at least one high-level Canadian political figure even travelled to the U.S. for medical care. Wrote Heritage's Edmund Haislmaier: "When Robert Bourassa, the Premier of Quebec, needed cancer treatment, he crossed into the U.S. and obtained it at his own expense. Such actions by more affluent or politically well-connected Canadians raise the question of whether a two-tiered' health system, of the kind Canadians long sought to avoid, is now emerging." _ Edmund Haislmaier, "Problems In Paradise: Canadians Complain About Their Health Care System," Heritage Backgrounder 883, February 19, 1992, p. 2.

2. The nicotine controversy
FAIR: "Rush's groundless assertions on issues of public importance include ... nicotine's addictiveness has not been proven.'"
REALITY: My point, made over and over again in recent months, is that if nicotine is really a terrible drug then Congress should just call it a terrible drug and ban it outright. The fact is that nicotine's addictiveness and whether or not it is a drug is, contrary to fair's assertion, a source of tremendous controversy _ so controversial that The Washington Post's lead editorial on July 2, 1994 dealt entirely with this issue. "[F]ood and drug commissioner David Kesslerhas begun an effort to determine whether nicotine-containing cigarettes meet the law's definition of a drug. If they do, the Food

and Drug Administration has the duty to regulate themif cigarettes are a drug, and if they can't be shown in their present form to be safe and effective _ which a drug would have to be in order to be sold, and which is not very likely _ then what does the government do?"

3. Ozone and volcanoes
FAIR: "Rush's groundless assertions on issues of public importance include ... volcanoes do more harm to the ozone layer than man-made chemicals."
This is the lead attack in fair's full report, in which fair trashes my source, Dixy Lee Ray's book, Trashing The Planet, published by Regnery Gateway.
REALITY: fair's source for countering me is Science magazine. However, Science's June 11, 1993 issue points out that this topic is a huge source of controversy. "[A]tmospheric scientists freely admit that, as a January 1993 review of the Department of Energy's Atmospheric Chemistry Program's Ozone Project put it, current understanding of global ozone behavior is fraught with uncertainty.' Among these uncertainties are whether ozone depletion is due to natural variation and changes in atmospheric circulation, chlorine from cfc's, or some combination of both."

Furthermore, Ray's book is not the only source of discussion of volcanoes and ozone. Ronald Bailey, who has reported on science issues for Forbes and PBS, discusses this topic in chapter eight of his 1993 book, Eco Scam: The False Prophets of Ecological Apocalypse (St. Martin's Press), noting, "sulfur from Mount Pinatubo and some Southern Hemisphere volcanoes did hasten the opening of the annual Antarctic ozone hole in 1992."

University professors Ben Bolch and Harold Lyons also discuss volcanoes and ozone in their 1993 book, Apocalypse Not: Science, Economics and Environmentalism (CATO Institute), noting, "volcanic eruptions can so disturb the stratosphere they may lead to significant ozone destruction."

And note this headline from a Boyce Rensberger article in The Washington Post: "Ozone Layer Thins Further, Possibly Because of Volcano" (April 23, 1993).

4. Effectiveness of condoms
FAIR: "Rush's groundless assertions on issues of public importance include ... condom users have a one-in-five aids risk."
REALITY: This is a distortion of fair's own study, which quotes me as saying, "The worst of all this is the lie that condoms really protect against aids. The condom failure rate can be as high as 20 percent. Would you get on a plane _ or put your children on a plane _ if one in five passengers would be killed on the flight? Well, the statistic holds for condoms, folks." My point is that because condoms can have such a high failure rate, they are not good protection against contracting hiv and aids. That is distinctly different from saying that condom users have a one-in-five aids risk.

As for condom failure rate, Susan C. Weller's 1993 study for the University of Texas Medical Branch found that "although contraceptive research indicates that condoms are 87 percent effective in preventing

pregnancy, results of hiv transmission studies indicate that condoms may reduce risk of hiv infections by approximately 69 percent," adding that condom "efficacy may be much lower than commonly assumed."

Having suggested condom use could, over time, fail to prevent hiv transmission 31 percent of the time (note: this is different from someone actually contracting aids, but still should be very alarming to the pro-condom community) Weller's study concludes: "It is a disservice to encourage the belief that condoms will prevent sexual transmission of hiv."

5. U.S. poor vs. Europe's mainstream
FAIR: "Rush's groundless assertions on issues of public importance include... the poorest people in America are better off than the mainstream of families in Europe.'"
REALITY: "Poor' Americans live in larger houses or apartments, eat more meat, and are more likely to own cars and dishwashers than is the general population in Western Europe." _ Robert Rector, senior policy analyst at The Heritage Foundation, in a September 22, 1993 study entitled, "The Poverty Paradox: How American Spent $5 Trillion on the War on Poverty Without Reducing the Poverty Rate."

6. Iran-Contra
FAIR: "Rush Limbaugh's groundless assertions on issues of public importance include ... not one indictment' resulted from Lawrence Walsh's Iran-Contra investigation."
REALITY: fair's actual report quotes me as saying, "This [Special Prosecutor Lawrence] Walsh story basically is, we just spent seven years and $40 million looking for any criminal activity on the part of anybody in the Reagan administration, and guess what? We couldn't find any. These guys didn't do anything; but we wish they had so we could nail them. So instead, we're going to say, Gosh, these are rotten guys.' They have absolutely no evidence. There is not one indictment. There is not one charge."

I was painting a portrait of how ridiculous I thought Walsh's investigation was, pointing out that no one was ever proven to have broken laws vis-Oe-vis selling arms to Iran or providing funds to the Nicaraguan contras.

I obviously misspoke when I said there were no indictments _ I clealy meant to say there were no convictions, a point I have made on many occasions. And I am exactly right that seven years and $40 million were spent to produce no convictions on the substantive points of the Iran-Contra charges.

Former Attorney General Edwin Meese III makes this case in his 1992 book, With Reagan: The Inside Story: "Despite all the rhetoric expended on this issue, it has never been settled in a court of law. The legal verdicts against North and Poindexter, which were subsequently overturned on appeal, were based on other, collateral issues. Likewise, other convictions that were obtained, generally on minor offenses, involved peripheral charges that had more to do with the investigation of the Iran-Contra affair than with the matter itself. To this day, the remaining funds from these transactions

are impounded by the Swiss authorities, subject to competing claims from General Secord and the U.S. government. Thus, it is far from certain that the diversion was illegal _ and still less certain that any other parts of the Iran-Contra affair were criminal activity" (p. 286).

Michael Gartner's charges in usa Today, July 12, 1994

GARTNER: "Why does anyone take Rush Limbaugh seriously? He's a showoff, a showman and a jerkHe's entertaining. But come on, he is to truthfulness as President Clinton is to faithfulness _ he has but a passing acquaintance with it. He's toying with you, folks, getting you all riled up with a stew of half-truths and non-truths. He's making fools of you, feeding you swill _ and you're taking it in."
and a related item, as published in extra!:
LIMBAUGH: Assailing a journalist who had criticized Nixon: "Michael Gartner, portraying himself as a balanced, objective journalist with years and years of experience faking events, and then reporting them as news _ and doing so with the express hope of destroying General Motors in one case and destroying businesses that cut down trees, the timber industry, in another." (TV show, 4/27/94)
FAIR: Gartner, the nbc News president who resigned in the wake of the gm truck explosion episode on nbc's "Dateline," had no hands-on role in it _ nor had he expressed a hope of destroying any company.
REALITY: Gartner, the "former president of nbc News," was in charge when nbc's "Dateline" staged the explosion of a General Motors truck, a nasty episode The Wall Street Journal properly dubbed "the worst scandal to beset nbc News in its four-decade history," (3/22/93). "nbc News employees made seriously flawed judgments' and violated numerous division guidelines in putting together a much-criticized story questioning the safety of General Motors Corp. trucks, an nbc-commissioned investigation charges. And when General Motors complained directly about supposed inaccuracies and questionable ethics involved in the story for Dateline nbc,' news staff failed to follow established rules for handling the protest, the report states. It further singles out Michael Gartner, who resigned as president of nbc News on March 2 for conducting an incomplete investigation when he learned belatedly of gm's problems with the broadcast." (The Wall Street Journal, 3/23/93).

A week after the "Dateline" episode, reported Time (3/15/93), "Tom Brokaw expressed his regrets for several aspects of a Nightly News report about environmental abuses on an Idaho river. It featured footage of dead' fish _ but the supposedly deceased denizens of the deep were only stunned as part of an experiment. Clearly, someone's head was due to roll, and the rollee turned out to be the top man himself: Michael Gartner, president of nbc News."

To answer Gartner's question, "Why does anyone take Rush Limbaugh seriously?" _ there is just one answer. People take me seriously because I am effective. And in my pursuit of the truth, I am an exceptionally accurate commentator.

"Nitrogen Tri-Iodide is a very unstable compound that decomposes explosively with the slightest provocation. It is too unstable to have any practical uses, but is often made for its novelty value."

garyb@ins.infonet.net (Gary Barrett) writes:

>Funny how "respect for the military" is location-specific. You see,
>endangering US military lives is WRONG according to Rush and the GOP party
>line...but it's RIGHT in Iraq (oh, but that's because George Bush started
>that action...).

That argument cuts both ways. Back when Bush was building up for Desert Shield (and ultimately Desert Storm), there were protestors coming out of the woodwork. The streets of San Francisco were blocked by protesters in front of the Federal Building shouting "no blood for oil" and the usual rent-a-mob slogans. At one point, they even shut down the Bay Bridge.

Now it is happening all over again, even while a moderately-sized military operation is in progress in Haiti, and there is not a protestor to be seen anywhere. Did our "national security" interests in the Middle East suddenly become "humanitarian"?

Something that I do not understand is why, during Bush's term, the polls showed that the public thought that the president should be spending more time with domestic issues and yet every time another hot spot flares up during Clinton's presidency, he gets a boost in his approval numbers?

As far as the media was concerned, I recall that everyone from news commentators and talkshow hosts on down were critical of Bush--some of which criticism he richly deserved while in office. Such behavior was considered SOP. Now, when anyone is critical of Clinton, it is "undermining his ability to govern". The day we are no longer permitted to be critical of the President of the United States is the day we might as well burn those documents kept in sealed glass cases on the east coast.

>Rush will talk about ANYTHING if it's to HIS advantage...and that of the
>Republican party. Same thing now with Ross Perot now that his nemesis
>George Bush is out of there (though nobody's really listening to Perot).

Rush is not nearly as bad as a particular local talkshow host here. According to him EVERYTHING bad that has ever happened has been the result of actions by Republicans and that any good that can be found in society has been the result of courageous actions by Democrats. If it is government vs industry, he sides with government. If it is workers vs employers, he sides with workers. He proudly admits that he has never owned or operated a business and pretty well takes the view that all business owners are scum. According to him, it is government's job to force all the greedy companies to give jobs to people at high pay--as it is the peoples' right to have them.

He bills himself as an "educator" and is as predictable in his simplistic views as the time of the next day's sunrise. I have literally stopped listening to him, as the frustration factor is too high and he WILL NOT allow anyone to disagree with him on the air--unlike Rush. But then, Rush is network grade entertainment. The moron here has probably reached the pinnacle of his career at KGO.

For the record, I disagree with much of what Rush says. But at least he is good entertainment. And that IS what this medium is about, right?

Message-ID: <37nmd6$ql@vixen.cso.uiuc.edu>
Source record: 37253

Well, Z-Rock on 103.1 is apparently not a smokescreen for a country format in West Palm Beach - their salespeople have business cards with the Z-Rock and WKGR (their sister station) logos. Plus they have a few billboards in the north part of Palm Beach county, where their signal is best.

Long time oldies station WAXY gave up it's call letters in August when they went all-70's and changed to WBGG "Big 106." So Jeff-Pilot, owner of crosstown oldies station Magic 102.7 picked up the WAXY calls for their AM, formerly WMRZ-790. The GM, Dennis Collins, sez it was to keep the heritage calls in Miami/Ft Lauderdale and to keep someone else from using them in town. No change in the lineup at WAXY-AM, which is talk during the day and nostalgia at night.

Former WSVN-7 anchor Penny Daniels is now host of the syndicated A Current Affair TV show. The show is on WSVN and 7 weeknites.

Format Categories: B (Black), C (Classical), G (Religious), H (Hit Rock), K (Country), N (Nostalgia), O (Oldies), R (AOR or Classic Rock), S (Soft Rock), T (News and/or Talk). A (Alternative, Modern) not listed -- none in KC.

Also of interest....

```
Shares by Duopoly: Summer Spring
1994 1994
Apollo 9.6 9.2 (KMXV, KUDL)
Bonneville 18.1 19.2 (KMBZ, KLTH, KCMO-AM/FM)
Sconnix 9.9 10.0 (KFKF, KKCJ LMA)
```

Time now for the quarterly tradition of counting up the winners and the losers in this survey:

WINNERS
* KUDL: It's now clear why Apollo bought this station, formerly KMXV's adult-contemporary archrival. KUDL has had a longer tradition in Kansas City, plus ideal call letters for this form. (Yes, they do call it "Cuddle" on the air. Yeccch.) Apollo has livened up the playlist and moved top-ranked morning time Dan Hurst and Gloria Goodwin over from KMXV. It's taken about six months for the moves to pay off, but it appears to have happened.
* KCMO-FM: The oldies station continues its steady march upward. WHB's move away from the format last summer has certainly helped, but it also appears that Bonneville is doing a far, far better job of programming "Oldies 95" than Gannett (KCMO's owner until last fall) ever could.
* WDAF: "61 Country" returns to double-digit figures with this book. It's possible the figures could have been a little higher if the baseball strike hadn't occurred. Still, WDAF evidently believes Royals baseball did not significantly help the station's ratings performance -- next season, the Royals will be on KMBZ.
* KFEZ: Yes, "1190 EZ," the nostalgia and MOR station, stays flat with a 2.2. But keep in mind that this is an AM station with a lousy nighttime signal, almost no promotion, and a somewhat eclectic, niche format. Furthermore, once KBEA drops "Music of Your Life" for kids' radio next month, KFEZ will have format exclusivity.
MAYBE A WINNER:
* KQRC: Yes, yes, yes, it's *way* up from 3.8 in the spring book. But compare it to the previous two summers: 6.5 and 7.3. Expect this hard-rocker to lose audience now that Chiefs football has started up on KCFX. Several prominent concerts this summer and a surprisingly liberal sprinkling of modern rock crossovers also helped boost the station's numbers.
LOSERS:
* KYYS: Our other album-rocker continues to turn in a sluggish performance. Flat compared to the spring book, and down from the previous two summers: 5.4 and 5.8. When I first moved to Kansas City four years ago, it pulled down double-digit numbers. That's how far it has fallen.
* KMXV: Summer surveys are supposed to give a boost to CHR stations, according to received wisdom. Then why did "Mix 93.3" plunge from a strong spring book? The station's playlist lately sounds almost like the playlist on urban-leaning competitor KISF ("Kiss FM").
* KCMO: While Bonneville souped up the FM, the AM is stuck in the soup. What news programming was left after Gannett got through with our only 50,000-watt signal has been siphoned off onto Bonneville's longstanding Kansas City news/talk outlet, KMBZ. What's left are talk show hosts who are trying to be controversial plus some syndicated talk. The only good news out of this is that KMBZ has become a far better station as a result of the Bonneville duopoly.
* KFKF/KKCJ: Yes, it's my quarterly complaint about this waste of FM Channel 293C1. KFKF (Sconnix) leased this station to keep another country FM competitor out of the market in 1992. It worked until 1993. Now all it does is drain audience from KFKF, in the face of heavy competition from "Young Country" KBEQ-FM. Even worse, KFKF has now lost its highly respected program director, Don Crawley, who's decided to leave radio.

Hey, Sconnix, it's time to do *something* with KKCJ.
Hell, put time signals on it. You might get a bigger audience.
QUESTIONS:
* Why did WHB fall off the survey altogether this time? Is this an inglorious end for Kansas City's onetime Top-40 giant, now doing country music and livestock reports?
* How does KNHN manage to field a locally-originated schedule of talk shows with cellar-level shares and a crummy signal on a graveyard channel (1340)?
* Will classical KXTR be able to recover from its summer dip in listenership?
* Will modern rock/new rock/etc. be passe by the time it gets to Kansas City (sorry, KLZR (Lawrence, KS) doesn't count in this instance)?
* With all the Volvos and Saabs in my neighborhood, why isn't anyone paying attention and trying an AAA format?

4337. Milwaukee-Racine Ratings News and Commentary

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:04 UTC
From: UltimaJock@aol.com
Message-ID: <37nmd8$qn@vixen.cso.uiuc.edu>
Source record: 37252

Here's the Cream City numbers deal, complete with my own occasionally-relevant commentary :-}...

+Country WMIL-FM 106.1 has replaced Full Service Talker WTMJ-AM 620 as the top station in the market. WTMJ's current drop can be attributed to the baseball strike (they're the Brewers' flagship and syndicator), but before that they slipped almost four points from year-ago levels. However, mid-day newcomers Jim Althoff and Andee Beck have gained slightly on G. Gordon Liddy's year-ago level; Charlie Sykes is still trying to catch up to Jay Marvin's exiting numbers.

+Talker WISN-AM 1130 can't blame sports strikes for its drop, however. Milwaukee's probably just tiring of the non-stop right-wing rants. Curt Smith, the ex-George Bush speechwriter that replaced Jerry Bott in the 9-Noon shift (by order of the Hearst Corporation's New York office, to hear Bott tell it on one of his last airshifts), has matched Rush Limbaugh (tape-delayed Noon-3) in both ideology and airshift ratings slide from Summer '93 levels (down two points). Mark Belling, the 3-6 conservative poster boy (I've never seen so many billboards for a single air personality around Milwaukee since the days of Larry "The Legend" Johnson on the old WZUU), is substantially ahead of longtime WTMJ staple Jonathan Green but has dropped 2.6 from last year, as did 6-7:30 sports talker Steve "The Homer" True.

+The top morning show is rocker WLZR-AM 1340-FM 102.9's Bob Madden and Brian Nelson, with WNOV-AM 860's Commander Michael McGee and Richard G. Carter "tough talk" more than tripling that station's share.

+The biggest loser: WLUM-FM 102.1, which lost almost half of its measured audience. Whether it willfully jumped from Urban to Alternative Rock last month or was pushed is debatable.

12-plus totals, with changes from Spring standings:
1. WMIL, Country, 8.8 (+1.1)
2. WTMJ, Full Service Talk, 8.0 (-0.5)
3. WKTI-FM 94.5, Uptempo A/C, 7.1 (+1.6)
4. WKLH-FM 96.5, Classic Rock, 6.9 (+0.3)
5. WLZR-AM-FM, 6.6 (+0.8)
6. (tie)WISN, Talk, 5.0 (-2.1)
6. (tie)WKKV-FM 100.7, Urban A/C, 5.0 (+1.3)
6. (tie)WOKY-AM 920, nostalgia, 5.0 (-1.1)
9. WEZW-FM 103.7, soft A/C, 4.7 (+0.6)
10. WMYX-FM 99.1, uptempo A/C, 4.6 (+1.5)
11. WQFM 93.3, rock, 4.0 (+0.9)
12. WLUM-FM, was Urban/now Alternative, 3.8 (-3.7)
13. (tie)WZTR-FM 95.7, oldies, 3.3 (-1.1)
13. (tie)WLTQ-FM 97.3, soft A/C, 3.3 (+0.1)

14. WNOV, Urban, 2.3 (steady)
15. WFMR-FM 98.3, classical, 2.2 (-0.3)
16. WMCS-AM 1290, Urban, 1.8 (+0.4)
Apparently missing in action: WYLO-AM 540 (religious/ethnic), WLIP-AM 1050 (A/C and oldies), WEMP-AM 1250 (Oldies Channel), WRJN-AM 1400 (Full Service A/C), WBJX-AM 1460 (Spanish), WAUK-AM 1510 (Country), WTKM-AM 1540-FM 104.9 (polkas), WHKQ-FM 92 (easy listening) and WVCY-FM 107.7 (strident Religious Right propaganda).

Top 5 in the mornings:
1. WLZR-AM-FM, 9.3
2. WMIL, 8.7
3. (tie)WTMJ, 8.6
3. (tie)WKTI, 8.6
5. WKLH, 8.1

Top 5 Middays:
1. WMIL, 8.9
2. WKLH, 7.8
3. WISN, 7.6
4. WKTI, 7.2
5. WEZW, 6.3

Top 5 Afternoon Drives:
1. WMIL, 9.2
2. WISN, 8.3
3. WKLH, 7.8
4. WKTI, 7.3
5. WTMJ, 6.7

Top 5 Evenings:
1. WTMJ, 14.6 (Gil Gross, interestingly)
2. WKKV, 9.6
3. WMIL, 6.8
4. WLUM, 5.9
5. WLZR-AM-FM, 5.3

Source on these numbers is Duane Dudek of the Milwaukee Sentinel.

Daevid Aachen, Mornings, WRJQ-AM 1570, Appleton WI

Based on European usage it would. Have a station on 99.0, if 99.2 is too close 99.3 can be used. European regulators have inter-country agreements on this. Did the FCC pick this for an easier life or can there be any technical reason?

Otherwise why does this odd spacing occur only in North America?

4339. new 104.3 f.m. the colt in Baltimore

4340. "King is Dead" Followup - Mpls/St. Paul Summer Arbs

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:12 UTC
From: SGRIFFITH@murrow.mpr.org
Message-ID: <37nmdg$r2@vixen.cso.uiuc.edu>
Source record: 37259

In followup to the note I wrote yesterday, herewith are the Summer
1993/1994 Arbitrons for Minneapolis and St. Paul;

STATION 12+ 18-34 25-54 35-64
'94 '93 '94 '93 '94 '93 '94 '93

KQRS AM/FM 13.1 10.0 23.4 18.0 16.3 11.8 8.0 5.5

WCCO AM 12.6 15.2 2.6 3.3 8.6 9.5 15.7 18.9

KEGE FM 6.5 5.6 13.2 10.9 5.3 3.3 1.1 0.5

KDWB FM 6.2 7.3 8.8 9.7 4.4 4.7 2.4 2.6

WLTE FM 5.7 6.7 4.6 5.7 6.6 8.1 7.7 9.3

KSTP FM 5.5 7.1 6.9 8.8 6.8 8.7 5.8 7.4

KQQL FM 5.4 4.5 3.2 2.4 7.7 6.6 9.0 7.7

KEEY FM 5.0 6.9 6.0 6.5 5.3 7.8 5.3 8.1

WBOB FM 4.6 3.9 6.6 5.0 4.4 4.8 3.2 4.0

KSTP AM 4.6 4.3 2.6 3.6 4.0 4.5 6.1 5.3

KTCZ FM 3.9 6.0 3.6 10.8 6.0 8.3 5.6 4.0

KJJO FM 3.5 2.6 2.9 3.4 3.5 3.2 4.6 2.4

KLBB AM 2.2 1.6 0.1 0.3 0.5 0.1 1.4 0.9

KFAN AM 1.7 1.3 2.5 1.1 2.0 1.7 1.4 1.7

KREV FM 0.8 -- 1.1 -- 0.7 -- 0.5 --

KCFE FM 0.7 0.5 0.4 0.4 0.9 0.8 1.2 0.8

WMIN AM 0.6 -- -- -- 0.1 -- 0.3 --

WREV FM 0.4 -- 1.1 -- 0.6 -- -- --

Stations in the Twin Cities market are:

KQRS AM/FM - Classic Rock WCCO AM - News/Talk
KEGE FM - Alternative KDWB FM - CHR/Dance WLTE FM - A/C
KSTP FM - A/C KQQL FM - Oldies KEEY FM - Hot Country
WBOB FM - Hot Country KSTP AM - Talk KTCZ FM - NAC/Alternative
KJJO FM - Classic Country KLBB AM - Music Of Your Life
KFAN AM - All Sports KREV FM - Alternative WREV FM - Alternative
KCFE FM - NAC WMIN AM Religious

What does it all mean? Alternative is on the rise - see KEGE/KREV/WREV vs KTCZ, who took a huge hit this past book. Country is still waning - KEEY FM was #2 in the market 18 months ago. They've lost something like 7 full points since then.

Also, the Twin Cities is a battleground between two broadcast giants - ABC/Cap Cities and CBS. ABC/Cap Cities (KQRS & KEGE) has 19.6 percent of the total market, 12+. CBS (WCCO & WLTE) is not far behind at 18.3 percent. That's almost 38 percent of all radio listeners concentrated at just four locations on the dial.

Other than that, it's been a quiet week in Lake Wobegon(tm)....8)

Hope this info is helpful/interesting/amusing...I greatly enjoy peeking into other peoples' markets thru AIRWAVES.

Best,

Steve Griffith

Message-ID: <37nmdh$r4@vixen.cso.uiuc.edu>
Source record: 37256

In 1971 I wrote Todd Rundgren a fan letter and the next thing I knew, this 16 year old New Yorker was the promo guy for Ampex Records. With stops at Bearsville, Big Tree, Casablanca, Playboy, Mushroom, Sire, IRS, Modern and then 8 years at Atlantic/Atco....Marc Nathan wants to find old radio MD's and PD's who might be on line, just to rekindle old animosity :) (yeah, right, like I was EVER upset at someone for not adding a Hamilton, Joe, Frank and Reynolds...er, Dennison record!)

Anyway, this board looked like it was all business, and perhaps the moderator will not take kindly to this gentle subversion, but the info stupor highway has made it possible for me to find some old friends, and I know I have a few here.

4343. Shareware review of ID Logic

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:19 UTC
From: ChrisCarm@aol.com
Message-ID: <37nmdn$r9@vixen.cso.uiuc.edu>
Source record: 37330

Review of ID Logic software:
Oct. 14, 1994

I took the offer that was published in the Airwaves
Journal on the ID Logic Simulator. That's the share-
ware software that contains the 14,000 plus radio
stations in Canada, U.S.A., and Mexico border stations.

I downloaded the software from the "Pics-on-Line"
BB at 14.4 -- because the 2400 baud would be almost
one hour! It took me about 15 minutes at 14.4.

You'll have to use the newest version of PKUNZIP to
uncompress the file. Also, the file VBRUN300.dll must be
in the Windows /system file. The program WILL NOT work
without it. The file exists on AOL or Compuserve; and
most local user-based bulletin boards.

Now to the software: The claim to fame on the ID logic
software is "Tune by format and automatically identify
a station by call sign, format and city of license."

I didn't read the instructions, or look at the help window --
I just went headfirst into the program. I quickly placed
Oceanside as my location, set the reception switch to "DX2"
and found that 99 percent of the stations were on target.
I was impressed! What I liked about it was the ability to jump
around anywhere in the U.S., Canada, or border of Mexico to
find what's available. The release is from September, so what
call letters that have changed within the past six months were
there on target.

The price for the registration is $45. The new edition of M Street
is $43; and as the copyright material says, they are the resource
for the station guide.

It's one of the better shareware software programs I have found.
When I am done with my trail period, I plan on paying for the
registration; and full benefits of the program.

The program is available via Internet-ftp: hk.net, in the
/shareware/prs subdirectory; or call 1.609.753.2540 (to
9600 baud); or 1.609.753.2618 (14.4). If using the BB,
try to use the 14.4 line; it'll be a lot faster.

>From the World Media Expo, Los Angeles, California:
Oct. 13, 1994

First day of the Expo kicks off! Westwood One's on-air
talent that broadcasted live from the convention center
includes:

Pat Buchanan & Co. from 9 a.m. to 12 p.m.

David Brenner: 12 p.m. to 3 p.m.

Bruce Williams: 3 p.m. to 5 p.m.

Live from the lobby of the Bonadventure Hotel:

Tom Leykis: 3 p.m. to 7 p.m.

Jim Bohannon: 7 p.m. to 10 p.m.

(all time Pacific)

Further news will be sent this weekend.

>From the Reader's Post:

Radio AAHS has added a Kansas City-area station. Through
an LMA, KBEA-AM, Misson, Kansas (1480, 1kw-D; .5kw nights)
broadcasts the Children's Broadcasting Corp., feed.

More to come from the World Media Expo!

4345. Orlando news

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:21 UTC
From: Andrew Reninger <andrewr@gate.net>
Message-ID: <37nmdp$rc@vixen.cso.uiuc.edu>
Source record: 37266

The owners of WMMO 98.9 in Orlando have apparently purchased WHTQ Q96 and will eventually move the Q96 studios to the downtown SunBank building where WMMO is headquartered.

WMMO is soft-rock and Q96 is classic rock. Rumor had been that the owners of Cool 105.9 would buy Q96, this is apparently not the case after all.

WMMO may transfer its soft rock format to Q96's 100,000 watt signal and launch a 70's format on the lower-powered 98.9 frequency.

4346. New central PA FM station

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:21 UTC
From: maxwell@essc.psu.edu
Message-ID: <37nmdp$rd@vixen.cso.uiuc.edu>
Source record: 37320

Thursday night, equipment tests were being done at the new 107.9 FM WXXZ Port Matilda-State College, PA (class A). The announcers said that the station would be up this Monday, Oct. 17. The format is still to be determined, however.

Here's some of what they played...when I tuned in (around 11:30PM) they were playing "Boot Scootin Boogie" by Brooks & Dunn, and I was thinking "OH, NO! Not a COUNTRY station! ARGH!" and the announcer even said "Country 108". However, he may have just been messing around with us because the next 10-15 songs that I heard were a mix of classic rock, 80's rock, pop, AC and modern rock (with one other country song toward the end). Most of the songs were well known, such as "Werewolves of London" by Warren Zevon, "Fall Down" by Toad the Wet Sprocket, or "Wanted Dead or Alive" by Bon Jovi. They had a few slogans such as "The only station you'll ever need" (which might signal that the format will be a mix/AC station) and "WXXZ Port Matilda-State College...where the hell is Port Matilda" (can't figure any hint there). They didn't use any sort of other music related slogans...no "Rock 108" or "Classic 108", "Cutting Edge 108", etc.

Any guesses here? I don't expect a good station here (the stations around here generally suck), but I'll be at least happy if it's not country, which is my fear...

Later...

Brandt

4347. South Florida Update

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:22 UTC

Message-ID: <37nmdq$rh@vixen.cso.uiuc.edu>
Source record: 37333

Well, Z-Rock on 103.1 is apparently not a smokescreen for a country format in West Palm Beach - their salespeople have business cards with the Z-Rock and WKGR (their sister station) logos. Plus they have a few billboards in the north part of Palm Beach county, where their signal is best.

Long time oldies station WAXY gave up it's call letters in August when they went all-70's and changed to WBGG "Big 106." So Jeff-Pilot, owner of crosstown oldies station Magic 102.7 picked up the WAXY calls for their AM, formerly WMRZ-790. The GM, Dennis Collins, sez it was to keep the heritage calls in Miami/Ft Lauderdale and to keep someone else from using them in town. No change in the lineup at WAXY-AM, which is talk during the day and nostalgia at night.

Former WSVN-7 anchor Penny Daniels is now host of the syndicated A Current Affair TV show. The show is on WSVN and 7 weeknites.

Format Categories: B (Black), C (Classical), G (Religious), H (Hit Rock), K (Country), N (Nostalgia), O (Oldies), R (AOR or Classic Rock), S (Soft Rock), T (News and/or Talk). A (Alternative, Modern) not listed -- none in KC.

Also of interest....

```
Shares by Duopoly: Summer Spring
1994 1994
Apollo 9.6 9.2 (KMXV, KUDL)
Bonneville 18.1 19.2 (KMBZ, KLTH, KCMO-AM/FM)
Sconnix 9.9 10.0 (KFKF, KKCJ LMA)
```

Time now for the quarterly tradition of counting up the winners and the losers in this survey:

WINNERS
* KUDL: It's now clear why Apollo bought this station, formerly KMXV's adult-contemporary archrival. KUDL has had a longer tradition in Kansas City, plus ideal call letters for this form. (Yes, they do call it "Cuddle" on the air. Yeccch.) Apollo has livened up the playlist and moved top-ranked morning time Dan Hurst and Gloria Goodwin over from KMXV. It's taken about six months for the moves to pay off, but it appears to have happened.
* KCMO-FM: The oldies station continues its steady march upward. WHB's move away from the format last summer has certainly helped, but it also appears that Bonneville is doing a far, far better job of programming "Oldies 95" than Gannett (KCMO's owner until last fall) ever could.
* WDAF: "61 Country" returns to double-digit figures with this book. It's possible the figures could have been a little higher if the baseball strike hadn't occurred. Still, WDAF evidently believes Royals baseball did not significantly help the station's ratings performance -- next season, the Royals will be on KMBZ.
* KFEZ: Yes, "1190 EZ," the nostalgia and MOR station, stays flat with a 2.2. But keep in mind that this is an AM station with a lousy nighttime signal, almost no promotion, and a somewhat eclectic, niche format. Furthermore, once KBEA drops "Music of Your Life" for kids' radio next month, KFEZ will have format exclusivity.
MAYBE A WINNER:
* KQRC: Yes, yes, yes, it's *way* up from 3.8 in the spring book. But compare it to the previous two summers: 6.5 and 7.3. Expect this hard-rocker to lose audience now that Chiefs football has started up on KCFX. Several prominent concerts this summer and a surprisingly liberal sprinkling of modern rock crossovers also helped boost the station's numbers.
LOSERS:
* KYYS: Our other album-rocker continues to turn in a sluggish performance. Flat compared to the spring book, and down from the previous two summers: 5.4 and 5.8. When I first moved to Kansas City four years ago, it pulled down double-digit numbers. That's how far it has fallen.
* KMXV: Summer surveys are supposed to give a boost to CHR stations, according to received wisdom. Then why did "Mix 93.3" plunge from a strong spring book? The station's playlist lately sounds almost like the playlist on urban-leaning competitor KISF ("Kiss FM").
* KCMO: While Bonneville souped up the FM, the AM is stuck in the soup. What news programming was left after Gannett got through with our only 50,000-watt signal has been siphoned off onto Bonneville's longstanding Kansas City news/talk outlet, KMBZ. What's left are talk show hosts who are trying to be controversial plus some syndicated talk. The only good news out of this is that KMBZ has become a far better station as a result of the Bonneville duopoly.
* KFKF/KKCJ: Yes, it's my quarterly complaint about this waste of FM Channel 293C1. KFKF (Sconnix) leased this station to keep another country FM competitor out of the market in 1992. It worked until 1993. Now all it does is drain audience from KFKF, in the face of heavy competition from "Young Country" KBEQ-FM. Even worse, KFKF has now lost its highly respected program director, Don Crawley, who's decided to leave radio.

Hey, Sconnix, it's time to do *something* with KKCJ.
Hell, put time signals on it. You might get a bigger audience.
QUESTIONS:
* Why did WHB fall off the survey altogether this time? Is this an inglorious end for Kansas City's onetime Top-40 giant, now doing country music and livestock reports?
* How does KNHN manage to field a locally-originated schedule of talk shows with cellar-level shares and a crummy signal on a graveyard channel (1340)?
* Will classical KXTR be able to recover from its summer dip in listenership?
* Will modern rock/new rock/etc. be passe by the time it gets to Kansas City (sorry, KLZR (Lawrence, KS) doesn't count in this instance)?
* With all the Volvos and Saabs in my neighborhood, why isn't anyone paying attention and trying an AAA format?

4349. Milwaukee-Racine Ratings News and Commentary

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:24 UTC
From: UltimaJock@aol.com
Message-ID: <37nmds$rl@vixen.cso.uiuc.edu>
Source record: 37348

Here's the Cream City numbers deal, complete with my own occasionally-relevant commentary :-}...

+Country WMIL-FM 106.1 has replaced Full Service Talker WTMJ-AM 620 as the top station in the market. WTMJ's current drop can be attributed to the baseball strike (they're the Brewers' flagship and syndicator), but before that they slipped almost four points from year-ago levels. However, mid-day newcomers Jim Althoff and Andee Beck have gained slightly on G. Gordon Liddy's year-ago level; Charlie Sykes is still trying to catch up to Jay Marvin's exiting numbers.

+Talker WISN-AM 1130 can't blame sports strikes for its drop, however. Milwaukee's probably just tiring of the non-stop right-wing rants. Curt Smith, the ex-George Bush speechwriter that replaced Jerry Bott in the 9-Noon shift (by order of the Hearst Corporation's New York office, to hear Bott tell it on one of his last airshifts), has matched Rush Limbaugh (tape-delayed Noon-3) in both ideology and airshift ratings slide from Summer '93 levels (down two points). Mark Belling, the 3-6 conservative poster boy (I've never seen so many billboards for a single air personality around Milwaukee since the days of Larry "The Legend" Johnson on the old WZUU), is substantially ahead of longtime WTMJ staple Jonathan Green but has dropped 2.6 from last year, as did 6-7:30 sports talker Steve "The Homer" True.

+The top morning show is rocker WLZR-AM 1340-FM 102.9's Bob Madden and Brian Nelson, with WNOV-AM 860's Commander Michael McGee and Richard G. Carter "tough talk" more than tripling that station's share.

+The biggest loser: WLUM-FM 102.1, which lost almost half of its measured audience. Whether it willfully jumped from Urban to Alternative Rock last month or was pushed is debatable.

12-plus totals, with changes from Spring standings:
1. WMIL, Country, 8.8 (+1.1)
2. WTMJ, Full Service Talk, 8.0 (-0.5)
3. WKTI-FM 94.5, Uptempo A/C, 7.1 (+1.6)
4. WKLH-FM 96.5, Classic Rock, 6.9 (+0.3)
5. WLZR-AM-FM, 6.6 (+0.8)
6. (tie)WISN, Talk, 5.0 (-2.1)
6. (tie)WKKV-FM 100.7, Urban A/C, 5.0 (+1.3)
6. (tie)WOKY-AM 920, nostalgia, 5.0 (-1.1)
9. WEZW-FM 103.7, soft A/C, 4.7 (+0.6)
10. WMYX-FM 99.1, uptempo A/C, 4.6 (+1.5)
11. WQFM 93.3, rock, 4.0 (+0.9)
12. WLUM-FM, was Urban/now Alternative, 3.8 (-3.7)
13. (tie)WZTR-FM 95.7, oldies, 3.3 (-1.1)
13. (tie)WLTQ-FM 97.3, soft A/C, 3.3 (+0.1)

14. WNOV, Urban, 2.3 (steady)
15. WFMR-FM 98.3, classical, 2.2 (-0.3)
16. WMCS-AM 1290, Urban, 1.8 (+0.4)
Apparently missing in action: WYLO-AM 540 (religious/ethnic), WLIP-AM 1050 (A/C and oldies), WEMP-AM 1250 (Oldies Channel), WRJN-AM 1400 (Full Service A/C), WBJX-AM 1460 (Spanish), WAUK-AM 1510 (Country), WTKM-AM 1540-FM 104.9 (polkas), WHKQ-FM 92 (easy listening) and WVCY-FM 107.7 (strident Religious Right propaganda).

Top 5 in the mornings:
1. WLZR-AM-FM, 9.3
2. WMIL, 8.7
3. (tie)WTMJ, 8.6
3. (tie)WKTI, 8.6
5. WKLH, 8.1

Top 5 Middays:
1. WMIL, 8.9
2. WKLH, 7.8
3. WISN, 7.6
4. WKTI, 7.2
5. WEZW, 6.3

Top 5 Afternoon Drives:
1. WMIL, 9.2
2. WISN, 8.3
3. WKLH, 7.8
4. WKTI, 7.3
5. WTMJ, 6.7

Top 5 Evenings:
1. WTMJ, 14.6 (Gil Gross, interestingly)
2. WKKV, 9.6
3. WMIL, 6.8
4. WLUM, 5.9
5. WLZR-AM-FM, 5.3

Source on these numbers is Duane Dudek of the Milwaukee Sentinel.

> interferance paramaters so I doubt that being able to use the even
> numbers would allow more stations.

Based on European usage it would. Have a station on 99.0, if 99.2 is too close 99.3 can be used. European regulators have inter-country agreements on this. Did the FCC pick this for an easier life or can there be any technical reason?

Otherwise why does this odd spacing occur only in North America?

From: SGRIFFITH@murrow.mpr.org
Message-ID: <37nme6$s7@vixen.cso.uiuc.edu>
Source record: 37268

In followup to the note I wrote yesterday, herewith are the Summer 1993/1994 Arbitrons for Minneapolis and St. Paul;

STATION	12+		18-34		25-54		35-64	
	'94	'93	'94	'93	'94	'93	'94	'93
KQRS AM/FM	13.1	10.0	23.4	18.0	16.3	11.8	8.0	5.5
WCCO AM	12.6	15.2	2.6	3.3	8.6	9.5	15.7	18.9
KEGE FM	6.5	5.6	13.2	10.9	5.3	3.3	1.1	0.5
KDWB FM	6.2	7.3	8.8	9.7	4.4	4.7	2.4	2.6
WLTE FM	5.7	6.7	4.6	5.7	6.6	8.1	7.7	9.3
KSTP FM	5.5	7.1	6.9	8.8	6.8	8.7	5.8	7.4
KQQL FM	5.4	4.5	3.2	2.4	7.7	6.6	9.0	7.7
KEEY FM	5.0	6.9	6.0	6.5	5.3	7.8	5.3	8.1
WBOB FM	4.6	3.9	6.6	5.0	4.4	4.8	3.2	4.0
KSTP AM	4.6	4.3	2.6	3.6	4.0	4.5	6.1	5.3
KTCZ FM	3.9	6.0	3.6	10.8	6.0	8.3	5.6	4.0
KJJO FM	3.5	2.6	2.9	3.4	3.5	3.2	4.6	2.4
KLBB AM	2.2	1.6	0.1	0.3	0.5	0.1	1.4	0.9
KFAN AM	1.7	1.3	2.5	1.1	2.0	1.7	1.4	1.7
KREV FM	0.8	--	1.1	--	0.7	--	0.5	--
KCFE FM	0.7	0.5	0.4	0.4	0.9	0.8	1.2	0.8
WMIN AM	0.6	--	--	--	0.1	--	0.3	--
WREV FM	0.4	--	1.1	--	0.6	--	--	--

Stations in the Twin Cities market are:

KQRS AM/FM - Classic Rock WCCO AM - News/Talk
KEGE FM - Alternative KDWB FM - CHR/Dance WLTE FM - A/C
KSTP FM - A/C KQQL FM - Oldies KEEY FM - Hot Country
WBOB FM - Hot Country KSTP AM - Talk KTCZ FM - NAC/Alternative
KJJO FM - Classic Country KLBB AM - Music Of Your Life
KFAN AM - All Sports KREV FM - Alternative WREV FM - Alternative
KCFE FM - NAC WMIN AM Religious

What does it all mean? Alternative is on the rise - see KEGE/KREV/WREV vs KTCZ, who took a huge hit this past book. Country is still waning - KEEY FM was #2 in the market 18 months ago. They've lost something like 7 full points since then.

Also, the Twin Cities is a battleground between two broadcast giants - ABC/Cap Cities and CBS. ABC/Cap Cities (KQRS & KEGE) has 19.6 percent of the total market, 12+. CBS (WCCO & WLTE) is not far behind at 18.3 percent. That's almost 38 percent of all radio listeners concentrated at just four locations on the dial.

Other than that, it's been a quiet week in Lake Wobegon(tm)....8)

Hope this info is helpful/interesting/amusing...I greatly enjoy peeking into other peoples' markets thru AIRWAVES.

Best,

Steve Griffith

Y'know, I was wondering. What if, in the early fifties, radio programmers were such slaves to research data? Patti Page and Frankie Laine would still be big stars. The kids would all be flocking to see the Four Aces Fiftieth Anniversary Tour. If you took a survey in 1953 and asked if anyone had ever heard rhythm and blues, they would ask you what the hell were you talking about. A handful would say, "Oh, that stuff they play on the other side of the tracks." Elvis Presley would be an Electrician in Memphis, and alive today. Get the picture?

>and what they want is a break from all the other overplayed crap. We
>program music that nobody has ever heard of, and our ratings are higher
>than stations with 5 times our wattage.

Since you are a college station with a wopping 340 watts (according to the Broadcasting Yearbook), you don't have to depend on having listeners to pay your bills. Commercial radio, on the other hand, must get as many listeners as possible. The only way to possibly do this is to have a focused strategy in the format of your choice. Get ready for the real world, Kim.

You say that you program music that nobody has ever heard of and your ratings are higher than stations with 5 times your wattage...what market are we talking about here. The closest rated market is Eugene, and at 340 watts your signal barely gets out of the college parking lot.

jimgrey@delphi.com wrote (and you responded)

>>I end up listening to the classic rock / AOR station most of the time,
>>because it's most comfortable in the background as I work. I think I'm
>>pretty typical of the average listener out there. I don't have time to
>>*pay attention*

>You should try listening to the unfamiliar and educate yourself! It
>doesn't take much. Who wants to be an average listener? Aspire to be
>better than average.

Like it or not, Kim, Jim is the average listener out there. You cannot change listeners' listening habits by playing music that they're not familiar with. If they are content with what is on the air then they will listen to that station. And that station will benefit with bigger ratings (and usually higher revenue) than the station that plays the unfamiliar.

jimgrey@delphi.com then wrote (and you responded)

>>If people listed "listening to the radio" as a pastime or hobby, like
>>"watching TV" or "working on the car" or "collecting stamps" or whatever,
>>it'd be different. Music radio has become mostly a background filler.

>What complete and total crap. Mediocrity does not keep listeners.
>Mediocrity drives them to non commercial radio because we are the only
>ones with enough guts to break the mold.

When did we start flaming people here. Should we be calling other people's opinions "crap." Besides, do some research, Kim, and you will see that Jim

is right on the money with the rest of the country.

4361. Shareware review of ID Logic

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:41 UTC
From: ChrisCarm@aol.com
Message-ID: <37nmed$sh@vixen.cso.uiuc.edu>
Source record: 37264

Review of ID Logic software:
Oct. 14, 1994

I took the offer that was published in the Airwaves
Journal on the ID Logic Simulator. That's the share-
ware software that contains the 14,000 plus radio
stations in Canada, U.S.A., and Mexico border stations.

I downloaded the software from the "Pics-on-Line"
BB at 14.4 -- because the 2400 baud would be almost
one hour! It took me about 15 minutes at 14.4.

You'll have to use the newest version of PKUNZIP to
uncompress the file. Also, the file VBRUN300.dll must be
in the Windows /system file. The program WILL NOT work
without it. The file exists on AOL or Compuserve; and
most local user-based bulletin boards.

Now to the software: The claim to fame on the ID logic
software is "Tune by format and automatically identify
a station by call sign, format and city of license."

I didn't read the instructions, or look at the help window --
I just went headfirst into the program. I quickly placed
Oceanside as my location, set the reception switch to "DX2"
and found that 99 percent of the stations were on target.
I was impressed! What I liked about it was the ability to jump
around anywhere in the U.S., Canada, or border of Mexico to
find what's available. The release is from September, so what
call letters that have changed within the past six months were
there on target.

The price for the registration is $45. The new edition of M Street
is $43; and as the copyright material says, they are the resource
for the station guide.

It's one of the better shareware software programs I have found.
When I am done with my trail period, I plan on paying for the
registration; and full benefits of the program.

The program is available via Internet-ftp: hk.net, in the
/shareware/prs subdirectory; or call 1.609.753.2540 (to
9600 baud); or 1.609.753.2618 (14.4). If using the BB,
try to use the 14.4 line; it'll be a lot faster.

4363. New central PA FM station

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 04:39:43 UTC
From: maxwell@essc.psu.edu
Message-ID: <37nmef$sk@vixen.cso.uiuc.edu>
Source record: 37260

Thursday night, equipment tests were being done at the new 107.9 FM WXXZ Port Matilda-State College, PA (class A). The announcers said that the station would be up this Monday, Oct. 17. The format is still to be determined, however.

Here's some of what they played...when I tuned in (around 11:30PM) they were playing "Boot Scootin Boogie" by Brooks & Dunn, and I was thinking "OH, NO! Not a COUNTRY station! ARGH!" and the announcer even said "Country 108". However, he may have just been messing around with us because the next 10-15 songs that I heard were a mix of classic rock, 80's rock, pop, AC and modern rock (with one other country song toward the end). Most of the songs were well known, such as "Werewolves of London" by Warren Zevon, "Fall Down" by Toad the Wet Sprocket, or "Wanted Dead or Alive" by Bon Jovi. They had a few slogans such as "The only station you'll ever need" (which might signal that the format will be a mix/AC station) and "WXXZ Port Matilda-State College...where the hell is Port Matilda" (can't figure any hint there). They didn't use any sort of other music related slogans...no "Rock 108" or "Classic 108", "Cutting Edge 108", etc.

Any guesses here? I don't expect a good station here (the stations around here generally suck), but I'll be at least happy if it's not country, which is my fear...

Later...

Brandt

4364. Orlando news

From: Andrew Reninger <andrewr@gate.net>
Message-ID: <37nmef$sj@vixen.cso.uiuc.edu>
Source record: 37345

The owners of WMMO 98.9 in Orlando have apparently purchased WHTQ Q96 and will eventually move the Q96 studios to the downtown SunBank building where WMMO is headquartered.

WMMO is soft-rock and Q96 is classic rock. Rumor had been that the owners of Cool 105.9 would buy Q96, this is apparently not the case after all.

WMMO may transfer its soft rock format to Q96's 100,000 watt signal and launch a 70's format on the lower-powered 98.9 frequency.

>>because it's most comfortable in the background as I work. I think I'm
>>pretty typical of the average listener out there. I don't have time to
>>*pay attention*

>You should try listening to the unfamiliar and educate yourself! It
>doesn't take much. Who wants to be an average listener? Aspire to be
>better than average.

Like it or not, Kim, Jim is the average listener out there. You cannot change listeners' listening habits by playing music that they're not familiar with. If they are content with what is on the air then they will listen to that station. And that station will benefit with bigger ratings (and usually higher revenue) than the station that plays the unfamiliar.

jimgrey@delphi.com then wrote (and you responded)

>>If people listed "listening to the radio" as a pastime or hobby, like
>>"watching TV" or "working on the car" or "collecting stamps" or whatever,
>>it'd be different. Music radio has become mostly a background filler.

>What complete and total crap. Mediocrity does not keep listeners.
>Mediocrity drives them to non commercial radio because we are the only
>ones with enough guts to break the mold.

When did we start flaming people here. Should we be calling other people's opinions "crap." Besides, do some research, Kim, and you will see that Jim

is right on the money with the rest of the country.

4371. WOWO to be discussed on SPECTRUM, 10/15/94

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 21:54:28 UTC
From: fybush@world.std.com
Message-ID: <37pj2k$6sp@vixen.cso.uiuc.edu>
Source record: 37390
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

If you've been following the impending demise of the 50kw clear channel signal of WOWO-1190 Fort Wayne IN, or if you have any interest at all in the future of America's clear channels, you'll want to be listening to SPECTRUM Saturday night October 15.

The guests will be myself and WOWO Listeners Guild founder Peter Q. George, and we'll be discussing the pending sale of WOWO, and what it could mean to American broadcasting.

Please tune in if you're able...and call in at 1-800-787-7732, or from overseas at +1 908 671 4209 (you can call collect). And please drop us a line at WOWO Listeners Guild, PO Box 1183, Randolph MA 02368, if you'd like to have a say in the future of WOWO.

SPECTRUM is on live 10-11pm EDT on WWCR, 5065kHz SW (*NOTE NEW FREQUENCY*), WIFI 1460 AM Florence NJ (Philadelphia), and KHNC 1360 in Colorado.

From: talk1370@aol.com
Message-ID: <37pj2l$6sq@vixen.cso.uiuc.edu>
Source record: 37392

In article <37hfgb$nk1@vixen.cso.uiuc.edu>, neil@realtime.demon.co.uk writes:

(why all N. American FMs are on odd fractional channels)

The decision was made by the FCC in 1946 when FM was moved from the 42-50 mHz region to the roomier 88-108 mHz territory it occupies today. It was felt for technical reasons that channels had to be spaced 200 kHz apart to operate with full fidelity and maximum freedom from interference. Then it was decided, for purposes of giving services on adjoining bands (VHF television below 88 mHz and aircraft communications above 108) to put the FM stations at the odd-number points and allow a short guard band at the top and bottom of the FM band, rather than having an FM station at 88.0 or 108.0 spilling over into a TV or aircraft station's signal. That's it, nothing unusual about it.
The allocation scheme applies consistently over the entire Western Hemisphere and the Pacific region including Hawaii, the Philippines and (I think) Australia and New Zealand. Other parts of the world either use different FM bands entirely, like Eastern Europe and Japan, or allocate FM stations on what we'd consider split channels or random frequencies at different spots on the band. In those cases, their TV services are located elsewhere in the spectrum as well, and TV service had a tendency to determine where FM went and how it was allocated just about everywhere. The only common denominator is that no one has FM sound broadcasting anywhere above 108 mHz, because that is virtually universal aircraft territory (although 108-109 mHz tends not to be used in North America because of proximity to FM stations at 107.7 or 107.9).

: every 'alternative' station, "the stuff they play isn't alternative
: enough". The overall mood of the article was that the station needs
: tuning before people will be tuning in.

: I tend to agree. I've tried to listen to the station but I found it
: impossible to keep tuned in for very long. If they are trying to
: address the apathy of the GenX crowd, then they've succeeded. I don't
: think it's enough to just throw different cuts out there and put in
: 'liner-reading-back-announcer' type jocks. . .Listening to
: KSCA is like listening to a automated station from an alternate
: universe of boring people. Just because it's recorded by a non
: mainstream artist doesn't make it inherently interesting.

Perhaps my expectations have been unduly lowered by the state of LA radio over the past few years, but I love KSCA. I am grateful to hear new music that I don't hear anywhere else. I don't think it sounds automated at all. In fact, I have noticed that each personality has a distinct and identifiable tilt to the music he plays (this may in fact be a contrivance, but if so it is an effective one). The personalities themselves, I must allow, are indeed bland and indistinguishable for the most part, but at least they are not annoying.

I especially like the fact that they place an emphasis on live in-studio performances. They even have a studio dedicated to that function.

Sure, I have my gripes. I think they play too much Springsteen and Traffic, and they have too strong an inclination towards young female vocalists that all sound like varying combinations of Joni Mitchell and Rickie Lee Jones. For the most part, however, it is the station I listen to constantly (at least, when Howard isn't on).

4379. Re: 500 song playlist

Newsgroup: rec.radio.broadcasting
Date: 1994-10-15 21:54:45 UTC
From: lancebkost@aol.com
Message-ID: <37pj35$6tl@vixen.cso.uiuc.edu>
Source record: 37398

When I was at oldies KWG/KYBB in Stockton (1986-89), at any given time KWG-AM played about 1500 tunes. HOWEVER, all songs were in catagories that would correspond to the number of times that they would play. For example, we had a POWER catagory (ONLY #1 or #2 songs) which had about 125 songs that came up about 20 hours or so. Then, a 50's gold which included about 300 songs and had a rotation time of every 6 1/2 days. a 60's gold which had about 600 songs and turned over every 3 days.

You can see the pattern here, I hope. I will admit that more than a few of the songs in the gold catagories were PROVEN tune-outs. That's why we rotated them so slowly.

In the POWER catagory, Every songs was something that was known by the listeners. But, since they weren't played every 8 hours or so,(ala KRTH) they didn't burn as bad and were always great response getters.

We were consistently in the top 5 in those days...
And most of this was based on GUT FEELING, no research.......

I respectfully beg to differ. The following titles were all in Billboard's
Top 40 during that year:
ABBA: HONY HONEY (#27)
Gregg Allman: MIDNIGHT RIDER (#19)
Average White Band: PICK UP THE PIECES (#1)
Bachman-Turner Overdrive: LET IT RIDE (#23)
Johnny Bristol: HANG ON IN THERE BABY (#8)
James Brown: THE PAYBACK (#26-Gold), PAPA DON'T TAKE NO MESS(#31)
Brownsville Station: KINGS OF THE PARTY (#31)
B.T. Express: DO IT (#2-Gold)
Carl Carlton: EVERLASTING LOVE (#6)
The Commodores: MACHINE GUN (#22)
Jim Croce: WORKIN' AT THE CAR WASH BLUES (#32)
Mac Davis: ONE HELL OF A WOMAN (#11)
Kiki Dee: I'VE GOT THE MUSIC IN ME (#12)
Rick Derringer: ROCK AND ROLL HOOCHIE KOO (#23)
William DeVaughn: BE THANKFUL FOR WHAT YOU GOT (#4-Gold)
Cliff DeYoung: MY SWEET LADY (#17)
Bo Donaldson & The Heywoods: WHO DO YOU THINK YOU ARE (#15)
Fancy: WILD THING (#14), TOUCH ME(#19)
Art Garfunkel: I SHALL SING (#38), SECOND AVENUE (#34)
J. Geils Band: MUST OF GOT LOST (#12)
Golden Earring: RADAR LOVE (#13)
Grand Funk: SHININ' ON (#11)
Guess Who: STAR BABY (#39)
Albert Hammond: I'M A TRAIN (#31)
The Hollies: THE AIR THAT I BREATHE (#6-Gold)
The Hudson Brothers: SO YOU ARE A STAR (#21)
Sami Jo: TELL ME A LIE (#21)
B.B. King: I LIKE TO LIVE THE LOVE (#28)
Anne Murray: YOU WON'T SEE ME (#8)
The Osmonds: LOVE ME FOR A REASON (#10)
Ozark Mountain Daredevils: IF YOU WANNA GET TO HEAVEN (#25)
Prelude: AFTER THE GOLDRUSH (#22)
Elvis Presley: IF YOU TALK IN YOUR SLEEP (#17), PROMISED LAND (#14)
Raspberries: OVERNIGHT SENSATION (#18)
Charlie Rich: A VERY SPECIAL LOVE SONG (#11)
Diana Ross: LAST TIME I SAW HIM (#14)
Rubettes: SUGAR BABY LOVE (#37)
Rufus: YOU GOT THE LOVE (#11)

Jim Stafford: WILDWOOD WEED (#7)
Stealers Wheel: STAR (#29)
Steppenwolf: STRAIGHT SHOOTIN' WOMAN (#29)
Stevie Wonder: DON'T YOU WORRY BOUT A THING (#16)
...when was the last time you heard any dozen of THESE on an Oldies station?

Happenings in the #40 market:

*The N.Y.gubernatorial debate between Gov.Mario Cuomo and a number of minor-party challengers was not on the city's major public TV & radio station last night(and pardon if this seems off-topic-radio is involved). WNED-TV joined WSKG-TV in BInghamton and WCNY-TV in Syracuse in not showing the debate because Republican challenger George Pataki and Cuomo can't agree on a format(Pataki wants a one-on-one with Cuomo,while Cuomo wants all the parties represented). WNED-AM also didn't carry the debate,though UB's public station WBFO(88.7 FM)did carry the debate,done in the studios of Albany's WMHT-TV.
Participating in the debate with Cuomo were Tom Golisano of the Independence-Fusion Party,the Libertarian Party's Robert Schulz,Larry Lane of the Socalist Workers Party and Robert Walsh of the Right-to-Life Party. Alan Chartock(of WAMC-FM in Albany and the Northeast Network of 'AMC repeaters;he also hosts a show with Cuomo-which was said to be a reason why some stations weren't flocking to air the debate)moderated.

*Pastor Fletcher Brothers,who runs Freedom Village(a home in upstate N.Y. for teenagers in trouble,which has had its share of money problems),is losing a half-hour off the hour-long live Wednesday call-in show he did on WDCX-FM(99.5). Brothers said this happened because WDCX picked up a new show that requested a 10pm weeknight time slot,and this Wednesday's show would be the last for the time being. It doesn't affect his Victory Today show,which airs twice a day on WDCX.

*On the NHL lockout:WGR(NewsRadio 55),the Sabres flagship,says it hasn't felt an impact from the labor woes. GM Jim Meltzer was quoted in last week's Business First,saying that "at this point it's been neglible, but a month from now it might be a different story.(It will,with both sides acting the way they are.) Actually,at this point,(the labor dispute)is giving the staff something to talk about besides the Buffalo Bills." (You mean 'GR doesn't talk about them _enough_? :>) PD Darryl Parks said in today's Buffalo News that 'GR has already paid its right fee for the season to the Sabres,and that most of the advertisers are staying with the station. Speaking of the Bills,the copter wars have begun again. WGR,in a promo, implied that WBEN's traffic coverage didn't help people get into Rich Stadium. Sorry,guys,but I did catch some of the Bills pregame show last Sunday,and 'BEN was running reports-relatively well-detailed. As Too Much Joy once said(in song),"That's a lie."

*About WBEN:Two ads for the station recently aired-one using its heritage as well as Bill Lacy,Kevin Keenan,Gary McNamara and Rush(with rotating satellite dishes). Smells like an out-of-town produced one. The other one shows the Bills in action,peering out of the station's logo with rock

music noting the Bills and 'BEN in the background.

Arbs soon...

Well, I just got back into the market. I decided to go and take a peek at a few Public inspection files and here is what I found:

KWTO:
FCC violations big time. They started using the calls KTWO-FM in August of 1993, and it is discovered that they didn't apply for them until January. <they used to be KKHT> Also they seem to have a problem with EBS testing...Appearantly they got caught with non-functioning EBS equipment. In a related matter, new owner Ken Meyer is paying $1.8 million dollars plus $750,000 in stock, and assumption of some debts of KWTO (not suprisingly overdrafts at 2 local banks, as well as the lease at Corporate Center).

KZBE:
Purchase price $780,000. Some people are going to get really rich off this one. Checking some files, the owners only had to pay the bank $6200 a month for payments on this station. Needless to say the partners are getting their money's worh out of it.

More to follow in Part II

>I was wondering why all the odd splits in FM frequencies in the USA and Canada...

Well,Neil it was both an historical and technical decision. It was decided back in 1945 when FM first started here in the US and the reason for it was to ensure a wide seperation between stations serving the same local area. As you must have noticed,we have a great deal more FM broadcasters than the UK or Europe does and there is a great need to protect the stations from interference.In the largest cities you might find up to 40 or more FM signals.

4388. What is "crap"

Newsgroup: rec.radio.broadcasting
Date: 1994-10-16 04:35:38 UTC
From: Jeff Gilbert <gilbert@oeonline.com>
Message-ID: <37qaiq$mmo@vixen.cso.uiuc.edu>
Source record: 37326

The debate over the size of radio station playlists--which has generally seen good points made on both sides--has taken a somewhat nasty turn with the references to some music and programming as "crap".

A couple of points that we need to remember:

1.) Just because something is popular, that doesn't mean it's bad. Most of us who have been in radio for any lenght of time shudder when we hear songs like "Feelings", "You Light Up My Life" or "Wind Beneath My Wings". But these records sold millions of copies, and are still being sung at weddings today. Somebody must have liked them!!!

2.) It's all subjective. One person's art, is another person's trash.

3.) Radio, by it's very nature, is a mass medium. If you want to hear a song for just the cost of also listening to a commercial, it has to also be a song that appeals to many others. The music is also available for other sources..you just have to buy the tape or CD.

4.) There are people coming up with new ideas. Unfortunately, most people who think they are creative, aren't...so most new ideas fail. Some need to be "fine tuned". Remember, the original oldies stations, in the late seventies and early eighties had large playlists. The format, however, didn't start to take off until the mid-to-late eighties, when stations with tighter playlists came along.

Thanks for your time,

Jeff Gilbert

European community radios seek international recognition

European community radio broadcasters have called upon the Council of Europe and its Members States to recognise the contribution which community radios make to media pluralism and freedom of expression and information and to support and assist the current and future development of the sector.

The call comes in a paper tabled by AMARC-Europe, the European section of the World Association of Community Radio Broadcasters, for the Fourth European Ministerial Conference on the Mass Media which takes place in Prague, 7 - 8 December 1994.

The paper recommends national and international anti-concentration regulations to prevent the takeover of community radio stations by commercial companies, reservation of frequencies in the FM band (87.5 to 108 MHz) and measures to assist community radio stations adjust to structural and technological change.

AMARC-Europe also urges research be undertaken into the impact of new regulatory, economic and technological developments and stresses that new digital sound broadcasting systems should be accessible, affordable and appropriate to the needs of community radio.

Community radio broadcasters fear that new digital technology could leave many broadcasters in the same position as vinyl record processing plants and are concerned that current digital sound broadcasting systems have not sufficiently addressed the needs of local and community radio services.

Further information:

AMARC-Europe, 15 Paternoster Row, Sheffield S1 2BX Tel: +44 742 795219 Fax: +44 742 798976 E-mail: amarc@gn.apc.org

Copies of the AMARC-Europe submission to the Council of Europe have been posted in English and French in the apc conference <amarc.radio> as replies to this topic. Copies are also available by post or e-mail from address above.

Join us here at HCJB for our two call-in programs scheduled
for early this coming week. On Monday, October 17 at 7:30 UTC to
the South Pacific and Europe, and then on Tuesday, October 18
(Monday evening in the Americas) at 2:00 UTC to North America.
Just dial your international access code or your international
operator, then 593-2-464-911. Curt Cole and Len Kinzel will be
your hosts. We look forward to your call.

MEDIA RELEASE

For immediate release: Thursday, October 13 - 2 pages

Contact: Stephen Dunifer, Free Radio Berkeley - (510) 644-3779, 464-3041
Luke Hiken, Attorney At Law, NLGCDC - (415) 705-6460

FCC SEEKS INJUNCTION TO
GAG MICRO POWER BROADCASTER

On Tuesday, October 10 attorneys for Stephen Dunifer and Free Radio Berkeley received notice, 80 pages worth, of the FCC's intention to seek an injunction which would bar further broadcasts by Free Radio Berkeley. Stephen Dunifer is named as the responsible party. Free Radio Berkeley is part of a rapidly growing movement which uses inexpensive and low power radio transmitters (1/2 watt to 30 watts) to reach local communities. Called micro power broadcasting, this movement sees simple, easy to use transmitters as the leaflet of the 90's. In an era of multinational controlled mass media, micro power broadcasting is the voice of the community; the voice of the people. For four years the government has been trying to squelch this movement with escalating (but uncollected) fines. Clearly, it sees broadcasting which anyone can do as a threat to centralized control of information, ideas and culture. Intimidation having failed, the FCC is abandoning its own procedures and turning to the weight of the Federal Courts to squelch this new and democratic media. It won't happen.

Last July the FCC served a notice of apparent liability on Stephen Dunifer in the amount of $20,000 for alleged illegal broadcasts. This case has been pending before an FCC administrative panel for over a year. In July 1994, a Federal Appeals Court in the District of Columbia ruled that the FCC's current fine structure was invalid. This action, at the very least, places the FCC fine process into a state of limbo until new hearings are held. Perhaps this explains why the FCC has taken this mode of attack.

Luke Hiken, attorney for Stephen Dunifer, stated, "This is a totally unprecedented move on the part of the FCC. It appears they have side-stepped their own authority regarding micro radio broadcasting. Instead, they have chosen to bring down the full weight of the Federal Court System on an ever expanding community of broadcasters who are challenging the FCC's ban on micro power broadcasting.". (continued)

"They can kiss my Bill of Rights" was Stephen Dunifer's response, who went on further to say, "Neither myself nor the movement to liberate and reclaim the airwaves from corporate control will be deterred one bit

by the FCC's latest action. It is a matter of free speech and human rights. No where in their prodigious legal tome does any aggrieved party come forth, other than the FCC, to assert damage or harm. FCC, in my opinion, stands for fostering corporate control. Free Radio Berkeley has been on vacation for the last few months in order to allow time to put together new equipment. Broadcasts will resume shortly at a new frequency, 104.1 FM, and continue until the date of the first court hearing. If an injunction is granted, there are many others taking up the banner of Free Radio Berkeley. We shall not be moved nor stymied by a justice system which means, in reality, just us corporations."

Another member of the legal defense team, Allen Hopper, put it this way, "It is utterly amazing that the FCC would seek a TRO, which is only sought for emergency situations where the threat of immediate and irreparable harm requires the intervention of the Court. The fact that the FCC has had this case pending before its own administrative panel for over a year contradicts any notion of emergency or injury. Further, their actions clearly demonstrate the fear they hold for the kind of public dialogue which takes place over micro power radio."

Luke Hiken and the National Lawyers Guild Committee on Democratic Communications are committed to defending the rights of micro broadcasters under the US Constitution and principles of international law.

At this moment, a hearing on this matter is scheduled to take place on December 2 in Federal District Court in Oakland starting at 10:30 AM. A Free Speech Solidarity Support Rally will be held outside the Oakland Federal Building prior to the hearing. On the following evening (Saturday, December 3) a public forum flying the banner of - Seizing the Space, Media and Communications Free Speech Activism - will be held in Berkeley at the Unitarian Fellowship (Cedar & Bonita). Starting time will be 8 PM. Simultaneous forums on this topic will be taking place in a number of other cities around the US, and perhaps internationally as well, on this date.

Complete media packets will be sent out upon request. Please contact Free Radio Berkeley, (510) 644-3779, (510) 464-3041.

4393. Has KMPC sunk out of sight?

I was just reading the current Arbitrons for Los Angeles in Billboard, and KMPC isn't listed at all. Does this mean its ratings are so low it falls off the scale?

I also noted with interest that KFI continues way ahead of KABC in the talk radio wars, generally speaking conservative vs liberal.

Source record: 37341

In article <37hfhh$nnf@vixen.cso.uiuc.edu>, rrb (AIRWAVES E-PUBLISHING) writes:

(on ratings and what they mean)

Sometimes we broadcasters wonder about it too, but I'll try to give you a broadcaster's eye view of what ratings are all about.

Basically, Arbitron will send out thousands of listener diaries in a market, in hopes of getting back at least 1000 for each week of the rating period, which in a top-50 market is a 12-week survey. That's considered a statistically valid sampling of the overall market. They will also hope to get several hundred diaries representing each of the major demographic categories.

They'll ask the diary-recipient what he/she listened to each waking hour, and also ask information about age, sex, race and rough income level of each person responding as well. Then they gather up all the information and tabulate it several ways. First they crank out an overall ranking of total station shares among all persons 12 years of age and older...those are the ratings you see printed in the paper. After that, they break down the ratings by age, sex, ethnic groups, and income level...and further break it down by daypart. Those more refined ratings are what a station sells.

It's a very imperfect process, and many stations see wide swings from survey to survey as a result. You really have to average out several books to spot a significant trend...not too tough in a larger market like ours where ratings periods literally meld seamlessly one into the next, and stations are being rated 49 weeks a year (with short breaks around the 4th of July and the Christmas/New Year's holidays). It's much tougher in a smaller market where the ratings happen once or twice a year.

: >postings are leaking into it from alt.folklore.urban; some of the
: >off-topic threads of note are:

: snip

: It is happening here as well (mcs.com in Chicago).

Also here at tyrell.net.

I looked at several of the posts, and one was from a poster sincerely
apologizing that his a.f.u post had, without his knowledge, been
crossposted into r.r.s.

I think this is another one of those flame wars, propagated by an
individual or individuals who act like, to use the technical term, jerks
with too much time on their hands.

This is the type of garbage that makes it hard for those of us who are
trying to sell our companies on the advantages of Internet connectivity.
One incident like this may unravel months of hard work that someone has
gone through to get his or her company connected.

<addition to my post, just for AIRWAVES readers>

I know about this from experience; I have been working on an Internet
connectivity proposal for my employer for ten months and every time, it
gets shot down over concerns about viruses, security, flame wars,
inappropriate use, you name it. This is even though another area of our
company has identified specific business uses, is working with a major
connectivity vendor, and wants to get connected.

Of course, it only takes one person to stink up an elevator by breaking
wind....

Funny you should mention J&R. I shop there a lot, but the SRF-42 experience caused me to lose respect for their sales people. [well, at least one of them]

For months last winter I checked J&R for the impending arrival of the SRF-42. The salespeople told me it didn't exist, even when I showed them the listing in the Sony catalog!

Finally I got one at an appliance store in NJ. In early March I was in J&R with some out-of-town friends, and one of them wanted an SRF-42. Here is my recollection of the conversation:

ME: You you have the Sony SRF-42 yet?

J&R: What's that?

ME: The AM stero pocket radio that Sony introduced this winter.

J&R: There is no such thing. It doesn't exist.

ME: [taking SRF-42 out of my jacket pocket] You mean THIS radio doesn't exist?

J&R: Where did you get that?

ME: Topp's Appliance City, in Union NJ.

J&R: The radio you are holding is a special model manufactured just for them. If you want anther one, buy it there.

A month later, the SRF-42 magically appeared in the showcase. I know know which salesman to avoid at J&R.

How many stations could even think about doing this promo, heard
today on WDAF(AM)?
Voice: "50"
<followed by brief excerpt of morning host David Lawrence, sounding
almost but not quite as though it were miked from a speaker>
Voice again: "100"
<another similar excerpt of late morning announcer>
Yet again: "200"
<excerpt of midday programming>
Finally: "300...miles!"
<excerpt of afternoon host Phil Young>
Voice: "Try THAT on an FM station! Wherever you go in mid-America,
take WDAF 61 Country with you."
The reference, of course, is to WDAF's 5,000-watt fulltime non-directional
signal at 610 kHz. I thought it was a creative way of playing on one of
the station's obvious strengths.
****
Some St. Louis items, from the St. Louis Journalism Review (8380 Olive
Blvd., 63132, $25/year):
* 70s oldies station KIHT(FM) is coming on strong in the Arbitrends,
including a #1 ranking in 25-54 in afternoon drive. The SJR issue was
published just before the summer Arbitron survey was released.
* The SJR confirmed something I've noticed about CBS newscasts on
clear-channel O&O KMOX: they're clipping them off after three minutes.
The station's PD justifies cutting the network newscasts in half by saying
the move cuts out filler stories and allows more time for local
news. But I can't tell that the 'MOX is using the time for more news,
at least in the evenings.
* Discarded KTVI(TV) anchor and mainstay Don Marsh will be filling in
for KMOX morning host Bill Wilkerson during October. Marsh was unceremoniously
dumped by KTVI last month after 23 years with the station. KTVI will
switch from ABC to Fox affiliation next summer.
* The SJR reports major changes in the works at adult-alternative WFXB(FM),
including a move toward more mainstream album rock. SJR radio columnist
Larry Hoffman wrote that, "most important for this station is getting
out from under the strong sense that it is an orphan operation," in part
because of its leased status and in part because it is a 50,000-watt
signal in a market that mostly has 100,000-watters.
****
Minor Kansas City update: oldies-station-to-be KCXL(AM) and Topeka
rimshot KZTO(FM), both planning to return to the air this autumn, remain
silent so far.

I'd like to commend Jeff Gilbert from WWJ Radio, Detroit for his comments in a recent issue. His comments about radio:

"Just because something is popular, that doesn't mean it's bad."

"It's all subjective. One person's art, is another person's trash."

"Radio, by it's very nature, is a mass medium."

I agree. We in the business - over time- seem to adopt the attitude that WE are the supreme judge of good programming. If that were the case, EVERY radio station would be a rousing success. WE are NOT the best judges of programming because so MANY stations are STRUGGLING in the ratings! If we, as broadcasters, programmers, PDs and consultants would STOP listening to our over-fed professional egos and start REALLY listening to the people who tune in, we might change the nature of success and failure in radio.

Certainly, what was considered "good" or "bad" 20 years ago, will not share the same judgement today. What is viewed as viable today might be considered trash tomorrow.

Taste is in the mouth of the beholder.

Radio people need to listen as hard as they wish their listeners would! Personally, I think a lot of our problems eminate from the vampires of our business: consultants!

I'd like to quote myself from issue #5 of Radio 2000 (tm):

Is it me or should most radio CONSULTANTS be forced to date Lorena Bobbit? (For those of you outside the U.S., Lorena Bobbit cut her husband's penis off while he was asleep!) Actually, most of these guys act like they don't have any manhood ANYWAY. I mean, they don't use their guts anymore and seldom make decisions based on how they feel inside. They sit there and pour over flawed research from flakey focus groups. These guys suck the life out of the industry. I want them all shot at sunrise. I want Clinton to send our troops to invade their offices after Haiti! I've been in radio a while....and I've NEVER met two consultants who agree! NEVER! NADA! I mean, GEEZ: If there were any constant truths to this business, I guess SOMEWHERE along the way, these guys would be meeting on common ground. But, that's not the case. They don't meet on common ground. They don't agree on anything. They only thing they do is collect big FAT checks. All this leads me to believe they make it up as they go. As a matter of fact, I've dealt with consultants who I KNOW MADE IT UP AS THEY WENT ALONG. How else can you explain why a consultant will keep changing the game plan? It's like "Well that didn't work....so let's try this." Well, DUH! I could do that! You could do that! A FREAKIN' RHESUS MONKEY COULD DO THAT!! If

General Managers and Program Directors would have a bit more confidence in their own talents and knowledge, maybe they wouldn't have to spend so much dough on a bunch of charlatans who parade around like the Lord's gift to broadcasting. Sure, it's good to have a third person listen to your station everyone once-in-a-while to help you hear the things you're not...but that service is NOT worth $30,000 to $100,000-a-year!

Another thing I'd like to see change: Can we stop lying to our listeners? If you say you play more music, PLAY MORE DAMN MUSIC! If you say you play more variety, PLAY MORE DAMN VARIETY. When are we going to stop pandering to the antiquated concept that our listeners really are stupid? They are NOT! When you lie to them, you piss them off! They leave! DUH! Time to hire a consultant to find out why our ratings are dropping! Yeah, right. We need to stop lying to the listeners and stop listening to the liars!

Please don't confuse my personal philosophy on a subject with statements
I make about how I think the world is. There are a lot of practices in
broadcasting I disagree with, but nothing I say will change them.

: All these arguments about the Fairness Doctrine having a "chilling effect"
: on issue-oriented talk radio is a crock.

In the past a station had to provide balance within its schedule. Today
it's assumed the marketplace will do this. The result is that stations
have less respect for opinions they disagree with and talkshows become
free-for-alls. You mentioned Joe Pyne, but his radio talkshow was much
more balanced than the TV show. The TV show was played for laughs with
space aliens, and other creatures appearing as guests. Still, his show
was balanced by other Metromedia productions such as Paul Coates'
fascinating interviews.

I see you work in radio. Did you happen to work in radio management when the "Fairness Doctrine" was in full swing? I did. Some images have stuck with me over the years.

I recall endless parades of quasi-political groups demanding "equal time" on stations. To answer what? Anything they could trump up. Naturally, most of them were screened out, but it cost the stations plenty for the personnel required to do that. And then there was "license renewal time". Stations had the double whammy of being forced to provide certain minimums of "public service", and then were forced to deal with the "equal time" fallout. Licenses were challenged on the flimsiest of grounds, usually centered around supposed "Fairness Doctrine" issues.

Again, I ask the question: what is the point? What groups are not being heard? If I were a Libertarian, I might be able to make a reasonable case that my points of view were not being presented, but I suspect that is not a concern to you. In fact, most truly minor political organizations are usually left out in the cold, but that is still not justification for dictating to broadcasters what they will present.

If I owned a station now (as I did back then), a new "Fairness Doctrine" would probably convince me to get out of the business, even with a music format. In my opinion, anyone advocating a return to that nonsense has either forgotten or was not really in touch with that era of broadcasting.

It is odd that most, if not all, of those advocating this regression are either connected with or supporters of the current party in power. Isn't control of the government, and the public by means of the government, enough?

>GRAFFITI or AMERICAN HOT WAX, or even GOOD MORNING VIETNAM, made about
>programming consultants...

We're comparing apples and oranges here. Wolfman's and Freed's shows were time-brokered. As long as management got paid, it mattered not whether they played Smiley Lewis or the Singing Nun. There are plenty of failing AMs around today I could broker a few hours on and play whatever I feel like. Some people would like it, some would not.

I agree that radio today is stale and boring, but 500 song playlists are not the reason. The great legendary rockers of the 60's...WABC, WKBW, WMEX, etc probably didn't play 500 songs, either. What makes radio today boring is the liner cards, cold segues, and sweepers. You know, the 10-in-a-row-and-a-better-mix-so-you-can-listen-longer-at-work mentality. Unfortunately, the public has been taught that jock talk is bad, bad, bad...lotsa music without interruptions is desirable, that today even if a station tried to do personality radio it would bomb miserably. As has been said before...radio sounds the way it does because that's what works. :-(

: audio.

I listen mostly to public radio talk (WAMU) or news (WTOP). I listen to music only one night a week. That is the night on which WAMU broadcasts Hot Jazz Saturday Night, a program focusing on traditional jazz and swing.

I don't listen to music on the radio except for Hot Jazz Saturday Night. The other jazz stations all play "modern" jazz. I am willing to listen to some of that if I can sometimes hear my kind of jazz, but "modern" is all they play.

Radio stations play what the big record companies want them to play. The big record companies don't know anything about traditional jazz. Neither do the radio format people. I am talking about the kind of jazz represented in history by King Oliver, Louis Armstrong, Fats Waller, Jelly Roll Morton, Eddie Condon, the Yerba Buena Jazz Band, and Turk Murphy. It is currently represented by Jim Cullum, James Dapogny, and a number of our local DC area bands such as Buck Creek, the Federal Jazz Commission, The Last Chance Jazz Band, Doc Scantlin, Hot Jazz, Hot Mustard, and others. It includes the hot dance music of the 20's, 30's

and 40's, Dixieland, ragtime, swing, boogie-woogie, and even the cakewalk music of the 1890's. (The media knows about cakewalk music. Whenever they want to set a scene in the 1890's they play "At a Georgia Camp Meeting".)

I think the broadcasting world is overlooking a potential market. I have seen young people come to traditional jazz band performances and get into the music. It is toe-tapping, finger-snapping dance music. The fast tunes are hot and the slow tunes are sensuous. It is definitely NOT "elevator music". The big-band stations treat their music as a museum piece, only playing stuff that was recorded in the 1940's. They ignore the band-within-a-band stuff and the current jazz bands playing the same style. A lot of people tell me they like traditional jazz, but don't know where they can hear it.

I can hear it anytime I want. If I want music, I carry my own tapes. In most cases, I bought them directly from the band. Or I play my tapes of Hot Jazz Saturday Night.

> sounded like that, but I didn't mean that. Just wanted to clear that up.
>
> <....>

First, the posting of the original article was an effort to try to address a *number* of confused/disappointed JAZZY 100 fans who have contacted either the Committee to Bring Back JAZZY 100 or Bob Linden asking whether or not either party was responsible for or associated with the change in format at WCXR 105.9 FM. Since a number of former JAZZY listeners have expressed their dissatisfaction/disapproval of the new format to us and, were concerned that their support of the effort to get back the JAZZY 100 format, launched by the Committee to Bring Back JAZZY 100 over 15 months ago had resulted in this format change, the Committee felt it necessary to get the word out regarding it's involvement (or rather lack thereof) in this matter. Therefore, the original posting was *not* in any way a direct response to any previous posting regarding this issue. (-- I apologize for any cause for alarm, Mike... 8-))

> -What is to say that the current format at WCXR is not something
> preceeding a true "Cool Jazz" type format like Jazzy 100 had? If, in
> fact, WCXR must be sold by Viacom, what is to say that the formers of

> Jazz". I think the current format would be a good seque into the old
> Jazzy 100's format.

This is a very strong possibility. I recommend that you keep watching the net for an update re: this or pick up you next issue of Bob Linden's JAZZY Music Scene, available at all Kemp Mill and Wiz stores.

> setting themselves up for a deflamation lawsuit, but who knows).

Mr Watts,

First: Let me say that I'm afraid that your comment regarding the misdirection of Jack's requests and questions is in error. Please read responses to Jacks requests and questions below.

Second: The Committee to Bring Back Jazzy 100 is *not* a front for any organization or groups of people. It *is* however an organization that was established a little over a year ago whose goal is to bring the TRUE JAZZY 100 format back to the Washington D.C. Area. This Committee is made up of *volunteers*, who are themselves former JAZZY listeners, that have worked for the the past 15 months to let the over 300,000 former JAZZY 100 listenersknow that there are people hard at work to get back the beloved JAZZY 100 format. This Committee is *NOT* made up of any former WJZE-JAZZY 100 employees and does not claim to represent these individuals in anyway. And, although Bob Linden's name may appear in posted articles form the Committee from time to time, I would like to make it perfectly clear that Mr. Linden is *NOT*, and has never been a member of this Committee. The Committee does, however enjoy the fact that Mr. Linden is working towards the same goal of getting the JAZZY 100 format back on the air. And, I am sure, Mr. Linden appreciates having a number of former JAZZY 100 fans support him in his efforts as well.

Lastly: The point of the posting was simply to let former JAZZY 100 listeners know that WCXR's change in format was a move made by its management *primarily* to solve *its* problem re: poor ratings (Washington Post, "Radio" column, Oct, 11th 1994) and not necessarily *the* overall *problem* of a lack of progressive jazz in the Washington, D.C. metro area, which is the primary concern of the Committee to Bring Back JAZZY 100.

I hope the above information has clarified a few things re: the Committee to Bring Back JAZZY 100 and its efforts. If you have any further questions regarding the Committee, please send your questions to our internet news coordinator at goldberg@oasys.dt.navy.mil . -- Thank you for your comments.

> : This new format can best
> : be described as 'EASY LISTENING' and NOT "JAZZY". What you will *NOT* be

Hi Jack,

I am not sure how often you listened to JAZZY 100 when it was on the
air but, the JAZZY 100 format was rather significantly than what is being
heard now on WCXR, both in music selection and overall programming approach.
In brief, JAZZY 100 had a more 'progressive' approach to its music
programming which meant that you would hear contemporary jazz along
with hard jazz-fusion, afro-latin and carribean jazz music, as well as
some *appropriate* adult contemporary and R&B tunes. What's most
important was that JAZZY *always* kept up with what was on the
cutting edge of progressive jazz music and therefore, always
kept the listener up-to-date musically with what was going on
in the progressive-jazz industry. Other differences include
local music-oriented and community-oriented events that the station
sponsored which kept the listener in touch with what was going on
around them.

> I do not know who Bob Linden is...if he is not an artist
> being played on the station I really don't know what to think of him. Is

Bob Linden was the former program director of WJZE JAZZY 100. What I
can say is that when Bob was PD at JAZZY he "lived for" (his words)
chats with listeners concerning the music they wanted to hear on
the station -- (yes, he spoke with people 'personally'!) and
therefore was able to be very responsive to the needs and desires
of the vast and diverse JAZZY listening audience. An example of
this is Bob's response to putting more carribean-jazz music
on the air which was met with an overwhelmingly postive response by
listeners. So, when Bob Linden does return to radio in our air,
rest assured you can call him up personally and tell him what
you'd like on the air! 8-).

> :
> : *** AGAIN, THE NEW FORMAT IS A *TEMPORARY* MEASURE TO TRY TO **

>
> *Are you saying this station will not be the same format in a few weeks and
> that I may as well erase this station's preset from my radio? I only have

Well, no one can say when the station will be sold, however, I think it is
a fair to say that it would probably not be for several months. The
point in making the reference of the sale of the station was to inform
former JAZZY 100 listeners, who are trying to get some relief from the

lack of contemporary jazz in this area, (be it 'Easy Listening' or 'JAZZY'),
by tuning in to this new format, that this should not be considered either
a partial or complete remedy for their woes as they may end up in
the same condition as they were over a year ago when JAZZY was taken
off the air. Sorry about this, Jack....

>
> :The GOOD NEWS is that the Committee to Bring Back JAZZY 100 and Bob Linden
> :are still hard at work to acquire the next "JAZZY 100" radio station and to

Thank you! The Committee is working hard to make it 'work out' too!

> By the way, could you people play less music that relys so much on sax solos
> and tired DX-7 timbres and more songs that 'push the envelope' please?

Well Jack, when the REAL JAZZY comes back you *will* hear more music
with an 'edge' so-to-speak (if I understand you correctly). So,
just keep your ears peeled for 'JAZZY' ... 8-)

> *PS
> As I write this response I'm listening to the 'Nine Inch Nails' CD "The
> Downward Spiral" at an unhealthy volume...I like all music. I would really
> like to talk to someone at 105.9 about what I've said above, reason being

Well Jack, I can't say much re: WCXR but, I can say that when JAZZY comes
back it will most assuredly have an e-mail address. For now, however,
please feel free to send your questions and/or comments to our
internet new coordinator at: goldberg@oasys.dt.navy.mil

Y'know, all the whining I hear about the realities of commercial radio seems kinda silly and pointless. But I gotta admit, I'm upset by this trend toward conformity and "playing it safe" on the part of non-commercial broadcasters. This isn't a market driven trend, this is top-heavy bureaucracy... inept overpaid administrators (who usually *aren't* radio people) wresting programming control from the local community. Arrrgh!

> Trouble is, of course, sheep often get
> sheared or turned into mutton chops when someone finally comes
> along with something new that captures people's imagination.

That's true. But the folks who are *leading* the commercial radio industry are not sheep, rather, in many cases, highly competitive veteran broadcasters who have a passionate love for the medium. These folks play the hits because it works. Pretty simple. I don't think there's anything wrong with that.

KFMB-AM 3.8 3.5 Full Service

XHRM (The Flash) 3.0 3.1 Modern
KFI 3.3 3.0 Talk/News
KPBS- FM 2.1 2.5 NPR/Public
KOGO .6 1.2 Talk/News

Mornings: San Diego Market:

KKLQ 7.7 (down from 10.6!) Top 40/CHR
KSON 7.3 Country
KSDO 7.2 Talk/News
KFMB 4.6 Hudson & Baurer Mornings - Comedy/News
KIOZ 4.1 [new morning show; up from 2.1] Hard Rock

Morning show supporters: Rock 102 (KIOZ) collected more than 500 bras in their "Cups for Commies" campaign. Giving their -- ahh -- support included Dr. Joyce Brothers, Phyillis Diller, Florence Henderson, and Carol LeBeau. The Escondido TA said the morning team were going to send them to Russia, after reports of bras being hard to find in the republic.

In Los Angeles, KFI's John Kobylt and Ken Chiampou captured their biggest slice of the ratings pie. Gary Lycan reported in the Orange County Register that the team has a 3.9 rating share. That's more than the audience of rival talkers at CapCities/ABC KABC (2.0) and KMPC (1.6) -- with a combined 3.6!

Also noted is that Kobylt and Chiampou's ratings for the past 12-months are 3.3. Tom Leykis' average at KFI was 2.7. As reported; and publicly stated by various skeptics, the New Jersey pair was thought to never last. As Lycan ended his column, "The ratings prove them wrong."

Hall of Fame. The National Association of Broadcasters has inducted the following broadcasters into the hall of fame:

Robert W. Morgan, Gary Owens, Larry King, Art Linkletter, the McGuire Sisters, and former president, and WHO announcer, Ronald Reagan. Presenting the awards include Jane Fonda, Jonathan Winters, Monty Hall and Don Imus. A lifetime achievement award will be presented to Ted Turner.

Also noted on Monday morning's Imus in the Morning, he -- and the rest of the crew -- received the Marconi award for syndication of the year. This was his first year up for the award.

A World Media Expo roundup will be forthcoming.

For a complete list of San Diego County broadcasters including the radio w/pictures, please e-mail me.

It was actually Labor Day Weekend 1990, or about 4 years ago, that the format change took place. I was the last morning man Q107 had, and actually made a scheduled appearance at a Pearle Vision Centre the next day, *after* the new lineup had been announced.

Lorrin is one of the most polished, methodical programmers around...he's the right guy for the job.

If they reinstated the fairness doctrine, faux-Christian hate talk would
either leave the airwaves completely, or these stations would be forced
to let people like me advocate tolerance of gay human beings and abortion
rights and point out that schoolchildren have 19 hours a day when they
are not in school during which they may pray as much as they wish.
Either way reasonable thought and common sense would score a big victory.

When I was in High school in the late 60s there was a DJ that I enjoyed listening to on KVIL. Before that he had worked for KBOX.
I know that for a while he worked in Top-40 radio at WNOE, New Orleans. I also remember him briefly being on KLIF 1190 when they were pop music.
Anyway, I was wondering whether anyone knows whether he is still in Broadcasting? If so what station/operation and in what position?
If he is announcing still I would like to hear him on cassette if someone is willing to send me an aircheck.

4420. CIUT looking for new manager

I was wondering whether anyone knows where I might be able to get a tape of
John R. doing his show/s on WLAC. I would like to have this since I was a big
fan of the John R. I understand that there is a book that has been published
as well on his life, if
anyone has the information I would appreciate having it.

<Almighty dollar rules..it didn't use to be that way>

I remember those days, too, Sashi.

What happened?

Back then we thought WE were going to grow up to run things and we'd keep improving on the system. We'd evolve and great things would happen.

We couldn't foresee the day when a handful of mighty conglomerates would control the media universe, swallowing up everything in their paths, spitting out peoples jobs and lives like so many splinters.

But eventually the pendulum WILL swing back the other way, monopolies will crumble, and the opportunity for change and a new way of doing things will present itself once again.

Hang in there kid!

I would like to find out, just for grins, what your basis for the higher ratings quoted above are. What are your methods for determining who is listening? When I was working in public radio, we were constantly grappling with the mystery of who was listening. We were a 300 watt station in Richmond, IN., and therefore wouldn't have made the Arbitrons even if public radio stations were included in them.

The only thing we were able to base programming decisions on was direct listener response, and at one point a telephone survey of people at random in the town and of our members. We got positive feedback all the way around, but I know that in total number of listeners the automated A/C station down the road must have blown us outta the water (sadly).

Thanks,
Alan

articles@airwaves.chi.il.us
Organization: I need to organize my socks!

Subject: World Media Expo
Oct. 17, 1994

I've seen the future. It's full of ones and zeros.

One theme at all of the vendors at the NAB's World Media Expo last week was: digital. Everything from transmitters, to radios, to editing -- to antennas were digital. What ever flavor the U.S. FCC takes in the digital broadcast world, a majority of stations will make the leap into the digital ream.

A popular booth was USA's Digital. That's the same company that used present analog signals to broadcast digital "underneath." At present, there wouldn't be any "change" to broadcast standards, the flyer claims, or no long, drawn out auction for a broadcast spectrum. USA has been testing on WBBM-FM, Chicago for two months and haven't received any formal complaint from the public or other broadcasters.

As a twenty-year broadcast veteran, I hated editing in the radio station -- often opting using a television studio, using two U-matics as my base -- and did electronic cuts. I found this less messy than cutting and splicing audio tape together. But, as the new century only five years away, a magnetic tape-less edit bay can happen -- today. Further enhancements on the home personal computer or the Apple Macintosh with an efficient software engine, coupled with increased disk space has made slicing tape a thing of the past. With current hard-disk spaces up to 9 gigabyte (Seagate), the only limiting factor has been the operating system to "read" that much. Most digital editing stations I saw utilized the two or four megabyte SCSI drive -- and some opting for a choice between hard-drive or optical. I'm encouraged that these editing tanks can have up to 32-channels! It depends on how many "bells and whistles" the end user wants. From what I could see, a two mega-byte hard drive -- either hard disk or glass medium -- could store up to four hours of CD-quality material.

The feeling I got from various vendors was that within ten to fifteen years, the last analog station will have signed off -- because the jump to full digital radio is coming down the road. That's hard to believe -- but then, it wasn't that long ago when horse and buggies ruled the road.

While I have not mentioned any vendors name -- except USA digital
-- I would privately e-mail to anyone who asks various companies
on the digital editing stations.

Thats right....its almost that time of year again. October 30, 1938...War of the Worlds was broadcast, creating an uproar and scaring the living crap out of everyone (ever notice there is a town in Penn. called Mars?).... and come this time of year, I have a major question/favor to ask any of you.

I am writing a paper on the War of the Worlds and its impact. I am focusing toward the psychology of radio, the amount of persuasion it can have over people. What I am looking for is information. If you know of any good books that can be found in libraries or anything on the net regarding this particular drama, or the psychology of radio, please let me know. I tried searching the FCC site, looking for instances recently where jocks have played tricks on people, but have found nothing.

If you can help me out, I would greatly appreciate it. Or, it you can point me in the right direction, just the same. Thanks in advance, and watch out for the aliens...

4427. Limbuaguh's reign of Error

Newsgroup: rec.radio.broadcasting
Date: 1994-10-18 11:03:09 UTC
From: fair@igc.org
Message-ID: <380a1d$olu@vixen.cso.uiuc.edu>
Source record: 37237

The following is FAIR's report on Rush Limbaugh from the
July/August issue of FAIR's magazine, EXTRA!

THE WAY THINGS AREN'T:
RUSH LIMBAUGH DEBATES REALITY

I do not lie on this program. And I do not make things up for the advancement of my cause. And if I find that I have been mistaken or am in error then I proclaim it generally at the top of--beginning of a program--or as loudly as I can."
--Rush Limbaugh, (Radio show, 8/30/93)

"Most of us here in the media are what I consider infotainers.... Rush Limbaugh is what I call a disinfotainer. He entertains by spreading disinformation."
--Al Franken at the White House Correspondents' Dinner (4/23/94)

Rush Limbaugh has gotten a lot of mileage out of his claim that volcanoes do more harm to the ozone layer than human-produced chemicals. He featured it in his best-selling book, The Way Things Ought to Be (paperback edition pp. 155-157): "Mount Pinatubo in the Philippines spewed forth more than a thousand times the amount of ozone-depleting chemicals in one eruption than all the fluorocarbons manufactured by wicked, diabolical and insensitive corporations in history.... Mankind can't possibly equal the output of even one eruption from Pinatubo, much less 4 billion years' worth of them, so how can we destroy ozone?" Limbaugh calls concern about the ozone layer: "balderdash. Poppycock." The only people who worry about it are "environmental wackos," "dunderheaded alarmists and prophets of doom."

Syndicated columnist Thomas Sowell (New York Post, 1/14/94) used the volcano theory as Exhibit A to illustrate Limbaugh's "very well-informed and savvy understanding of the political issues of our time." "While far more pretentious people have been joining the chorus of hysteria over 'global warming,'" Sowell wrote, "Limbaugh pointed out in his [first] book that one of the high readings of greenhouse gases in the atmosphere came right after a volcanic eruption--and volcanoes can put more gases into the atmosphere than the entire human race." The alert reader will notice that Sowell has mixed up global warming and the ozone layer, two different problems. Still, Sowell concluded of Limbaugh, "It is obvious that the man has done his homework--and done it well."

Ted Koppel must have thought so, too, when he invited Limbaugh to be on Nightline (2/4/92) as an environmental "expert," opposite

then-Sen. Al Gore. "If you listen to what Senator Gore said," Limbaugh proclaimed, "it is man-made products which are causing the ozone depletion, yet Mount Pinatubo has put 570 times the amount of chlorine into the atmosphere in one eruption than all of man-made chlorofluorocarbons in one year."

On his radio show, his syndicated TV show, and in two best-selling books, Limbaugh has advanced the idea that volcanoes are the real ozone culprits. This theory, like so many of Limbaugh's claims, has only one problem: Limbaugh doesn't know what he's talking about.

A MOUNTAIN OF DISTORTION

"Chlorine from natural sources is soluble, and so it gets rained out of the lower atmosphere," the journal Science explained (6/11/93). "CFCs, in contrast, are insoluble and inert and thus make it to the stratosphere to release their chlorine."

Science also noted that chlorine found in the stratosphere--where it can eat away at Earth's protective ozone layer--is always found with other byproducts of CFCs, and not with the byproducts of natural chlorine sources.

"Ozone depletion is real, as certain as Neil Armstrong's landing on the moon," Dr. Sherwood Rowland, an atmospheric chemist at the University of California at Irvine, told EXTRA!. "Natural causes of ozone depletion are not significant."

But Limbaugh didn't rely on atmospheric scientists for his information about the ozone layer--he dismissed them as the "agenda-oriented scientific community." Instead, he turned to Dixy Lee Ray, a former Washington State governor and Atomic Energy Commission chair, who wrote Trashing the Planet--"the most footnoted, documented book I have ever read," Limbaugh says.

If you check Ray's footnotes, you'll find that the main source for the volcano theory is Rogelio Maduro, the associate editor of 21st Century Science & Technology, a magazine published by the Lyndon LaRouche network. Maduro is evidently not part of the "agenda-oriented scientific community"--even though he does have a bachelor's degree in geology.

The volcano theorists can't even keep their stories straight. In his book, Limbaugh claims that the 1991 Pinatubo eruption put 1000 times as much chlorine into the atmosphere as industry has EVER produced through CFCs; yet on Nightline, Pinatubo is alleged to have produced 570 times the equivalent of ONE YEAR'S worth of CFCs. Both can't be right. It turns out neither are.

The figure 570 apparently derives from Ray's book--but she said it was Mount Augustine, an Alaskan volcano that erupted in 1976, that put out 570 times as much chlorine as one year's worth of CFCs. Ray's source is a 1980 Science magazine article--but that piece was

actually talking about the chlorine produced by a gigantic eruption that occurred 700,000 years ago in California (Science, 6/11/93).

UNCHALLENGED DEMAGOGUERY

This kind of sloppiness, ignorance and/or fabrication is run of the mill in Limbaugh's commentary, both broadcast and print. From dioxin to Whitewater, from Rodney King to Reaganomics, Rush Limbaugh has a finely honed ability to twist and distort reality.

Limbaugh's facts are almost never challenged on his programs. A hostile caller hardly ever gets through the screeners on his radio show, and his TV show is just him doing a monologue in front of his cheering audience. No one in the history of national television has had such a political platform. He has almost never corrected anything he's said--although he did apologize once to the aerosol industry for implying that spray cans still had CFCs in them. (CFCs were removed in 1978.)

Limbaugh's chronic inaccuracy, and his lack of accountability, wouldn't be such a problem if Limbaugh were just a cranky entertainer, like Howard Stern. But Limbaugh is taken seriously by "serious" media--in addition to Nightline, he's been an "expert" on such chat shows as Charlie Rose and Meet the Press. The New York Times (10/15/92) and Newsweek (1/24/94) have published his writings. A U.S. News & World Report piece (8/16/93) by Steven Roberts declared, "The information Mr. Limbaugh provides is generally accurate."

He's also taken seriously as a political figure. A National Review cover story (9/6/93) declared him the "Leader of the Opposition." Supreme Court Justice Clarence Thomas,who recently officiated at Limbaugh's wedding, says he tapes Limbaugh's radio show and listens to it as he works out (USA Today, 5/13/94).

FAIR is publishing a compilation of some of Limbaugh's more obvious whoppers in order to convince journalists and political leaders alike that when Limbaugh says, "I'm not making this up, folks," it's time to duck and cover.

Journalists, in particular, have an obligation to challenge Limbaugh's brand of hysteria. Someone who has amassed a powerful political following through the regular use of half-truth and distortion is begging for tough media scrutiny. In 1954, Edward R. Murrow confronted another demagogue who had a similar allergy to facts and documentation. Today's TV networks don't ask themselves how they can challenge Limbaugh's reign of error--but how they can profit from him. CBS News, the platform from which Murrow denounced Joe McCarthy, has been seeking to hire Limbaugh as a political commentator.

Real democracy is built on debate. But Limbaugh has little use for debates; he has forged a media empire largely on unchallenged

monologues. The following confrontation--Limbaugh vs. Reality--is an attempt at stimulating (or at least simulating) a debate.

The list of fallacies compiled here is not exhaustive. It was assembled from easily available sources--Limbaugh's books, The Way Things Ought to Be and See, I Told You So; transcripts of several weeks' worth of his TV show; gleanings from as much of his radio show as we could take; and other published evaluations of Limbaugh's accuracy. (There's a publication, the Flush Rush Quarterly (FRQ), largely devoted to chronicling Limbaugh's falsehoods, and a book, The Bum's Rush by Don Trent Jacobs, that debunks his environmental rhetoric.) As Josh Shenk showed in the New Republic ("Limbaugh's Lies," 5/23/94), scrutinizing the TV show for a month results in errors too numerous to count.

"There's a pathology here, folks," is a phrase Limbaugh likes to use when discussing President Clinton's alleged inability to tell the truth. A psychiatrist might agree--and label it projection.

LIMBAUGH VS. REALITY
BOGUS ECONOMICS

LIMBAUGH: On California contractor C.C. Myers completing repairs 74 days early on the earthquake-damaged Santa Monica Freeway: "There was one key element that made this happen. One key thing: The governor of California declared the [freeway] a disaster area and by so doing eliminated the need for competitive bids.... Government got the hell out of the way." (TV show, 4/13/94) "They gave this guy [Myers] the job without having to go through the rigmarole...of giving 25 percent of the job to a minority-owned business and 25 percent to a woman." (TV show, 4/15/94)

REALITY: There was competitive bidding: Myers beat four other contractors for the job. Affirmative action rules applied: At least 40 percent of the subcontracts went to minority or women-owned firms. Far from getting out of the way, dozens of state employees were on the job 24 hours a day. Furthermore, the federal government picked up the tab for the whole job (L.A. Times, 5/1/94).

LIMBAUGH: "Banks take the risks in issuing student loans and they are entitled to the profits." (Radio show, quoted in FRQ, Summer/93)

REALITY: Banks take no risks in issuing student loans, which are federally insured.

LIMBAUGH: "Don't let the liberals deceive you into believing that a decade of sustained growth without inflation in America [in the '80s] resulted in a bigger gap between the haves and the have-nots. Figures compiled by the Congressional Budget Office dispel that myth." (Ought to Be, p. 70)

REALITY: CBO figures do nothing of the sort. Its numbers for after-tax incomes show that in 1980, the richest fifth of our country had eight times the income of the poorest fifth. By 1989, the ratio was more than 20 to one.

LIMBAUGH: Comparing the 1950s with the present: "And I might point out that poverty and economic disparities between the lower and upper classes were greater during the former period." (Told You So, p. 84)

REALITY: Income inequality, as measured by the U.S. Census Bureau, fell from the 1940s to the late 1960s, and then began rising. Inequality surpassed the 1950 level in 1982 and rose steadily to all-time highs in 1992. (Census Bureau's "Money Income of Households, Families and Persons in the United States")

LIMBAUGH: "Oh, how they relished blaming Reagan administration policies, including the mythical reductions in HUD's budget for public housing, for creating all of the homeless! Budget cuts? There were no budget cuts! The budget figures show that actual construction of public housing INCREASED during the Reagan years." (Ought to Be, p. 242-243)

REALITY: In 1980, 20,900 low-income public housing units were under construction; in 1988, 9,700, a decline of 54 percent (Statistical Abstracts of the U.S.).In terms of 1993 dollars, the HUD budget for the construction of new public housing was slashed from $6.3 billion in 1980 to $683 million in 1988. "We're getting out of the housing business. Period," a Reagan HUD official declared in 1985.

LIMBAUGH: "The poorest people in America are better off than the mainstream families of Europe." (Radio show, quoted in FRQ, Spring/93)

REALITY: Huh? The average cash income of the poorest 20 percent of Americans is $5,226; the average cash income of four major European nations--Germany, France, United Kingdom and Italy--is $19,708.

LIMBAUGH: "There's no such thing as an implied contract." (Radio show, quoted in FRQ, Spring/93)

REALITY: Every first year law student knows there is.

LIMBAUGH: "Ladies and gentlemen, we now know why there is this institutional opposition to low tax rates in the liberal wing of the Democratic Party. It's because [low tax rates] are biblical in nature and in root. When you can trace the lowering of tax rates on grain from 90 percent to 20 percent giving seven fat years during the days of Pharaoh in Egypt, why then you are tracing the roots of lower taxes and rising prosperity to religion.... You can trace individual prosperity, economic growth back to the Bible, the Old Testament. Isn't it amazing?" (Radio show, 6/28/93)

REALITY: Amazingly wrong. Genesis 41 is about the wisdom of INSTITUTING taxes, not cutting them. After Pharaoh had a dream that prophesied seven fat years to be followed by seven lean years, Joseph advised him to "appoint officers over the land, and take up the fifth part of the land of Egypt in the seven plenteous years...and lay up corn under the hands of Pharaoh." In other words, a 20 percent tax on the grain harvest would put aside food for use during the famine. Pharaoh took Joseph's advice, and Egypt avoided hunger during the famine.

WEIRD SCIENCE

LIMBAUGH: "It has not been proven that nicotine is addictive, the same with cigarettes causing emphysema [and other diseases]." (Radio show, 4/29/94)

REALITY: Nicotine's addictiveness has been reported in medical literature since the turn of the century. Surgeon General C. Everett Koop's 1988 report on nicotine addiction left no doubts on the subject; "Today the scientific base linking smoking to a number of chronic diseases is overwhelming, with a total of 50,000 studies from dozens of countries," states Encyclopedia Britannica's 1987 "Medical and Health Annual."

LIMBAUGH: "We closed down a whole town--Times Beach, Mo.--over the threat of dioxin. We now know there was no reason to do that. Dioxin at those levels isn't harmful." (Ought to Be, p. 163)

REALITY: "The hypothesis that low exposures [to dioxin] are entirely safe for humans is distinctly less tenable now than before," editorialized the New England Journal of Medicine after publishing a study (1/24/91) on cancer mortality and dioxin. In 1993, after Limbaugh's book was written, a study of residents in Seveso, Italy had increased cancer rates after being exposed to dioxin, The EPA's director of environmental toxicology said this study removed one of the last remaining doubts about dioxin,s deadly effects (AP, 8/29/93).

LIMBAUGH: "The worst of all of this is the lie that condoms really protect against AIDS. The condom failure rate can be as high as 20 percent. Would you get on a plane--or put your children on a plane--if one of five passengers would be killed on the flight? Well, the statistic holds for condoms, folks." (Ought to Be, p. 135)

REALITY: A one in five AIDS risk for condom users? Not true, according to Dr. Joseph Kelaghan, who evaluates contraceptives for the National Institutes of Health. "There is substantive evidence that condoms prevent transmission if used consistently and properly," he said. He pointed to a nearly two-year study of couples in which one partner was HIV-positive. Among the 123 couples who used condoms regularly, there wasn't a single new infection (AP, 8/29/93).

LIMBAUGH: "Most Canadian physicians who are themselves in need of surgery, for example, scurry across the border to get it done right: the American way. They have found, through experience, that state medical care is too expensive, too slow and inefficient, and, most important, it doesn't provide adequate care for most people." (Told You So, p. 153)

REALITY: "Mr. Limbaugh's claim simply isn't true," says Dr. Hugh Scully, chair of the Canadian Medical Association's Council on Healing and Finance. "The vast majority of Canadians, including physicians, receive their care here in Canada. Those few Canadians who receive health care in the U.S. most often do because they have winter homes in the States--like Arizona and Florida--and have emergent health problems there." Medical care in Canada is hardly "too expensive"; it's provided free and covered by taxes.

LIMBAUGH: "If you have any doubts about the status of American health care, just compare it with that in other industrialized nations." (Told You So, p. 153)

REALITY: The United States ranks 19th in life expectancy and 20th in infant mortality among 23 industrialized nations, according to the CIA's 1993 World Fact Book. The U.S. also has the lowest health care satisfaction rate (11 percent) of the 10 largest industrialized nations (Health Affairs, vol. 9, no. 2).

LIMBAUGH: Denouncing Jeremy Rifkin of the Beyond Beef campaign as an "ecopest": "Rifkin is bent out of shape because he says the cattle consume enough grain to feed hundreds of millions of people. The reason the cattle are eating the grain is so they can be fattened and slaughtered, after which they will feed people, who need a high protein diet." (Ought To Be, p. 110)

REALITY: Sixteen pounds of grain and soy is required to produce one pound of edible food from beef (USDA Economic Research Service). As for needing a "high-protein diet," the World Health Organization and U.S. Department of Agriculture recommend that from 4.5 percent to 6 percent of daily calories come from protein. The amount of calories from protein in rice is 8 percent; in wheat it's 17 percent (USDA Handbook No. 456).

LIMBAUGH: "Do you know we have more acreage of forest land in the United States today than we did at the time the constitution was written." (Radio show, 2/18/94)

REALITY: In what are now the 50 U.S. states, there were 850 million acres of forest land in the late 1700s vs. only 730 million today (The Bum's Rush, p. 136). Limbaugh's claim also ignores the fact that much of today's forests are single-species tree farms, as opposed to natural old-growth forests which support diverse ecosystems.

BROTHERHOOD...AND SISTERHOOD

LIMBAUGH: "The videotape of the Rodney King beating played absolutely no role in the conviction of two of the four officers. It was pure emotion that was responsible for the guilty verdict." (Radio show, quoted in FRQ, Summer/93)

REALITY: "Jury Foreman Says Video Was Crucial in Convictions," read an accurate Los Angeles Times headline the day after the federal court verdict (4/20/93).

LIMBAUGH: "Anytime the illegitimacy rate in black America is raised, Reverend Jackson and other black 'leaders' immediately change the subject." (Ought to Be, p. 225)

REALITY: Jesse Jackson has been talking about and against "children having children" in speeches and interviews for decades. So have many other black leaders, especially in the clergy.

LIMBAUGH: Praising Sen. Strom Thurmond for calling a gay soldier "not normal": "He's not encumbered by being politically correct.... If you want to know what America used to be--and a lot of people wish it still were--then you listen to Strom Thurmond." (TV show, 9/1/93)

REALITY: In the America that "used to be," Strom Thurmond was one of the country's strongest voices for racism, running for president in 1948 on the slogan, "Segregation Forever."

LIMBAUGH: "There are more American Indians alive today than there were when Columbus arrived or at any other time in history. Does this sound like a record of genocide?" (Told You So, p. 68)

REALITY: According to Carl Shaw of the U.S. Bureau of Indian Affairs, estimates of the pre-Columbus population of what later became the United States range from 5 million to 15 million. Native populations in the late 19th century fell to 250,000, due in part to genocidal policies. Today the U.S.'s Native American population is about 2 million.

LIMBAUGH: "Women were doing quite well in this country before feminism came along." (Radio show, quoted in FRQ, Summer/93)

REALITY: Before feminism, women couldn't even vote.

LIMBAUGH: "Anita Hill followed Clarence Thomas everywhere. Wherever he went, she wanted to be right by his side, she wanted to work with him, she wanted to continue to date him.... There were no other accusers who came forth after Anita Hill did and said, 'Yeah, Clarence Thomas, he harassed me, too.' There was none of that." (TV show, 5/4/94)

REALITY: Hill could not have continued to date Thomas, since they never dated. Two other women, Sukari Hardnett and Angela Wright, came forth in the Thomas case with similar charges.

LIMBAUGH: "Now I got something for you that's true--1972, Tufts University, Boston. This is 24 years ago--or 22 years ago. Three year study of 5000 co-eds, and they used a benchmark of a bra size of 34C. They found that the--now wait. It's true. The larger the brasize, the smaller the IQ." (TV show, 5/13/94)

REALITY: Dr. Burton Hallowell, president of Tufts in the '60s and '70s, had "absolutely no recollection" of such a study, according to Tufts' communications office. "I surely would have remembered that!" he exclaimed. Limbaugh's staff was unable to produce any such study. A search of the Nexis database--while revealing no evidence of a Tufts study--did produce a number of women theorizing that the presence of large breasts caused a lowering of IQ in some males.

THE CLINTON OBSESSION

LIMBAUGH: On Whitewater: "I don't think the New York Times has run a story on this yet. I mean, we haven't done a thorough search, but I--there has not been a big one, front-page story, about this one that we can recall. So this has yet to create or get up to its full speed--if it weren't for us and the Wall Street Journal and the American Spectator, this would be one of the biggest and most well kept secrets going on in American politics today." (TV show, 2/17/94)

REALITY: The New York Times BROKE the Whitewater story on March 8, 1992, in a front-page story by Jeff Gerth that included much of the key information known today. The investigative article ran over 1700 words.

LIMBAUGH: "You know the Clintons send Chelsea to the Sidwell Friends private school.... A recent eighth grade class assignment required students to write a paper on 'Why I Feel Guilty Being White.'... My source for this story is CBS News. I am not making it up." (Radio show, quoted in the Chicago Sun-Times, 1/16/94.)

REALITY: When Richard Roeper of the Chicago Sun-Times called CBS, the network denied running such a story. Ellis Turner, the director of external affairs for Sidwell Friends, told Roeper: "There is no legitimacy to the story that has been circulating.... We're anxious to let people know that this story is not true." The essay topic would be particularly difficult for the 28 percent of the school's student body that is not white.

LIMBAUGH: "You better pay attention to the 1993 budget deal because there is an increase in beer and alcohol taxes." (Radio show, 7/9/93)

REALITY: There were no increases in beer and alcohol taxes in the 1993 budget.

LIMBAUGH: The lead item on a page of "Stupid Quotes" in the May '94 Limbaugh Letter--subtitled, "Folks, I don't make this stuff

up"--was a quote attributed to Eleanor Clift on the McLaughlin Group: "Hillary and Bill Clinton cheating on their taxes was a protest against the Reagan era tax breaks for the wealthy.... They knew...the IRS would catch up to them and tack penalties.... If more people had been as far-sighted and altruistic as the Clintons, we could retroactively erase the deficit." Limbaugh commented, "It's only May, folks, and we've got our Stupid Quote of the year."

REALITY: Rush Limbaugh, April Fool. The item came from the April Fools Day issue of a right-wing newsletter Notable Quotables. Each item in the newsletter was dated April 1 and the issue signed off with the words "April Fools." (The Limbaugh Letter later printed a correction on this and another April Fools quote used as fact.)

FRACTURED HISTORY

LIMBAUGH: Quotes President James Madison: "We have staked the future...upon the capacity of each and all of us to govern ourselves, to control ourselves, to sustain ourselves according to the Ten Commandments of God." (Told You So, p. 73)

REALITY: "We didn't find anything in our files remotely like the sentiment expressed in the extract you sent to us," David B. Mattern, the associate editor of The Madison Papers, told the Kansas City Star (1/16/94). "In addition, the idea is entirely inconsistent with everything we know about Madison's views on religion and government."

LIMBAUGH: "And it was only 4,000 votes that--had they gone another way in Chicago--Richard Nixon would have been elected in 1960." (TV show, 4/28/94)

REALITY: Kennedy won the 1960 election with 303 electoral votes to 219 for Nixon. Without Illinois' 27 electoral votes, Kennedy would still have won, 276-246.

LIMBAUGH: On how to stop riots: "Richard Daley, in 1968, in the Democratic National Convention, issued an order--where there were rumors of riots--he issued a shoot-to-kill order. And there were no riots and there was no civil disobedience and no shots were fired and nobody was hurt. And that's what ought to happen." (TV show, 6/10/93)

REALITY: Mayor Daley's shoot-to-kill order was issued not at the Democratic Convention, but following the April 4, 1968 Martin Luther King assassination. Daley wasn't reacting to "rumors of riots" since riots had already broken out. The shoot-to-kill order hardly put an end to unrest--since four months after Daley's order, protestors flocked to Chicago's Democratic Convention and engaged in riotous civil disobedience. Protesters chanted, "The whole world is watching." Except for Rush Limbaugh.

LIMBAUGH: In an attack on Spike Lee, director of Malcolm X, for being fast and loose with the facts, Limbaugh introduced a video clip of Malcolm X's "daughter named Betty Shabazz." (TV show, 11/17/92)

REALITY: Betty Shabazz is Malcolm X's widow.

LIMBAUGH: "Those gas lines were a direct result of the foreign oil powers playing tough with us because they didn't fear Jimmy Carter." (Told You So, p. 112)

REALITY: The first--and most serious--gas lines occurred in late 1973/early 1974, during the administration of Limbaugh hero Richard Nixon.

LIMBAUGH: On Iran-contra special prosecutor Lawrence Walsh: "This Walsh story basically is, we just spent seven years and $40 million looking for any criminal activity on the part of anybody in the Reagan administration, and guess what? We couldn't find any. These guys didn't do anything, but we wish they had so that we could nail them. So instead, we're just going to say, 'Gosh, these are rotten guys.' They have absolutely no evidence. There is not one indictment. There is not one charge." (TV show, 1/19/94)

REALITY: Walsh won indictments against 14 people in connection with the Iran-contra scandal including leading Reagan administration officials like former Secretary of Defense Caspar Weinberger and former national security advisers Robert McFarlane and John Poindexter. Of the 14, 11 were convicted or pleaded guilty. (Two convictions were later overturned on technicalities--including that of occasional limbaugh substitute Oliver North)

LIMBAUGH: Explaining why the Democrats wanted to "sabotage" President Bush with the 1990 budget deal: "Now, here is my point. In 1990, George Bush was president and was enjoying a 90 percent plus approval rating on the strength of our victories in the Persian Gulf War and Cold War." (Told You So, p. 304)

REALITY: In October 1990, when the budget deal was concluded the Gulf War had not yet been fought.

LIMBAUGH: On the Gulf War: "Everybody in the world was aligned with the United States except who? The United States Congress." (TV show, 4/18/94)

REALITY: Both houses of Congress voted to authorize the U.S. to use force against Iraq.

LIMBAUGH: On Bosnia: "For the first time in military history, U.S. military personnel are not under the command of United States generals." (TV show, 4/18/94)

REALITY: That's news to the Pentagon. "How far back do you want to go?" asked Commander Joe Gradisher, a Pentagon spokesperson. "Americans served under Lafayette in the Revolutionary war."

Gradisher pointed out several famous foreign commanders of U.S. troops, including France's Marshall Foch, in overall command of U.S. troops in World War 1. In World War 2, Britain's General Montgomery led U.S. troops in Europe and North Africa, while another British General, Lord Mountbatten, commanded the China-Burma-India theatre.

PERSONAL ATTACKS

LIMBAUGH: Limbaugh constantly tells his audience that he doesn't make personnel or ad hominem attacks. To a caller who had a problem with his personalized attacks, Limbaugh responded with a denial: "Give me a specific example: who, what, when, where, and what exactly did I say?" (Radio show, 2/18/94)

REALITY: One hour before that call, Limbaugh was telling his audience that a 5,000-year-old man found buried in ice--pictured on the cover of Time magazine--was really Sally Jesse Raphael: "This is just what Sally Jesse Raphael looks like without makeup!"

MORE REALITY: Columnist Molly Ivins reported (Arizona Republic 10/17/93) this incident from Limbaugh's TV show--"Here is a Limbaugh joke: Everyone knows the Clintons have a cat. Socks is the White House cat. But did you know there is a White House dog?" And he puts up a picture of Chelsea Clinton. Chelsea Clinton is 13 Years old.

LIMBAUGH: Assailing a journalist who had criticized Nixon: "Michael Gartner, portraying himself as a balanced, objective journalist with years and years of experience faking events, and then reporting them as news--and doing so with the express hope of destroying General Motors in one case and destroying businesses that cut down trees, the timber industry, in another." (TV show, 4/27/94)

REALITY: Gartner, the NBC News president who resigned in the wake of the GM truck explosion episode on NBC's Dateline, had no hands-on role in it- -nor had he expressed a hope of destroying any company.

LIMBAUGH: Equally accurate when denouncing a fellow conservative, he said of right-wing journalist Cliff Kincaid: "He's written all kinds of pieces about how I don't go make speeches for free, for the cause.... He's just one more of these little gnats out there trying to sink a Boeing 747 that's leaving him in a cloud of dust." (Radio show, 11/19/93)

REALITY: Kincaid's only published piece on whether Limbaugh does speeches "for the cause" was in Human Events (7/27/91): "He does his bit for conservatives when the movement calls. He waived his fees, for instance, when he emceed at roasts for Oliver North and Paul Weyrich and addressed the National Right to Life convention."

LIMBAUGH VS. LIMBAUGH

LIMBAUGH: Limbaugh frequently denies that he uses his show for political activism: "I have yet to encourage you people or urge you to call anybody. I don't do it. They think I'm the one doing it. That's fine. You don't need to be told when to call. They think you are a bunch of lemmings out there." (Radio show, 6/28/93)

REALITY: Just an hour after making the above claim, he was--as usual--sending his troops to the trenches: "The people in the states where these Democratic senators are up for reelection in '94 have to let their feelings be known.... These senators, you let them know. I think Wisconsin's one state. Let's say Herb Kohl is up in '94. You people in Wisconsin who don't like this bill, who don't like the tax increases, you let Herb Kohl know somehow."

LIMBAUGH: On the poverty line: "$14,400 for a family of four. That's not so bad." (Radio show, 11/9/93, quoted in FRQ, Winter/94)

REALITY: Just a few months earlier, Limbaugh was talking about how tough it was to make 10 times that: "I know families that make $180,000 a year and they don't consider themselves rich. Why, it costs them $20,000 a year to send their kids to school." (Radio show, 8/3/93, quoted in FRQ, Winter/94)

LIMBAUGH: On Bill Clinton: "Never trust a draft dodger." (Radio show, quoted in FRQ, Summer/93)

REALITY: Although a supporter of the Vietnam War, Limbaugh used a minor physical impairment to avoid the draft (Minneapolis Star Tribune, 9/27/93).

LIMBAUGH: In frequent broadcasts, Limbaugh offers impassioned advocacy for Paula Jones, who charged Bill Clinton with sexual harassment. (TV and radio, April-May/94)

REALITY: Limbaugh boasted that a sign on his office door reads, "Sexual harassment at this work station will not be reported. However...it will be graded!!!" (USA Weekend, 1/26/92).

RUSH LIMBAUGH: CHAMPION OF THE OVERDOG

Who says Rush Limbaugh is abusive to minorities? He champions various minority interests: multi-millionaires, bankers, owners of private planes and yachts, drug companies. It's only those other "minorities"--women, workers, the poor, racial minorities, gays--that he has no use for. Here's a sampling:

"One of the things I want to do before I die is conduct the homeless Olympics...[Events would include] the 10-meter Shopping Cart Relay, the Dumpster Dig, and the Hop, Skip and Trip." (L.A. Times, 1/20/91)

On NAFTA: "If we are going to start rewarding no skills and stupid people--I'm serious, let the unskilled jobs, let the kinds of jobs

that take absolutely no knowledge whatsoever to do--let stupid and unskilled Mexicans do that work." (Radio show quoted in FRQ Fall/93)

Speculating on why a Mexican national won the New York marathon: "An immigration agent chased him for the last 10 miles." (USA Weekend, 1/26/92)

This is asinine! A Cesar Chavez Day in California? Wasn't he convicted of a crime?" (Quoted in FRQ, Winter/94)

"Kurt Cobain was, ladies and gentleman, I just--he was a worthless shred of human debris..." (TV show, 4/11/94)

"When a gay person turns his back on you, it is anything but an insult ; it's an invitation." (Quoted in FRQ, Summer/94)

"Feminism was established to allow unattractive women easier access to the mainstream." (Quoted in FRQ, Summer/93)

"Militant feminists are pro-choice because it's their ultimate avenue of power over men.... It is their attempt to impose their will on the rest of society, particularly on men." (Ought to Be, p.53)

"Why is it that whenever a corporation fires workers it is never speculated that the workers might have deserved it?" (Ought to Be, p.275)

KOPPEL COVERS FOR LIMBAUGH'S RUMOR-MONGERING

Ted Koppel's special (ABC Viewpoint, 4/19/94) on press coverage of Whitewater was a perfect opportunity to take Rush Limbaugh to task for spreading unfounded conspiracy theories. But instead, ABC journalists Koppel and Jeff Greenfield let Limbaugh off the hook.

On his March 10 radio broadcast, Limbaugh had announced the following in urgent tones: "OK, folks, I think I got enough information here to tell you about the contents of this fax that I got. Brace yourselves. This fax contains information that I have just been told will appear in a newsletter to Morgan Stanley sales personnel this afternoon.... What it is is a bit of news which says...there's a Washington consulting firm that has scheduled the release of a report that will appear, it will be published, that claims that Vince Foster was murdered in an apartment owned by Hilary Clinton, and the body was then taken to Fort Marcy Park."

After he returned from a commercial break, Limbaugh began referring to the story as a "rumor," but continued to claim that the story was that "the Vince Foster suicide was not a suicide."

Limbaugh was referring to an item in a newsletter put out by the Washington, D.C. firm of Johnson Smick International. The newsletter, relating a rumor that has no apparent basis in fact,

reported that White House attorney Foster's suicide occurred in an apartment owned by White House associates, and that his body was moved to the park where it was found.

Limbaugh took this baseless rumor from a small insiders' newsletter and broadcast it to his radio audience of millions, adding his own new inaccuracies: The newsletter did not report--as Limbaugh claimed--that Foster was murdered, or that the apartment was owned by Hillary Rodham Clinton. Limbaugh's repetition of an unfounded rumor has been credited (Chicago Tribune, 3/11/94; Newsweek, 3/21/94) with contributing to a plunge in the stock market on the day it was aired.

Appearing as an "expert" on the Viewpoint special, Limbaugh denied twisting the rumor: "Never have I suggested that this was murder," he said. ABC's Jeff Greenfield, in a taped segment, further covered for the talkshow host, claiming that Limbaugh "broadcast the rumor as an example of the more wild stories circulating."

Later in the broadcast, host Ted Koppel also stuck up for Limbaugh when his role in spreading the story was challenged. "As I recall," Koppel said, "you didn't present it as accurate, did you? You represented it as one of the rumors that was going around."

The executive producer of Limbaugh's TV show, Roger Ailes (a Republican campaign consultant and president of the CNBC cable network), didn't claim that his star had debunked the rumor--he boasted that Limbaugh's report of "a suicide coverup, possibly murder" was a scoop. On the Don Imus radio show, Ailes remarked: "The guy who's been doing an excellent job for the New York Post [Chris Ruddy]...for the first time on the Rush Limbaugh show said that...he did not believe it was suicide.... Now, I don't have any evidence.... These people are very good at hiding or destroying evidence."

But Limbaugh doesn't seem so proud of his scoop. When a caller to the radio show (3/10/94), who identified himself as a pediatrician from Memphis, articulately criticized Limbaugh for spreading false reports about Vincent Foster's death, the host seemed to take it personally: "One thing I'm not is a rumor-monger," he said.

Limbaugh later went on to imply that the pediatrician had been calling from the "West Wing of the White House" (even though he had also attacked the Clinton health care plan and endorsed a single-payer approach). "I think that what is going to happen during the course of this year," Limbaugh said, "is that a bunch of people are going to call this show that have been given marching orders.... What's going to happen is there will be numerous attempts, and they've gone on all the time, to discredit what occurs on this program."

The next day (3/11/94), apparently still smarting from the Memphis caller's remarks, Limbaugh instructed his staff on the air: "You guys be on the lookout in there for more calls from the White House disguised as pediatricians from Memphis."

FAIR associate Jonathan Eagleman tracked down the "Memphis pediatrician" and found that he was...a Memphis pediatrician. The pediatrician had received a number of hate calls from outraged dittoheads--apparently some of them hadn't believed their leader's claim that he was actually calling from the White House.

(c) FAIR
* * *

FAIR (Fairness & Accuracy In Reporting) is the national media watch group offering well-documented criticism in an effort to correct bias and imbalance. FAIR focuses public awareness on the narrow corporate ownership of the press, the media's allegiance to official agendas and their insensitivity to women, labor, minorities and other public interest constituencies. FAIR seeks to invigorate the First Amendment by advocating for greater media pluralism and the inclusion of public interest voices in national debates.

FAIR is a membership-based organization. If you would like to become a member and receive FAIR's magazine, EXTRA!, where this report originally appeared and which features such well-documented media criticism in each issue, call our subscription service at 800-847-3993, 9:00-5:00 Eastern Time. Let them know you got the number on the internet. If you would like a copy of the original report, send an e-mail message to FAIR (fair@igc.apc.org), and we'll tell you how you can get one.

ACTION: Each TV or radio station that carries Limbaugh has a responsibility to the community it serves. They can be held accountable if they broadcast fabrications. They must find a way to correct the record if they allow Limbaugh to spew falsehoods. Contact the station manager of your local Limbaugh outlets. Let them know you take Limbaugh's disinformation seriously...and so should they.

An obvious antidote to Limbaugh's brand of distortion would be to have a genuine debate. That would give the facts a chance -- and provide some political balance. When you call radio stations, you could note that stations can provide some debate and balance by broadcasting the talkshows hosted by populist Jim Hightower and iconoclast Jerry Brown -- two hosts who do not seem to be allergic to the facts.

The debunking of Limbaugh is also featured this week on FAIR's weekly radio program, CounterSpin, (which airs on over 70 stations) and in the "Media Beat" column by FAIR associates Jeff Cohen and Norman Solomon. Their column is distributed by Creators Syndicate.

If you would like to hear CounterSpin on a local radio station, let them know. If you'd like to see "Media Beat" in your local paper, let the editorial page editors know.

For more information on FAIR, write to: Sam Husseini, FAIR, 130 West 25th Street, New York, NY, 10001. (fair@igc.apc.org) Please send FAIR any letters you write or any newspaper reports you see on this subject. Feel free to post this on any appropriate place on the internet. Thank you.

4428. FAIR replies to Limbaugh

Newsgroup: rec.radio.broadcasting

FAIR'S REPLY TO LIMBAUGH'S NON-RESPONSE October 13, 1994

Rush Limbaugh's long-touted "5,000 word response" to FAIR's "Reign of Error" report has been released -- after nearly three and a half months. Unfortunately for Limbaugh, it doesn't rebut; mostly it changes the subject, dodges and wastes thousands of words on tangents and what-I-really-meant-to-say digressions. Whereas the FAIR report offered facts to specifically rebut Limbaugh's claims, his response relies on off-point quotes, non-responsive texts, even passages from opinion columnists.

It's telling that Limbaugh doesn't bother to rebut our original report -- which we provided to him two days before its public release. Instead, his response works from (sometimes incomplete) press accounts of our report. As a result, Limbaugh ignores almost half of the errors that we pointed out.

The response is in many ways more disturbing than the original false claims -- because it reveals that even after his accuracy has been specifically challenged, Limbaugh (along with his multi-million dollar broadcasting and publishing operation) is utterly incapable of engaging in factual discourse.

In his "Dear Mr. Journalist" cover letter, Limbaugh writes that "there has been no double checking; there have been no questions asked of FAIR. Journalists were handed a list of items by this group, and they simply repeated them." In fact, journalists repeatedly asked tough questions of FAIR, sought added documentation, and did their own reporting. It is clear from Howard Kurtz' Washington Post piece (7/1/94), for example, that he did his own independent research and interviews.

Even the brief cover page of Limbaugh's response contains errors. In furtherance of a conspiracy theory that was apparently too good to check out, Limbaugh writes that FAIR "was launched in the summer of 1987 with the financial assistance of The New World Foundation." He goes on to say that Hillary Clinton chaired the foundation. In fact, FAIR was founded not in 1987, but 1986 -- and the foundation played no role in the launching. Limbaugh makes reference to a 1987 grant of $2,500; he doesn't say that it was a discretionary grant conferred by the foundation's executive director, a decision that did not involve the chair or the board. These are simple facts that anyone could have learned by calling FAIR or the foundation.

(Anyone who's done even a cursory review of FAIR's work would know that we are far from flacks for the Clinton administration, and that we've frequently criticized mainstream media for soft treatment of the president on various issues.)

Limbaugh's cover letter also repeats the claim that FAIR found 43 errors in more than 4,000 hours of broadcasts. As our report noted, our list was far from exhaustive. We assembled those errors from easily available sources -- mainly his books and transcripts of several weeks' worth of his TV show.

What follows is a point-by-point reply to Limbaugh's non-response. We retract nothing -- since Limbaugh has been unable to show that we were wrong on a single point. Limbaugh's "rebuttal" is a sad commentary on a broadcaster who has 20 million listeners per week, but can't document his claims.

1. STUDENT LOANS: Limbaugh asserted that "banks take risks in issuing student loans and they are entitled to the profits." In reality, as FAIR pointed out, these loans are federally insured.

His "rebuttal" is to offer a quote from a bankers' association spokesperson, who asserts that the "risk" bankers face is that they might fail to comply with federal procedures, and therefore not receive the reimbursement that the federal government would otherwise give them. This is a novel use of the concept of "risk" in lending, which is generally considered to be the chance that a recipient will not repay a loan.

2. AMERICAN HEALTH CARE: Limbaugh urged a comparison of "American health care to other industrialized nations." FAIR did so, and found the U.S. running near the bottom on such matters as life expectancy and infant survival.

In attempted rebuttal, Limbaugh offers a quote from "Dr. Elizabeth McCaughey" (not a medical doctor, the Manhattan Institute's McCaughey has a PhD in constitutional law), who writes that high infant mortality and lower life expectancy "have almost nothing to do with the quality of American medical care. Both statistics reflect the epidemic of low-birth-weight babies born to teenage and drug-addicted mothers, as well as the large numbers of homicides in American cities and drug-related deaths."

This is misinformation. Infant mortality, far from having "almost nothing to do with" the quality of health care, is closely linked with the availability of prenatal care. According to figures from the National Center for Health Statistics, the mortality rate for infants whose mothers received little or no prenatal care is almost 10 times that of mothers who received frequent prenatal care.

And the Centers for Disease Control estimate that homicide lowers U.S. life expectancy by about three months -- which would do almost nothing to improve our rank. "Drug related deaths" are far fewer than homicides, and would have even less impact on our life

expectancy ranking.

Limbaugh ignores the second half of FAIR's argument: "The U.S. also has the lowest health care satisfaction rate (11 percent) of the 10 largest industrialized nations (Health Affairs, Vol. 9, No. 2)."

3. FOREST ACREAGE: "Do you know we have more acreage of forest land in the United States today than we did at the time the Constitution was written?" said Limbaugh. In fact, in what are now the 50 U.S. states, there were at least 850 acres of forest land in the late 1700s, vs. only 730 acres today.

Limbaugh's rebuttal is a lengthy dodge, which compares the amount of forest land in the U.S. today to that in 1920. But the Constitution was written in 1787, not 1920.

4. CHELSEA CLINTON: Limbaugh asserted that students at Chelsea Clinton's Sidwell Friends school were "required" to write a paper on "Why I Feel Guilty Being White" and added, "My source for this story is CBS News. I am not making it up." In reality, Limbaugh falsely claimed CBS News as his source, and there's no evidence that any such essay was ever assigned.

Limbaugh actually took this claim from an infotainment tip sheet called CBS Morning Resource--which is not part of CBS News, any more than a game show on a CBS station is part of CBS's news operation. Limbaugh also neglected to tell his listeners that his real source for the item, as stated in the tip sheet, was Playboy (which had cited Heterodoxy, a right-wing publication).

As CBS News Vice President Larry Cooper wrote in a letter responding to Limbaugh (USA Today, 7/20/94): "Limbaugh's source was actually Playboy magazine. The story, crediting Playboy, was distributed to radio stations via the CBS Morning Resource.... Morning Resource is not associated with CBS News." Limbaugh seemed to sense -- correctly -- that an item would sound more credible to his listeners if sourced to "CBS News" than to Playboy.

In Limbaugh's rebuttal, he ignores the difference between CBS News and CBS Morning Resource. He still asserts that his claim about the required essay assignment is "a true story," and that "my office did what no other journalist did: We tracked the story to its root and talked to the original reporter (for Washington's City Paper). He confirmed the story."

Did Limbaugh's office do some pioneering research here? Not quite. FAIR's magazine EXTRA! had already tracked down the reporter who first wrote of the purported essay assignment, and published that fact five weeks ago (Sept./Oct. 94). After we asked the City Paper reporter, Bill Gifford, how an essay called "Why I Feel Guilty Being White" could be assigned to the roughly 25 percent of the school's students who are not white, he said he would doublecheck with his source, an unnamed disgruntled parent. Gifford got back

to us and said that the actual title of the essay assigned to a 7th and 8th-grade class was "Should White People Feel Guilty and Why?" -- a different, more neutral topic.

After claiming that "no other journalist" had talked to the original reporter, Limbaugh then contradicts himself by acknowledging that we had talked to Gifford. Limbaugh claims Gifford "says he told FAIR the same thing he told my office, that he stands by the story and it's true." Interviewed by a Washington Times reporter doing a story on the Limbaugh rebuttal (10/11/94), Gifford confirmed that his source said the assignment was "Should White People Feel Guilty?" -- and not "Why I Feel Guilty Being White."

Of course, the "root" of a story about a school assignment is not a reporter, or a shaky unnamed source -- it's the classroom. From inquiring repeatedly among administrators and faculty at the school, we have found no evidence of either of the above two essay topics. Limbaugh and City Paper have produced no written documentation. The school maintains that the story is "apocryphal."

5. BEER AND ALCOHOL TAXES IN 1993: "You better pay attention to the 1993 budget deal because there is an increase in beer and alcohol taxes," asserted Limbaugh during his July 9, 1993 radio show. In reality, there were no such increases in the budget deal.

In "rebuttal," Limbaugh says that beer and alcohol taxes "were indeed considered" for the budget. This of course is very different from saying that alcohol tax increases are IN the budget deal. In fact, when Limbaugh made this statement, different budget packages had passed both the House and the Senate, and neither package included tax increases on beer or alcohol.

It's noteworthy that Limbaugh's main source for the point that an alcohol tax was even considered is Bob Woodward's The Agenda, which hadn't been published when Limbaugh made his pronouncement. In an even wilder tangent, Limbaugh talks of prospective alcohol taxes to cover Clinton's health plan. This, again, has nothing to do with "the 1993 budget deal."

6. GAS LINES: "Those gas lines were a direct result of foreign oil powers playing tough with us because they didn't fear Jimmy Carter," Limbaugh wrote in his book See, I Told You So. In fact, FAIR pointed out, the most serious gas lines were in late 1973/early 1974, during the Nixon administration.

Limbaugh says he "wasn't discussing the 1973 gas lines" -- just the "gas lines that Jimmy Carter was responsible for." But the passage that includes this statement begins, "I, for one, remember the long gas lines of the 1970s" -- with no distinction made between the more serious 1973-74 gas lines and the gas lines he blames on Jimmy

Carter.

7. U.S. MILITARY/BOSNIA: Defending his claim that "for the first time in military history, U.S. military personnel [in Bosnia] are not under the command of United States generals," Limbaugh's rebuttal claims that "U.S. military personnel have served WITH forces from other countries throughout history, such as in World War I and II but U.S. generals have always been at the top of the command structure." In fact, in World War I, France's Marshal Ferdinand Foch was in overall command of Allied troops. This fact was noted in FAIR's report, but Limbaugh seems to have chosen to ignore it.

8. RODNEY KING: Limbaugh's claim that "the videotape of the Rodney King beating played absolutely no role in the conviction of two of the four officers" is clearly unsupportable. Nothing Limbaugh writes contradicts the jury foreman's statement that the video was "crucial" in the conviction -- a statement that Limbaugh says he simply "discounted."

9. C.C. MYERS: Limbaugh said that declaring the Santa Monica Freeway a disaster area "eliminated the need for competitive bids."

In fact, C.C. Myers beat out four other contractors who bid on the project. Limbaugh said that Myers did not have to go through the "rigamarole...of giving 25 percent of the job to a minority-owned business and 25 percent to a woman." In fact, affirmative action rules applied. Limbaugh said that "government got the hell out of the way." In fact, state employees worked round the clock on the project, and the whole thing was government-funded. While not disputing any of the factual errors that we pointed out, Limbaugh's rebuttal irrelevantly argues that other statements he made about Myers were true.

10. FEMINISM: "Women were doing quite well in this country before feminism came along," Limbaugh said. FAIR pointed out that before feminism, women couldn't even vote -- since feminism "came along" in the 19th Century. "I was referring to contemporary militant feminism," Limbaugh now amends. But that is not what he said -- and "Words mean things," as Limbaugh proclaims in his "35 Undeniable Truths of Life."

11. ANITA HILL: Of Anita Hill and Clarence Thomas, Limbaugh declared: "She wanted to continue to date him." In response to FAIR's pointing out that Hill and Thomas never dated, Limbaugh said that his comment "actually demonstrates my recall of the Thomas-Hill episode," citing a statement by Thomas that Hill had invited him into her home after driving her home.

But neither Thomas or Hill ever characterized these or any other interaction that the two had as anything approaching a "date." Hill has said that Thomas asked her out, and that she declined;

Thomas denied strongly that "I ever attempted to date her."

Limbaugh also said, "There were no other accusers who came forth after Anita Hill did and said, 'Yeah, Clarence Thomas, he harassed me too.' There was none of that." Angela Wright and Sukari Hardnett did not apply the term "sexual harassment" to what they had personally experienced while working for Thomas. But their descriptions of Thomas' behavior, if true, would almost certainly meet the legal definition of harassment.

"Clarence Thomas did consistently pressure me to date him," Wright told Senate investigators. "At one point, Clarence Thomas made comments about my anatomy. Clarence Thomas made comments about women's anatomy quite frequently. At one point, Clarence Thomas came by my apartment at night, unannounced and uninvited.... He would try to move the conversation over to the prospect of my dating him."

"If you were young, black, female and reasonably attractive, you knew full well you were being inspected and auditioned as a female," Hardnett wrote in a letter to the Senate Judiciary Committee. "You knew when you were in favor because you were always at his beck and call, being summoned constantly, tracked down wherever you were in the agency and given special deference by others because of his interest. And you knew when you had ceased to be an object of sexual interest -- because you were barred from entering his office and treated as an outcast, or worse, a leper with whom contact was taboo."

12. JAMES MADISON: Limbaugh acknowledges that he misattributed the alleged quote from Madison (saying that Americans must "sustain ourselves according to the Ten Commandments of God").

13. NATIVE AMERICANS: Unable to provide any evidence to support his claim that "there are more American Indians alive today than there were when Columbus arrived," Limbaugh quotes an article in the Heritage Foundation magazine that claims that "some Indian groups are more populous today than in 1492."

14. WHITEWATER COVERAGE: "I don't think the New York Times has run a story on [Whitewater] yet," Limbaugh said on February 17, 1994. "There has not been a big one, front-page story about this one that I can recall." FAIR noted that the Times had actually published the first major story on Whitewater -- a lengthy, front-page piece that appeared on March 8, 1992.

Limbaugh defends this mistake: "The fact that I overlooked one Times article that ran 11 months earlier is hardly indicative of a 'reign of error.'"

First, March 1992 is 23 months before February 1994, not 11 months.

Furthermore, Limbaugh did not overlook one front-page New York Times story on Whitewater, he overlooked half a dozen. We cited the March 8, 1992 story to suggest that Limbaugh, who passes himself off as an expert on press coverage of Whitewater, should have known who it was that originally broke the story.

15. GULF WAR I: Limbaugh's original statement was that during the Gulf War, "everybody in the world was aligned with the United States except who? The United States Congress."

After FAIR pointed out that both houses of Congress had voted to authorize the use of force in the Persian Gulf, Limbaugh responded on his radio show (7/5/94): "When I said it, it was true," he claimed -- implying he had said it while the debate was still ongoing.

Actually, Limbaugh made the statement on April 18, 1994 -- more than three years after the vote. Limbaugh now admits that "Congress eventually went along with President Bush's policy -- but they had to be dragged along, kicking and screaming." Yet another "what I meant to say..." response.

16. GULF WAR II: "In 1990, George Bush was president and was enjoying a 90 percent plus approval rating on the strength of our victories in the Persian Gulf War and Cold War." Limbaugh does not dispute our point that "our victories in the Gulf War," fought in 1991, could not have influenced Bush's 1990 approval rating. Only after the war did Bush's approval rating reach anything like 90 percent.

17. CANADIAN HEALTH CARE: Limbaugh says that his claim that "most Canadian physicians who are themselves in need of surgery...scurry across the border to get it done right; the American Way" was "an obvious humorous exaggeration." In fact, the passage it appears in -- on page 153 of See, I Told You So -- is completely sober and straightforward. In his rebuttal, Limbaugh is unable to produce even a single anecdotal example of a Canadian doctor who came to the U.S. for any kind of medical treatment -- though he does offer examples of Canadian doctors who moved south to WORK in the U.S.

18. THE NICOTINE CONTROVERSY: "It has not been proven that nicotine is addictive," Limbaugh declared. Nicotine's addictiveness is only controversial among scientists paid by the tobacco industry. When the New York Times (8/2/94) asked two independent experts to rank nicotine in terms of "dependence" -- defined as "how difficult it is for the user to quit, the relapse rate, the percentage of people who eventually become dependent, the rating users give their own need for the substance and the degree to which the substance will be used in the face of evidence that it causes harm" -- both rated nicotine ahead of heroin, cocaine and alcohol.

19. OZONE AND VOLCANOES: There are many uncertainties about ozone depletion -- which makes it all the more important that the debate

not be confused with inaccurate statements. Limbaugh claimed in his book The Way Things Ought to Be that "Mt. Pinatubo in the Philippines spewed forth more than a thousand times the amount of ozone-destroying chemicals in one eruption than all the fluorocarbons manufactured by wicked, diabolical and insensitive corporations in history." On Nightline, he said that "Mount Pinatubo has put 570 times the amount of chlorine into the atmosphere in one eruption than all of the man-made chlorofluorocarbons in one year."

Both statements can't be true; in fact, neither are. The "570 times" figure apparently derives from Trashing the Planet, an anti-environmental book by Dixy Lee Ray, but Ray was referring to a different volcano -- Mt. Augustine, an Alaskan volcano that erupted in 1976. Ray in turn gets the number from a 1980 Science magazine article -- but Science was talking about the chlorine produced by a gigantic eruption that occurred 700,000 years ago in California.

20. EFFECTIVENESS OF CONDOMS: When Limbaugh says that a one-in-five fatality rate is a "statistic [that] holds for condoms, folks," that is NOT "distinctly different from saying that condom users have a one-in-five AIDS risk," as he claims in his rebuttal. He is clearly suggesting to his readers that if they allow their children to use condoms, there is a one-in-five chance that they will die. In fact, studies have shown that when a person with HIV uses condoms consistently during sex with an uninfected partner, long-term transmission rates are relatively low -- generally 2 percent or less.

21. U.S. POOR VS. EUROPE'S MAINSTREAM: Limbaugh initially had made the absurd claim that "the poorest people in America are better off than the mainstream families of Europe." In support of this, he cites a Heritage Foundation study that unscientifically compares statistics that were collected several years apart, and singles out a few commodities that U.S. citizens are likely to have more of.

A broader comparison of living standards is available from the World Bank's World Development Report 1994, which calculates "Purchasing Power Parity" -- a comparison of how much people in each country can buy with their money. (Limbaugh has touted this method as the "most reliable measurement of economic strength" -- Limbaugh Letter, 1/94.) The residents of four major European nations -- France, Germany, Italy and Britain -- can purchase the equivalent of $18,568 with their average incomes. The poorest 20 percent of Americans can purchase $5,433 worth of goods.

In some countries, like Germany, Italy, Sweden and the Netherlands, the poorest residents are significantly better off than their poor counterparts in the U.S. According to World Bank figures, poor Americans are not even better off than mainstream families in many Eastern European countries, such as Russia, the Czech Republic, Slovakia and Hungary.

22. IRAN-CONTRA: Watch Rush Limbaugh backpedal. He originally said that there was "absolutely no evidence... not one indictment... not one charge" resulting from the Iran-contra investigation. Now he says, "I obviously misspoke when I said there were no indictments -- I clearly meant to say there were no CONVICTIONS, a point I have made on many occasions." But he immediately begins backing off from that claim, since there WERE convictions -- nine, including guilty pleas, plus two other convictions that were reversed on technicalities. But these were not on "substantive points," Limbaugh says, or, as guest expert Ed Meese says, they were "generally on minor offenses." Are felony convictions minor?

23. MICHAEL GARTNER: Limbaugh accused former NBC president Michael Gartner of deliberately faking news "with the express hope of destroying General Motors" and other businesses. He has still offered no evidence to back up this serious charge.

* * *

POSTSCRIPT: Limbaugh's expectation of how reporters should cover his rebuttal speaks volumes about his understanding of journalism. Here's a verbatim transcription from his October 11, 1994 radio show:

"Two weeks ago -- a week and a half ago -- we sent out over 150, maybe 200 copies of this to various columnists, newspapers which had printed the FAIR report originally and so forth.

"To this date, only one newspaper, the Washington Times, has sought to do a story on my response. And the way that it happened was laughable. We sent our response out, a reporter from the Washington Times gets it, and immediately calls FAIR, and says what do you think of this? They then call us and say all right, here's what FAIR thinks of your response, what do you think of what they said? And we got on the phone and we said, 'Listen, bleep-head, you have your response in our hands, that's all you're going to get, run our response.'

"That's what I think is called for here. We're not going to get into a tit-for-tat, blow-by-blow, it's not the point. The point is we've responded to these charges, you have them in their hands and there they are.

"Well, it is my thought, my, my premonition here, that most columnists, and Doonesbury, for example, which ran a whole week-long series in his cartoon strip on this, and the newspapers who ran it are not going to run it as we sent it out or even an abbreviated version of it, our response. They're just not going to do it, for who knows whatever reasons, but leading the list would be bias."

(For the record, the Washington Times did not run a news report on FAIR's original report.)

(c) FAIR
* * *

FAIR (Fairness & Accuracy In Reporting) is the national media watch group offering well-documented criticism in an effort to correct bias and imbalance. FAIR focuses public awareness on the narrow corporate ownership of the press, the media's allegiance to official agendas and their insensitivity to women, labor, minorities and other public interest constituencies. FAIR seeks to invigorate the First Amendment by advocating for greater media pluralism and the inclusion of public interest voices in national debates.

FAIR is a membership-based organization. If you would like to become a member and receive FAIR's magazine, EXTRA!, where the Limbaugh report originally appeared and which features such well-documented media criticism in each issue, call our subscription service at 800-847-3993, 9:00-5:00 Eastern Time. Let them know you got the number on the internet. If you would like a copy of the original report, send an e-mail message to FAIR (fair@igc.apc.org), and we'll tell you how you can get one.

ACTION: Each TV or radio station that carries Limbaugh has a responsibility to the community it serves. They can be held accountable if they broadcast fabrications. They must find a way to correct the record if they allow Limbaugh to spew falsehoods. Contact the station manager of your local Limbaugh outlets. Let them know you take Limbaugh's disinformation seriously...and so should they.

An obvious antidote to Limbaugh's brand of distortion would be to have a genuine debate. That would give the facts a chance -- and provide some political balance. When you call radio stations, you could note that stations can provide some debate and balance by broadcasting the talkshows hosted by populist Jim Hightower and iconoclast Jerry Brown -- two hosts who do not seem to be allergic to the facts.

The debunking of Limbaugh is also featured this week on FAIR's weekly radio program, CounterSpin, (which airs on over 70 stations) and in the "Media Beat" column by FAIR associates Jeff Cohen and Norman Solomon. Their column is distributed by Creators Syndicate.

If you would like to hear CounterSpin on a local radio station, let them know. If you'd like to see "Media Beat" in your local paper, let the editorial page editors know.

For more information on FAIR, write to: Sam Husseini, FAIR, 130 West 25th Street, New York, NY, 10001. (fair@igc.apc.org) Please send FAIR any letters you write or any newspaper reports you see on this subject. Feel free to post this on any appropriate place on the internet. Thank you.

4429. Boston Radio Watch 10-18-94

Newsgroup: rec.radio.broadcasting
Date: 1994-10-19 05:33:37 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <382b3h$t5l@vixen.cso.uiuc.edu>
Source record: 37270

* Pyramid's CHR WXKS 107.9FM won a Marconi Award for the best CHR station in the Major Market....WXKS, known in the Boston market simply as KISS-1-0-8, has been doing the same format for about 14 years now...It always finishes in Top 3 among FM music stations in the nation's ninth largest market..KISS' 14-year morning man Matt Siegal(Disco Matty) was nominated for the best on-air personality but lost...Pyramid is looking to syndicate Siegal's morning show nationally starting in the spring of 1995...

Pyramid's other Boston property, recently acquired Churban WJMN 94.5FM(Jam'n 94-5), is expected to move to KISS 108's current digs in Medford,MA(just outside Boston) in about 8
months...Both KISS 108 and Jam'n 94-5 will have brand new state of the art studios. WJMN's studios are presently located in the office complex in Waltham,MA...

Speaking of 'JMN : Music observers from both Boston dailies continue to crticize Pyramid's new
strategy by keep playing very watered down, bland, slow-jam ballads instead of more faster and
upbeat hip-hop,house, and reggae. This new direction by 'JMN has been linked to a disappearing
support for local hip-hop/house music scene in the Boston area...

* ARS is looking is still trying to fill in some vacancies at the brand new Eagle 93.7(greatest
pop and rock hits of the 70s)...It moved Scott MacKay from early evening(6-9pm) at the sister station Hot AC WBMX 98.5FM(Mix 98.5) to take over the mornings at 93-7. It also added a very smooth out-of-town voice Willie B. to take over the 2-6pm shift. So, midday(10-2), early evening(6-9), and night-time(9-1a) slots are still up for grabs....

MacKay's old slot at Mix will probably go to weekend/fill-in Andrea Phillips who's currently filling in 6-9pm shift...

* Country battle is heating up again...Greater Media's WBCS 96.9FM which has been on the losing end so far jumped from 1.5 in the spring to 1.9 in the summer book(17th overall). At the same time Fairbanks' WCLB 105.7FM which has been in the lead since May '93 dropped from 2.5 in the spring to 2.3 in the summer(tied for 14th)...It looks like Boston could very well handle one country station[combined 'CLB and 'BCS shares could easily place the station into a Top10]. One thing is very clear : while 'CLB and 'BCS continue
to compete against each other the country market in Boston will remain very fragmented.

* Back Bay Broadcasting's all-business WBNW AM 590 which debuted in early September has added some 2 afternoon local call-in business talk programming to its line-up...:

Here's a look at the new weekday line-up :

6-9am Bloomberg Business Radio
9-12p local 'Money Experts' with Rick Schaffer and Bob Glovsky

12-2p local 'New England Business' with Jeanine Graf
2p-4p local 'Risky Business' with John Napolitano
4pm-9a Bloomberg Business Radio(local news/weather/traffic updates provided Metro Networks)

Is there an FTP site or WWW Homepage that has a DB of radio stations &
info about them (format, address, etc). For those wondering, yes, I am
job hunting. All information greatly appreciated.

Didn't someone launch a comedy radio format on satelite some time ago,
featuring nothing but comedy and stand-up 24 hours a day?

Is the format still on the bird, are any stations picking it up? And how
come the
format isn't more widespread. Everyone loves comedy, it rules TV, and
there's a
wealth of recordings out there?

------------------------------------------------
FCC ANNOUNCES AM EXPANDED BAND ALLOTMENTS
------------------------------------------------

In its Review of the Technical
Assignment Criteria for the AM Broadcast Service, 6 FCC
Rcd 6273 (1991), recon. granted in part and denied in
part, 8 FCC Rcd 3250 (1993)["AM improvement Order"],
the Commission adopted measures to facilitate an
overall improvement and revitalization of the AM
broadcast band and to effectuate the necessary
incorporation of new spectrum between 1605 and 1705 kHz
into the AM broadcast band. The Commission concluded
that the public interest would be best served by using
the expanded AM band to improve the overall
quality of the AM service by lessening interference and
congestion in the existing band. On May 3, 1993, the
Commission opened a filing window for existing AM
stations to file petitions to migrate to the expanded
band. On December 3, 1993, the Commission announced a
ranking of all petitions to migrate in accordance with
the priority groups and improvement factors
described in the AM Improvement Order.

This Public Notice announces the expanded band
Allotment Plan, and identifies the stations that are
```

eligible to apply for authorizations associated with specific allotments, based upon the previously announced ranking of the petitions. Stations not receiving an allotment were precluded by one or more of the following: the Canadian agr eement, the Mexican agreement, the Region 2 agreement, Federal Travelers' Information Service Stations ("TIS"), harmonic frequency relationships with existing stations, or preclusion by stations of higher ranking. The Canadian agreement restricts the assignment of stations within 500 km of the common border to 1620, 1640, 1660, 1680, and 1700 kHz with a US priority on 1680 kHz and a Canadian priority on 1630 kHz. Stations on 1620, 1640, 1660, and 1700 kHz must be notified to Canada. A comparable restriction applies to Canadian stations. The Mexican agreement restricts assignments within 450 km of the common border to 21 specified frequencies at specific locations. If an expanded band proposal for a station was within 45 km of an allotment specified in the Mexican agreement it received an expanded band allotment provided it was not precluded by a station with a higher ranking or other factors. U.S. Government TIS facilities were protected in accordance with the guidelines of 47 C.F.F 90.242(a)(2)(i). Expanded band stations were not allotted within 30 km of an existing station if the frequency relationship being considered was twice the frequency of the existing station. The allotments also maintain a separation of 53 km from existing 1590 khz stations and 200 km from existing 1600 kHz stations. Finally a proposed station may have been precluded by the allotment of a frequency to a station(s) having a higher ranking. Stations not selected for migration will be afforded thirty (30) days to file for reconsideration of the Allotment Plan with arguments limited to addressing errors in the selection process. After the Allotment Plan has become final and no longer subject to Commission reconsideration, the Commission will enter the allotments into the Commission's AM Engineering Data Base. The Commission will issue a Public Notice of the finality of the Allotment Plan and call for applications to be filed. Stations selected for migration will be afforded sixty (60) days from the date the plan becomes final in which to file an application for construction permit on the allotted channel The application should be filed on Form 301 and must be accompanied by the normal filing fee for such application. After acceptance of the application for filing, the Commission will then put

the application on a cut-off list. The application will then be subject to petitions to deny but not to competing applications. After grant of the construction permit application and construction of the authorized facilities, the expanded band permittee will then file a covering license application on FCC Form 302. Licenses for stations in the expanded band will be issued for a term that is concurrent with the existing license for operation in the 535-1605 khz band.

For more information, contact Jim Buttle at (202) 418-2660.

In a previous article, janik@spss.com (Ed Janik) says:

>If they reinstated the fairness doctrine, faux-Christian hate talk would
>either leave the airwaves completely, or these stations would be forced
>to let people like me advocate tolerance of gay human beings and abortion
>rights and point out that schoolchildren have 19 hours a day when they
>are not in school during which they may pray as much as they wish.
>Either way reasonable thought and common sense would score a big victory.

Would it also mean that your local Pacifica stations would be forced
to let people advocate tolerance of business and private property rights
and that Western Culture and lifestyles are not the scourge of the
developed world?

From: Charles George <charles6407@delphi.com>
Message-ID: <382b4b$6@vixen.cso.uiuc.edu>
Source record: 37238

I find that there are two stations with almost complete Jazz programming
that I can recieve where I live. The first is KNTU 88.1 with Traditional Jazz
and some Contemporary Jazz, from the University of North Texas; while the other
is KOAI 107.5 with "Smooth Jazz". I find "Smooth Jazz" more of a marketing
tool than a true form of Jazz; however; as a musician I find some of the music
is good to listen to. And many of the artists are rooted in the older forms of
Jazz. They know a good thing when they see it makes money.
Wes Montgomery, who is now considered one of the best Jazz guitarists was often
criticized for being commercial, the same way Ramsey Lewis has been as well.
I find the "Smooth Jazz" is best for when I have a date and want music, and
or when I am working on a project. I think the Jazz Field is wide enough to
have both, and I am glad both formats of Jazz are represented in the market I
live in.

: than a subscription to BROADCASTING & CABLE ***** AND ********
: Electronic Media, which in addition to the most job listings I've
: ever seen, they have NEWS and features.
: AND, you can usually read them FREE at the public library!

: Don Moore

I got his listing and it is the most complete listing of jobs I've ever seen. This weeks issue had 24 pages. There were 42 job listings for radio airshifts....then there were also listings for television anchors, sales people, GMs, camera operators, engineers etc....

I have been in radio for 17 years and have never seen a listing this complete..this isn't for keeping up with radio trends or for bathroom reading. This listing is for people who want to send out tapes and resumes. I paid $5.00 bucks for one week and probably won't need it another week, but if I did want more I could get 5 weeks for $20.00 e-mailed straight to me (I don't have to go the library).

Roy Fredriks, 7 years with WABC talk radio in New York, looking for PD position. All offers will be considered anywhere in US. Station and Location take priority over salary considerations. Resume pasted below with contact information. Serious Replies only please.

ROY FREDRIKS

340 East 93 Street, Apt 22-I Phone/Fax:
New York, New York 10128 (212) 410-4249

Objective
A Programming position where career experience will be maximized to positively enhance station operations and profitability.

Professional Summary
A dynamic, extremely creative professional with solid career experience in all aspects of radio broadcast entertainment operations, public relations, and media communications. Demonstrated ability to turn new ideas and concepts into reality. Proven problem solving and decision making skills with the ability to set priorities and organize facilities to generate top results. A strong team leader, committed to maintaining high standards of excellence. Excellent interpersonal and communication skills with individuals at all levels. Computer literate with expertise in the use and troubleshooting of Macintosh software.

AREAS OF EXPERTISE
* RADIO BROADCASTING * PROGRAMMING * TALENT DEVELOPMENT
* NEWSWRITING * PRODUCTION * SCHEDULING * SPECIAL EVENTS

PROFESSIONAL EXPERIENCE
WABC RADIO- New York, NY 1986-1993
Executive Producer
Identified story ideas, booked guests for talk shows, directed and formatted programs. Coordinated station's coverage of various major national news events. Wrote copy and edited tape. Discovered new talent; served as MC for all promotional events.
* Produced the highest rated afternoon drive time radio program in the NYC
metropolitan area for three consecutive years.
* Recommended and implemented innovative format change which resulted in
increased ratings for WABC's overnight and morning programs.
* Discovered morning drive and 9-11 am talent and helped establish them as
major players in the market.

* Coordinated and produced successful annual radiothons for the Leukemia
Society.
* Only Producer during seven years with WABC to win a media award for news coverage.

WNET-TV- New York, NY 1981-1983
On-Air Announcer
Announced station breaks and fund raising spots during station Pledge Drives

ADDITIONAL EXPERIENCE
Computer Marketing Consultant 1993-Present
Involved in the development and marketing of various on-line services for consumers nationwide

Actor
Member of EQUITY, SAG AND AFTRA 1976-1984

EDUCATION
PENN STATE UNIVERSITY- STATE COLLEGE, PENNA.
B.F.A. in Theater Arts

References will be furnished upon request

Billboard magazine only lists stations that have above a 1.0 rating 12+. KMPC (I think) has a 0.7. However, the new KMPC has only been on the air for a few months, and have not (yet) done a lot of advertising. Understand, KFI took 6 years to be where they are now, with Limbaugh. Give KMPC time, there are no real overnight sensations, except for The Beatles and KLAX. No one becomes a contender just like that, especially with a (somewhat) crippled signal at night..

4443. FCC action on Micro-broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1994-10-19 05:34:17 UTC
From: "Michael Black...WEOS-FM" <BLACK@HWS.EDU>
Message-ID: <382b4p$1l@vixen.cso.uiuc.edu>
Source record: 37228

At the risk of another personal attack sent to me from Mr. Dunifer, I will state my agreement with the FCC in starting to do something about this issue. While he and his cause may be valid, he is going about it the wrong way, and is starting to gain the reproach of the broadcasting profession. Contrary to his belief, 30 watts IS significant power, and some of the kits that are for this service are linear amps at minimimum class A FM operating power. If the FCC is going to give a frequency, SHARED by all these micro-interests, let them do it. And, regulate it. Possibly like SBE frequency coordination (Is FRB ready to take this aspect on?) And what happens when a group 1 block away from FRB decides to put up its own transmitter on the same frequency? What would the process be to reconcile it? If I remember correctly, FRB has already gotten into a hastle with a neighboring group on a "field trip" type of outting.

In agreement with Gary Barrett's Post, I would like to add that I think it is time for the non-commercial broadcast interests to also get involved. Since FRB and their counterparts are popping up where ever they choose, the potential for interference to licensed facilities is great. As an industry, we are already complaining and getting concerned about short spaced, LEGAL FCC allocations cutting into reception area, let alone any unauthorized stations. THis issue will have a direct effect on both non-commercial and commercial stations. As much as I do not like religious broadcasters eating up the spectrum, can you imagine what Moody or our friends in Oakland would do if one of these micro-broadcasters were interfering with their "ministries?" It will be worth watching the FCC on this, as it may set the tone for things to come.

[List deleted]

>...when was the last time you heard any dozen of THESE on an Oldies station?

I occasionally hear some of them on the various oldies stations in LA. Of course "rock" oldies get played on one station, "soul" oldies on another station, "country" oldies on still a third.

Occasionally, some stations will play "rarer" stuff if reminded . . .

From: scottm4300@aol.com
Message-ID: <382b51$20@vixen.cso.uiuc.edu>
Source record: 37151

In article <37qaj6$mnh@vixen.cso.uiuc.edu>, markelliot@aol.com (MarkElliot) writes:

I suppose as an Oldies PD at a rather successful station, I ought to stay out of this fray - but after wading through 15 messages, I just can't help myself. a lot of good observations have been made here - Sean Caldwell's Art v. Science mesage was particularly intriguing.

The reality is that radio - especially Oldies stations have become far more science, and far less art. I believe that the formost Oldies stations are those that don't cling so tightly to their research that they become blind to the humanb side of this business. It is very true that a 500 to 800 song list is about as far as a real successful Oldies station is going to go. Mark Elliot made a good point when he noted that the point of any radio station is to 'attract the largest number of listeners". I think Mark would agree that in addition to attracting them, we also have to KEEP them listening. Peppering the playlist with unfamiliar (or even less familiar) songs will cause those listeners who lean heavily on the familiarilty of the format to go away. For those people, Oldies is usually a 2nd or 3rd choice.

To those who want 25,000 song playlists, I invite you to store that many CD's!!!! Seriously, the hard-core Oldies fan - the one who really likes the Jive Bombers, B. Bumble and the Stingers, God knows we love you. But for most of you - not all, but MOST - the reality is that Oldies is your music. You don't have a second choice in formats. You are going to give most of your listening time to the Oldies station in your market. Where are you going to go - CHR??? AC?? AOR?? Probably not. I know full well that the vast majority of the time spent listening to my radio station comes from a minority of the people who listen. These heavy listeners will, in most cases, stay with the station regardless of how many titles are on the playlist.

If college radio has an advantage over the rest of us, it is in the fact that most of them aren't dependant on making money. As long as we have to turn a profit (and I do wish to continue being paid), we need to appeal to the masses. As Spock once said, " The needs of the many outweight the needs of the few."

It's just one man's opinion, but so far, we're doing OK.

Live long and prosper.

Rock Around the Clock

ScottM4300@aol.com

[Moderator's Note: I don't believe anyone suggested a 25,000 song playlist. What is being refered to here is that someone stated that there were 25,000 songs in the top 100 during the seventies (or during some period of time) and that most oldies stations only play the same 500 songs. Bill]

4446. 1974 songs

>From Issue 878,
Here's a revised list of the 1974 songs you hear on the radio:

Average White Band: PICK UP THE PIECES (#1)
Bachman-Turner Overdrive: LET IT RIDE (#23)
Johnny Bristol: HANG ON IN THERE BABY (#8)
Carl Carlton: EVERLASTING LOVE (#6)
Golden Earring: RADAR LOVE (#13)
The Hollies: THE AIR THAT I BREATHE (#6-Gold)
Diana Ross: LAST TIME I SAW HIM (#14)
Stevie Wonder: DON'T YOU WORRY BOUT A THING (#16)

A little smaller than David's list, eh?

Rogers

4447. The Oldieanapolis 500

Newsgroup: rec.radio.broadcasting
Date: 1994-10-19 05:34:27 UTC
From: LanceBKOST@aol.com
Message-ID: <382b53$23@vixen.cso.uiuc.edu>
Source record: 37248

In an earlier post, I mentioned how an Oldies station that I previously worked for handled it's on-air rotations. I also stated that what we did was based upon Gut Feelings, without research.

I also saw a list posted of songs from 1974 as well, we played probably 4 or 5 of them. (There had to be 75 songs on this list..) Some people believe that playing 25,000 songs will help you become more popular, and that research is merely something that stations with no guts or ambition have. Neither is true. (And trust me, I'm NO fan of research.....)

We had no research and still narrowed down the playlist for several reasons. #1) We looked at songs from a listeners point of view. Even though there were some songs we personally liked, We knew they could never be played due to the fact that most listeners have probably NEVER liked, or even heard the song in question.

#2) We also went with a lot of songs that we despised (ie: Feelings by Morris Albert, You Light up my Life by Debby Boone) because listeners knew them and probably couldn't wait to hear them, even though we usually got a Coke or used the toilet during those times.

The main reason we had no research at that time was because the station had very little money. Therefore, since we didn't have research, It made us all better Music & Programming minds..

Playing 25,000 songs is a tuneout
Playing 500 songs is also a tuneout
Playing the RIGHT songs for your audience makes you Number One.

There will be those who disagree with me, and that doesn't mean that either of us are wrong or right. If it works for you, GO FOR IT!!

We're all in this for one reason, to get the most listeners. May the best station win..

WCXR, the call letters for the former Classic Rock station turned Smooth Jazz, are no longer with us. On Monday, October 17, WCXR got the OK to switch to WJZW.

While listening to the station last Monday during the Columbus Day federal holiday, I found it interesting to notice that one of the winners of free tickets to the Bobby Caldwell concert was John Horan. I couldn't help but wonder if it was the same John Horan who used to work at Jazzy 100.3. If so, watch it John. The Committee to bring back Jazzy 100 has been a crabby bunch lately ;-)

To me, WJZW sounds great. Is it just like Jazzy 100? No, but it's better than most of what I can find going up and down the dial. Will WJZW be sold in the near future? It looks that way. But, what the heck can I do about it? Those of you in the Washington, D.C., area with an opinion on WJZW, please email your thoughts to me at TOMLACKO@DELPHI.COM. Most of what I've heard on 105.9's new sound is positive but I'd like to know your thoughts. All responses will be forwarded to Steve Kosbau, Program Director, at WJZW.

Here's something hard to believe--a Program Director kept his promise! Steve Kosbau didn't fire any on air staff during the switch over to Jazz. The lineup is as follows:

Midnight-5 a.m. Tom Groome
5 a.m. - 9 a.m. Kenny King
9 a.m. - 2 p.m. John Perry
2 p.m. - 7 p.m. Greg Fitzgerald
7 p.m. - Midnight Allen Scott (Filling in until a full timer can be found. Vacancy was not a result of the format change).
Weekends Beverly Farmer and Mark Cruz

//

WPGC FM 95.5 & AM 1580 (Urban format on FM/Business format on AM), which was acquired by Infinity Broadcasting in the Spring for $60 million, finds itself defending that acquisition. A group known as Americans for Responsible Television has challenged Infinity's purchase of the stations.

ART claims the FCC broke its own rules when it permitted the broadcasting giant to make a $2.75 million settlement with a black group who opposed the sale initially. ART wants the FCC to

reconsider its grant of the WPGC sale and wants Infinity to file an early license renewal application for its only other Washington, D.C., station, WJFK FM 106.7.

//

WETA FM 90.9 (Public Broadcasting) is now available to all via the Internet. Listeners can get in touch with WETA by sending their email to RADIO@WETA.COM.

//

WASH FM 97.1 (AC format) has promoted part-timer Bill Worthington to full time mid-day host. Bill is a familiar voice in Washington and used to work at country station WMZQ.

//

Local popular DJ Jerry "The Bama" Washington died on Tuesday, October 4th. Jerry spent most of his career at WPFW FM 89.3 (Listener Supported/Multi-formatted) where he came on board in 1977 playing popular rhythm and blues songs. He was forced to retired in April of this year due to poor health. Jerry was a native of Albany, GA., and spent many years in Pittsburgh, PA., before attending college in Atlanta. Jerry Washington died of a brain hemorrhage at Walter Reed Army Medical Center here in Washington. He was 64 years old.

4451. WCXR's call is now (quietly) WJZW

Newsgroup: rec.radio.broadcasting
Date: 1994-10-19 08:27:35 UTC
From: maverick@access1.digex.net
Message-ID: <382l9n$j50@vixen.cso.uiuc.edu>
Source record: 37278

WCXR (105.9 Woodbridge Va.) has now switched its call letters
(as expected) to WJZW.
So far the switch has been very low key. Throughout the hour the
station simply refers to itself as "Smooth Jazz 105.9". It is only
during a block of commercials, just before the hour, that the WJZW call
letters are mentioned. The station ID is placed in the middle of
this commercial block.
A lot of people are still hoping that some sort of arrangement can be
worked out with the people from former WJZE, since JAZZY 100 is a station
still fondly remembered by a lot of listeners in the Washington D.C. area.
In a related matter, as mentioned earlier, WJFK (106.7) runs "Cool
Jazz" in the early morning (hosted by Shirletta), and on weekends.
However the PD at WJFK is quoted in Billboard as saying that he is looking
for an overnight talk host to complement the station's all-day lineup of
talk hosts, so JFK's longterm commitment seems to be fairly tenuous.

In article <3805ms$jmr@vixen.cso.uiuc.edu>, Just me
<luxt@river.it.gvsu.edu> writes:

>I am writing a paper on the War of the Worlds and its impact. I am
>focusing toward the psychology of radio, the amount of persuasion it can
>have over people. What I am looking for is information. If you know of
>any good books that can be found in libraries or anything on the net
>regarding this particular drama, or the psychology of radio, please let
>me know.

Howard Koch, the radio play's scriptwriter, wrote a book on the incident titled THE PANIC BROADCAST which was an Avon paperback for God-only-knows-how-many years. The book included the text of the original script, reprints of New York newspaper coverage of the story, and an interview with speculative fiction writer Arthur C. Clarke. Any library worth its salt (even by Grand Rapids standards :-}) should either have it or have access to it.

Another book which you may want to use to filter the WAR OF THE WORLDS information through is RADIOTEXT(E): SEMIOTEXT(E) #16, an essay compilation edited by Neil Strauss and available through many alternative bookstores or directly from Semiotext(e), 522 Philosophy Hall, Columbia University, New York NY 10027, 718-387-6471.

Each of the biographies of Orson Welles that have appeared in the past ten years or so also have fairly lengthy chapters on the broadcast as well (especially try Charles Higham's and Barbara Leaming's books, both titled ORSON WELLES).

> miss or something.

You couldn't have possibly missed 104.3's last format change (less than a year ago). They played 5 songs from different formats over and over for a couple of weeks. On the last day, they played an announcement "It's comming at 6" over and over.

I don't know exactly when they changed ... but I a friend told me that he heard it Friday. I also like the new format too, but my friend hates it.

I was listening to The Colt over the weekend and I heard some commercials about a fund raising event sponsored by "The New Soft 104.3."

Also, for those of you outside of the Baltimore area, the name "Colt" is another sign of Baltimore's anger over the NFL Colts leaving Baltimore.

They even have a bumper that says "In the middle of the night, Mayflower moving vans brought The Colt to Baltimore." That's how the NFL Colts left, by sneaking out in the middle of the night using Mayflower moving vans.

Right now, there are only DJ's, news, and traffic in the morning drive slot. Also, they are still identifying themselves as WSSF (their Soft 104.3 calls).

4454. Looking for lost DJ

Try the latest `Broadcasting & Cable Yearbook.' Should be available at
most big city and university libraries. Turn to the radio stations
section, and you'll find a state-by-state listing. Within each state,
stations are listed by town, sorted alphabetically by call letter.
Each listing contains information such as who owns the station, network
affiliate if any, format, specialty programming if any, national or
regional rep, power, frequency, names of major officers (VP/GM, GSM,
PD, etc.).

I'm looking for anyone affiliated with stations carrying the BBC World Service from PRI (formerly APR) during the overnight hours.

(1) What hours do you carry the service?

(2) Have you experienced failure of the ID trigger tones at :59:32? If so, what has your station done about it?

(3) Have you experienced program failure of more than 20 seconds? If so, what sort of backup does your station have for this outage?

(4) Have you found PRI to be unresponsive to your complaints about these problems?

(5) Were you aware that PRI actually has a LIVE person on duty who manually punches in the tones and manually monitors the output?

>come the
>format isn't more widespread. Everyone loves comedy, it rules TV, and
>there's a
>wealth of recordings out there?
>
>
>

I remember a all-comedy AM station out in Thousand Oaks, CA. Operated for about nine or ten years (1982?-1991).

I don't remember what the ratings were (it was a small, local station with an extremely weakened signal at night), but to last for almost 10 years, it must have had some following . . ..

4468. EBS really voluntary?

Whenever I hear a test of the Emergency Broadcast System, the
announcer always says the station is doing this "in voluntary
cooperation with" the FCC (or some government agency).

I wonder if it's really voluntary. Does anyone know of a
station anywhere in the U.S. which is not part of the EBS and
still gets their license renewed? Does anyone know if any
station has tried to pull out of the EBS?

(It's been many years since I took the tests, but I don't
remember any questions at all about the EBS when I got my First
Class Radiotelephone license.)

> Could anyone point me to any articles, or posts that contain
> information about how NPR lobbied the FCC/Congress, to have
> small wattage stations eradicated from our nation?

I believe your request is predicated on a misconception. There was a filing over 10 years ago requesting that 5 and 10 watt non-commercial stations be required to increase their power to 100 watts. It received support from most of the educational broadcasting organizations, the NAB, NPR and CPB. The final order gave those smaller-power outlets the time to make the change-it eradicated no one. A local public-school radio station (KWDM-FM, owned by the West Des Moines School District) stayed at 5 watts until one year ago-when they switched to full (100 watts) power and went stereo.

> and that Western Culture and lifestyles are not the scourge of the
> developed world?

Yeah, right. More right-wing blather. Cast everyone in the media as
a commie. Maybe if you say it enough the really stupid people in this
world will believe you. Everything I implied about right-wing esp.
faux-Christian radio is true. They advocate denying human rights to
gay people, outlawing abortion and forcing children in public school to
participate in Christian prayer. They can't imagine how anyone who is
not posessed by the devil could disagree with these self-evident truths.
Public radio and PBS give plenty of time to conservative and reactionary
viewpoints. I know, I listen to WBEZ and watch WTTW in Chicago regularly.
Just how often do you listen to Pacifica (we have no outlet here in
Chicago)
and do you just take note when something extremely left is said on the air
and paint the whole network with that philosophy?

<<<<<perhaps you'd like to include this in a future "Airwaves">>>>>

Today's (10/19) San Francisco Chronicle reports that KFRC has had to apologize once again to a Bay Area group for offensive material on the Gary Bryan/J. Paul Emerson morning show.

The reason: A parody song about Judge Lance Ito, presiding over the O.J. Simpson case. The song, called "Ito Ito" and done to the tune of the Dixie Cups' "Iko Iko," included Bryan speaking in a supposedly Japanese-accented voice. Members of the local Japanese American community protested to KFRC GM Will Schutte, who offered an apology and pulled the song from the air.

Earlier this year, KFRC got into hot water with the local gay and lesbian community over Bryan's on-air remarks that gay relations were "sick and pathetic." After a long period during which phone calls went unreturned, San Francisco city supervisors got involved and pressured then-GM David Bramnick, who finally offered a public apology.

The KFRC AM/FM combo ranked #2 25-54 in the Summer Arbitron. Though I don't have actual numbers in front of me, the morning show did register a substantial ratings gain.

KFRC is an oldies simulcast except for times when the AM broadcasts A's Baseball and San Jose Sharks hockey.

[Moderator's Note: Sad. Can't even have a parody or comedy tune without rubbing some oversensitive soul the wrong way. I'd love to hear the tune. Anyone wanna digitie it and send it? Even a minute or so would be great. Bill]

There is an excellent Children's show named "Kid's Corner" on WXPN - 88.5 FM in Philadelphia, Pennsylvania. The host's name is Kathy O'Connell and you can write to WXPN at P.O. Box 31926, Philadelphia, PA 19104-9998.

4481. Re: Has KMPC sunk out of sight?

From: tomleykis@aol.com
Message-ID: <3859ps$6m@vixen.cso.uiuc.edu>
Source record: 37208

For the record, KMPC had a 0.8 12+, and as low as it is, that represents a 60% increase over the previous 0.5. It is the highest number this station has had in over a year.

Indeed, Lance, KFI took years to achieve what it has. Anyone who wants to gloat about KFI beating KMPC ought to look back at KFI's first 12 books or so as a talk station.

Tom Leykis

I am looking to find shock mounts to mount the Technics Sp10
turntables. Ideally the ones used with a Mccurdy pedestal. If anyone knows
how I can get them please let me Know?

Thanks

4487. Leykis takes a "JAB" at the Sports Babe during "N.A.B."!

Newsgroup: rec.radio.broadcasting
Date: 1994-10-20 08:29:57 UTC
From: au664@freenet.buffalo.edu
Message-ID: <3859q5$77@vixen.cso.uiuc.edu>
Source record: 37214

Tom Leykis did his National Radio Show from the lobby of the hotel
in L.A. where this years N.A.B. convention was being held. I liked
the fact that he talked about many issues concerning the change in
radio in recent years. He touched apon the subject of Reagan's
deregulation of the industry which brought about people buying
radio station that had no formal training in broadcasting at all.
People who were looking for quick profit and had little concept on
programming. That kind of talk was interesting and he had some
fascinating guests.
However... towards the end of his show on Friday when he came
back from one of his commercial breaks, he mentioned a rude comment
he overheard someone saying about what the "Fabulous Sports Babe"
really looked like. I don't want to say it but it refered to how fat
she is. I thought the comment was uncalled for and many of the "Babes"
many fans started calling in and telling him the same thing. He kept
on saying he didn't say it, that he "was just repeating the comment that
he had heard."
I thought the comment was kind of a "low blow"... forgive the pun. :-)
Many people in the radio business "carry alot of weight around",
(if you know what I mean!) That's why their on the RADIO!
The Sports Babe has a dynamic show and she handles all callers and
guests with a brutal,fast paced, honest method. Everboby in the radio
industry can learn from how she handles a Network Show! It doesn't
matter what she looks like and you don't even have to be a sports fan
to enjoy her show.
I know Tom Leykis reads this newsgroup and I'd like to tell him,
I like the radio issues he brings up, but he could leave oout personal
attacks like this against someone who works at his own Network of
"Westwood One".

Later,

Paul

From: jmoore@aed.org
Message-ID: <3859q9$7c@vixen.cso.uiuc.edu>
Source record: 37215

I am writing a proposal for an international visitor project that will bring 15 radio broadcasting professionals from different countries to the United States under the sponsorship of the U.S. Information Agency. For five weeks, beginning in late February, 1995, the group will study the radio broadcasting industry in this country. I would like to ask the readers of this newsgroup for suggestions as to themes, sites, stations, individuals, etc. that might be included in the group's itinerary. I would also be very interested in other sources to which I might turn for advice. The English-speaking group will reflect a wide range of experience and sophistication and will include management, technical people, producers, and on-air personalities. They will be accompanied by U.S. escort officers assigned by the Department of State's Office of Language Services.

The group will spend its first week in Washington, DC, with a series of introductory meetings that will focus on the role of broadcast radio in our society, radio & democracy, and government regulation. Some of those organizations will include (pardon the acronyms) the FCC, VOA, NAB, and NPR. After that, the itinerary is up for grabs. The balance of the calendar will be divided into five or six modules, each including approximately three business days and some leisure time, and each focusing on a different aspect of radio broadcasting in the U.S. During several of those segments, the group will be split into smaller teams and sent to different cities in order to allow the participants a bit more individualized contact. Some module themes that have been suggested include censorship & the First Amendment, radio journalism education and training, and commercial competition and survival.

Please send questions, suggestions, and advice to me directly at JMoore@AED.ORG I am new to the net so if this request violates established etiquette, please accept my apologies in advance. Thank you.

There's a book written by Howard Koch, the guy who produced the show about the event. It was written many years ago, you might find it in your local library.

As I've been told, the reason for the panic is the way the show was presented in the infant days of radio. This showed the power of the medium, as the Kennedy assassination did for TV.

You may also want to contact Radio & Records regarding recent EBS violations. I recall a station in St. Louis during the Persian Gulf war doing a false EBS alert and they got hammered.

Contact Van Harden, PD of WHO Radio in Des Moines, Iowa. I rewrote the script, making it local about 5 years ago, we produced it with all of our own newspeople, as if it were really happening, promoted it for a solid month in advance, and still got people all worked up!

Van has some articles about people's reactions and can tell you about the calls (both positive and negative) that the broadcast generated.

I'm working now for WHO's FM sister (KLYF), but it was great when we did it...

Van's number is (515) 242-3671... mine is 242-3670.

From: wd8jeljim@aol.com
Message-ID: <3859qh$89@vixen.cso.uiuc.edu>
Source record: 37219

On 10-18-94, WJMP 1520 licensed to Kent, OH ended its broadcast of a continuous loop tape which included a version of "Take me out to the ballgame" with a notice stating that "all sports talk programming has been suspended" pending the settlement of the MLB strike. The tape had been broadcast since August, and was the sole programming of the station during this time. The station's FM sister station's (WNIR) news department noted that the announcement had been broadcast over 50,000 times during this period.

(Perhaps) coincidentially, this author had sent a fax to WJMP's management just the day before, suggesting that WJMP was NOT broadcasting in the "public interest, convenience and necessity" by transmitting such a superfluous communication.

Programming of syndicated sports talk programming has resumed.

>I am writing a paper on the War of the Worlds and its impact. I am
>focusing toward the psychology of radio, the amount of persuasion it can
>have over people. What I am looking for is information.

If you want some contemporary information you might contact Van Harden, our program director at WHO radio. About 4 years ago, WHO produced its own version of "War of the Worlds"...completely re-adapting the script to make it fit our community. All of the news reports used WHO radio newscasters and personalities. The broadcast began by interrupting Bruce Williams' TALKNET show.

The event was publicized two months in advance...and with heavy promotional emphasis the week before.

In spite of that, the switchboards at the local police stations in our area were flooded with calls reporting unusual phenomena. In our broadcast, the "spaceship" first landed in a farm field outside Adel. The county sheriff's office sent a squad car out to the area we described on-air to check it out! (When I called her after the show, the dispatcher nearly killed me...).

We had a lot of fun...but I doubt we'll do it for awhile.....

BIRDWATCHER [Gary, MI] at 21:28 EDT

Ever want to program a major shortwave station? Pick the kind of shows YOU want to hear?

Well here is your chance!

I have been asked by Adam Locke of WWCR to post the following:

To all WWCR Listeners:

This is your chance to let us know what you want to have more of. For months we have been doing country music to the world in the afternoons. Do you want this to continue, or would you like to have more talk programming during the day? Any favorite talk shows? Other ideas? Mail us a post card with the top five shows youwould like to hear during the day (no phone calls please).

EMAIL US at: NMKS01A@PRODIGY.COM

Or write:

WWCR AFTERNOON PROGRAMMING SURVEY
1300 WWCR AVENUE
Nashville TN 37218

Do it TODAY!!

Note: Please spread the word. Can someone post this on rec.video.shortwave and FIDO SW ECHO?

I can not access these conferences. Just repost the message.

I have already said what I would like. Also WWCR will be running their afternoon programming on a new lower frequency, so we can all HEAR it during the afternoon hours.

Try the latest `Broadcasting & Cable Yearbook.' Should be available at
most big city and university libraries. Turn to the radio stations
section, and you'll find a state-by-state listing. Within each state,
stations are listed by town, sorted alphabetically by call letter.
Each listing contains information such as who owns the station, network
affiliate if any, format, specialty programming if any, national or
regional rep, power, frequency, names of major officers (VP/GM, GSM,
PD, etc.).

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the noncommercial, electronic newsletter for folks who
enjoy collecting and listening to nostalgic radio programs is proud to
announce the acceptance of charter subscriptions.

OTR was founded after discussion in Usenet newsgroups and email
exchanges, indicating the desire of a number of Usenet users to
have a forum dedicated to the hobby of listening to old-time radio
(OTR) programming.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the anticipated topics include (but are not limited to):

Lists of AM radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during
the "golden age of radio", would like to learn more about programming
on the "TV without a tube" that fascinated your parents, or would like
to contribute your topical expertise, send in your subscription
request now.

Are you interested in the "Modern Day" radio dramas and how they
compare and contrast to the 'Golden Age" of radio? If so, then OTR
is for you.

Subscribers will receive periodic emailings of contributed articles.
in a daily digest format (as news warrants). You may enjoy reading

OTR while listening to your favorite radio dramas. An enjoyable
example of sensory multiplexing :-).

-o-o-o-o-o-o-o-o-o-o-o-o-

To subscribe, send an email message in the following format:

To: otr-request@airwaves.chi.il.us
Subject: SUBSCRIBE

You will receive a 'welcome' message with even more information.

OTR is brought to you courtesy of -Airwaves Radio Journal
and Lou Genco, who actually remembers some of the original programs |-).

> always been done that way?

Hi Neil:
You will notice that in Europe they do not use the odd frequencies. This is
for separation. Odds in Americas, Evens in Europe.
This must have been set up before the big war, otherwise USA would be Evens and
Europe would be the odd ones. :-)

Gus Wirth from USA that has the telephone country code of 1 (set up after the
big war) :-) Hope this answers your question. For your information on
TV the VHF has a one channel separation and the UHF has 6 channel
separation in USA.

4499. San Diego County Report

San Diego County Roundup for Oct. 20, 1994

Here's the latest in news from the 15th and 55th markets.

KCLX-FM (San Diego, 102.9 32kw) changed from a classic rock to the newly invented "beach" format about two weeks ago. The former rocker decided that KGB-FM and KIOZ had the rock format sewn up -- and ventured into a format that: well, it reminds me of a skit on Saturday Night Live with Steve Martin and (I believe) Bill Murray:

"What the hell is that?"
"I don't know what the hell that is! What the HELL is that?"
"What is that dang thing, what the HELL IS THAT!"
"I know what that is ---- what the hell is that?"

I think you get the idea. It's a cross mix of disco -- remember that? -- Beach Boys and AOR rolled around -- into an uneven mix. What the hell is that? 'CLX calls it Beach format. I call it confusion.

"Hanging'' with Mr. KFI on Sunday, Oct. 16, was Weird Al Yakovic. He premiered the new single, "Headline News" based on the Crash Test Dummies "mmm-mmm-mmm" hit. It's quite funny, taken from the tabloid news that has filled the press. Mr. KFI's show is heard exclusively on KFI (640, 50kw U) on Saturday and Sunday from 6 to 9 p.m. Pacific, until the next millennium.

As previously sent; and noted in the Airwaves Journal: Where is KMPC in the latest round of ratings? An article I read in "Talkers Magazine" claimed that when WABC-AM (New York) jumped from music to talk, it would take ten years. In these days of "ratings make everything," does CapCities/ABC have the same patience? KMPC, the 50kw daytimer, didn't show in any books that I have seen published.

In the San Diego County Talk Wars, upstart KOGO (600, 5kw U), actually doubled -- from a .6 to 1.2 -- while cross-town rival KSDO dropped from 5.5 to 5.0. KFI dropped from 3.2 to 3.0, and that may count for KOGOs rise. I believe the best show is George Weber, nights from 6 p.m to 9 p.m. KOGO has a great signal at 5kw; often I'll hear callers from Santa Barbara or Bakersfield -- a distance of over 300 air-miles.

[interestingly: KFI targets the LA metro area; doesn't include SD or North SD in it's audience -- and yet captures an impressive rating for a fringe area. KFI is the number one

station in the North SD books at 6.9!]

>from the reader's post:
The October issue of "Talkers" magazine I grabbed at the World Media Expo claims that Art Bell is now on 130+ stations in the U.S. and Canada.

Broadcast & Cable: The FCC is near to addressing the "new" EBS. Reed Hundt told an LA audience that the commission is working to insure "it understands" the costs associated with EBS.

AM stations expanding to the 1600 - 1700 band is moving forward. B&C says the FCC will issue an allotment plan for stations moving to the new area. Larry Eads (FCC) says the move will number less than 100 stations.

Radio World's Oct. 19 edition reports there is a change in the 200 mile (320 km) FM border agreement between U.S. and Mexico. For further info, e-mail me. It basically establishes new station classes (Class AA 6kw for example), and brings the agreement closer to current FCC rules.

[I'm still trying to find the scoop on Par Broadcastings quest for KFSD 94.1 signal; and KUSI radio w/pictures lawsuit against XETV's broadcast of Fox programs. The lawsuit was generic, and wanted clarification on the so-called reported "foreign broadcast permit" that covers the fifth estate.]

For a list of San Diego radio and radio w/pictures, please e-mail me!

In a previous article, charles1647@delphi.com () says:

>I wonder just how many of these stations will go to the expanded band. . .?
>
>I doubt very many. . .
>
>Charles1647@delphi.com
>Sarasota, Florida
>

Most common AM radios can get up to at least 1620 or so, a few maybe higher (1640?). Of course, most radios sold in the past few years now go up to 1700, in anticipation of this expansion. . .

Just a quick note from the editors at Radio Business Report saying hello to everyone on this news group.

Feel free to send an e-mail to:
J.T. Anderton, Editor
Mike Henderson, Managing Editor, or
Tony Sanders, Senior Editor.

For those who don't know us, we're a weekly trade focusing on the management side of commercial radio. Hope to hear from you.

Thanks,
Tony Sanders

4502. Jim Bohannan info?...

Newsgroup: rec.radio.broadcasting
Date: 1994-10-21 07:08:45 UTC

Asking about a sattelite comedy service

I don't believe the service ever got off the ground. They were based out of St Louis, and a friend of mine was supposed to be a programmer for them. From what I recall, the company worked on putting it together for awhile, but it never flew.

4505. David Brudnoy

Newsgroup: rec.radio.broadcasting
Date: 1994-10-21 07:08:48 UTC
From: Samuel Antonio Minter <Abulsme+@CMU.EDU>
Message-ID: <387pe0$shq@vixen.cso.uiuc.edu>
Source record: 37107

I've been wondering this for awhile, so let me ask here where I know a variety of people will know...

A while back I rember listening Brudnoy deliver a "farewell address" from WBZ. They were putting some sort of network program on. His farewell was realitively emotional and he vowed that he would be back on Boston radio.

I live in Pittsburgh, where KDKA normally washes out WBZ, and only happened to be out of town where I could hear 'BZ that particular night. Thus I couldn't tune into the station again for quite awhile.

When I did, David was back, and with expanded hours.

What were the exact mechanics that led 'BZ to decide to dump Brudnoy in the first place, and then more interestingly what exactly made them change their minds? How long was Brudnoy gone? Etc.

Or was I just hallucinating that whole "goodbye, I will be back" speech???

Thanks for the info!

4506. DXing off an AM Transmitting Antenna: Results

Newsgroup: rec.radio.broadcasting

>Subject: DXing off an AM Transmitting Antenna: Results
>Message-ID: <Cy08A2.7o5@world.std.com>
>Organization: The World Public Access UNIX, Brookline, MA
>Date: Fri, 21 Oct 1994 03:56:25 GMT
>Lines: 69

So how did it all work out? Not bad for a first try at it.

Our engineer (Peter George, N1GGP) ran a piece of coax out from
the transmitter room and terminated it in a coil of wire wrapped
tightly around a paper towel tube (three cheers for high tech!)
Rather than attempting a direct connection, we used the coil
as an "RF wand," moving it around the radios to do some primitive
phasing.

The receivers used included three Superradios (one SR I and two
SR IIIs), a DX440, a Sony 2003, a Sony SRF-42 AM stereo
walkman, and a Radio Shack TM-152 stereo receiver).

The antenna was (and is) the 285 foot tower of WJIB 740 in
Cambridge MA.

To the log, then...

(all times EDT)

2300 Wed 19 Oct - 820 WQSI Frederick heard with legal ID, news
2302 - 890 WLS very strong, with a 1khz het, which later
proved to be Algeria 891.
2304 - 800 CHRC Quebec PQ w/mx in FF. Moving the wand
allowed us to clearly differentiate CHRC,
CKLW, and CJAD.
2312 - 1300 WJFK Baltimore weak
2322 - 1070 CHOK, again moving the wand to move between
completely clear CHOK and CBA.
2326 - 1130 something UNID heard under WBBR, maybe KWKH?
2336 - 810 WGY phased out, CJVA Caraquet NB heard clearly
2354 - 640 CBN heard clearly w/class mx. Stayed with CBN
till s/off began, then flipped rapidly among
640 CBN, 540 CBT, and 990 CBY till carrier
dropped on all at 0005.
0028 Thu 20 Oct - 891 Algeria heard on DX440 with WLS

completely nulled. We stayed with 891 for much
of the hour, listening to the chanting in Arabic.
891 was the only good TA of the night -- 774 Spain
was a tentative log.
0100 - cranked up the stereo receivers to listen to WOWO
for a few minutes. Nice and strong.
0105 - lined up the three SRs and tuned them to 740 CBL,
940 CBM, 1550 CBE for the sign-offs. 740 was
of course incredibly strong.
0117 - 940 XEQ heard under CBM's tone, and then much stronger
after CBM dropped carrier. "La Q" was so strong
I was listening in the car on the way home!
0126 - 740 CHCM heard till top-hour (0130 EDT, 0300 NDT)
ID of "VOCM Radio Service." Class mx weak underneath -
likely CBX.

Nothing earth-shattering...but this was just a first try, after all.
We've already been offered the use of another local AM station's
backup antenna (at a different site from their main tx site)
to try it again.

Any comments on the reception ought to be directed to
radio-nerds@halloran-eldar.lcs.mit.edu -- that address
will reflect the mail to all 4 of us who took part in the
evening of Tall Tower DX.

I once worked for such a station. They were required to monitor EBS, then sign off if an activation was done, basically "stay out of the way" of stations participating in EBS. In the SF Bay Area EBS is seldom activiated (maybe once every 3-5 years for river flood warnings during especially severe storms), so I never got a chance to check out how this would be done in practice.

>and paint the whole network with that philosophy?

Would you like a copy of their program schedule? I'm sure even you'd find them
definitely left of PBS/NPR. We can argue about whether ABC, NBC, CBS, FOX,
PBS and NPR are "left-wing", "right-wing", etc. But one look or listen and
you'll know where Pacifica stands.

My question still stands. Would they be subject to your "Fairness" rules or
not?

[...]

ab415@lafn.org (charles hobbs) countered:

} My question still stands. Would they be subject to your "Fairness" rules or
} not?

I can't speak (nor would I dream of speaking) for either of
these posters. However, I would say that, YES, if there was a
<so-called> fairness doctrine that it should apply to all broadcasters
or to none of them. Attempting to excempt *your side* from having to
allow *their side* to access such a doctrine is ludicrous.

What amaes me is how many people who oppose a Rush Limbaugh, feel that
we need a "left-wing Rush on the air to 'counter' the effects of
Limbaugh. I say *nonsense*. Most in this forum know that I have no
love for Mr Limbaugh's program. However that is not because he is an
<alleged> conservative or that I am some kind of liberal <whatever
than means>, it is because I oppose the one-sided, binary-choice,
black and white world of Limbaugh's presentation, and the way it
encourages people to think in those terms.

I am also quick to point out that the left wing is just as full of ...
themselves as is the right wing and what is needed on the air is not a
Left Wing Rush, but a more balanced program. Interestingly, such a
program would be infinitely more effective at persuasion, due to the
fact that it would not be as predictable and one-sided.

With Rush, you always know what he is going to say before you tune in. If you like that message, you listen. If you don;t you tune elsewhere.

<Rant Alert>

As for the Fairness Doctrine, as long as the FCC chooses to regulate radio's content in other ways (obscenity for example) then I think their regulatory power should also do something to be sure that an entity with a singular point of view, does not monopolize the <so-called> public airwaves to hammer home thier point without some accountability to the other sides of issues. This goes for both sides of the debate,, left and right, conservative and liberal chirsitan and non-christian.

Lately the FCC seems to hold very little regard for the public in its rulings. With all the duopoly (read: monopoly), LMA, and 80-90 changes, the Commission can no longer hold any reasonable assertion that it its acting in any way towards the public good/interest. Instead it is showing itsself to care not for the public, but instead sheding any remaining shroud from the notion that 'radio is a business, only a business and the player with the most chips takes the pot'.

The previous poster spoke of 'faux christian hate talk'. I personally am very concerned about the mass encroacment of <so-called> christian radio networks who are buying up stations and placing powerful translators everywhere.

And all of it is tax free!!!

Here in SW Missouri, a Christian station in Camdenton Mo (KCVO) owns and operated 9 translators ranging in power (allegendly) from 50 - 250 watts (the main signal is 10,000 watts). In many places their translators are in places where their main signal is very audible.

Is this a wise use of spectrum? You tell me. In any event, I digress.

I know the Fairness Doctrine is a hot topic,, and that I come down on a side that is less popular with the broadcasting community. Also, I am not sauying that I agree with *any* fairness doctrine. I do, however bemoan the not-so-gradual erosion of the idea that broadcasting is a service first, and a business second. I do not want a 'fairness docrine' as much as I would like to see broadcasters act in a fairer manner.

As long as the FCC maintains such high hurdles (financial and spectral) to the entrance of new stations and continues to allow translators to exist, yet make it essentially impossible for a community to have 5 or 10 watts on the air legally for the dissemination of programming not carried by mainsteram media, then I believe it is also up to them to assure that the station that DO exist are accessable by as many views as possible.

I am sure this viewpoint doesn't make me real popular with some of those on this list, but let me assure you that I am not anti-mainstream broadcasting. I love radio, that is why I moderate this forum. Also, I do *not* agree with the "In Your Face" tactics of Free Radio Berkely's "Let 1000 Transmitters Bloom". But I do wish to see the broadcast medium more open than it is, whether this take a Fairness Doctrine, or a Free Radio Berkely, or just an awakening of the broadcast community that there IS money to be made in "serving a community". However it takes guts and a commitment little seen in today's consultant-driven broaadcasting scene. Are there any *real* broadcasters left?

Bill

Seattle has a station devoted entirely to kids, KKDZ ("Kidstar"). They're at 1250AM. They've been going for about a year and a half, and doing decently. I hear they may move the format into other markets.

For info write 1334 1st Avenue, Suite 150, Seattle, WA, 98101-2003, or call 206-382-1250.

The Boston market is getting its first radio show about radio. WJIB 740 in Cambridge will debut a show tentatively called "Let's Talk About Radio" this Sunday, 10/23, at 2:30pm...and every Sunday thereafter at the same time.

It's as bare boned as radio gets...station owner Bob Bittner, engineer Peter George, and me sitting around talking radio for half an hour.

We welcome comments, questions, and above all a better name for the show :-) Send them to WJIB, POB 848, Needham Heights MA 02194.

The show will be simulcast on Bob's other station, WKBR 1250 in Manchester NH, for listeners up that way.

If you're near Boston or NH, check it out and let us know what you think!

The Indianapolis Star recently published summer ratings for the top 10 stations in the market in the 12+ and 25-54 demographics. Here's the scoop:

12+ 25-54
1. WFBQ-FM (AOR) 13.7 1. WFBQ-FM (AOR) 17.7
WFMS-FM (Country) 13.7 2. WFMS-FM (Country) 14.1
3. WIBC-AM (N/T) 8.2 3. WENS-FM (AC) 8.2
4. WENS-FM (AC) 6.3 4. WKLR-FM (Oldies) 6.6
5. WZPL-FM (CHR) 6.0 5. WTPI-FM (EZ/Lite) 6.4
6. WTPI-FM (EZ/Lite) 5.7 6. WIBC-AM (N/T) 5.9
7. WKLR-FM (Oldies) 5.4 7. WTLC-FM (Urban) 4.8
8. WTLC-FM (Urban) 5.2 8. WZPL-FM (CHR) 4.2
9. WRZX-FM (Alt Rock) 5.1 9. WGRL-FM (Country) 3.9
10. WHHH-FM (CHR) 4.0 10. WRZX-FM (Alt Rock) 3.6

Caveats:

** The formats noted above are based on my listening to these stations, since the Star did not give format information.

** The Star listed WKLR as WNAP, but since the station was still WKLR running the Oldies format during the book, I listed it as such here.

A St. Joseph radio and TV host has lost his TV show after his conviction and sentencing in federal court on hunting-related charges. Fred Ramsey was sentenced Thursday (Oct. 20) to eight days in jail, three years of probation, and 100 hours of community service after being convicted of violating federal hunting laws by shooting too many ducks during an outing last November.

According to a report in the Kansas City Star, the federal Fish and Wildlife Service had accused Ramsay and a fellow hunter of shooting 28 mallards sitting in a marsh during one day of the outing. The daily limit is two.

St. Joseph television station KQTV ("KQ2") manager Jerry Condra cancelled Ramsay's show immediately after learning of Ramsey's sentencing.

Ramsay also has radio talk shows on St. Joseph station KFEQ(AM) and Kansas City station KCMO(AM). A KCMO spokesman says Ramsey's show would continue. No information was available regarding Ramsey's status on KFEQ.

*****

Kansas City station KMBZ(AM) is carrying the World Series through October 30.

Obviously, the station isn't carrying *this* year's World Series, nor next year's. Instead, KMBZ is replaying tapes of the 1985 "I-70" World Series between the Kansas City Royals and the St. Louis Cardinals.

While the station is calling the games a "gift" to Kansas City baseball fans, it's also a shrewd reminder that KMBZ will be carrying Royals baseball again next season after three years on WDAF(AM).

*****

This week's mysterious transmission: KCFX(FM), testing a 67 kHz subcarrier Tuesday night (Oct. 18). The subcarrier merely relayed main-channel programming, and was gone the next day. The SCA signal was heavily compressed and squelched during quiet periods, which may suggest its eventual use for a background music service.

*****

This week's disappointment, while reading the list posted by Shaun Maher: no Kansas City-area stations getting expanded-band allocations. The only Kansas allocation is KYUU in Liberal, in the southwestern corner of the state.

In Missouri, the only winner was Hannibal's KHMO. However, given KHMO's tradition of regional coverage with a 5 kW directionalized signal at 1070 kHz, it's hard to see how a move to 1620 kHz will benefit the station. While the station would be able to do away with its DA, it also will certainly give up some coverage at the considerably higher frequency.

In Kansas City, there were many rumors about KFEZ(AM) having a spot
on the list, enabling it to move off 1190 kHz and an extremely critical
pattern (six towers pumping out 250 watts) at night. However, with a
station at 810 kHz (harmonic at 1620 kHz), a TIS at 1610 kHz, and a
station at 1590 kHz, there evidently were too many constraints to make
such an allocation work.

>Just curious...is ARS disappointed/anxious/worried about the
>decline of WRKO, and continued format dominance of what
>used to be also-ran WBZ?

>From this view : ARS is a proudct of the '90s conglemarate radio
biz..They're more into the bottom line aspect when it comes to
running all of their Boston stations. In a 24 hour broadcast
day 'RKO only broadcasts 18 hours of original programming[the other
6 hours at night are spent repeating its two afternoon shows]. 8 out
of those 18 hours are syndicated. That comes down to only 10 hours
of live local programming. The highest-paid employee is probably
the man who's only working 2 of those 10 hours and nearing
his retirement -- Jerry 'I am getting out of the business' Williams.
I think that as long as 'RKO makes some amount of money ARS will
stick to this dollars and cents formula...And, as long as there's
no direct competition in the market it'll be business as usual at
116 Huntington Ave....

-Mark
Remembering the 'RKO of the early '80s.

Early indications from our data indicate that the recent combination of WRKO and WHDH programming on WRKO's frequency is paying off to the tune of higher numbers for WRKO. In addition, the placement of WEEI's sports programming on the old WHDH frequency has already lead to a half-a-share point jump. Once I have had a chance to thoroughly review our data from the first four weeks of our Fall survey, I will post a note on the effects of the ARS changes.

charles1647@delphi.com wrote:
: I wonder just how many of these stations will go to the expanded band. . .?
:
: I doubt very many. . .
:

I only know about one -- KWHN in Fort Smith, AR, whose owner has expressed a definite intent for pursuing this. Here's his rationale.

The DA of KWHN at 1320 kHz has a null that renders the station inaudible in the part of Fort Smith and Sebastian County that has had the most growth. Fort Smith's major regional shopping mall is in this area as well. While his daytime signal is unimpaired, he's not selling spots in eastern Oklahoma on KWHN -- what he can sell is Fort Smith. So what he wants to do is solidify his Fort Smith coverage, even perhaps at the cost of some regional coverage.

Hence, if KWHN can move to 1670 kHz, with 10 kW daytime, 1 kW nights, ND both, and with the stations carefully spaced to avoid interference, he can get the city coverage he needs. This is especially critical for a news/talk station such as KWHN -- if listeners can't hear you, they're not going to call in.

HI!
I represent WUMD Radio, AM 560 Carrier Current at the University
of Maryland Baltimore County(UMBC). We are a station which severely
lacks proper equipment to broadcast effeciently.

Basically, we need a decent broadcast console which works and is reliable
but the problem is we do not have money. We have 1 board which works,
but cannot be sure how much longer it will last. We have 2 other nice
boards which would do very nicely if they worked. If anyone can provide
parts for these boards, we would be very greatful. Also, does anyone
know of an organization which donates radio broadcast equip. to college
stations?

Our goal is to get a regular broadcast signal this year, but it is no
good without decent working consoles.

Thanx.

Hi!

I live in Garden City, MI. where I listen to my favorite radio station, Young Country. I asked one of the D.J.s how they got their live signal back from the Country Music Awards, and this is what he said:

The CMA broadcast came back over ISDN lines... yep, those same things you read about in PC mag. Actually, we were on Switched 56 one day, satellite one day, and full-blown ISDN the other two. The box we use is called a Zephyr. It takes the ISDN pair of lines, and sends compressed digitized audio at 56 to 64Kbps to the receive unit in our Chief Engineer's equipment rack. Lots of advantages, chiefly it's cheaper. Per-minute ISDN rates beat the holy crap out of satellite time. Plus, it's there when we need it. If we want to feed down the "on-the-street" bits at 9am to have them edited up by 3, we just plug in and go. And, with all the "on-the-street" bits going to a portable DAT and edited on a digital editor, then stored on our Troll... there's NO analog noise. None. MOF, I defy you to tell me which interviews ran live, and which ones were delayed.
The Zephyr can be configured to send two 15Khz channels from the remote site, and return one 7.5Khz IFB. Since we didn't need the stereo, we ran it 15Khz mono both ways. In my headsets, it sounded like I was right there. There's only a third of a second delay to account for the analog to digital to analog conversion. Soon, any station (we're the only ones with the gear at the moment, although I hear CSX just bought a box) will be able to air a live concert from anywhere with minimal expense. You'll be hearing more and more "away from home" broadcasts. We're even going to use the gear for at least one of our "World Tour" stops, since the Marti transmitter can't reach the studio from there.

I asked one of my friends who used to be in radio, and he was clueless. He said that if anyone knew any of this, you guys would. Can you help?

I always wondered if there were people who collected jingles, spots,and be hard/impossible to get (bootlegs? ;-)
I know you can get old commercials from records and CD's. etc from many stations and eras. Is there a source for this.
Would old stuff still be copyrighted, for example "WABC! <bell gong>"

Thanks for your help!

Frank,
There are many jingle collectors around, I being one of them or more accurately , I used to be one. I have not collected any jingles in some time. Jingle collectors get their jingles mostly from other collectors or if someone has a contact at a radio station, they may get dubs directly from the station. Many also get a hold of demo tapes which jingle companies send out to various stations.
From 1963 through 1974, the jingles you have heard on WABC were produced by a company named PAMS Of Dallas. They produced classic 1960s jingles such as the WABC! <bell gong>you refer to (actually this particular jingle was an edit WABC made, splicing the end of a weather jingle from Series 30 to a chime, which was formerly used as a stand-alone. The edited jingle first appeared in 1965). In late 1974, WABC briefly used Tanner jingles and then they switched to JAM Productions of Dallas, which I belie
ve still produces jingles for their talk format.
Today, KEN R. Productions in Toledo Oh. has purchased the multi-track session tapes from the original PAMS sessions, and they now produce vintage-style jingles for numerous stations including; in the New York area, the former 66 WNBC (remember the Time Machine with Dan Taylor in 1988), WCBS-FM, WDRC-FM Hartford, WLNG AM/FM Sag Harbor NY and yours truly. Hope this was of some help.

Glenn

Frank --

There are a bunch of us "jingle freaks" out here...

I, in fact, am about to head to the airport to fly to Dallas for the mixing of a new custom package at JAM, so I can't really reply to you right now...

However, FWIW, the WABC chime cut you mentioned is a hybrid - the station added the bell to a PAMS Series 30 jingle that originally went, "The weather is IN! WABC!" There are at least three different sings of that cut (different lyrics and/or female group sound) as well...

4540. Re: Help about Kidsradio

Newsgroup: rec.radio.broadcasting
Date: 1994-10-22 21:17:29 UTC
From: FWBF05A@prodigy.com
Message-ID: <38bvh9$j5h@vixen.cso.uiuc.edu>
Source record: 37175

Kids Radio is a unique and unusual format. The show on WXPN, in Philly is ongoing and call-in. I hear it's got a great response and skews a little upward demographically. I've spoken to Kathy once and she seems to be hardworking and really on top of it. Theshow atone time was national as KidsAmerica.

Boston's WBZ has a Peabody awardwinning show produced by Jody Snider called Kid Company. It's excellent. A potpourri of kid interest stuff done well, interactive and nicely paced. It airs once a week and as of the spring, they were thinking of national syndication. You'll learn a lot from their demo.

The kids station in St.Louis just folded -- tried a combo of public and commercial funding.

Radio AAHS, is a full-time syndicated format from Minneapolic --publicly traded stock (Childrens Broadcasting). It's goten better in the past year, but is still primarily a music service with some promos. Not a lot of national spots yet-- though the L.A. affils seemed to have sold much of it locally. There seems to be more local input on the weekends. Thet're in, maybe 20 markets, now --though not too many of the majors. They've got some potential...

Fox Kids Countdown is distributed by Wally Clark Productions, out of the Los Angeles area. It's slick and borrows from the typical L.A.- produced countdown shows. Thew music's good and it really airs as a vehicle to promote Fox TV shows. It may someday be a cornerstone feature in any radio network that Fox might put together for kids.

And then there's Children's Media Network and KidStar, in Seattle. Call me biased, call me prejudiced and call me a features producer at KidStar. -- It's really got the most creative effort in the field -- head and shoulders above the others. The theory is that kids radio, alone, done right is an expensive enterprise that needs national exposure in order to create enough revenue to make it worthwhile. What's more KidStar is a mix of a full time radio station, full-color magazine and interactive telephone system for kids 6-12. Too much to explain the complexities here, but the mix has worked very very well in Seattle and the national rollout is expected this spring. It's a complex undertaking, loaded with more production than -- probably any other station in the country. What's more, we use kids voices most of the time and the editing ands coaching time it takes is considerable. It's all digital in production and lots of effects. Also educational, feature rich and musically varied.

If you're ever in Seattle, stop by -- or write me on the internet
Don@KidStar.com

Hope this helps you out. Anything else, I know is under nondisclosure.
Don.

Today's letter comes from Paul Kerr, who writes:

: I thought the comment was kind of a "low blow"... forgive the pun. :-)
: Many people in the radio business "carry alot of weight around",
: (if you know what I mean!) That's why their on the RADIO!

Actually, Paul, the reason "their" on the RADIO is because they're entertaining and do a good job. How they look or what they weigh is immaterial. (It's worth noting that even Rush Limbaugh has a TV show, as does of course Roseanne Barrnold.)

By the same logic, "good pipes" would be seem to be a requirement for radio work, but that's not the case either. If someone makes you want to listen (and come back for more), THAT'S what carries the "weight"!

Life is a Rock was by the English group made up of all studio musicians: REUNION.
Interestingly, First Class was also a group of English studio musicians who had never been to California.

Hey...don't forget Slow Ride by Foghat! And I'll bet Zeppelin was on the charts that year...which LP was out in '74?

4544. One-on-One Network status?

Newsgroup: rec.radio.broadcasting
Date: 1994-10-22 21:17:38 UTC
From: franklig@aztec.inre.asu.edu
Message-ID: <38bvhi$j61@vixen.cso.uiuc.edu>

I would like to know the current status of the One-on-One Network, formerly known as the Sports Entertainment Network. One-on-One is a nationwide sports talk network. They used to be based in Las Vegas but recently moved all their operations to Chicago.

A station (KGME 1360) here in Phoenix used to carry One-on-One until they dropped them in favor of the Sports Fan Radio Network. I understand the San Francisco sports boomer KNBR has made the same switch. From this info, I would think the network is struggling. Too bad -- Bob Kemp is the best....

From: Jerad Hoff <hoffj@mhd1.moorhead.msus.edu>
Message-ID: <38bvho$j69@vixen.cso.uiuc.edu>
Source record: 37180

I was doing my usual flipping, and Rush was on TV. He gave an example where someone overdubbed a women's voice over his saying something negitive. He then mentioned a Minneapolis station doing the same thing..I am assuming it was KSTP AM, and I thought they were excited about carrying his show.

First, why would someone risk such a thing, second, is rush just making this up and third, anyone have anymore info on it?

Thanks...

Jerad Hoff

Since I'm a Beaver alumni who was formerly subjected to the Corvallis, Oregon radio market, I feel I must respond.

Kimberly Gentry <gentryk@ucs.orst.edu> wrote:
>We
>program music that nobody has ever heard of, and our ratings are higher
>than stations with 5 times our wattage.

Corvallis, Albany and Lebanon have only 4 formats of their own: KBVR, country, AC (prerecorded) and religious. Other stations are available from 'nearby' Eugene and Portland, but their receivability spotted throughout Corvallis. With this kind of competition, ANY station could get ratings.

>You should try listening to the unfamiliar and educate yourself!

During my 4 years at Oregon St., KBVR's philosophy was to play music (alternative, metal, hardcore, rock,...) until they heard it somewhere else (MTV, Portland, Seattle, Eugene). After that the album was dropped from the playlist. An interesting idea, but just as extreme as a typical top 40 station, only in the other direction. The mentality seemed to be "if it is popular, then it must be no good, so we won't play it anymore". Maybe that would have been great if there really was some other station picking up those 'old' songs, but there wasn't. In summary, I couldn't get my music on the commercial stations from Portland or Eugene because it was too new and different, NOR could I get my music on KBVR because it wasn't new or different enough. Frustrating.

>just the day before, suggesting that WJMP was NOT broadcasting in the
>"public interest, convenience and necessity" by transmitting such a
>superfluous communication.
>Programming of syndicated sports talk programming has resumed.

Perhaps coincidence...perhaps not... but WJMP's signal has been something of an afterthought to Kaiser Bill et al. (For those who don't know, that's the nickname for WJMP/WNIR station manager Bill Klaus...the name most of the FM station's talk hosts call him on the air...sort of a tradition, as it were.) The necessity to protect WINW-AM 1520 in Canton means that WJMP is barely heard outside of Kent and Ravenna, and not at all to the south of Kent.

Aside from having been a publicity stunt run its course, the major league baseball regular season would have been over by now, and he has a legit excuse to end the stunt. ;)

In a normal year, the Indians would be nowhere near the World Series, and their season would have long been over. This year, who knows? Sigh.

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-
Try to stump the Grease, but if you don't, you best
drop them pants....
Sgt. Fury- the Grease relives his time in Viet
Deliverance 101-
a class in which the Grease analyzes the movie
Deliverance.
Clinton- a look at how life would be if the Grease and
Clint Eastwood got a knock on the head and decided
to live alternative lifestyles
Law Man- the Grease tells about life as a law man

Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen to some of his bits.

Source record: 37185

Start off with a sad note: John Katzbeck ("Katman"), sidekick of J.D.Sprangler mornings on Chicago country music outlet WUSN (99.5 FM) passed away after suffering a brain aneurysm. Katman was 29. Katzbeck was from the Chicago suburb of Des Plaines and was a graduate from Maine West High School.

As rumored, WLS-AM 890 has finally settled on a replacement team for the Ty Wansley/Ed Vrdolyak afternoon gabfest. Al Lerner, veteran media personality, has been reunited with Ed Curran afternoons. Al and Ed worked together at WGN for 5 years before being dumped. Lerner had been working nights on WLS-AM after the station split off its FM signal. Ty Wansley, who along with Ed Vrdolyak had placed the afternoon show in the top ten, was released from his contract to pursue other interests.

Morton Downey Jr. (who liked to be called Doctor) former talk show host on WMAQ (AM 670) has resurfaced with another syndicated television show. Downey had his undeserved 15 minutes of fame in the late 80's when he first left MAQ for television. The bet here is that people will quickly tire of his fraudulent pandering and we will be put out of the misery of listening to him.

Time apparently does not heal all wounds. Steve Dahl went on the attack against former partner Garry Meier when a story surfaced that Garry was being considered for a job at WGN-TV as a feature reporter. Steve teed Garry up, stating a couple of times that "I hate him. I am so glad he is gone." Many feel the show has been rejuvenated since the addition of wise cracking Bruce Wolf mornings on WMVP.

>Actually, Paul, the reason "their" on the RADIO is because they're
>entertaining and do a good job. How they look or what they weigh is
>immaterial. (It's worth noting that even Rush Limbaugh has a TV show, as
>does of course Roseanne Barrnold.)

I don't know if you were just skimming through my posting, Ron, but
I made the exact same point... that it didn't matter what the Sports Babe
looked like or how much she weighed, that she has a dynamic show and
runs a riveting, fast paced show. It's Tom Leykis you should be complaining
to about this rude comment he repeated on his Network show!
Tom shouldn't even be repeating comments like this... because I hear
that no one could ever nickname him "Slim Tom" (if you get my drift!)
I don't care about his weight either... as long as he keeps talking
about topics that interest me. I also like the fact that Tom is active
on the Internet and speaks his mind publically. I just think there is
no need for such personal attacks!
I hope you won't take a section of this post out of context and
make it look like *I* made another rude comment!

Thanks for taking the time to respond... the subject must have
"weighed heavy on you mind" to provoke you to respond. ;-)

Across Australia

GoinG_Off!! A Radio Eye Feature on RADIO NATIONAL
__________ Sunday Nov 6 at 8.20pm _____________

Something vibrant is happening in the close knit quarters of the underground. Transcending deep into the trenches of the urban tribes, producers Rosie Cross and John Jacobs investigate the high ideals and crazy dreams of those involved in the politics of dance. Dancing can be a powerful political expression of freedom and a pretext to changing social structures. But where can you go to have a good time without getting caught, closed down or ripped off!

Come to the party with Radio Eye and listen_up to the voices who are fighting for their right to RAVE. Meet the Australian tribes fearful of a similar scenario to Britain, where the Criminal Justice and Order Bill threatens the lifestyles of travellers, ravers and squatters. Can it happen here ? Or will the energy and creativeness of global do-it-yourself culture continue to allude the authorities and other threats to commercialize the scene.

Meet: Vibe Tribe, Spiral, United Systems, Prodigy, Drew Muirhead, RRAG, The Action Party, Ravers + more.

A wicked documentary!

For more info contact Mr Nick Franklin
Executive Producer Radio Eye, ABC + 61 2 3331329

worked at KFJZ, KRXV, and KXOL.
I think he is still doing engineering in San Antonio.

>
>Did you hear where KD went? And are you in the biz in Dallas or **just** a
>listener?
>

No, I did not know where Ken Dow went after the station changed Format.
In away I am in the Business, I have done volunteer work for a College station
as an announcer and for a Community Access station.
I also have a friend who is a record producer/promoter who has worked in
Broadcasting in various positions. He sends me CDs, and singles he wants
response on.
He also sold me for $100 used a 4BM50 Broadcast Electronics Board, 4-pots,
8-inputs; and an Electro Voice 644A mic for $25. I have used this to stay in
practice when not on the air. I also have built me a transmitter from a kit,
that allows me to broadca
s programming on my block. I even have gotten a call from someone who was
further than I had expected. I am glad that the NAB was not able to get the
equipment off the market. Though, they claim such operations are a sandbox and
prevent quality programmin
g by stations. However; I have not really noticed that much quality
programming in recent years except on a few non commercial radio stations.
I also edit a column on SWBCing/DXing for the Association of DX Reporters,
published out of Baltimore.
Recently ARB called to see whether I would be interested in their survey;
however; I was told I was disqualified because of my involvement in the
industry/field. So I guess I am more than just a listener, though I am not
currently on the air.

4559. Imus Radio Network

Roy Fredriks, seven years with WABC in New York, looking to P.D. talk station. Station and location take priority over salary considerations. I am posting my resume below which contains all info on contacting me. Serious Replies Only Please.

ROY FREDRIKS

340 East 93 Street, Apt 22-I Phone/Fax:
New York, New York 10128 (212) 410-4249
Internet: broadway@pipeline.com or
Gahooty@AOL.com

Objective
A Programming position where career experience will be maximized to positively enhance station operations and profitability.

Professional Summary
A dynamic, extremely creative professional with solid career experience in all aspects of radio broadcast entertainment operations, public relations, and media communications. Demonstrated ability to turn new ideas and concepts into reality. Proven problem solving and decision making skills with the ability to set priorities and organize facilities to generate top results. A strong team leader, committed to maintaining high standards of excellence. Excellent interpersonal and communication skills with individuals at all levels. Computer literate with expertise in the use and troubleshooting of Macintosh software.

AREAS OF EXPERTISE
* RADIO BROADCASTING * PROGRAMMING * TALENT DEVELOPMENT
* NEWSWRITING * PRODUCTION * SCHEDULING * SPECIAL EVENTS

PROFESSIONAL EXPERIENCE
WABC RADIO- New York, NY 1986-1993
Executive Producer
Identified story ideas, booked guests for talk shows, directed and formatted programs. Coordinated station's coverage of various major national news events. Wrote copy and edited tape. Discovered new talent; served as MC for all promotional events.
* Produced the highest rated afternoon drive time radio program in the NYC
metropolitan area for three consecutive years.
* Recommended and implemented innovative format change which resulted in
increased ratings for WABC's overnight and morning programs.
* Discovered morning drive and 9-11 am talent and helped establish them

as
major players in the market.
* Coordinated and produced successful annual radiothons for the
Leukemia
Society.
* Only Producer during seven years with WABC to win a media award for
news coverage.

WNET-TV- New York, NY 1981-1983
On-Air Announcer
Announced station breaks and fund raising spots during station Pledge
Drives

ADDITIONAL EXPERIENCE
Computer Marketing Consultant 1993-Present
Involved in the development and marketing of various on-line services for
consumers nationwide

Actor
Member of EQUITY, SAG AND AFTRA 1976-1984

EDUCATION
PENN STATE UNIVERSITY- STATE COLLEGE, PENNA.
B.F.A. in Theater Arts

>
[snip]

Just wondering...has anybody asked _where_ this guy gets his job notices
from? If he's actually getting the word directly from potential employers,
then the service would be worth something. My guess (based on past
experience) is that all he's doing is reprinting information available
elsewhere (the various trades mentioned earlier in the thread). It's
kind of awkward when you call a PD and s/he sez "you saw an ad *where*?"

And unless things have really changed in the couple of years since I last
shopped the air shift market, 42 ads would be a _very_ slow week at R&R.

4563. St. Louis Arbitrons (Summer 1994)

Newsgroup: rec.radio.broadcasting
Date: 1994-10-24 01:54:30 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <38f44m$npk@vixen.cso.uiuc.edu>
Source record: 37197

Per a couple of requests, I finally have been able to get
the St. Louis summer numbers. They are arranged by station ranking
with commentary as appropriate:
#1 -- KMOX (AM, CBS O&O, news/talk/sports, 50 kW clear-channel).
14.9 (14.7 spring, 17.2 same-book [summer] 1993). The baseball strike
certainly hurt the Cardinals flagship, as well as a perception of
decline under management imported from the CBS sales organization after
the death of longtime GM Bob Hyland in 1992.
#2 -- WIL (FM, Heritage Media, country, 100 kW). 9.1 (8.8, 8.7).
St. Louis' longtime country leader appears unfazed by stepped-up
competition from WKKX(FM).
#3 -- KSHE (FM, Emmis, heritage AOR, 100 kW). 7.9 (6.7, 7.0). A
bit of a surge for KSHE, suggesting that its recent emphasis on newer
music and more music in the mornings is paying off.
#4 -- KMJM (FM, "Majic 108," Noble, urban, 100 kW). 7.8 (7.6,
7.2). As always, a steady performer.
#5 -- KEZK (FM, Compass Media, soft AC, 100 kW). 6.5 (6.9, 8.1).
#6 -- KIHT (FM, "K-Hits," Heritage Media, 70s oldies, 100 kW). 5.6
(3.7, 1.3). Last year, the station was locally owned "Juke Box 96,"
with a 50s and 60s oldies format, and not much of a presence in the
market. The big question: can the station sustain this level of
performance?
#7 -- KYKY (FM, "Y-98," EZ Communications, AC, 100 kW). 5.2 (5.3,
4.6).
#8 -- KSD-FM (EZ Communications, classic rock, 100 kW). 3.6 (4.3,
4.5).
#9 -- WKKX (FM, "Kix," Zimmer, young country, 98 kW). 3.6 (4.3,
2.2). The 1993 numbers were with the station at its old, less-powerful
104.1 spot on the dial. The frequency swap with WKBQ appears to have
helped this station, but it still has a long way to go to catch up with
WIL.
#10 -- WKBQ (AM/FM, "Q-104," Zimmer, CHR/modern, 39 kW [FM], 5/1 kW
[AM]). 3.4 (4.6, 4.1). Zimmer bought the 106.5 frequency and dumped
the hit format onto the weaker stations in its stable. While there has
been a negative impact from the change, it doesn't seem to have hurt
the Q as much as one might have expected.
#11 -- KLOU (FM, "Clue 103," CBS O&O, oldies, 100 kW). 3.2 (3.6,
3.5). KIHT hasn't hurt this station all that much, but there's another
interesting question: could KLOU have done better before KIHT came
along? Clearly there were some potential oldies listeners that were
ignoring this station.
#12 -- WRTH (AM, Heritage Media, nostalgia, 5 kW). 3.2 (2.7, 2.8).
#13 -- KPNT (FM, "The Point," River City/KDNL-TV, modern, 100 kW
rimshot from Ste. Genevieve). 2.5 (2.9, 3.1). The station has

recently made adjustments in its playlist and presentation, no doubt in response to its relatively flat performance.
#14 -- KXOK (FM, "Mix 97," Legend [Pittsburgh], soul oldies, 100 kW rimshot from St. Charles). 2.1 (2.0, 2.3). Loss of combo partner KXOK(AM) appears to have had little effect.
#15 -- KFUO-FM ("Classic 99," Lutheran Church-Missouri Synod, classical, 100 kW). 1.9 (2.2, 3.2). This is a commercial station, exquisitely programmed, making its sagging numbers especially disappointing.
#16 -- KATZ (AM, Noble, soul/R&B, 5 kW). 1.5 (1.2, 1.2).
#17 -- KNJZ (FM, Noble, "lite jazz," 50 kW rimshot from Alton, Illinois). 1.4 (1.2, 0.8). Format switch occurred during spring book.
#18 -- WCBW (FM, ?, gospel, 25 kW). 1.3 (1.2, 1.0).
#19 -- WFXB (FM, "The Fox," LMA to River City/KDNL-TV, AAA, 44 kW). 1.3 (1.9, 1.2). Clearly a station with problems. Its talking-book subcarrier may pull down higher numbers in some dayparts.
#20 -- WIBV (AM, locally owned, talk, 5 kW). 1.3 (1.5, 2.2). The Illinois suburban station lost Limbaugh to KMOX earlier this year.
Stations I wished would have shown up in the numbers:
* WGNU (920 kHz, 500 W). This locally owned station has some pretty good talk-show host and, thanks to a well-designed DA, a signal that covers the metro area well day and night.
* KIRL (1460 kHz, 5/0.5 kW, St. Charles). This is a black gospel station rimshotting into St. Louis and the primarily African-American suburbs along St. Charles Rock and Natural Bridge roads. It is as energetic and lively as any CHR station, and keeps the preaching down to a minimum.

: The kids station in St.Louis just folded -- tried a combo of public and
: commercial funding.

That's terribly sad -- my family used to listen to it a lot when we drove through St. Louis. Is there any possibility at all that it could be replaced by one of the syndicated formats, or is it going to be impossible to start one of these in St. Louis now?

BTW, I thought I read a little while ago that WEW-AM (770 daytime 1 kw) tried this format once -- is that true? And if so, does that mean that this is a *second* failure in St. Louis for this format?

4566. Looking for operations resources

Newsgroup: rec.radio.broadcasting
Date: 1994-10-24 01:54:38 UTC
From: technofile@aol.com
Message-ID: <38f44u$nq2@vixen.cso.uiuc.edu>
Source record: 37101

I'm looking for various reference materials for radio station operations. I'm currently working with an old set of FCC regs from a rules subscription service, but the station let the subscription go quite some time ago, so the information is very dated, and, at times, very inaccurate.

Also, what's the easiest way to access other areas of law that deal with our business? For example, the regs banning cigarette spots is part of the US code; political spots fall into material issued jointly by the FCC and the agency that monitors elections. (Sorry, can't remember the exact name, but you get the idea.)

I need the info in part because there are issues on the table at my station that need to be resolved, and in part because I want to make myself more aware of the regs, both common and obscure.

Some more background info... I've searched gopherspace and found nothing pertinent. The local FCC office in useless, so please don't suggest I start there. Also, I think we're all aware that everyone in DC, Virginia, and Maryland tells you to call someone else, so unless you have a solid lead, don't send me in that direction either. The biggest thing you need to know is this: I have ZERO budget, and the boss won't flinch, so it's got to be cheap. (Free is better.)

One final question... and a major issue: the ops manager for a station left on bad terms, and destroyed some important papers in the process, including the station's license. Any suggestions on how to get a new copy? My fear is that if they ask the FCC, they'll get busted for operating without the license.

Thanks all for the help.

Boy, the 70s are alive and well, aren't they ?

In answer to the question on the song called .....
"Life is a Rock, but the Radio Rolled Me", the song was done by a group
of studio musicians called "Reunion". When this song was made the charts,
"Reunion" did customized drop-ins...for example.....
"Life is a Rock, but W-L-S Rolled Me. Gotta turn it up louder, so my DJ told
me !!!! Woo-Wooo!!!....." and you know the rest !

OH!!!! For the days of "THE BIG 89, W-L-S" and the "BOOGIE CHECKS !".

Those were great radio days,indeed !

Source record: 37125

[Moderarors Note, this is being reposted at the request of several who have written in, as are the other two segmnents of the FAIR-LIMBAUGH debate . They are also available via our archives Bill]

==========
The following is FAIR's report on Rush Limbaugh from the July/August issue of FAIR's magazine, EXTRA!

THE WAY THINGS AREN'T:
RUSH LIMBAUGH DEBATES REALITY

I do not lie on this program. And I do not make things up for the advancement of my cause. And if I find that I have been mistaken or am in error then I proclaim it generally at the top of--beginning of a program--or as loudly as I can."
--Rush Limbaugh, (Radio show, 8/30/93)

"Most of us here in the media are what I consider infotainers.... Rush Limbaugh is what I call a disinfotainer. He entertains by spreading disinformation."
--Al Franken at the White House Correspondents' Dinner (4/23/94)

Rush Limbaugh has gotten a lot of mileage out of his claim that volcanoes do more harm to the ozone layer than human-produced chemicals. He featured it in his best-selling book, The Way Things Ought to Be (paperback edition pp. 155-157): "Mount Pinatubo in the Philippines spewed forth more than a thousand times the amount of ozone-depleting chemicals in one eruption than all the fluorocarbons manufactured by wicked, diabolical and insensitive corporations in history.... Mankind can't possibly equal the output of even one eruption from Pinatubo, much less 4 billion years' worth of them, so how can we destroy ozone?" Limbaugh calls concern about the ozone layer: "balderdash. Poppycock." The only people who worry about it are "environmental wackos," "dunderheaded alarmists and prophets of doom."

Syndicated columnist Thomas Sowell (New York Post, 1/14/94) used the volcano theory as Exhibit A to illustrate Limbaugh's "very well-informed and savvy understanding of the political issues of our time." "While far more pretentious people have been joining the chorus of hysteria over 'global warming,'" Sowell wrote, "Limbaugh pointed out in his [first] book that one of the high readings of greenhouse gases in the atmosphere came right after a volcanic eruption--and volcanoes can put more gases into the atmosphere than the entire human race." The alert reader will notice that Sowell has mixed up global warming and the ozone layer, two different

problems. Still, Sowell concluded of Limbaugh, "It is obvious that the man has done his homework--and done it well."

Ted Koppel must have thought so, too, when he invited Limbaugh to be on Nightline (2/4/92) as an environmental "expert," opposite then-Sen. Al Gore. "If you listen to what Senator Gore said," Limbaugh proclaimed, "it is man-made products which are causing the ozone depletion, yet Mount Pinatubo has put 570 times the amount of chlorine into the atmosphere in one eruption than all of man-made chlorofluorocarbons in one year."

On his radio show, his syndicated TV show, and in two best-selling books, Limbaugh has advanced the idea that volcanoes are the real ozone culprits. This theory, like so many of Limbaugh's claims, has only one problem: Limbaugh doesn't know what he's talking about.

A MOUNTAIN OF DISTORTION

"Chlorine from natural sources is soluble, and so it gets rained out of the lower atmosphere," the journal Science explained (6/11/93). "CFCs, in contrast, are insoluble and inert and thus make it to the stratosphere to release their chlorine."

Science also noted that chlorine found in the stratosphere--where it can eat away at Earth's protective ozone layer--is always found with other byproducts of CFCs, and not with the byproducts of natural chlorine sources.

"Ozone depletion is real, as certain as Neil Armstrong's landing on the moon," Dr. Sherwood Rowland, an atmospheric chemist at the University of California at Irvine, told EXTRA!. "Natural causes of ozone depletion are not significant."

But Limbaugh didn't rely on atmospheric scientists for his information about the ozone layer--he dismissed them as the "agenda-oriented scientific community." Instead, he turned to Dixy Lee Ray, a former Washington State governor and Atomic Energy Commission chair, who wrote Trashing the Planet--"the most footnoted, documented book I have ever read," Limbaugh says.

If you check Ray's footnotes, you'll find that the main source for the volcano theory is Rogelio Maduro, the associate editor of 21st Century Science & Technology, a magazine published by the Lyndon LaRouche network. Maduro is evidently not part of the "agenda-oriented scientific community"--even though he does have a bachelor's degree in geology.

The volcano theorists can't even keep their stories straight. In his book, Limbaugh claims that the 1991 Pinatubo eruption put 1000 times as much chlorine into the atmosphere as industry has EVER produced through CFCs; yet on Nightline, Pinatubo is alleged to have produced 570 times the equivalent of ONE YEAR'S worth of CFCs. Both can't be right. It turns out neither are.

The figure 570 apparently derives from Ray's book--but she said it was Mount Augustine, an Alaskan volcano that erupted in 1976, that put out 570 times as much chlorine as one year's worth of CFCs. Ray's source is a 1980 Science magazine article--but that piece was actually talking about the chlorine produced by a gigantic eruption that occurred 700,000 years ago in California (Science, 6/11/93).

UNCHALLENGED DEMAGOGUERY

This kind of sloppiness, ignorance and/or fabrication is run of the mill in Limbaugh's commentary, both broadcast and print. From dioxin to Whitewater, from Rodney King to Reaganomics, Rush Limbaugh has a finely honed ability to twist and distort reality.

Limbaugh's facts are almost never challenged on his programs. A hostile caller hardly ever gets through the screeners on his radio show, and his TV show is just him doing a monologue in front of his cheering audience. No one in the history of national television has had such a political platform. He has almost never corrected anything he's said--although he did apologize once to the aerosol industry for implying that spray cans still had CFCs in them. (CFCs were removed in 1978.)

Limbaugh's chronic inaccuracy, and his lack of accountability, wouldn't be such a problem if Limbaugh were just a cranky entertainer, like Howard Stern. But Limbaugh is taken seriously by "serious" media--in addition to Nightline, he's been an "expert" on such chat shows as Charlie Rose and Meet the Press. The New York Times (10/15/92) and Newsweek (1/24/94) have published his writings. A U.S. News & World Report piece (8/16/93) by Steven Roberts declared, "The information Mr. Limbaugh provides is generally accurate."

He's also taken seriously as a political figure. A National Review cover story (9/6/93) declared him the "Leader of the Opposition." Supreme Court Justice Clarence Thomas,who recently officiated at Limbaugh's wedding, says he tapes Limbaugh's radio show and listens to it as he works out (USA Today, 5/13/94).

FAIR is publishing a compilation of some of Limbaugh's more obvious whoppers in order to convince journalists and political leaders alike that when Limbaugh says, "I'm not making this up, folks," it's time to duck and cover.

Journalists, in particular, have an obligation to challenge Limbaugh's brand of hysteria. Someone who has amassed a powerful political following through the regular use of half-truth and distortion is begging for tough media scrutiny. In 1954, Edward R. Murrow confronted another demagogue who had a similar allergy to facts and documentation. Today's TV networks don't ask themselves how they can challenge Limbaugh's reign of error--but how they can profit from him. CBS News, the platform from which Murrow denounced Joe McCarthy, has been seeking to hire Limbaugh as a political

commentator.

Real democracy is built on debate. But Limbaugh has little use for debates; he has forged a media empire largely on unchallenged monologues. The following confrontation--Limbaugh vs. Reality--is an attempt at stimulating (or at least simulating) a debate.

The list of fallacies compiled here is not exhaustive. It was assembled from easily available sources--Limbaugh's books, The Way Things Ought to Be and See, I Told You So; transcripts of several weeks' worth of his TV show; gleanings from as much of his radio show as we could take; and other published evaluations of Limbaugh's accuracy. (There's a publication, the Flush Rush Quarterly (FRQ), largely devoted to chronicling Limbaugh's falsehoods, and a book, The Bum's Rush by Don Trent Jacobs, that debunks his environmental rhetoric.) As Josh Shenk showed in the New Republic ("Limbaugh's Lies," 5/23/94), scrutinizing the TV show for a month results in errors too numerous to count.

"There's a pathology here, folks," is a phrase Limbaugh likes to use when discussing President Clinton's alleged inability to tell the truth. A psychiatrist might agree--and label it projection.

LIMBAUGH VS. REALITY
BOGUS ECONOMICS

LIMBAUGH: On California contractor C.C. Myers completing repairs 74 days early on the earthquake-damaged Santa Monica Freeway: "There was one key element that made this happen. One key thing: The governor of California declared the [freeway] a disaster area and by so doing eliminated the need for competitive bids.... Government got the hell out of the way." (TV show, 4/13/94) "They gave this guy [Myers] the job without having to go through the rigmarole...of giving 25 percent of the job to a minority-owned business and 25 percent to a woman." (TV show, 4/15/94)

REALITY: There was competitive bidding: Myers beat four other contractors for the job. Affirmative action rules applied: At least 40 percent of the subcontracts went to minority or women-owned firms. Far from getting out of the way, dozens of state employees were on the job 24 hours a day. Furthermore, the federal government picked up the tab for the whole job (L.A. Times, 5/1/94).

LIMBAUGH: "Banks take the risks in issuing student loans and they are entitled to the profits." (Radio show, quoted in FRQ, Summer/93)

REALITY: Banks take no risks in issuing student loans, which are federally insured.

LIMBAUGH: "Don't let the liberals deceive you into believing that a decade of sustained growth without inflation in America [in the '80s] resulted in a bigger gap between the haves and the have-

nots. Figures compiled by the Congressional Budget Office dispel that myth." (Ought to Be, p. 70)

REALITY: CBO figures do nothing of the sort. Its numbers for after-tax incomes show that in 1980, the richest fifth of our country had eight times the income of the poorest fifth. By 1989, the ratio was more than 20 to one.

LIMBAUGH: Comparing the 1950s with the present: "And I might point out that poverty and economic disparities between the lower and upper classes were greater during the former period." (Told You So, p. 84)

REALITY: Income inequality, as measured by the U.S. Census Bureau, fell from the 1940s to the late 1960s, and then began rising. Inequality surpassed the 1950 level in 1982 and rose steadily to all-time highs in 1992. (Census Bureau's "Money Income of Households, Families and Persons in the United States")

LIMBAUGH: "Oh, how they relished blaming Reagan administration policies, including the mythical reductions in HUD's budget for public housing, for creating all of the homeless! Budget cuts? There were no budget cuts! The budget figures show that actual construction of public housing INCREASED during the Reagan years." (Ought to Be, p. 242-243)

REALITY: In 1980, 20,900 low-income public housing units were under construction; in 1988, 9,700, a decline of 54 percent (Statistical Abstracts of the U.S.).In terms of 1993 dollars, the HUD budget for the construction of new public housing was slashed from $6.3 billion in 1980 to $683 million in 1988. "We're getting out of the housing business. Period," a Reagan HUD official declared in 1985.

LIMBAUGH: "The poorest people in America are better off than the mainstream families of Europe." (Radio show, quoted in FRQ, Spring/93)

REALITY: Huh? The average cash income of the poorest 20 percent of Americans is $5,226; the average cash income of four major European nations--Germany, France, United Kingdom and Italy--is $19,708.

LIMBAUGH: "There's no such thing as an implied contract." (Radio show, quoted in FRQ, Spring/93)

REALITY: Every first year law student knows there is.

LIMBAUGH: "Ladies and gentlemen, we now know why there is this institutional opposition to low tax rates in the liberal wing of the Democratic Party. It's because [low tax rates] are biblical in nature and in root. When you can trace the lowering of tax rates on grain from 90 percent to 20 percent giving seven fat years during the days of Pharaoh in Egypt, why then you are tracing the roots of lower taxes and rising prosperity to religion.... You can trace

individual prosperity, economic growth back to the Bible, the Old Testament. Isn't it amazing?" (Radio show, 6/28/93)

REALITY: Amazingly wrong. Genesis 41 is about the wisdom of INSTITUTING taxes, not cutting them. After Pharaoh had a dream that prophesied seven fat years to be followed by seven lean years, Joseph advised him to "appoint officers over the land, and take up the fifth part of the land of Egypt in the seven plenteous years...and lay up corn under the hands of Pharaoh." In other words, a 20 percent tax on the grain harvest would put aside food for use during the famine. Pharaoh took Joseph's advice, and Egypt avoided hunger during the famine.

WEIRD SCIENCE

LIMBAUGH: "It has not been proven that nicotine is addictive, the same with cigarettes causing emphysema [and other diseases]." (Radio show, 4/29/94)

REALITY: Nicotine's addictiveness has been reported in medical literature since the turn of the century. Surgeon General C. Everett Koop's 1988 report on nicotine addiction left no doubts on the subject; "Today the scientific base linking smoking to a number of chronic diseases is overwhelming, with a total of 50,000 studies from dozens of countries," states Encyclopedia Britannica's 1987 "Medical and Health Annual."

LIMBAUGH: "We closed down a whole town--Times Beach, Mo.--over the threat of dioxin. We now know there was no reason to do that. Dioxin at those levels isn't harmful." (Ought to Be, p. 163)

REALITY: "The hypothesis that low exposures [to dioxin] are entirely safe for humans is distinctly less tenable now than before," editorialized the New England Journal of Medicine after publishing a study (1/24/91) on cancer mortality and dioxin. In 1993, after Limbaugh's book was written, a study of residents in Seveso, Italy had increased cancer rates after being exposed to dioxin, The EPA's director of environmental toxicology said this study removed one of the last remaining doubts about dioxin,s deadly effects (AP, 8/29/93).

LIMBAUGH: "The worst of all of this is the lie that condoms really protect against AIDS. The condom failure rate can be as high as 20 percent. Would you get on a plane--or put your children on a plane--if one of five passengers would be killed on the flight? Well, the statistic holds for condoms, folks." (Ought to Be, p. 135)

REALITY: A one in five AIDS risk for condom users? Not true, according to Dr. Joseph Kelaghan, who evaluates contraceptives for the National Institutes of Health. "There is substantive evidence that condoms prevent transmission if used consistently and properly," he said. He pointed to a nearly two-year study of couples in which one partner was HIV-positive. Among the 123

couples who used condoms regularly, there wasn't a single new infection (AP, 8/29/93).

LIMBAUGH: "Most Canadian physicians who are themselves in need of surgery, for example, scurry across the border to get it done right: the American way. They have found, through experience, that state medical care is too expensive, too slow and inefficient, and, most important, it doesn't provide adequate care for most people." (Told You So, p. 153)

REALITY: "Mr. Limbaugh's claim simply isn't true," says Dr. Hugh Scully, chair of the Canadian Medical Association's Council on Healing and Finance. "The vast majority of Canadians, including physicians, receive their care here in Canada. Those few Canadians who receive health care in the U.S. most often do because they have winter homes in the States--like Arizona and Florida--and have emergent health problems there." Medical care in Canada is hardly "too expensive"; it's provided free and covered by taxes.

LIMBAUGH: "If you have any doubts about the status of American health care, just compare it with that in other industrialized nations." (Told You So, p. 153)

REALITY: The United States ranks 19th in life expectancy and 20th in infant mortality among 23 industrialized nations, according to the CIA's 1993 World Fact Book. The U.S. also has the lowest health care satisfaction rate (11 percent) of the 10 largest industrialized nations (Health Affairs, vol. 9, no. 2).

LIMBAUGH: Denouncing Jeremy Rifkin of the Beyond Beef campaign as an "ecopest": "Rifkin is bent out of shape because he says the cattle consume enough grain to feed hundreds of millions of people. The reason the cattle are eating the grain is so they can be fattened and slaughtered, after which they will feed people, who need a high protein diet." (Ought To Be, p. 110)

REALITY: Sixteen pounds of grain and soy is required to produce one pound of edible food from beef (USDA Economic Research Service). As for needing a "high-protein diet," the World Health Organization and U.S. Department of Agriculture recommend that from 4.5 percent to 6 percent of daily calories come from protein. The amount of calories from protein in rice is 8 percent; in wheat it's 17 percent (USDA Handbook No. 456).

LIMBAUGH: "Do you know we have more acreage of forest land in the United States today than we did at the time the constitution was written." (Radio show, 2/18/94)

REALITY: In what are now the 50 U.S. states, there were 850 million acres of forest land in the late 1700s vs. only 730 million today (The Bum's Rush, p. 136). Limbaugh's claim also ignores the fact that much of today's forests are single-species tree farms, as opposed to natural old-growth forests which support diverse

ecosystems.

BROTHERHOOD...AND SISTERHOOD

LIMBAUGH: "The videotape of the Rodney King beating played absolutely no role in the conviction of two of the four officers. It was pure emotion that was responsible for the guilty verdict." (Radio show, quoted in FRQ, Summer/93)

REALITY: "Jury Foreman Says Video Was Crucial in Convictions," read an accurate Los Angeles Times headline the day after the federal court verdict (4/20/93).

LIMBAUGH: "Anytime the illegitimacy rate in black America is raised, Reverend Jackson and other black 'leaders' immediately change the subject." (Ought to Be, p. 225)

REALITY: Jesse Jackson has been talking about and against "children having children" in speeches and interviews for decades. So have many other black leaders, especially in the clergy.

LIMBAUGH: Praising Sen. Strom Thurmond for calling a gay soldier "not normal": "He's not encumbered by being politically correct.... If you want to know what America used to be--and a lot of people wish it still were--then you listen to Strom Thurmond." (TV show, 9/1/93)

REALITY: In the America that "used to be," Strom Thurmond was one of the country's strongest voices for racism, running for president in 1948 on the slogan, "Segregation Forever."

LIMBAUGH: "There are more American Indians alive today than there were when Columbus arrived or at any other time in history. Does this sound like a record of genocide?" (Told You So, p. 68)

REALITY: According to Carl Shaw of the U.S. Bureau of Indian Affairs, estimates of the pre-Columbus population of what later became the United States range from 5 million to 15 million. Native populations in the late 19th century fell to 250,000, due in part to genocidal policies. Today the U.S.'s Native American population is about 2 million.

LIMBAUGH: "Women were doing quite well in this country before feminism came along." (Radio show, quoted in FRQ, Summer/93)

REALITY: Before feminism, women couldn't even vote.

LIMBAUGH: "Anita Hill followed Clarence Thomas everywhere. Wherever he went, she wanted to be right by his side, she wanted to work with him, she wanted to continue to date him.... There were no other accusers who came forth after Anita Hill did and said, 'Yeah, Clarence Thomas, he harassed me, too.' There was none of that." (TV show, 5/4/94)

REALITY: Hill could not have continued to date Thomas, since they never dated. Two other women, Sukari Hardnett and Angela Wright, came forth in the Thomas case with similar charges.

LIMBAUGH: "Now I got something for you that's true--1972, Tufts University, Boston. This is 24 years ago--or 22 years ago. Three year study of 5000 co-eds, and they used a benchmark of a bra size of 34C. They found that the--now wait. It's true. The larger the brasize, the smaller the IQ." (TV show, 5/13/94)

REALITY: Dr. Burton Hallowell, president of Tufts in the '60s and '70s, had "absolutely no recollection" of such a study, according to Tufts' communications office. "I surely would have remembered that!" he exclaimed. Limbaugh's staff was unable to produce any such study. A search of the Nexis database--while revealing no evidence of a Tufts study--did produce a number of women theorizing that the presence of large breasts caused a lowering of IQ in some males.

THE CLINTON OBSESSION

LIMBAUGH: On Whitewater: "I don't think the New York Times has run a story on this yet. I mean, we haven't done a thorough search, but I--there has not been a big one, front-page story, about this one that we can recall. So this has yet to create or get up to its full speed--if it weren't for us and the Wall Street Journal and the American Spectator, this would be one of the biggest and most well kept secrets going on in American politics today." (TV show, 2/17/94)

REALITY: The New York Times BROKE the Whitewater story on March 8, 1992, in a front-page story by Jeff Gerth that included much of the key information known today. The investigative article ran over 1700 words.

LIMBAUGH: "You know the Clintons send Chelsea to the Sidwell Friends private school.... A recent eighth grade class assignment required students to write a paper on 'Why I Feel Guilty Being White.'... My source for this story is CBS News. I am not making it up." (Radio show, quoted in the Chicago Sun-Times, 1/16/94.)

REALITY: When Richard Roeper of the Chicago Sun-Times called CBS, the network denied running such a story. Ellis Turner, the director of external affairs for Sidwell Friends, told Roeper: "There is no legitimacy to the story that has been circulating.... We're anxious to let people know that this story is not true." The essay topic would be particularly difficult for the 28 percent of the school's student body that is not white.

LIMBAUGH: "You better pay attention to the 1993 budget deal because there is an increase in beer and alcohol taxes." (Radio show, 7/9/93)

REALITY: There were no increases in beer and alcohol taxes in the 1993 budget.

LIMBAUGH: The lead item on a page of "Stupid Quotes" in the May '94 Limbaugh Letter--subtitled, "Folks, I don't make this stuff up"--was a quote attributed to Eleanor Clift on the McLaughlin Group: "Hillary and Bill Clinton cheating on their taxes was a protest against the Reagan era tax breaks for the wealthy.... They knew...the IRS would catch up to them and tack penalties.... If more people had been as far-sighted and altruistic as the Clintons, we could retroactively erase the deficit." Limbaugh commented, "It's only May, folks, and we've got our Stupid Quote of the year."

REALITY: Rush Limbaugh, April Fool. The item came from the April Fools Day issue of a right-wing newsletter Notable Quotables. Each item in the newsletter was dated April 1 and the issue signed off with the words "April Fools." (The Limbaugh Letter later printed a correction on this and another April Fools quote used as fact.)

FRACTURED HISTORY

LIMBAUGH: Quotes President James Madison: "We have staked the future...upon the capacity of each and all of us to govern ourselves, to control ourselves, to sustain ourselves according to the Ten Commandments of God." (Told You So, p. 73)

REALITY: "We didn't find anything in our files remotely like the sentiment expressed in the extract you sent to us," David B. Mattern, the associate editor of The Madison Papers, told the Kansas City Star (1/16/94). "In addition, the idea is entirely inconsistent with everything we know about Madison's views on religion and government."

LIMBAUGH: "And it was only 4,000 votes that--had they gone another way in Chicago--Richard Nixon would have been elected in 1960." (TV show, 4/28/94)

REALITY: Kennedy won the 1960 election with 303 electoral votes to 219 for Nixon. Without Illinois' 27 electoral votes, Kennedy would still have won, 276-246.

LIMBAUGH: On how to stop riots: "Richard Daley, in 1968, in the Democratic National Convention, issued an order--where there were rumors of riots--he issued a shoot-to-kill order. And there were no riots and there was no civil disobedience and no shots were fired and nobody was hurt. And that's what ought to happen." (TV show, 6/10/93)

REALITY: Mayor Daley's shoot-to-kill order was issued not at the Democratic Convention, but following the April 4, 1968 Martin Luther King assassination. Daley wasn't reacting to "rumors of riots" since riots had already broken out. The shoot-to-kill order hardly put an end to unrest--since four months after Daley's order, protestors flocked to Chicago's Democratic Convention and engaged

in riotous civil disobedience. Protesters chanted, "The whole world is watching." Except for Rush Limbaugh.

LIMBAUGH: In an attack on Spike Lee, director of Malcolm X, for being fast and loose with the facts, Limbaugh introduced a video clip of Malcolm X's "daughter named Betty Shabazz." (TV show, 11/17/92)

REALITY: Betty Shabazz is Malcolm X's widow.

LIMBAUGH: "Those gas lines were a direct result of the foreign oil powers playing tough with us because they didn't fear Jimmy Carter." (Told You So, p. 112)

REALITY: The first--and most serious--gas lines occurred in late 1973/early 1974, during the administration of Limbaugh hero Richard Nixon.

LIMBAUGH: On Iran-contra special prosecutor Lawrence Walsh: "This Walsh story basically is, we just spent seven years and $40 million looking for any criminal activity on the part of anybody in the Reagan administration, and guess what? We couldn't find any. These guys didn't do anything, but we wish they had so that we could nail them. So instead, we're just going to say, 'Gosh, these are rotten guys.' They have absolutely no evidence. There is not one indictment. There is not one charge." (TV show, 1/19/94)

REALITY: Walsh won indictments against 14 people in connection with the Iran-contra scandal including leading Reagan administration officials like former Secretary of Defense Caspar Weinberger and former national security advisers Robert McFarlane and John Poindexter. Of the 14, 11 were convicted or pleaded guilty. (Two convictions were later overturned on technicalities--including that of occasional limbaugh substitute Oliver North)

LIMBAUGH: Explaining why the Democrats wanted to "sabotage" President Bush with the 1990 budget deal: "Now, here is my point. In 1990, George Bush was president and was enjoying a 90 percent plus approval rating on the strength of our victories in the Persian Gulf War and Cold War." (Told You So, p. 304)

REALITY: In October 1990, when the budget deal was concluded the Gulf War had not yet been fought.

LIMBAUGH: On the Gulf War: "Everybody in the world was aligned with the United States except who? The United States Congress." (TV show, 4/18/94)

REALITY: Both houses of Congress voted to authorize the U.S. to use force against Iraq.

LIMBAUGH: On Bosnia: "For the first time in military history, U.S. military personnel are not under the command of United States generals." (TV show, 4/18/94)

REALITY: That's news to the Pentagon. "How far back do you want to go?" asked Commander Joe Gradisher, a Pentagon spokesperson. "Americans served under Lafayette in the Revolutionary war." Gradisher pointed out several famous foreign commanders of U.S. troops, including France's Marshall Foch, in overall command of U.S. troops in World War 1. In World War 2, Britain's General Montgomery led U.S. troops in Europe and North Africa, while another British General, Lord Mountbatten, commanded the China-Burma-India theatre.

PERSONAL ATTACKS

LIMBAUGH: Limbaugh constantly tells his audience that he doesn't make personnel or ad hominem attacks. To a caller who had a problem with his personalized attacks, Limbaugh responded with a denial: "Give me a specific example: who, what, when, where, and what exactly did I say?" (Radio show, 2/18/94)

REALITY: One hour before that call, Limbaugh was telling his audience that a 5,000-year-old man found buried in ice--pictured on the cover of Time magazine--was really Sally Jesse Raphael: "This is just what Sally Jesse Raphael looks like without makeup!"

MORE REALITY: Columnist Molly Ivins reported (Arizona Republic 10/17/93) this incident from Limbaugh's TV show--"Here is a Limbaugh joke: Everyone knows the Clintons have a cat. Socks is the White House cat. But did you know there is a White House dog?" And he puts up a picture of Chelsea Clinton. Chelsea Clinton is 13 Years old.

LIMBAUGH: Assailing a journalist who had criticized Nixon: "Michael Gartner, portraying himself as a balanced, objective journalist with years and years of experience faking events, and then reporting them as news--and doing so with the express hope of destroying General Motors in one case and destroying businesses that cut down trees, the timber industry, in another." (TV show, 4/27/94)

REALITY: Gartner, the NBC News president who resigned in the wake of the GM truck explosion episode on NBC's Dateline, had no hands-on role in it- -nor had he expressed a hope of destroying any company.

LIMBAUGH: Equally accurate when denouncing a fellow conservative, he said of right-wing journalist Cliff Kincaid: "He's written all kinds of pieces about how I don't go make speeches for free, for the cause.... He's just one more of these little gnats out there trying to sink a Boeing 747 that's leaving him in a cloud of dust." (Radio show, 11/19/93)

REALITY: Kincaid's only published piece on whether Limbaugh does speeches "for the cause" was in Human Events (7/27/91): "He does his bit for conservatives when the movement calls. He waived his fees, for instance, when he emceed at roasts for Oliver North and

Paul Weyrich and addressed the National Right to Life convention."

LIMBAUGH VS. LIMBAUGH

LIMBAUGH: Limbaugh frequently denies that he uses his show for political activism: "I have yet to encourage you people or urge you to call anybody. I don't do it. They think I'm the one doing it. That's fine. You don't need to be told when to call. They think you are a bunch of lemmings out there." (Radio show, 6/28/93)

REALITY: Just an hour after making the above claim, he was--as usual--sending his troops to the trenches: "The people in the states where these Democratic senators are up for reelection in '94 have to let their feelings be known.... These senators, you let them know. I think Wisconsin's one state. Let's say Herb Kohl is up in '94. You people in Wisconsin who don't like this bill, who don't like the tax increases, you let Herb Kohl know somehow."

LIMBAUGH: On the poverty line: "$14,400 for a family of four. That's not so bad." (Radio show, 11/9/93, quoted in FRQ, Winter/94)

REALITY: Just a few months earlier, Limbaugh was talking about how tough it was to make 10 times that: "I know families that make $180,000 a year and they don't consider themselves rich. Why, it costs them $20,000 a year to send their kids to school." (Radio show, 8/3/93, quoted in FRQ, Winter/94)

LIMBAUGH: On Bill Clinton: "Never trust a draft dodger." (Radio show, quoted in FRQ, Summer/93)

REALITY: Although a supporter of the Vietnam War, Limbaugh used a minor physical impairment to avoid the draft (Minneapolis Star Tribune, 9/27/93).

LIMBAUGH: In frequent broadcasts, Limbaugh offers impassioned advocacy for Paula Jones, who charged Bill Clinton with sexual harassment. (TV and radio, April-May/94)

REALITY: Limbaugh boasted that a sign on his office door reads, "Sexual harassment at this work station will not be reported. However...it will be graded!!!" (USA Weekend, 1/26/92).

RUSH LIMBAUGH: CHAMPION OF THE OVERDOG

Who says Rush Limbaugh is abusive to minorities? He champions various minority interests: multi-millionaires, bankers, owners of private planes and yachts, drug companies. It's only those other "minorities"--women, workers, the poor, racial minorities, gays--that he has no use for. Here's a sampling:

"One of the things I want to do before I die is conduct the homeless Olympics...[Events would include] the 10-meter Shopping Cart Relay, the Dumpster Dig, and the Hop, Skip and Trip." (L.A. Times, 1/20/91)

On NAFTA: "If we are going to start rewarding no skills and stupid people--I'm serious, let the unskilled jobs, let the kinds of jobs that take absolutely no knowledge whatsoever to do--let stupid and unskilled Mexicans do that work." (Radio show quoted in FRQ Fall/93)

Speculating on why a Mexican national won the New York marathon: "An immigration agent chased him for the last 10 miles." (USA Weekend, 1/26/92)

This is asinine! A Cesar Chavez Day in California? Wasn't he convicted of a crime?" (Quoted in FRQ, Winter/94)

"Kurt Cobain was, ladies and gentleman, I just--he was a worthless shred of human debris..." (TV show, 4/11/94)

"When a gay person turns his back on you, it is anything but an insult ; it's an invitation." (Quoted in FRQ, Summer/94)

"Feminism was established to allow unattractive women easier access to the mainstream." (Quoted in FRQ, Summer/93)

"Militant feminists are pro-choice because it's their ultimate avenue of power over men.... It is their attempt to impose their will on the rest of society, particularly on men." (Ought to Be, p.53)

"Why is it that whenever a corporation fires workers it is never speculated that the workers might have deserved it?" (Ought to Be, p.275)

KOPPEL COVERS FOR LIMBAUGH'S RUMOR-MONGERING

Ted Koppel's special (ABC Viewpoint, 4/19/94) on press coverage of Whitewater was a perfect opportunity to take Rush Limbaugh to task for spreading unfounded conspiracy theories. But instead, ABC journalists Koppel and Jeff Greenfield let Limbaugh off the hook.

On his March 10 radio broadcast, Limbaugh had announced the following in urgent tones: "OK, folks, I think I got enough information here to tell you about the contents of this fax that I got. Brace yourselves. This fax contains information that I have just been told will appear in a newsletter to Morgan Stanley sales personnel this afternoon.... What it is is a bit of news which says...there's a Washington consulting firm that has scheduled the release of a report that will appear, it will be published, that claims that Vince Foster was murdered in an apartment owned by Hilary Clinton, and the body was then taken to Fort Marcy Park."

After he returned from a commercial break, Limbaugh began referring to the story as a "rumor," but continued to claim that the story was that "the Vince Foster suicide was not a suicide."

Limbaugh was referring to an item in a newsletter put out by the Washington, D.C. firm of Johnson Smick International. The

newsletter, relating a rumor that has no apparent basis in fact, reported that White House attorney Foster's suicide occurred in an apartment owned by White House associates, and that his body was moved to the park where it was found.

Limbaugh took this baseless rumor from a small insiders' newsletter and broadcast it to his radio audience of millions, adding his own new inaccuracies: The newsletter did not report--as Limbaugh claimed--that Foster was murdered, or that the apartment was owned by Hillary Rodham Clinton. Limbaugh's repetition of an unfounded rumor has been credited (Chicago Tribune, 3/11/94; Newsweek, 3/21/94) with contributing to a plunge in the stock market on the day it was aired.

Appearing as an "expert" on the Viewpoint special, Limbaugh denied twisting the rumor: "Never have I suggested that this was murder," he said. ABC's Jeff Greenfield, in a taped segment, further covered for the talkshow host, claiming that Limbaugh "broadcast the rumor as an example of the more wild stories circulating."

Later in the broadcast, host Ted Koppel also stuck up for Limbaugh when his role in spreading the story was challenged. "As I recall," Koppel said, "you didn't present it as accurate, did you? You represented it as one of the rumors that was going around."

The executive producer of Limbaugh's TV show, Roger Ailes (a Republican campaign consultant and president of the CNBC cable network), didn't claim that his star had debunked the rumor--he boasted that Limbaugh's report of "a suicide coverup, possibly murder" was a scoop. On the Don Imus radio show, Ailes remarked: "The guy who's been doing an excellent job for the New York Post [Chris Ruddy]...for the first time on the Rush Limbaugh show said that...he did not believe it was suicide.... Now, I don't have any evidence.... These people are very good at hiding or destroying evidence."

But Limbaugh doesn't seem so proud of his scoop. When a caller to the radio show (3/10/94), who identified himself as a pediatrician from Memphis, articulately criticized Limbaugh for spreading false reports about Vincent Foster's death, the host seemed to take it personally: "One thing I'm not is a rumor-monger," he said.

Limbaugh later went on to imply that the pediatrician had been calling from the "West Wing of the White House" (even though he had also attacked the Clinton health care plan and endorsed a single-payer approach). "I think that what is going to happen during the course of this year," Limbaugh said, "is that a bunch of people are going to call this show that have been given marching orders.... What's going to happen is there will be numerous attempts, and they've gone on all the time, to discredit what occurs on this program."

The next day (3/11/94), apparently still smarting from the Memphis caller's remarks, Limbaugh instructed his staff on the air: "You guys be on the lookout in there for more calls from the White House disguised as pediatricians from Memphis."

FAIR associate Jonathan Eagleman tracked down the "Memphis pediatrician" and found that he was...a Memphis pediatrician. The pediatrician had received a number of hate calls from outraged dittoheads--apparently some of them hadn't believed their leader's claim that he was actually calling from the White House.

* * *

FAIR (Fairness & Accuracy In Reporting) is the national media watch group offering well-documented criticism in an effort to correct bias and imbalance. FAIR focuses public awareness on the narrow corporate ownership of the press, the media's allegiance to official agendas and their insensitivity to women, labor, minorities and other public interest constituencies. FAIR seeks to invigorate the First Amendment by advocating for greater media pluralism and the inclusion of public interest voices in national debates.

FAIR is a membership-based organization. If you would like to become a member and receive FAIR's magazine, EXTRA!, where this report originally appeared and which features such well-documented media criticism in each issue, call our subscription service at 800-847-3993, 9:00-5:00 Eastern Time. Let them know you got the number on the internet. If you would like a copy of the original report, send an e-mail message to FAIR (fair@igc.apc.org), and we'll tell you how you can get one.

ACTION: Each TV or radio station that carries Limbaugh has a responsibility to the community it serves. They can be held accountable if they broadcast fabrications. They must find a way to correct the record if they allow Limbaugh to spew falsehoods. Contact the station manager of your local Limbaugh outlets. Let them know you take Limbaugh's disinformation seriously...and so should they.

An obvious antidote to Limbaugh's brand of distortion would be to have a genuine debate. That would give the facts a chance -- and provide some political balance. When you call radio stations, you could note that stations can provide some debate and balance by broadcasting the talkshows hosted by populist Jim Hightower and iconoclast Jerry Brown -- two hosts who do not seem to be allergic to the facts.

The debunking of Limbaugh is also featured this week on FAIR's weekly radio program, CounterSpin, (which airs on over 70 stations) and in the "Media Beat" column by FAIR associates Jeff Cohen and Norman Solomon. Their column is distributed by Creators Syndicate.

If you would like to hear CounterSpin on a local radio station, let them know. If you'd like to see "Media Beat" in your local paper, let the editorial page editors know.

For more information on FAIR, write to: Sam Husseini, FAIR, 130 West 25th Street, New York, NY, 10001. (fair@igc.apc.org) Please send FAIR any letters you write or any newspaper reports you see on this subject. Feel free to post this on any appropriate place on the internet. Thank you.

4571. Re: Rush and the 40 lies? <From Compuserve>

Limbaugh Responds to FAIR

"Reign of Error: From aids to ozone, from Whitewater to the Bible,
Limbaugh seems to be able to dissemble and disinform on virtually
any subject." _ report from Fairness and Accuracy in Reporting
(fair), listing "dozens of [Limbaugh's] statements and writings it says
are inaccurate," Associated Press, June 28, 1994.

"Limbaugh's Reign of Error" was printed in extra!, the
publication of Fairness and Accuracy in Reporting. "fair" was
launched in the summer of 1987 with the financial assistance of The
New World Foundation (nwf) which gave fair a $2,500 grant that
year, according to nwf's 1987-1988 annual report. The Chair of
nwf's board in 1987 was Hillary Rodham Clinton. (Mrs. Clinton, a
board member since 1982, resigned in March of 1988.)

What follows is a rebuttal to the fair allegations printed by
the Big Five print media outlets: the Associated Press, The Los
Angeles Times, The Washington Post, The New York Times and usa
Today.

RESPONDING TO FAIR's CHARGES
PRINTED BY MAJOR PRINT MEDIA OUTLETS

Fairness and Accuracy In Reporting's charges
(as reported by the Associated Press, June 28, 1994):

1. Student loans
LIMBAUGH: "Banks take risks in issuing student loans and they are entitled
to the profits."
FAIR: "Banks take no risks in issuing student loans, which are federally
insured."
REALITY: Banks do take risks in issuing student loans and are entitled to
their profits.

"The federal government instituted the guaranteed student loan
program to provide incentives to banks to make risky loans to students with

no assets, no credit records, no full-time jobs and no permanent address. This is enormous risk. The government helps mitigate this risk. But, the government will only pay off defaulted loans if banks have followed a very careful, very detailed, very exacting set of procedures of servicing and collecting student loans. If banks don't follow the guidelines precisely, they won't be reimbursed by the government and they are left high and dry. That is risk." _ Fritz Elmendorf, Vice President for Communications, Consumer Bankers Association [by interview].

So, as I said: When banks take that kind of risk, they are entitled to their profits (even now, however, Congress is instituting new rules and regulations that are cutting the profitability of bank-issued student loans.)

2. American health care
LIMBAUGH: "If you have any doubts about the status of American health care, just compare it with that in other industrialized nations."
FAIR: "The United States ranks 16th in life expectancy and 21st in infant survival among industrialized nations, according to the CIA's 1993 World Fact Book."
REALITY: America's health care system is the best in the world.

According to Dr. Elizabeth McCaughey: "The [Clinton] Administration often cites two statistics _ America's relatively high infant mortality rate and its lower life expectancy _ to support the need for the Clinton health bill. But these have almost nothing to do with the quality of American medical care. Both statistics reflect the epidemic of low-birth-weight babies born to teenage and drug-addicted mothers, as well as the large numbers of homicides in American cities and drug-related deaths. In fact, if you're seriously ill, the best place to be is in the United States. Among all industrialized nations, the United States has the highest cure rates for stomach, cervical, and uterine cancer, the second highest cure rate for breast cancer and is second to none in treating heart disease." _ Dr. Elizabeth McCaughey, John M. Olin Fellow at the Manhattan Institute, "No Exit," The New Republic, February 7, 1994.

3. Forest acreage
LIMBAUGH: "Do you know we have more acreage of forest land in the United States today than we did at the time the Constitution was written?"
FAIR: "In what are now the 50 U.S. states, there were 850 million acres of forest land in the late 1700s vs. only 730 million acres today."
REALITY: Enormous tracts of trees were destroyed by settlers in this country, without being replanted. Today, reforestation is a critical component of the U.S. lumber industry. Furthermore, with increasingly sophisticated measuring methods, the more sure we are about the rapidly increasing rate of forest growth in the continental United States. These are the current facts: In 1952, the U.S. had 664 million acres of forest land. In 1987 the number had climbed to 731 million acres, according to the most recent numbers available in the U.S. Statistical Abstract, 1993-1994 edition.

"According to the U.S. Forest Service, annual timber growth in the U.S. now exceeds harvest by 37 percent. Annual growth has exceeded harvest every year since 1952. In 1992, just 384,000 acres _ six-tenths of 1

percent of the National Forest land open to harvesting _ were actually harvested. As a result of growth steadily exceeding harvests, the number of wooded acres in the U.S. has grown 20 percent in the past twenty years. The average annual wooded growth in the U.S. today is an amazing three times what it was in 1920. In Vermont, for example, the area covered by forests has increased from 35 percent a hundred years ago to about 76 percent today." _ Joseph Bast, Peter Hill and Richard Rue, Eco-Sanity: A Common Sense Guide to Environmentalism (Madison Books: 1994), p. 23.

4. Chelsea Clinton
LIMBAUGH: "You know the Clintons send Chelsea to Sidwell Friends private school...a recent eighth-grade class assignment required students to write a paper on Why I Feel Guilty Being White.' My source for this story is cbs News."
FAIR: "cbs denied running such a story and a Sidwell spokesman said it never happened." In its New York Times advertisement, fair calls this an example of a "groundless assertion."
REALITY: In fact, cbs Morning Resource, a wire service for radio talk show hosts run by cbs Radio Networks, reported the story on January 6, 1994. The operations director of an Ohio radio station faxed the cbs wire story to my New York studios, which I read on the air. Playboy magazine (February 1994) and Heterodoxy magazine (September 1993) had both already published the story, and in fact were the sources of the cbs wire story. And my own research has uncovered what every media outlet that uncritically repeated fair's charge could have learned by investigating (but did not bother): that _ despite Sidwell Friends' denials _ the story was, in fact, true.

On cnn's "Reliable Sources" (7/10/94), Ellen Hume said: "I don't respect someone who is clearly telling myths and pretending that he's got facts behind him. Occasionally [Limbaugh will] do something like say that the Sidwell Friends School had some test for Chelsea _ some essay Chelsea Clinton had to write about why I don't like being white, or why I'm embarrassed to be white, and then he cites a source like cbs News. That simply isn't true. None of that was true. So where is this coming fromand where do you draw the line at a mistake, which we all make, and a deliberate distortion of the fact to pander to myths that people wish were true?"

I responded to this charge in a usa Today column (7/14/94), documenting my information, and insisting that to suggest I pulled the story out of thin air or lied about cbs as its source is patently untrue.

The following week on cnn's "Reliable Sources," Ellen Hume back-pedaled. "[I]n deference to Rush, I would like to make a clarification, which is that there was a story that he put out on the radio, that Chelsea Clinton had had to write some essay about how she hates being white. This was not a true story. Rush, as far as I know, never apologized for broadcasting it, but he did say he got it from cbs. It turns out that the bad guy here was cbs, not Rush. They had a tip sheet that actually put the story out, so I say, Rush, you're off the hook on that one." (7/17/94)

But it was a true story. In a July 16, 1993 article titled "Hillary's Friends" in Washington City Paper (a D.C. newspaper with a circulation of 90,000), reporter Bill Gifford wrote: "Off the record, some parents will admit to discomfort with the school's multicultural excesses. The eighth-grade essay assignment on Why I Feel Guilty About Being White,' for example. Or the treatment accorded a sixth-grader who stood up, at a school-wide meeting held during the L.A. riots, to express his fear of the rioters (he was later forced to apologize to his black classmates).Other parents quietly fault the school for pandering to its black students, who nowadays are more likely to be the sons and daughters of blue-chip lawyers and entertainment moguls than bus drivers or janitors. The world hasn't witnessed such aristocratic self-abnegation since Robespierre was lopping off heads. It's completely riven apart by a collection of neurotic individuals who are worried sick about being seen as politically incorrect,' fumes a parent of one of Chelsea's classmates. But these same people seem possessed by the urge to mention, at the first opportunity, that their kids Got In."

My office did what no other journalist did: we tracked the story to its root, and talked to the original reporter. He confirmed the story. The paper's editor, Jack Shafer, who knows the reporter's source, agreed: "Yes, I stand by the story."

Amazingly, the reporter says that fair never called him before they ran with the story. They called him after they published the charge _ at which time the reporter says he told fair the same thing he told my office, that he stands by the story and it's true. Yet fair has never retracted its charge, corrected its record, or apologized for its error.

5. Beer and alcohol taxes in 1993
LIMBAUGH: "You better pay attention to the 1993 budget deal because there is an increase in beer and alcohol taxes."
FAIR: "There were no increases in beer and alcohol taxes in the 1993 budget."
REALITY: Beer and alcohol taxes were indeed considered for the 1993 budget deal. fair gives no context to the quote, nor a date on which I supposedly said it. I could have been referring to:

1) Clinton's 1993 budget plan. The idea of taxing beer and alcohol was a trial balloon floated early by the Administration and discussed (as were the myriad other Clinton trial balloons) on my programs. Bob Woodward's book, The Agenda, reports: "Friday morning, the team gathered in the Governor's Mansion again. Sperling, looking for more revenue to pay for the new spending, had suggested additional new taxes on inheritance, securities transfers, alcohol, and tobacco" (p. 46). "Bensten had a single sheet listing various possible taxes. It includedtaxes on cigarettes and alcohol" (p. 88). The final budget did not raise beer and alcohol taxes, but it did include the much-debated gas tax, which affected every product shipped by truck _ including beer and other alcoholic products.

2) Clinton's 1993 health care financing plan. "Increasing sin' taxes _ federal taxes on tobacco and alcoholic beverages _ is being considered as a way to help pay the $30 billion to $90 billion needed annually to provide health care coverage for everyone. A February 1993 Congressional Budget

Office study found $40 billion could be raised from 1994 through 1998 by doubling federal tobacco taxes and raising alcohol taxes by $2.50 per proof gallon. Effect of those hikes: 6-pack of beer _ current rate: 33 cents; raised rate: 81 cents." _ Judy Hasson, "Clinton Budget Plan: Opposition lies in wait for health-care reformers," usa Today, 2/22/93.

6. Gas lines and Jimmy Carter's foreign policy
LIMBAUGH: "Those gas lines were a direct result of the foreign oil powers playing tough with us because they didn't fear Jimmy Carter."
FAIR: "The first _ and most serious _ gas lines occurred in late 1973-early 1974, during the administration of Limbaugh hero Richard Nixon."
REALITY: I wasn't discussing the 1973 gas lines. I was discussing the gas lines that Jimmy Carter was responsible for _ because he ran such a pathetic foreign policy operation.

According to Daniel Yergin, Pulitzer-prize-winning author of The Prize: The Epic Quest for Oil, Money & Power, "the policy of the United States, Iran's most important ally, was in confusion, disarray and shockThe United States never sent [Iran] a clear, consistent signal,' one senior official recalled. Instead of oscillating back and forth between one course of action and another and never deciding, we would have done better to have flipped a coin and then stuck to a policy.' The cacophony from the United States certainly confused the Shah and his senior officials, undermined their calculations, and drastically weakened their resolveAt midday on January 16, the Shahboarded a plane and left Tehran for the last time, carrying with his luggage a casket of Iranian soilOn February 1, [the Ayatollah] Khomeini arrived back in Tehran in a chartered Air France 747The American defense attache provided a succinct summary of the situation in a message to Washington: Army surrenders; Khomeini wins. Destroying all classified'The old regime was gone in Iran, and the new one was in power, though most uneasily; there were already bitter struggles for control. And from Iran, as if it had been shaken by a violent earthquake, a giant tidal wave surged around the world. All were swept up in it; nothing and no one escaped. When the wave finally spent its fury two years later, the survivors would look around and find themselves beached on a totally new terrain. Everything was different; relations among all of them were altered. The wave would generate the Second Oil shock, carrying prices from thirteen to thirty-four dollars a barrel, and bringing massive changes not only in the international petroleum industry but also, for the second time in less than a decade, in the world economy and global politicsAnd suddenly, almost overnight, upwards of a billion gallons of motor fuel were sucked out of gasoline station tanks by America's frightened motoristsThe gas lines marked the beginning of the end of the Presidency of Jimmy CarterThe signing of salt ii, in negotiation for seven years through three administrations, might have been celebrated as a landmark achievement. But not then. It simply did not count. The only thing that mattered was the gas lines _ and they were Carter's fault" (The Prize, p. 679-94).

7. U.S. military/Bosnia
LIMBAUGH: "For the first time in military history, U.S. military personnel [in Bosnia] are not under the command of United States generals."

FAIR: "How far back do you want to go?' asked Commander Joe Gradisher, a Pentagon spokesman. Americans served under Lafayette in the Revolutionary War and under other foreign commanders in both world wars."
REALITY: "Rush is right. If an American is shot down in Bosnia, he will have been sent on that mission by an Egyptian bureaucrat, Boutros Boutros-Ghali, because Ghali is the one who approves the use of air strikes. You've got a really convoluted command structure over there in which the U.S. has basically ceded authority to U.N. bureaucrats. What's going on with U.S. troops in Bosnia is fundamentally different than other peacekeeping operations that the U.S. in involved in." _ Larry Di Rita, former staff officer on the Joint Chiefs of Staff and currently Deputy Director for Foreign Policy and Defense at The Heritage Foundation [by interview].

The U.S. Constitution (Article II, Section 2) states: "The President shall be the Commander-in-Chief of the Army and Navy of the United States." The Constitution does not say: "unless U.N. Secretary General Boutros Boutros-Ghali thinks otherwise." U.S. military personnel have served with forces from other countries throughout history, such as in World War I and II, but U.S. generals have always been at the top of the command structure. Dwight Eisenhower's title, for example, was Supreme Allied Commander because he, an American, was in charge of all operations involving U.S. forces. The danger today, whether in Somalia, Bosnia, Rwanda, Haiti or elsewhere, is that the Clinton Administration is ceding political and military authority to the United Nations.

fair's charges as reported by The Los Angeles Times on June 29, 1994 (except for those covered elsewhere in this response):

1. Rodney King
LIMBAUGH: "The videotape of the Rodney King beating played absolutely no role in the conviction of two of the four officers. It was pure emotion that was responsible for the guilty verdict."
FAIR: "Jury Foreman Says Video Was Crucial in Convictions,' read an accurate Los Angeles Times headline the day after the federal court verdict (4/20/93)."
REALITY: fair cites the headline of 199-word article on page 4 of the "B" Section of The Los Angeles Times to "disprove" my point, and ignores the well-documented role of emotion in each of the Los Angeles trials.

I made two points. First, I discounted the role of the videotape in the jury's decision, despite the jury foreman's claims. Second, I gave added weight to the emotion of the overall experience of being a "King juror," a commitment few in the Los Angeles area wanted. My conclusions _ clearly in the realm of opinion _ can be supported by contemporaneous media reports.

Role of the Videotape: The Wall Street Journal (April 19, 1993, article entitled, "Split Decision: Verdict in King Case Owes Much to Lessons of State-Court Trial") lends credence to my point. It reported that "if their case was made tougher by that added intent' requirement, U.S. prosecutors had the significant strategic edge of having seen a run-through. In particular,

they benefitted from knowing that the notorious 81-second videotape of Mr. King's beating had been perceived as ambiguous in places by the first jury, and that more evidence would be needed to translate into legal terms what the tape said in visceral terms."

The Journal also pointed out that: "In general, observers said, prosecutors were less confident in the videotape and were willing to take a chance on evidence that might have seemed risky last year. For instance, early on, they called bystanders who had given state investigators accounts of the incident that didn't precisely match the videotape. But even though the details were attacked by defense lawyers, the observers' eyewitness testimony about the use of force was compelling. One woman, who had watched the beating from her apartment, choked up as she described officers kicking Mr. King any way they could get a lick in.'"

This discounting of videotape evidence occurred in the fall 1993 Reginald Denny trial as well. "Jurors Show Seeing Is Not Believing," by Philip Wasserman, 10/21/93, Wall Street Journal, reported: "The decision of the jury in Los Angeles to acquit Damian Williams and Henry Watson of the most serious charges against them stemming from their beating of Reginald Denny highlights the shortcomings of using videotape as the basis of a prosecution. Like the brutal videotape in the first Rodney King trial, the horrifically compelling tape in the Reginald Denny trial was unable to provide the prosecution with the evidence it needed for convictions on the most serious charges. That shouldn't come as a surprise. In several high-profile cases in the past few years, videotape has been no substitute for compelling eyewitness testimony. The jurors apparently had no problem deciding that Messrs. Williams and Watson were the men on the tape. But the silent video scenes, shot from the ground and the air, were not enough to convince the jury that the defendants had the specific intent to commit the most serious crimes they were charged with. Ultimately, the 47 minutes of videotape could show jurors only what the defendants were doing, not why."

Emotion: The Washington Post, like The Los Angeles Times, used the jury foreman's comment in its headline. But rather than just writing 199 words, The Post used 917 words (on page 4 of the "A" Section) to stress the emotional intensity of the jury's deliberations. The April 20, 1993 Post led its story by describing "seven days of deliberations so emotional that one man had to seek medical attention for stress."

The Post further reported: "The interviews revealed disagreement on some key points of the trial. One white male juror said King's testimony was not very' important. But a black woman said she thought his appearance was crucial because it made him a human being.' The foreman of the jury said he was so moved by the testimony that he cried when he heard it."

The Post continued: "I can say that the jury system works,' the black woman, a postal worker in her twenties, told kabc-tv. But, she said: One time I was sitting there and I thoughtwhere am I? Am I at an aa meeting or am I in a jury room? It was just that emotional.' The emotional climax of the deliberations came last Tuesday, according to one account, when emotions boiled over. Tuesday it got so heated in there that one of the

jurors had to get out of the room,' a white male juror told ABC's Good Morning America.' On the news, I understood later they said one of the jurors got sick. No, he couldn't take it in there.' U.S. Marshal Craig Meacham confirmed parts of that account today. He said that the juror began feeling ill Tuesday, but participated in the deliberations Wednesday morning. By lunchtime he asked to see his doctor and, Meacham said, was treated for a rash brought on by stress and fatigue."

Further, in an article entitled, "No Punitive Damages for King; Stressful Situation' For Jurors, City," usa Today reported on June 2, 1994: "The divisiveness, pain, anger and emotional toll the 1991 Rodney King beating has unleashed here was visible again Wednesday in the faces of nine jurors as verdicts were read in a downtown federal courtroomThe jury forewoman sniffled and wiped tears from her face. Others stared straight ahead, visibly shaken. Another, the only black juror, looked angryThe forewoman, a professional mediator, read a statement: "It was a very stressful situation for many of us."

2. C.C. Myers
LIMBAUGH: "There was one key element that made this happen. One key thing: The governor of California declared the [freeway] a disaster area and by so doing eliminated the need for competitive bidsGovernment got the hell out of the way." and "They gave this guy [contractor C.C. Myers] the job without having to go through the rigmaroleof giving 25 percent of the job to a minority-owned business and 25 percent to a woman."
FAIR: "There was competitive bidding: Myers beat four other contractors for the job. Affirmative action rules applied: At least 40 percent of the subcontracts went to minority or women-owned firms. Far from getting out of the way, dozens of state employees were on the job 24 hours a day. Furthermore, the federal government picked up the tab for the whole job."
REALITY: fair's "edit" of my statements amounts to misrepresentation.

I talked on my radio and television shows for days _ and read from a number of articles _ about the fascinating chain of events that led to the opening of earthquake-damaged highways and bridges days, weeks, and, in some cases, months before they were expected to open. In doing so, I repeatedly made three main points: 1) The private sector _ using market incentives _ was responsible for repairing California's roads and bridges so quickly; 2) Government, usually a hindrance and drag on public works projects, made it easier for private companies to do their work by approving no-bid contracts and cutting red tape, and the government did so despite the fact that it was footing the bill; and 3) Contractor C.C. Myers was an American hero for taking advantage of market incentives and government restraint to accomplish what he did.

I was right on all three points, and the record supports me.

1) The private sector and market incentives: "To ensure speedy work, officials set up incentives and penalties: For every day ahead of schedule that work was finished, the company would receive $200,000, and it would be penalized at the same rate for lateness. Caltrans officials based the amount of the incentive bonus on a complicated set of estimates of the daily cost to Los

Angeles of having interrupted freeway service. Of all the contracts awarded, the incentive was largest on the Santa Monica," reported The Los Angeles Times on April 6, 1994.

The Times added: "This Santa Monica project demonstrates what can happen when private sector innovation and market incentives replace business as usual,' said Los Angeles Mayor Richard Riordan, who joined Wilson and Caltrans officials at the news conference. This is the way government should be carried out all the time, not just in emergencies.'"

2) Government restraint: "On the day of the quake, working at times by flashlight in a downtown office that lost its power, supervisors began approving emergency no-bid contracts to remove damaged bridges and shore up shaky ones. And in less than three weeks, they issued the first contracts for major reconstruction of the Santa Monica Freeway and fallen stretches of the Golden State Freeway," reported The Los Angeles Times on February 16, 1994.

The Times continued: "Instead of waiting as long as a month between bid openings and the execution of a contract, state officials are opening bids and approving contracts on the same dayAnd on dozens of smaller jobs _ to remove debris, bring down damaged bridges and shore up shaky structures _ Caltrans has dispensed with competitive bidding entirely. Department officials are picking contractors to do the work on a standard pay schedule. Some of these no-bid jobs are worth more than $1 million."

On April 6, 1994, The Los Angeles Times reported: "The high-speed construction was made possible by crews working around the clock, seven days a week, and by state officials cutting through red tape." Though the government did cut through red tape, it did not waive affirmative action rules. But, given the enormous amount of time I spent on this topic, this very minor misstatement hardly qualifies as a threat to the republic.

3) C.C. Myers: My comments on Myers were drawn from the following article, "The Santa Monica Freeway, Open Again: The Man Who Put the Pedal to the Metal Construction; Clinton Myers is a bootstrap millionaire who speeded up the job by never taking no for an answer," by Nora Zamichow of The Los Angeles Times (4/13/94):

"When the railroads told contractor Clinton Myers that it would take three weeks to deliver steel beams needed for rebuilding the Santa Monica Freeway, Myers spent $119,000 to rent his own trains to carry supplies from Arkansas and Texas. When the ironworkers said they were tired from working 10-hour days, seven days a week, Myers, a bootstrap millionaire, hired more. Day and night, Myers pushed, prodded and urged the workers. A man in constant motion, he stopped only when the freeway opened. Then he gazed at the structures, which still have wood framing attached, and pronounced: No one will ever touch what we have done, no one will ever come close.' And then, he added: But I could do it in 10 days less if I were to design and build it.'

"On the Santa Monica Freeway, Myers immediately made sure all the crews and subcontractors knew his goal. He demanded every boss's home number and he was not shy about calling day or night. When he first told me his plans to finish mid-April, I thought he was trying to light a fire under me. I'm thinking, Yeah, right, finish in April,' said Dean Bubion, president of Tri-City Reinforcing Corp., the subcontractor that handled the steelwork. But as Bubion quickly learned, Myers meant it. When you want something bad enough, you've got to go for it,' said Myers, 56."

As I said, an American hero.

3. Feminism
LIMBAUGH: "Women were doing quite well in this country before feminism came along."
FAIR: "Before feminism, women couldn't even vote."
REALITY: I was referring to contemporary militant feminism, not women's suffrage. My statement is pure opinion, and my assessment that the true backlash in this country is against militant feminism is an opinion I can well defend.

"Every revolution has its losing side. In the sexual revolution, evidence continues to mount that the supposed winners _ liberated' women _ are in some cases turning out to be the losers. Instead of the freedom and equality they thought they had achieved, too many find themselves shackled by unplanned pregnancies, abortions, single motherhood, infections or infertility," wrote Christian Science Monitor columnist Marilyn Gardner in her April 8, 1993 article entitled, "Sexual Revolution _ Women Pay the Cost."

"I feel the same as I did when I was 19 years old during the women's liberation movement,' Ms. [Anita] Blair [a lawyer who began the Independent Women's Forum] says. Except this time I want to go out and burn my dress-for-success' suit's floppy bow ties.' She would be right, says Clark University philosophy professor Christina Hoff Sommers, author of Who Stole Feminism? (Simon & Schuster). The majority of women are not represented by the feminists,' Ms. Sommers says. The majority of women are not at war with men, and while grateful for the opportunities that have been made for them, they are turned off by the feminists' relentless male-bashing,'" reported The Washington Times on December 16, 1993 in an article entitled, "Putting a New Face on Feminism: Fed-Up Women Giving Mainstream a Voice."

"[Washington Post columnist Sally] Quinn's argument was a muscular one. She wrote that the established feminist leaders and the National Organization for Women are the domestic equivalents of Communist Party apparatchiks in the Soviet Union: ideological dinosaurs, remote from the needs of their constituency and that they should step down and let other people take over. The truth is,' she wrote, that many women have come to see the feminist movement as anti-male, anti-child, anti-family, anti-feminine. And therefore it has nothing to do with us.'" _ from a February 5, 1992, Washington Times column by John Leo.

"To the extent that contemporary feminism abandons its true mission to focus on oppression and self-absorption, it creates social ills more destructive than those it seeks to remedy. By giving rise to expectations that can never be met, it condemns women to despair, and consigns them to permanent victimhood.' Feminism of this sort clouds women's judgment; it renders them incapable of distinguishing between needs and wants, between real injustices and garden-variety irritations," wrote Katherine Kersten in Policy Review (Spring 1991).

4. Anita Hill
LIMBAUGH: "Anita Hill followed Clarence Thomas everywhere. Wherever he went, she wanted to be right by his side, she wanted to work with him, she wanted to continue to date himThere were no other accusers who came forth after Anita Hill did and said, Yeah, Clarence Thomas, he harassed me, too.' There was none of that."
FAIR: "Hill could not have continued to date Thomas, since they never dated. Two other women, Sukari Hardnett and Angela Wright, came forth in the Thomas case with similar charges."
REALITY: My comment about Hill dating Thomas actually demonstrates my recall of the Thomas-Hill episode _ specifically that the record shows Anita Hill had a genuine affection for Clarence Thomas and repeatedly invited him to her apartment for drinks (a fact Thomas, not Hill, offered for the record).

In his book, The Real Anita Hill, David Brock writes: "In describing her relationship with Thomas, Hill said nothing about any contacts with him outside the office. According to her account, their relationship was strictly professional and had been confined to the workplace. When Thomas later testified, however, he disclosed that when Hill worked at Education, he occasionally offered her rides from the office to her Capitol Hill duplex, since they lived near one another in the Southwest section of the city. This revelation raises the question of what transpired on these occasions _ which overlapped with the period in which the worst harassment had supposedly occurred _ and why Hill omitted them from her testimony. According to Thomas, Hill accepted the rides and sometimes invited him into her apartment, where the two engaged in lengthy discussions about their backgrounds, life in Washington, politics, and policy. What I said was, when we were at the Department of Education, there were, as I recall, a number of instances in which I gave her a ride home, and she asked me just to drop in to continue discussion, and I would have a Coke or a beer or something and leave.'On one occasion, Thomas said, Hill asked him to help hook up new stereo equipment, hardly something that an employee would request of her boss unless the two were on good terms and had a relationship outside the office" (p. 294).

As for "other women" accusing Thomas of sexual harassment, there were none. fair is simply repeating standard liberal mythology. At this juncture, Anita Hill remains Thomas's "sole accuser," writes David Brock (p. 21).

Specifically regarding Angela Wright, Brock writes: "In a May speech at Stanford University, npr's Nina Totenberg said: Angela Wright

was the so-called other woman who made allegations against Clarence ThomasAngela Wright, in a sworn deposition, said that Clarence Thomas had sexually harassed her.' Yet Totenberg was wrong on two counts: The Wright statement was not sworn, and _ one good reason why it warranted little attention during the hearings _ it did not charge Thomas with sexual harassment. The campaign to rehabilitate and publicize comments of a woman who never came forward and never charged Thomas with sexual harassment continued" (p. 255).

And who was Angela Wright? Brock writes: "Wright was soon fired from her job on Capitol Hill for intemperate and erratic behavior in the office, and she went to work for the Republican National Committee [rnc]At the rnc, Wright's reputation did not improve. Former office mates remember having to restrain Wright from pouring boiling hot water from a coffeemaker out a window onto a crowd of pro-choice demonstrators outside the committee's offices. Wright frequently made suggestive commentsand told male co-workers that she liked to walk around her house in the nude" (p. 260).

Specifically regarding Sukari Hardnett, Brock writes: "In addition to resurrecting and mischaracterizing [Angela] Wright's charge against Thomas, [U.S. News & World Report] also claimed that a third sexual harassment charge had been lodged against Thomas by Sukari Hardnett. This was also false. Hardnett, a former legal assistant to Chairman Thomas, submitted an affidavit to the Judiciary Committee on October 14, the day before the Senate vote on the nomination. Women know when there are sexual dimensions to the attention they are receiving. And there was never any doubt about that dimension in Clarence Thomas's office,' Hardnett wrote. She provided no specifics to describe this dimension,' however. She also stated plainly: I am not claiming that I was the victim of sexual harassment.' Hardnett said she eventually resigned from the eeoc because she found working on Thomas's staff unpleasant.' Diane Holt, however, said in a written statement to the Judiciary Committee that Hardnett was fired from the staff after failing on more than one occasion to pass the bar exam. Co-workers of Hardnett during the period said she never complained to anyone about the working environment in the agency" (p. 416).

5. James Madison
LIMBAUGH: Quotes James Madison: "We have staked the futureupon the capacity of each and all of us to govern ourselves, to control ourselves, to sustain ourselves according to the Ten Commandments of God."
FAIR: "We didn't find anything in our files remotely like the sentiment expressed in the extract you sent to us,' David B. Matter, associate editor of The Madison Papers, told the Kansas City Star (1/16/94). In addition, the idea is entirely inconsistent with everything we know about Madison's views on religion and government.'"
REALITY: The quote is not Madison's. But the misattribution of this statement (an error, not "a lie") has been made by many over the years. (An early citation is found in a 1939 book by Harold K. Lane, Liberty, Cry Liberty.)

But as for the other point _ that "the idea is entirely inconsistent with everything we know about Madison's views on religion and government" _ fair's source is wrong. Sample these fully documented quotes by Madison:

"...we have all been encouraged to feel in the guardianship and guidance of that Almighty Being whose power regulates the destiny of nations, whose blessings have been so conspicuously dispensed to this rising Republic, and to whom we are bound to address our devout gratitude for the past, as well as our fervent supplications and best hopes for the future" (James Madison's First Inaugural Address, delivered March 4, 1809).

"It is the duty of every man to render to the Creator such homage and such only as he believes to be acceptable to him. This duty is precedent, both in order of time and in degree of obligation, to the claims of Civil Society" (cited in Forrest McDonald's Novus Ordo Seclorum: The Intellectual Origins of the Constitution, published by the University Press of Kansas in 1985, p. 45).

"Religion, or the duty we owe our Creator, and the manner of discharging it, can be directed only by reason and conviction, not by force or violence; and, therefore, that all men should enjoy the fullest toleration in the exercise of religion according to the dictates of conscience, unpunished and unrestrained by the magistrate, unless under color of religion any man disturb the peace, the happiness, or safety of society, and that it is the mutual duty of all to practice Christian forbearance, love and charity toward each other" (cited in Gaillard Hunt's James Madison and Religious Liberty, published by the Government Printing Office in 1902, p. 166).

"The belief in a God All Powerful, wise and good, is so essential to the moral order of the World and to the happiness of man, that arguments which enforce it cannot be drawn from too many sources nor adapted with too much solicitude to the different characters and capacities to be impressed with it" (cited in A.D. Wainwright's Madison and Witherspoon: Theological Roots of American Political Thought, published by the Princeton University Library in 1961, p. 125).

6. Native Americans
LIMBAUGH: "There are more American Indians alive today than there were when Columbus arrived or at any other time in history. Does this sound like a record of Genocide?"
FAIR: "According to Carl Shaw of the U.S. Bureau of Indian Affairs, estimates of the pre-Columbus population of what later became the United States range from 5 million to 15 million. Native populations in the late 19th century fell to 250,000 due in part to genocidal policies. Today the U.S.'s Native American population is about 2 million."
REALITY: The facts support me. fair is repeating the liberal myth that American Indians were systematically wiped out by white genocide. In See, I Told You So (from which fair takes my statement), I myself point out that while "there were certainly atrocities against Indians by white people," the full picture indicates that "life was far from utopian for these people" and that "there were just as many _ and probably to a greater degree of savagery _ committed by other Indians" (p. 68).

As for Indian population in the New World, Robert Royal, author of 1492 And All That: Political Manipulations of History, writes: "Estimates of pre-Columbian population figures have become heavily politicizedwith scholars who are particularly critical of Europe often favoring wildly higher figures. High starting points make Indian deaths by disease, warfare, and mistreatment all the greater. David Henige has dubbed this Native American Historical Demography as Expiation.' Yet despite their mistreatment by Europeans and devastation by European diseases (large numbers of Indians died as disease passed along trade routes, 80 percent without ever seeing a white man), some Indian groups are more populous today than in 1492. There are now more than 30 million Indians in Latin America alone, and there are several times more Iroquois in North America than at first contact." _ Robert Royal, "Hello Columbus: America Was No Paradise in 1492," Policy Review, Fall 1992, p. 44.

As for instances of "genocidal policies," Royal asks: "Genocide? Where? I don't know of any instances of Indian genocide. Mistreatment, yes. Warfare, yes. Deaths related to diseases caught from Europeans, yes. But systematic genocide, policies of genocide, no. Where are these policies? Where is the proof? The fact is, activists who spout off such claims of genocide have no proof. It's amazing what they can get away with" [by interview].

fair's charges as reported by The Washington Post July 1, 1994 (except for those covered elsewhere in this response):

1. Whitewater coverage
FAIR: Limbaugh has said, "I don't think The New York Times has run a story on [Whitewater] yetthere has not been a big one, front-page story, about this one that we can recall."
REALITY: My full quote, cited in the fair's own report, reads: "I don't think The New York Times has run a story on this yet. I mean, we haven't done a thorough search, but I _ there has not been a big one, front-page story about this one that we can recall. So this has yet to create or get up to its full speed _ if it weren't for us and The Wall Street Journal and The American Spectator, this would be one of the biggest and most well-kept secrets going on in American politics today." The date I said this: February 17, 1994.

My point, that as of February, much of the mainstream press had not played up Whitewater details while conservative publications had covered the scandal prominently and advanced the story, is correct. I plainly state that I don't recall if The New York Times has run a front-page story. And the fact that I overlooked one Times article that ran eleven months earlier is hardly indicative of a "reign of error."

My quote came exactly nine days before The New York Times ran another major news story on Whitewater and followed that with an editorial the following day blasting the Clinton Administration in a piece entitled, "Slovenly White House Ethics." New York Post critic Hilton Kramer then noted: "If we may judge from the catch-up reporting in Saturday's New York Times and the paper's fire-and-brimstone editorial on Sunday, it looks as if the scandals plaguing President Clinton and the First Lady are rapidly

approaching disaster. Given the way the paper has shamelessly downplayed the Clintons' follies in the past _ even as the press was coming up with more and more sensational revelations _ I think we can assume that the situation has gotten to be too hot now to be ignored, even by the Times."

2. Gulf War I
LIMBAUGH: On the Persian Gulf, Limbaugh has said "everybody in the world was aligned with the United States except who? The United States Congress."
FAIR: Both houses of Congress voted to authorize the U.S. to use force against Iraq.
REALITY: Congress eventually went along with President Bush's policy _ but they had to be dragged along, kicking and screaming since a majority in Congress and the Democratic leadership were against military action month after month. This is my point, easily understood in the context of my view that the Democratic Congress was almost always opposed to what George Bush favored. Congress didn't even vote "yes" on a resolution to authorize military force until January 12, three days before the deadline for war, and after three days of intense and emotional debate.

Bob Woodward, in his book The Commanders, wrote that on January 6, 1990, Defense Secretary Richard Cheney argued the President not take his case before Congress at all for fear of having Democrats vote "no" on authorization to use force against Iraq. "Cheney was deeply suspicious of the Democrats, who controlled Congress. He thought they would love to slam the door on the administration's effortsThe next day, on January 7, [House] Speaker [Tom] Foley announced that the House would begin debate later in the week on a resolution authorizing the use of force. He personally opposed the use of force until economic sanctions were given more time, but he said that he believed the authorization would pass by a narrow margin." That is precisely what happened. In the Senate, in fact, the vote was a mere 52 to 47.

Here are a few salient quotes from leading Democrats at the time, taken from The Congressional Record:

"If we rush to war, it will be a nightmare in the Persian Gulf. Our country will be torn apart, and very little good will happen in the United States or in the world for a long, long, long time." _ Sen. Paul Wellstone

"It'll be brutal and costlyThe Administration refuses to release casualty estimates, but the 45,000 body bags the Pentagon has sent to the region are all the evidence we need of the high price in lives and blood that we will have to pay." _ Sen. Edward M. Kennedy

"Is Kuwait worth the life of a GI? Not at all." _ Sen. Ernest F. Hollings

"Nothing large happened. A nasty little country invaded a littler but just as nasty country." _ Sen. Daniel Patrick Moynihan

3. Gulf War II
LIMBAUGH: Explaining why the Democrats wanted to "sabotage" President

Bush with the 1990 budget deal: "Now, here is my point. In 1990, George Bush was president and was enjoying a 90 percent plus approval rating on the strength of our victories in the Persian Gulf War and Cold War." (Told You So, p. 304)
FAIR: In October 1990, when the budget deal was concluded, the Gulf War had not yet been fought.
REALITY: My point, that George Bush was riding high in the polls on the strength of his handling of foreign policy (the Persian Gulf and managing the twilight of the Cold War) and that this popularity was sabotaged by the Democrats in the 1990 budget deal, is supported by the record. Eighteen days after Kuwait was invaded by Iraq (Aug. 2, 1990), Bush's approval rating on the crisis was at 82 percent, according to a usa Today poll. His overall approval rating was at 76 percent, according to a cbs News/New York Times survey. By November 13, a month after the budget deal vote, Bush's approval rating on handling the Persian Gulf crisis had fallen to 51 percent (see "Bush Support Slim," usa Today, 11/13/90). His overall approval rating that month, according to cbs/ny times, was down as well _ to 60 percent. According to pollster Frank Luntz, this 16-point drop in the overall rating is one of the sharpest two-month declines in modern presidential history.

Wrote David Broder on November 4, 1990, before the U.S. invasion had begun: "The era of good feelings President Bush engendered after the nastiness of the 1988 campaign lasted for more than a year, punctuated by broad public support for his military actions against Manuel Noriega and Saddam Hussein, and the celebrations of the fall of the Berlin Wall and the freedom of Eastern EuropeBut then Bush put himself at the very center of the most frustrating of all Washington problems, the budget deficit. He built a bipartisan summit _ and dove off its peak. By dumping his tax pledge, he separated himself from most of his party's candidates, and the budget deal he obtained _ after much grief _ was not one that many voters cheered." _ "The Year of Voting Dangerously," in The Washington Post, 11/4/90.

Ironically, on the day that Kuwait was invaded, two quotes referring to the 1990 budget deal appeared in The Washington Post that fully support my contention that the Democrats knew full well that they were sabotaging President Bush:

"We are watching the Bush presidency unravel,' said Democratic National Committee Chairman Ronald H. Brown." (Washington Post, 8/2/90)

"Democrats agreed to help the president, Panetta said, but we did not pledge that every time the Republicans slit their wrists, we'll slit ours.'" (Washington Post, 8/2/90)

FAIR's charges in a New York Times advertisement July 6, 1994 (except for those covered elsewhere in this response):

1. Canadian health care
FAIR: "Rush's groundless assertions on issues of public importance include most physicians come to the U.S. when in need of surgery.'"

REALITY: My full quote, found in fair's own report, is this: "Most Canadian physicians who are themselves in need of surgery, for example, scurry across the border to get it done right; the American way. They have found, through experience, that state medical care is too expensive, too slow and inefficient, and, most important, it doesn't provide adequate care for most people."

Canadian medical care is expensive, slow, and inefficient. Wrote Heritage Foundation health care policy analyst Edmund Haislmaier in a 1991 Policy Review article entitled, "Northern Discomfort: The Ills of the Canadian Health System": Canada's "health care system has been fully nationalized for the past two decades. In a 1989 cover story entitled Sick to Death,' the Canadian news magazine McLean's described [Charles] Coleman's case [who, at 63, had his coronary bypass surgery postponed 11 times and died eight days after the surgery was finally performed], as well as numerous other examples of a national health care system in crisis. Dr. Phil Gold, then-chief physician of Montreal General Hospital, complained, I'm living from hand to mouth and waiting for disaster each dayI don't know when someone will die for lack of a bed or the proper equipment." As for "most" physicians scurrying over the border, this is an obvious humorous exaggeration to be sure, but it is hardly "groundless." The Canadian media itself reports on fed-up doctors coming to the U.S. Note this headline in the London [Ontario] Free Press on June 28, 1994: "Cutbacks, Frustration, Pushing Doctors to U.S." The article states: "Frustrated by restrictions, cutbacks, and loss of respect, the number of doctors actively seeking work south of the border is on the rise _ and Americans are embracing them with open arms. I have never heard of as many doctors who have their names with recruiting agencies, or who have gone to the States to look around as I have for the past six months,' says [a member] of the London District Academy of Medicine, who has practiced in that city for 23 years." The article also stated, "In the U.S., which traditionally attracted Canadian specialists, the biggest demand now is for family physicians, says Jim Merritt, president of the Irving, Texas, based Merritt, Hawkins and Associates, one of the largest American physician recruitment firms."

W. Gifford-Jones, himself a Canadian doctor, wrote a column for The Evening Telegram (St. Johns, Newfoundland, Canada) entitled, "Public's Appetite Too Ravenous for Free Medical Care.'" He stated: "Mrs. Clinton take note. Many hospital beds in Canada have closed due to a lack of government funding. Operating rooms stand idle at certain times in a desperate effort to save money. Cutbacks are evident in every hospital service. It's meant that some Canadians have become more familiar with the U.S. But they're not tourists on their way to the Grand Canyon. Rather, they've crossed the border for bypass surgery and other procedures to avoid long waiting lists in Canada. But not only patients cross the 49th parallel. Some of the best physicians and surgeons have fled south, due to inadequacies in the system. One doctor who moved to Buffalo, N.Y., told me, Now I'm considered part of the solution. In Canada I was considered part of the problem.'"

Furthermore, scores of wealthy and well-connected Canadians come to the United States for surgery because they cannot get timely, quality service in Canada's own nationalized health care system.

In 1993, Joanna Miyake and Michael Walker of the Frasier Institute, a Vancouver, Canada-based think tank, published a 1993 study entitled, "Waiting Your Turn: Hospital Waiting Lists in Canada." They wrote: "More people in Canada will die this year of cardiovascular disease than of any other single disease. Because cardiovascular disease is a degenerative process and the decay of the cardiac surgery candidate is gradual, under a system of rationed supply some cardiovascular surgery candidates tend to be bumped by patients with other conditions that require immediate careThe result has been lengthy waiting lists, often as long as a year or more, followed by public outcry, prompting short-term funding. For instance, last year we reported that Newfoundland's waiting list for coronary bypass surgery was a year long."

Miyake and Walker, discussing how patients deal with such waiting lists, continue: "U.S. hospitals have also provided a convenient short term solution to excessive waiting lists for cardiac surgery. The British Columbia government contracted Washington state hospitals to perform some 200 operations in 1989, after public outcry over the six-month waiting list for cardiac bypass surgery. Wealthy individuals are sometimes choosing to avoid the waiting lists by having their heart surgery performed in the U.S. In fact, a California heart surgery centre has advertised its services in a Vancouver newspaper. Our survey suggests that 5 percent of patients enquire about surgery outside of Canada and 1.5 percent actually have their heart surgery performed outside of the country." _ Joanna Miyake and Michael Walker, "Waiting Your Turn: Hospital Waiting Lists in Canada," 3rd Edition, Critical Issues Bulletin, Frasier Institute, 1993.

What is more, at least one high-level Canadian political figure even travelled to the U.S. for medical care. Wrote Heritage's Edmund Haislmaier: "When Robert Bourassa, the Premier of Quebec, needed cancer treatment, he crossed into the U.S. and obtained it at his own expense. Such actions by more affluent or politically well-connected Canadians raise the question of whether a two-tiered' health system, of the kind Canadians long sought to avoid, is now emerging." _ Edmund Haislmaier, "Problems In Paradise: Canadians Complain About Their Health Care System," Heritage Backgrounder 883, February 19, 1992, p. 2.

2. The nicotine controversy
FAIR: "Rush's groundless assertions on issues of public importance include ... nicotine's addictiveness has not been proven.'"
REALITY: My point, made over and over again in recent months, is that if nicotine is really a terrible drug then Congress should just call it a terrible drug and ban it outright. The fact is that nicotine's addictiveness and whether or not it is a drug is, contrary to fair's assertion, a source of tremendous controversy _ so controversial that The Washington Post's lead editorial on July 2, 1994 dealt entirely with this issue. "[F]ood and drug commissioner David Kesslerhas begun an effort to determine whether nicotine-containing cigarettes meet the law's definition of a drug. If they do, the Food

and Drug Administration has the duty to regulate themif cigarettes are a drug, and if they can't be shown in their present form to be safe and effective _ which a drug would have to be in order to be sold, and which is not very likely _ then what does the government do?"

3. Ozone and volcanoes
FAIR: "Rush's groundless assertions on issues of public importance include ... volcanoes do more harm to the ozone layer than man-made chemicals."
This is the lead attack in fair's full report, in which fair trashes my source, Dixy Lee Ray's book, Trashing The Planet, published by Regnery Gateway.
REALITY: fair's source for countering me is Science magazine. However, Science's June 11, 1993 issue points out that this topic is a huge source of controversy. "[A]tmospheric scientists freely admit that, as a January 1993 review of the Department of Energy's Atmospheric Chemistry Program's Ozone Project put it, current understanding of global ozone behavior is fraught with uncertainty.' Among these uncertainties are whether ozone depletion is due to natural variation and changes in atmospheric circulation, chlorine from cfc's, or some combination of both."

Furthermore, Ray's book is not the only source of discussion of volcanoes and ozone. Ronald Bailey, who has reported on science issues for Forbes and PBS, discusses this topic in chapter eight of his 1993 book, Eco Scam: The False Prophets of Ecological Apocalypse (St. Martin's Press), noting, "sulfur from Mount Pinatubo and some Southern Hemisphere volcanoes did hasten the opening of the annual Antarctic ozone hole in 1992."

University professors Ben Bolch and Harold Lyons also discuss volcanoes and ozone in their 1993 book, Apocalypse Not: Science, Economics and Environmentalism (CATO Institute), noting, "volcanic eruptions can so disturb the stratosphere they may lead to significant ozone destruction."

And note this headline from a Boyce Rensberger article in The Washington Post: "Ozone Layer Thins Further, Possibly Because of Volcano" (April 23, 1993).

4. Effectiveness of condoms
FAIR: "Rush's groundless assertions on issues of public importance include ... condom users have a one-in-five aids risk."
REALITY: This is a distortion of fair's own study, which quotes me as saying, "The worst of all this is the lie that condoms really protect against aids. The condom failure rate can be as high as 20 percent. Would you get on a plane _ or put your children on a plane _ if one in five passengers would be killed on the flight? Well, the statistic holds for condoms, folks." My point is that because condoms can have such a high failure rate, they are not good protection against contracting hiv and aids. That is distinctly different from saying that condom users have a one-in-five aids risk.

As for condom failure rate, Susan C. Weller's 1993 study for the University of Texas Medical Branch found that "although contraceptive research indicates that condoms are 87 percent effective in preventing

pregnancy, results of hiv transmission studies indicate that condoms may reduce risk of hiv infections by approximately 69 percent," adding that condom "efficacy may be much lower than commonly assumed."

Having suggested condom use could, over time, fail to prevent hiv transmission 31 percent of the time (note: this is different from someone actually contracting aids, but still should be very alarming to the pro-condom community) Weller's study concludes: "It is a disservice to encourage the belief that condoms will prevent sexual transmission of hiv."

5. U.S. poor vs. Europe's mainstream
FAIR: "Rush's groundless assertions on issues of public importance include... the poorest people in America are better off than the mainstream of families in Europe.'"
REALITY: "Poor' Americans live in larger houses or apartments, eat more meat, and are more likely to own cars and dishwashers than is the general population in Western Europe." _ Robert Rector, senior policy analyst at The Heritage Foundation, in a September 22, 1993 study entitled, "The Poverty Paradox: How American Spent $5 Trillion on the War on Poverty Without Reducing the Poverty Rate."

6. Iran-Contra
FAIR: "Rush Limbaugh's groundless assertions on issues of public importance include ... not one indictment' resulted from Lawrence Walsh's Iran-Contra investigation."
REALITY: fair's actual report quotes me as saying, "This [Special Prosecutor Lawrence] Walsh story basically is, we just spent seven years and $40 million looking for any criminal activity on the part of anybody in the Reagan administration, and guess what? We couldn't find any. These guys didn't do anything; but we wish they had so we could nail them. So instead, we're going to say, Gosh, these are rotten guys.' They have absolutely no evidence. There is not one indictment. There is not one charge."

I was painting a portrait of how ridiculous I thought Walsh's investigation was, pointing out that no one was ever proven to have broken laws vis-Oe-vis selling arms to Iran or providing funds to the Nicaraguan contras.

I obviously misspoke when I said there were no indictments _ I clealy meant to say there were no convictions, a point I have made on many occasions. And I am exactly right that seven years and $40 million were spent to produce no convictions on the substantive points of the Iran-Contra charges.

Former Attorney General Edwin Meese III makes this case in his 1992 book, With Reagan: The Inside Story: "Despite all the rhetoric expended on this issue, it has never been settled in a court of law. The legal verdicts against North and Poindexter, which were subsequently overturned on appeal, were based on other, collateral issues. Likewise, other convictions that were obtained, generally on minor offenses, involved peripheral charges that had more to do with the investigation of the Iran-Contra affair than with the matter itself. To this day, the remaining funds from these transactions

are impounded by the Swiss authorities, subject to competing claims from General Secord and the U.S. government. Thus, it is far from certain that the diversion was illegal _ and still less certain that any other parts of the Iran-Contra affair were criminal activity" (p. 286).

Michael Gartner's charges in usa Today, July 12, 1994

GARTNER: "Why does anyone take Rush Limbaugh seriously? He's a showoff, a showman and a jerkHe's entertaining. But come on, he is to truthfulness as President Clinton is to faithfulness _ he has but a passing acquaintance with it. He's toying with you, folks, getting you all riled up with a stew of half-truths and non-truths. He's making fools of you, feeding you swill _ and you're taking it in."
and a related item, as published in extra!:
LIMBAUGH: Assailing a journalist who had criticized Nixon: "Michael Gartner, portraying himself as a balanced, objective journalist with years and years of experience faking events, and then reporting them as news _ and doing so with the express hope of destroying General Motors in one case and destroying businesses that cut down trees, the timber industry, in another." (TV show, 4/27/94)
FAIR: Gartner, the nbc News president who resigned in the wake of the gm truck explosion episode on nbc's "Dateline," had no hands-on role in it _ nor had he expressed a hope of destroying any company.
REALITY: Gartner, the "former president of nbc News," was in charge when nbc's "Dateline" staged the explosion of a General Motors truck, a nasty episode The Wall Street Journal properly dubbed "the worst scandal to beset nbc News in its four-decade history," (3/22/93). "nbc News employees made seriously flawed judgments' and violated numerous division guidelines in putting together a much-criticized story questioning the safety of General Motors Corp. trucks, an nbc-commissioned investigation charges. And when General Motors complained directly about supposed inaccuracies and questionable ethics involved in the story for Dateline nbc,' news staff failed to follow established rules for handling the protest, the report states. It further singles out Michael Gartner, who resigned as president of nbc News on March 2 for conducting an incomplete investigation when he learned belatedly of gm's problems with the broadcast." (The Wall Street Journal, 3/23/93).

A week after the "Dateline" episode, reported Time (3/15/93), "Tom Brokaw expressed his regrets for several aspects of a Nightly News report about environmental abuses on an Idaho river. It featured footage of dead' fish _ but the supposedly deceased denizens of the deep were only stunned as part of an experiment. Clearly, someone's head was due to roll, and the rollee turned out to be the top man himself: Michael Gartner, president of nbc News."

To answer Gartner's question, "Why does anyone take Rush Limbaugh seriously?" _ there is just one answer. People take me seriously because I am effective. And in my pursuit of the truth, I am an exceptionally accurate commentator.

"Nitrogen Tri-Iodide is a very unstable compound that decomposes explosively with the slightest provocation. It is too unstable to have any practical uses, but is often made for its novelty value."
- rec.pyrotechnics FAQ

4572. FAIR replies to Limbaugh

Newsgroup: rec.radio.broadcasting
Date: 1994-10-24 21:32:08 UTC

FAIR'S REPLY TO LIMBAUGH'S NON-RESPONSE October 13, 1994

Rush Limbaugh's long-touted "5,000 word response" to FAIR's "Reign of Error" report has been released -- after nearly three and a half months. Unfortunately for Limbaugh, it doesn't rebut; mostly it changes the subject, dodges and wastes thousands of words on tangents and what-I-really-meant-to-say digressions. Whereas the FAIR report offered facts to specifically rebut Limbaugh's claims, his response relies on off-point quotes, non-responsive texts, even passages from opinion columnists.

It's telling that Limbaugh doesn't bother to rebut our original report -- which we provided to him two days before its public release. Instead, his response works from (sometimes incomplete) press accounts of our report. As a result, Limbaugh ignores almost half of the errors that we pointed out.

The response is in many ways more disturbing than the original false claims -- because it reveals that even after his accuracy has been specifically challenged, Limbaugh (along with his multi-million dollar broadcasting and publishing operation) is utterly incapable of engaging in factual discourse.

In his "Dear Mr. Journalist" cover letter, Limbaugh writes that "there has been no double checking; there have been no questions asked of FAIR. Journalists were handed a list of items by this group, and they simply repeated them." In fact, journalists repeatedly asked tough questions of FAIR, sought added documentation, and did their own reporting. It is clear from Howard Kurtz' Washington Post piece (7/1/94), for example, that he did his own independent research and interviews.

Even the brief cover page of Limbaugh's response contains errors. In furtherance of a conspiracy theory that was apparently too good to check out, Limbaugh writes that FAIR "was launched in the summer of 1987 with the financial assistance of The New World Foundation." He goes on to say that Hillary Clinton chaired the foundation. In fact, FAIR was founded not in 1987, but 1986 -- and the foundation played no role in the launching. Limbaugh makes reference to a 1987 grant of $2,500; he doesn't say that it was a discretionary grant conferred by the foundation's executive director, a decision that did not involve the chair or the board. These are simple facts that anyone could have learned by calling FAIR or the foundation.

(Anyone who's done even a cursory review of FAIR's work would know that we are far from flacks for the Clinton administration, and that we've frequently criticized mainstream media for soft treatment of the president on various issues.)

Limbaugh's cover letter also repeats the claim that FAIR found 43 errors in more than 4,000 hours of broadcasts. As our report noted, our list was far from exhaustive. We assembled those errors from easily available sources -- mainly his books and transcripts of several weeks' worth of his TV show.

What follows is a point-by-point reply to Limbaugh's non-response. We retract nothing -- since Limbaugh has been unable to show that we were wrong on a single point. Limbaugh's "rebuttal" is a sad commentary on a broadcaster who has 20 million listeners per week, but can't document his claims.

1. STUDENT LOANS: Limbaugh asserted that "banks take risks in issuing student loans and they are entitled to the profits." In reality, as FAIR pointed out, these loans are federally insured.

His "rebuttal" is to offer a quote from a bankers' association spokesperson, who asserts that the "risk" bankers face is that they might fail to comply with federal procedures, and therefore not receive the reimbursement that the federal government would otherwise give them. This is a novel use of the concept of "risk" in lending, which is generally considered to be the chance that a recipient will not repay a loan.

2. AMERICAN HEALTH CARE: Limbaugh urged a comparison of "American health care to other industrialized nations." FAIR did so, and found the U.S. running near the bottom on such matters as life expectancy and infant survival.

In attempted rebuttal, Limbaugh offers a quote from "Dr. Elizabeth McCaughey" (not a medical doctor, the Manhattan Institute's McCaughey has a PhD in constitutional law), who writes that high infant mortality and lower life expectancy "have almost nothing to do with the quality of American medical care. Both statistics reflect the epidemic of low-birth-weight babies born to teenage and drug-addicted mothers, as well as the large numbers of homicides in American cities and drug-related deaths."

This is misinformation. Infant mortality, far from having "almost nothing to do with" the quality of health care, is closely linked with the availability of prenatal care. According to figures from the National Center for Health Statistics, the mortality rate for infants whose mothers received little or no prenatal care is almost 10 times that of mothers who received frequent prenatal care.

And the Centers for Disease Control estimate that homicide lowers U.S. life expectancy by about three months -- which would do almost nothing to improve our rank. "Drug related deaths" are far fewer than homicides, and would have even less impact on our life

expectancy ranking.

Limbaugh ignores the second half of FAIR's argument: "The U.S. also has the lowest health care satisfaction rate (11 percent) of the 10 largest industrialized nations (Health Affairs, Vol. 9, No. 2)."

3. FOREST ACREAGE: "Do you know we have more acreage of forest land in the United States today than we did at the time the Constitution was written?" said Limbaugh. In fact, in what are now the 50 U.S. states, there were at least 850 acres of forest land in the late 1700s, vs. only 730 acres today.

Limbaugh's rebuttal is a lengthy dodge, which compares the amount of forest land in the U.S. today to that in 1920. But the Constitution was written in 1787, not 1920.

4. CHELSEA CLINTON: Limbaugh asserted that students at Chelsea Clinton's Sidwell Friends school were "required" to write a paper on "Why I Feel Guilty Being White" and added, "My source for this story is CBS News. I am not making it up." In reality, Limbaugh falsely claimed CBS News as his source, and there's no evidence that any such essay was ever assigned.

Limbaugh actually took this claim from an infotainment tip sheet called CBS Morning Resource--which is not part of CBS News, any more than a game show on a CBS station is part of CBS's news operation. Limbaugh also neglected to tell his listeners that his real source for the item, as stated in the tip sheet, was Playboy (which had cited Heterodoxy, a right-wing publication).

As CBS News Vice President Larry Cooper wrote in a letter responding to Limbaugh (USA Today, 7/20/94): "Limbaugh's source was actually Playboy magazine. The story, crediting Playboy, was distributed to radio stations via the CBS Morning Resource.... Morning Resource is not associated with CBS News." Limbaugh seemed to sense -- correctly -- that an item would sound more credible to his listeners if sourced to "CBS News" than to Playboy.

In Limbaugh's rebuttal, he ignores the difference between CBS News and CBS Morning Resource. He still asserts that his claim about the required essay assignment is "a true story," and that "my office did what no other journalist did: We tracked the story to its root and talked to the original reporter (for Washington's City Paper). He confirmed the story."

Did Limbaugh's office do some pioneering research here? Not quite. FAIR's magazine EXTRA! had already tracked down the reporter who first wrote of the purported essay assignment, and published that fact five weeks ago (Sept./Oct. 94). After we asked the City Paper reporter, Bill Gifford, how an essay called "Why I Feel Guilty Being White" could be assigned to the roughly 25 percent of the school's students who are not white, he said he would doublecheck with his source, an unnamed disgruntled parent. Gifford got back

to us and said that the actual title of the essay assigned to a 7th and 8th-grade class was "Should White People Feel Guilty and Why?" -- a different, more neutral topic.

After claiming that "no other journalist" had talked to the original reporter, Limbaugh then contradicts himself by acknowledging that we had talked to Gifford. Limbaugh claims Gifford "says he told FAIR the same thing he told my office, that he stands by the story and it's true." Interviewed by a Washington Times reporter doing a story on the Limbaugh rebuttal (10/11/94), Gifford confirmed that his source said the assignment was "Should White People Feel Guilty?" -- and not "Why I Feel Guilty Being White."

Of course, the "root" of a story about a school assignment is not a reporter, or a shaky unnamed source -- it's the classroom. From inquiring repeatedly among administrators and faculty at the school, we have found no evidence of either of the above two essay topics. Limbaugh and City Paper have produced no written documentation. The school maintains that the story is "apocryphal."

5. BEER AND ALCOHOL TAXES IN 1993: "You better pay attention to the 1993 budget deal because there is an increase in beer and alcohol taxes," asserted Limbaugh during his July 9, 1993 radio show. In reality, there were no such increases in the budget deal.

In "rebuttal," Limbaugh says that beer and alcohol taxes "were indeed considered" for the budget. This of course is very different from saying that alcohol tax increases are IN the budget deal. In fact, when Limbaugh made this statement, different budget packages had passed both the House and the Senate, and neither package included tax increases on beer or alcohol.

It's noteworthy that Limbaugh's main source for the point that an alcohol tax was even considered is Bob Woodward's The Agenda, which hadn't been published when Limbaugh made his pronouncement. In an even wilder tangent, Limbaugh talks of prospective alcohol taxes to cover Clinton's health plan. This, again, has nothing to do with "the 1993 budget deal."

6. GAS LINES: "Those gas lines were a direct result of foreign oil powers playing tough with us because they didn't fear Jimmy Carter," Limbaugh wrote in his book See, I Told You So. In fact, FAIR pointed out, the most serious gas lines were in late 1973/early 1974, during the Nixon administration.

Limbaugh says he "wasn't discussing the 1973 gas lines" -- just the "gas lines that Jimmy Carter was responsible for." But the passage that includes this statement begins, "I, for one, remember the long gas lines of the 1970s" -- with no distinction made between the more serious 1973-74 gas lines and the gas lines he blames on Jimmy

Carter.

7. U.S. MILITARY/BOSNIA: Defending his claim that "for the first time in military history, U.S. military personnel [in Bosnia] are not under the command of United States generals," Limbaugh's rebuttal claims that "U.S. military personnel have served WITH forces from other countries throughout history, such as in World War I and II but U.S. generals have always been at the top of the command structure." In fact, in World War I, France's Marshal Ferdinand Foch was in overall command of Allied troops. This fact was noted in FAIR's report, but Limbaugh seems to have chosen to ignore it.

8. RODNEY KING: Limbaugh's claim that "the videotape of the Rodney King beating played absolutely no role in the conviction of two of the four officers" is clearly unsupportable. Nothing Limbaugh writes contradicts the jury foreman's statement that the video was "crucial" in the conviction -- a statement that Limbaugh says he simply "discounted."

9. C.C. MYERS: Limbaugh said that declaring the Santa Monica Freeway a disaster area "eliminated the need for competitive bids."

In fact, C.C. Myers beat out four other contractors who bid on the project. Limbaugh said that Myers did not have to go through the "rigamarole...of giving 25 percent of the job to a minority-owned business and 25 percent to a woman." In fact, affirmative action rules applied. Limbaugh said that "government got the hell out of the way." In fact, state employees worked round the clock on the project, and the whole thing was government-funded. While not disputing any of the factual errors that we pointed out, Limbaugh's rebuttal irrelevantly argues that other statements he made about Myers were true.

10. FEMINISM: "Women were doing quite well in this country before feminism came along," Limbaugh said. FAIR pointed out that before feminism, women couldn't even vote -- since feminism "came along" in the 19th Century. "I was referring to contemporary militant feminism," Limbaugh now amends. But that is not what he said -- and "Words mean things," as Limbaugh proclaims in his "35 Undeniable Truths of Life."

11. ANITA HILL: Of Anita Hill and Clarence Thomas, Limbaugh declared: "She wanted to continue to date him." In response to FAIR's pointing out that Hill and Thomas never dated, Limbaugh said that his comment "actually demonstrates my recall of the Thomas-Hill episode," citing a statement by Thomas that Hill had invited him into her home after driving her home.

But neither Thomas or Hill ever characterized these or any other interaction that the two had as anything approaching a "date." Hill has said that Thomas asked her out, and that she declined;

Thomas denied strongly that "I ever attempted to date her."

Limbaugh also said, "There were no other accusers who came forth after Anita Hill did and said, 'Yeah, Clarence Thomas, he harassed me too.' There was none of that." Angela Wright and Sukari Hardnett did not apply the term "sexual harassment" to what they had personally experienced while working for Thomas. But their descriptions of Thomas' behavior, if true, would almost certainly meet the legal definition of harassment.

"Clarence Thomas did consistently pressure me to date him," Wright told Senate investigators. "At one point, Clarence Thomas made comments about my anatomy. Clarence Thomas made comments about women's anatomy quite frequently. At one point, Clarence Thomas came by my apartment at night, unannounced and uninvited.... He would try to move the conversation over to the prospect of my dating him."

"If you were young, black, female and reasonably attractive, you knew full well you were being inspected and auditioned as a female," Hardnett wrote in a letter to the Senate Judiciary Committee. "You knew when you were in favor because you were always at his beck and call, being summoned constantly, tracked down wherever you were in the agency and given special deference by others because of his interest. And you knew when you had ceased to be an object of sexual interest -- because you were barred from entering his office and treated as an outcast, or worse, a leper with whom contact was taboo."

12. JAMES MADISON: Limbaugh acknowledges that he misattributed the alleged quote from Madison (saying that Americans must "sustain ourselves according to the Ten Commandments of God").

13. NATIVE AMERICANS: Unable to provide any evidence to support his claim that "there are more American Indians alive today than there were when Columbus arrived," Limbaugh quotes an article in the Heritage Foundation magazine that claims that "some Indian groups are more populous today than in 1492."

14. WHITEWATER COVERAGE: "I don't think the New York Times has run a story on [Whitewater] yet," Limbaugh said on February 17, 1994. "There has not been a big one, front-page story about this one that I can recall." FAIR noted that the Times had actually published the first major story on Whitewater -- a lengthy, front-page piece that appeared on March 8, 1992.

Limbaugh defends this mistake: "The fact that I overlooked one Times article that ran 11 months earlier is hardly indicative of a 'reign of error.'"

First, March 1992 is 23 months before February 1994, not 11 months.

Furthermore, Limbaugh did not overlook one front-page New York Times story on Whitewater, he overlooked half a dozen. We cited the March 8, 1992 story to suggest that Limbaugh, who passes himself off as an expert on press coverage of Whitewater, should have known who it was that originally broke the story.

15. GULF WAR I: Limbaugh's original statement was that during the Gulf War, "everybody in the world was aligned with the United States except who? The United States Congress."

After FAIR pointed out that both houses of Congress had voted to authorize the use of force in the Persian Gulf, Limbaugh responded on his radio show (7/5/94): "When I said it, it was true," he claimed -- implying he had said it while the debate was still ongoing.

Actually, Limbaugh made the statement on April 18, 1994 -- more than three years after the vote. Limbaugh now admits that "Congress eventually went along with President Bush's policy -- but they had to be dragged along, kicking and screaming." Yet another "what I meant to say..." response.

16. GULF WAR II: "In 1990, George Bush was president and was enjoying a 90 percent plus approval rating on the strength of our victories in the Persian Gulf War and Cold War." Limbaugh does not dispute our point that "our victories in the Gulf War," fought in 1991, could not have influenced Bush's 1990 approval rating. Only after the war did Bush's approval rating reach anything like 90 percent.

17. CANADIAN HEALTH CARE: Limbaugh says that his claim that "most Canadian physicians who are themselves in need of surgery...scurry across the border to get it done right; the American Way" was "an obvious humorous exaggeration." In fact, the passage it appears in -- on page 153 of See, I Told You So -- is completely sober and straightforward. In his rebuttal, Limbaugh is unable to produce even a single anecdotal example of a Canadian doctor who came to the U.S. for any kind of medical treatment -- though he does offer examples of Canadian doctors who moved south to WORK in the U.S.

18. THE NICOTINE CONTROVERSY: "It has not been proven that nicotine is addictive," Limbaugh declared. Nicotine's addictiveness is only controversial among scientists paid by the tobacco industry. When the New York Times (8/2/94) asked two independent experts to rank nicotine in terms of "dependence" -- defined as "how difficult it is for the user to quit, the relapse rate, the percentage of people who eventually become dependent, the rating users give their own need for the substance and the degree to which the substance will be used in the face of evidence that it causes harm" -- both rated nicotine ahead of heroin, cocaine and alcohol.

19. OZONE AND VOLCANOES: There are many uncertainties about ozone depletion -- which makes it all the more important that the debate

not be confused with inaccurate statements. Limbaugh claimed in his book The Way Things Ought to Be that "Mt. Pinatubo in the Philippines spewed forth more than a thousand times the amount of ozone-destroying chemicals in one eruption than all the fluorocarbons manufactured by wicked, diabolical and insensitive corporations in history." On Nightline, he said that "Mount Pinatubo has put 570 times the amount of chlorine into the atmosphere in one eruption than all of the man-made chlorofluorocarbons in one year."

Both statements can't be true; in fact, neither are. The "570 times" figure apparently derives from Trashing the Planet, an anti-environmental book by Dixy Lee Ray, but Ray was referring to a different volcano -- Mt. Augustine, an Alaskan volcano that erupted in 1976. Ray in turn gets the number from a 1980 Science magazine article -- but Science was talking about the chlorine produced by a gigantic eruption that occurred 700,000 years ago in California.

20. EFFECTIVENESS OF CONDOMS: When Limbaugh says that a one-in-five fatality rate is a "statistic [that] holds for condoms, folks," that is NOT "distinctly different from saying that condom users have a one-in-five AIDS risk," as he claims in his rebuttal. He is clearly suggesting to his readers that if they allow their children to use condoms, there is a one-in-five chance that they will die. In fact, studies have shown that when a person with HIV uses condoms consistently during sex with an uninfected partner, long-term transmission rates are relatively low -- generally 2 percent or less.

21. U.S. POOR VS. EUROPE'S MAINSTREAM: Limbaugh initially had made the absurd claim that "the poorest people in America are better off than the mainstream families of Europe." In support of this, he cites a Heritage Foundation study that unscientifically compares statistics that were collected several years apart, and singles out a few commodities that U.S. citizens are likely to have more of.

A broader comparison of living standards is available from the World Bank's World Development Report 1994, which calculates "Purchasing Power Parity" -- a comparison of how much people in each country can buy with their money. (Limbaugh has touted this method as the "most reliable measurement of economic strength" -- Limbaugh Letter, 1/94.) The residents of four major European nations -- France, Germany, Italy and Britain -- can purchase the equivalent of $18,568 with their average incomes. The poorest 20 percent of Americans can purchase $5,433 worth of goods.

In some countries, like Germany, Italy, Sweden and the Netherlands, the poorest residents are significantly better off than their poor counterparts in the U.S. According to World Bank figures, poor Americans are not even better off than mainstream families in many Eastern European countries, such as Russia, the Czech Republic, Slovakia and Hungary.

22. IRAN-CONTRA: Watch Rush Limbaugh backpedal. He originally said that there was "absolutely no evidence... not one indictment... not one charge" resulting from the Iran-contra investigation. Now he says, "I obviously misspoke when I said there were no indictments -- I clearly meant to say there were no CONVICTIONS, a point I have made on many occasions." But he immediately begins backing off from that claim, since there WERE convictions -- nine, including guilty pleas, plus two other convictions that were reversed on technicalities. But these were not on "substantive points," Limbaugh says, or, as guest expert Ed Meese says, they were "generally on minor offenses." Are felony convictions minor?

23. MICHAEL GARTNER: Limbaugh accused former NBC president Michael Gartner of deliberately faking news "with the express hope of destroying General Motors" and other businesses. He has still offered no evidence to back up this serious charge.

* * *

POSTSCRIPT: Limbaugh's expectation of how reporters should cover his rebuttal speaks volumes about his understanding of journalism. Here's a verbatim transcription from his October 11, 1994 radio show:

"Two weeks ago -- a week and a half ago -- we sent out over 150, maybe 200 copies of this to various columnists, newspapers which had printed the FAIR report originally and so forth.

"To this date, only one newspaper, the Washington Times, has sought to do a story on my response. And the way that it happened was laughable. We sent our response out, a reporter from the Washington Times gets it, and immediately calls FAIR, and says what do you think of this? They then call us and say all right, here's what FAIR thinks of your response, what do you think of what they said? And we got on the phone and we said, 'Listen, bleep-head, you have your response in our hands, that's all you're going to get, run our response.'

"That's what I think is called for here. We're not going to get into a tit-for-tat, blow-by-blow, it's not the point. The point is we've responded to these charges, you have them in their hands and there they are.

"Well, it is my thought, my, my premonition here, that most columnists, and Doonesbury, for example, which ran a whole week-long series in his cartoon strip on this, and the newspapers who ran it are not going to run it as we sent it out or even an abbreviated version of it, our response. They're just not going to do it, for who knows whatever reasons, but leading the list would be bias."

(For the record, the Washington Times did not run a news report on FAIR's original report.)

(c) FAIR
* * *

FAIR (Fairness & Accuracy In Reporting) is the national media watch group offering well-documented criticism in an effort to correct bias and imbalance. FAIR focuses public awareness on the narrow corporate ownership of the press, the media's allegiance to official agendas and their insensitivity to women, labor, minorities and other public interest constituencies. FAIR seeks to invigorate the First Amendment by advocating for greater media pluralism and the inclusion of public interest voices in national debates.

FAIR is a membership-based organization. If you would like to become a member and receive FAIR's magazine, EXTRA!, where the Limbaugh report originally appeared and which features such well-documented media criticism in each issue, call our subscription service at 800-847-3993, 9:00-5:00 Eastern Time. Let them know you got the number on the internet. If you would like a copy of the original report, send an e-mail message to FAIR (fair@igc.apc.org), and we'll tell you how you can get one.

ACTION: Each TV or radio station that carries Limbaugh has a responsibility to the community it serves. They can be held accountable if they broadcast fabrications. They must find a way to correct the record if they allow Limbaugh to spew falsehoods. Contact the station manager of your local Limbaugh outlets. Let them know you take Limbaugh's disinformation seriously...and so should they.

An obvious antidote to Limbaugh's brand of distortion would be to have a genuine debate. That would give the facts a chance -- and provide some political balance. When you call radio stations, you could note that stations can provide some debate and balance by broadcasting the talkshows hosted by populist Jim Hightower and iconoclast Jerry Brown -- two hosts who do not seem to be allergic to the facts.

The debunking of Limbaugh is also featured this week on FAIR's weekly radio program, CounterSpin, (which airs on over 70 stations) and in the "Media Beat" column by FAIR associates Jeff Cohen and Norman Solomon. Their column is distributed by Creators Syndicate.

If you would like to hear CounterSpin on a local radio station, let them know. If you'd like to see "Media Beat" in your local paper, let the editorial page editors know.

For more information on FAIR, write to: Sam Husseini, FAIR, 130 West 25th Street, New York, NY, 10001. (fair@igc.apc.org) Please send FAIR any letters you write or any newspaper reports you see on this subject. Feel free to post this on any appropriate place on the internet. Thank you.

FCC ANNOUNCES AM EXPANDED BAND ALLOTMENTS

In its Review of the Technical Assignment Criteria for the
AM Broadcast Service, 6 FCC Rcd 6273 (1991), recon. granted in part and denied
in part, 8 FCC Rcd 3250 (1993)["AM improvement Order"], the Commission adopted
measures to facilitate an overall improvement and revitalization of the AM
broadcast band and to effectuate the necessary incorporation of new spectrum
between 1605 and 1705 kHz into the AM broadcast band. The Commission concluded
that the public interest would be best served by using the expanded AM band to
improve the overall quality of the AM service by lessening interference and
congestion in the existing band. On May 3, 1993, the Commission opened a filing
window for existing AM stations to file petitions to migrate to the expanded
band. On December 3, 1993, the Commission announced a ranking of all petitions
to migrate in accordance with the priority groups and improvement factors
described in the AM Improvement Order.

This Public Notice announces the expanded band Allotment Plan, and
identifies the stations that are eligible to apply for authorizations
associated with specific allotments, based upon the previously announced
ranking of the petitions. Stations not receiving an allotment were
precluded by one or more of the following: the Canadian agreement, the
Mexican agreement, the Region 2 agreement, Federal Travelers' Information
Service Stations ("TIS"), harmonic frequency relationships with existing
stations, or preclusion by stations of higher ranking. The Canadian agreement
restricts the assignment of stations within 500 km of the common border to
1620, 1640, 1660, 1680, and 1700 kHz with a US priority on 1680 kHz and a
Canadian priority on 1630 kHz. Stations on 1620, 1640, 1660, and 1700 kHz
must be notified to Canada. A comparable restriction applies to Canadian
stations. The Mexican agreement restricts assignments within 450 km of the
common border to 21 specified frequencies at specific locations. If an
expanded band proposal for a station was within 45 km of an allotment
specified in the Mexican agreement it received an expanded band allotment
provided it was not precluded by a station with a higher ranking or other
factors. U.S. Government TIS facilities were protected in accordance with
the guidelines of 47 C.F.F 90.242(a)(2)(i). Expanded band stations were
not allotted within 30 km of an existing station if the frequency
relationship being considered was twice the frequency of the existing
station. The allotments also maintain a separation of 53 km from existing 1590
khz stations and 200 km from existing 1600 kHz stations. Finally a
proposed station may have been precluded by the allotment of a frequency
to a station(s) having a higher ranking. Stations not selected for
migration will be afforded thirty (30) days to file for reconsideration of

the Allotment Plan with arguments limited to addressing errors in the selection process. After the Allotment Plan has become final and no longer subject to Commission reconsideration, the Commission will enter the allotments into the Commission's AM Engineering Data Base. The Commission will issue a Public Notice of the finality of the Allotment Plan and call for applications to be filed. Stations selected for migration will be afforded sixty (60) days from the date the plan becomes final in which to file an application for construction permit on the allotted channel The application should be filed on Form 301 and must be accompanied by the normal filing fee for such application. After acceptance of the application for filing, the Commission will then put the application on a cut-off list. The application will then be subject to petitions to deny but not to competing applications. After grant of the construction permit application and construction of the authorized facilities, the expanded band permittee will then file a covering license application on FCC Form 302. Licenses for stations in the expanded band will be issued for a term that is concurrent with the existing license for operation in the 535-1605 khz band.

For more information, contact Jim Buttle at (202) 418-2660.

Frequently Asked Questions (FAQ) File for OTR
The Old-Time Radio Newsletter
(FAQ Edited by Lou Genco (lgenco@crl.com))

Last Modified Tue 10-25-1994

---------------------

Copies of this FAQ are distributed monthly to rec.answers and
other newsgroups. Updates may occur more frequently than the normal
distribution schedule. The most current version is available by
anonymous ftp from ftp.crl.com, directory: users/ro/lgenco. See FAQ
for more info on ftp and WWW access.

---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more info?
```

Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of OTR?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations and three satellite feeds rebroadcast OTR. Check the OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I's suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations

as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP).

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See the WWW page or FTP site for a list of some of them.

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to be listed in this database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Q12. Are there any OTR clubs near me?
A12. Check the club listing in the WWW page. We will add clubs as they become known to us.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, Armed Services Radio rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mistypopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more info?
A16. Yes, there are two WWW sites, as well as two anonymous FTP addresses and a Gopher. The two WWW sites are independent, and contain different information, but each can be accessed from the other. The FTP directories each contain different files & information. My FTP site holds OTR station lists, catalogs / libraries, bibliography, the most recent FAQ, etc. The Airwaves FTP site holds archived copies of the OTR digests as well as other files relating to -Airwaves- and rec.radio.broadcasting.

(1) My site:

World Wide Web URL:
ftp://ftp.crl.com/users/ro/lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/ro/lgenco

(2) AIRWAVES E-Publishing's Site:

FTP:
Anonymous ftp to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070

(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

For subscribers without normal FTP access, there is a (presently experimental) FTP-by-mail server. For more information, send email in -exactly- this format:
To: lgenco@crl.com
Subject: Request otrhelp
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: otr-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: otr-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

[NOTE: the airwaves.com address may not have propigated to your site as yet. An alternate address is: otr-request@airwaves.chi.il.us]

Q18. Can I get archived copies of old issues of OTR?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of the four tracks to record monophonically. Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction.

Some subscribers have mentioned TalkingBook tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually

Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines,
Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in
response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment
division at 1-800-622-0022 or call Radio World
magazine at 703-998-7600 for subscription
information. Radio World is an industry trade and has
used equipment listings in the classifieds once a
month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a
reel-reel tape recorder. (1) The tape edge may be rubbing
against the rim of a distorted take-up reel, or (2) the oxide
may be sticking to your erase (or other) heads. If the former,
the least frustrating alternative is probably a new take-up
reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to
recover, I will be glad to send you more information
on how to do it. Just send me a stamped self addressed
10 envelope and I will respond. Send your request
to: Fred Korb, c/o Oldtime Radio Collectors and
Traders Society, 725 Cardigan Court, Naperville,
Illinois 60565-1202. I am willing to help you preserve
the sounds of radio days gone by.

Q21. Where can I find more information about restoring antique radios?
A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie.

4575. RADIO WAVES DAMAGES HEALTH?

Newsgroup: rec.radio.broadcasting
Date: 1994-10-26 05:30:38 UTC

The AIRWAVES RADIO JOURNAL (the email digest of
rec.radio.broadcasting) is seeking to add a "Radio Folks"
Page to its ever-expanding web server (http://radio.aiss.uiuc.edu/~rrb).

We are looking for home pages of any and all radio people.

This is different from the "Personality Page" we have started which
consists of, mainly, well known radio personalities FTP sites and web
pages (although we need more of those too).

This page will be strictly for the working women and men in the
business, or those who have recently left the business, to tell their
tales, show their stuff and stake their place on the web.

You can post your resume', sound clips from your show, photos, what
ever you wish, and it will be accessible by the many broadcast pros
and quasi-pros who read AIRWAVES and who visit our web site daily.

So, if you are involved in radio, either on-air, in sales, management,
engineering, or what-have-you, be you commercial, non-comm, USA or
elsewhere, send me your URL, to the address below, and I will add you
to our new feature called Radio Folks.

Please reply to web@airwaves.com. If that should bounce (the
domain was just changed and may not have propagated everywhere yet)
try web@airwaves.chi.il.us.

This is a new and exciting project. We are trying to bring together
as many broadcast people on the web as possible. We would love to add
you to the composite.

If you do not have a web page, create one. It is very easy. Ask your
system administrator. If you are not able to create a page, you may
send us a "Short" (under 10k) bio sheet with information about who you
are and what you are interested in. No photos or sound clips in this
file, sorry. But do include your email address(es) and we will see to
it that people who read your page have instant mail access to you via
the World Wide Web. We will post as many bios as we have room for
here, but it is much better if you maintain your own page so it can be
updated at a moments notice bu you, plus you can have the sounds and
photos available on your page.

Again, the address to send URL's or bio's is - web@airwaves.com.

Our web site's address is - http://radio.aiss.uiuc.edu/~rrb.

Seeya

Doings in the #40 market:

*It seems that one radio personality is doing double-dipping. One of my contacts(who DXes)told me that on Oct.15th,he heard on WFMK(99.1 FM in E.Lansing,Mich.)a promo that trumpted Rich Michaels' return to Lansing the following Monday. That station was still coming in on Monday,so he heard it and,lo and behold,it was Rich. He mentioned not one whit about the area, just a 1 minute or so commentary about the Michigan congressional races. One note:Care to explain yourself,Rich? (I don't want these charges to go unchallenged,so I'm extending an invitation to you to come on this board and respond. Yes,I know you have computer accounts with AOL and CompuServe-which have access to Usenet-so by all means,please come on the board.)

*WUFX(103.3,album rock;103.3 the Fox)recently got nabbed by Aerosmith's record company for playing a bootleg copy of the group's new album. A legal copy is on its way to the Fox.

*CKEY(101.1,modern rock;FM 101 The Planet)started up its new local show "State of Independence" this Sunday(10/23) at 6pm. Charlene(yes,she has a last name;like Cher,she just uses her first)hosted,and was good-though a bit dry. Also,they are starting up showcases for area bands-the first is at Front 54 in Thorold,Ont. Nov.8 with Buffalo's Tugboat Annie,Hamilton's The Killjoys and Blue Bonnel Boy from St.Catharines.

*Also new of note:
-WJJL(1440;Niagara Falls)has "Native Sounds",featuring traditional and modern music of the Native American people. Included were Iroquois social songs,pow-wow songs and flute music. It runs from 7-8pm Sundays.
-WNUC(107.7,with boosters at 105.3 and 107.3,new country)ran Country's Cancer Fight Monday with appearances by Vince Gill,Diamond Rio,Blackhawk, Tracy Lawrence and Lorrie Morgan. A 900 number was set up during the show for listeners to make contributions.

*WBEN(NewsTalk 930)has a new reporter on board. Joe Sviatko(an alum,like me,of WBNY)comes on board as a reporter/anchor. Sviatko,last I heard,was at WHWK in the Binghamton,N.Y. area. Also,Claudine Ewing was doing weekend work at WIVB-TV last weekend.

So,I'll quit while I'm ahead...

C.K.G.

Now on line at:
-National Capital Free-Net(address: bf585@freenet.carleton.ca)
-Prince George(B.C.)Free-Net(address: ad455@freenet.unbc.ca)

"By the time you look at something,it's history."
-Bruce Cockburn,"Tie Me at The Crossroads"

(Trust me,he wasn't talking about our proposed arena...was he? :)

In some parts of Europe, maybe. Not in the Netherlands or any of our
neighbours. OK, so they don't put two stations which are near to each other
on adjacent frequencies (even a separation of 0.2 MHz seems to close to me),
but "all" frequencies can be used.

The postings regarding John Landecker's boogie check prompted me to post this for the benefit of other nostalgic Chicago radio listeners:

Bob Sirrot (formerly afternoons on WLS...the BS love counsellor, the BS horoscope and his signoff: "This has been a lot of BS"... is doing the morning TV show on FOX-32 WFLD TV in Chicago... "Fox Thing in the Morning". He's still very entertaining and hip...he was only in his 20's back in the early 70's doing his show on WLS...but he never uses his intials anymore... I'd love to hear him do radio again, but he's far too hip for an oldies format (thank G-d)...maybe hot ac or aaa... oh well...

I also have a cassette tape of the entire 1970's WBBM-FM jingle package. If anyone is dying for something like that, I suppose I could make a dub. E-mail me.

I just saw him last week on the WGN-TV morning news. He's on
an oldies station in Chicago. Doing pretty well I gather. He
looked young to me. I guess I picture all these old DJ's to
look like Imus!

John Records Landecker is alive and well and doing mornings on WJMK "Oldies 104" 104.3FM in Chicago. Dick Biondi does evenings there as well.

(what happened to John Landecker)

After a while in Toronto at CFTR/680, he went back to the States and specifically to Cleveland, where I believe he's still doing mornings on one of the CHR FMs...though I've heard rumors he either has moved, is moving or may move to a Chicago FM.
Frankly, Drew Hayes ought to rehire him at WLS...it sure would improve the morning show...

And, of course, CBC Radio operates stations on many Canadian clear frequencies which can be heard by most people who aren't too close to the Mexican border. In the east, English service is on 640/CBN St. John's, 740/CBL Toronto, 940/CBM Montreal, 1070/CBA Moncton, 1140/CBI Sydney, and 1550/CBE Windsor. In the West, the CBC English mono service is on 540/CBK Watrous, 690/CBU Vancouver, 740/CBX Edmonton, 9?0/CBW Winnipeg, and 1010/CBR Calgary. French service is concentrated in the East, with 690/CBF Montreal, 860/CJBC Toronto, and 1580/CBJ Chicoutimi being the most likely catches. (CJBC in particular blasts throughout much of the northeast; even this close to 850/WHDH^H^H^HEEI Boston, I can still very often hear the classical music on 860.)

4586. CHOO-fm testing

Newsgroup: rec.radio.broadcasting
Date: 1994-10-27 04:47:47 UTC
From: "Niel J. Wolfish" <lobo@io.org>
Message-ID: <38nbdj$fou@vixen.cso.uiuc.edu>
Source record: 37141

The past couple of days Ajax, Ontario's CHOO (1390) has been testing their new FM frequency of 95.9. The test has consisted of a loop tape with a couple of C&W songs and the following announcement/ID: "this is a Durham Radio Inc. signal test on 95 point 9 FM!". So, 1390 is the next southern Ontario AM frequency to become a thing of the past. CHOO has never had very good coverage, with their pattern protecting Syracuse NY across the lake and Kingston's CKLC (1380) down Highway 401. From where I was listening about 35 kms to the east in north central Toronto (North York), London's CFPL-fm was killing CHOO-fm's signal. The signal was even worse in downtown Toronto. Incidentally, I am only assuming at this point that the calls are CHOO-fm.

Gee, if you think Harvey is extreme right... you've never heard extreme right!

Personally, I like Harvey's passion in the way he reads an advertisement.
I think he's very talented and would be good no matter what his political
leanings. He gets my vote for the best, especially because he's been at it
for so long.

and Charles Osgood is
> the king of fluff... you often feel entertained in a cozy storyteller kind

I agree with you about Osgood. Casey's got a great voice and delivery --
his political analysis leaves me cold.

Unfortunately, everybody else is a commentator these days.

There is no such thing as a "radio commentator" nowadays. The two you list hardly meet my standards for consideration. The closest is Jim Hightower, and even HE falls short.

Hi There friends. I really shouldn't beg but when your a Community College non-commercial radio station in Southern California, you have no choice. We are in need of a new (or newer, ie post Marconi) on air board prerably one w with slide faders and 8 to 10 channels. We could also use a coue of smaller boards for production, cart machi reel to reel console, and basically any equipment you or your station would care to donate. Keep in it is Tax Deductable.

Thank You

Greetings from another disaterously over-radioed market! In case you're interested, here's the way the formats break down in market #66:

News/Talk:

We have 3. KMJ (Henry) leads. KEYQ (Americom) and KKTR (Cencal) have minor shares.

AC:

We have 4. Fairly even between KJOI, which is a lite AC, KTHT and KFRR, both hot ACs, and KSEQ, which is a rock-leaning AC that comes in from a fringe market called Visalia. It has a city-grade signal, but has the smallest numbers out of the four.

CHR:

One, big, fat, dominant CHR called KBOS owned by Cencal. They lean dance and pull, like, ten shares. The two hot ACs are apparently trying to fragment this audience.

Rock:

One rock station that leans metal, KRZR. We also have a Classic Rock station
called The Fox, KJFX. They play *no* currents, not even those done by classic artists like Tom Petty. We have no Alternative station and no mainstream Rock station. In other words, nowhere on the Fresno radio dial will you hear "Last Dance With Mary Jane" by Tom Petty or "Just Like Heaven" by The Cure.

Country:

Lots of those. KSKS, "Kiss Country" is by far the dominant Country station of the last couple of years. There is also KNAX, which did fairly well until this past ratings period, when owners EBE bought an AC station called KSXY and changed it to a Country format that sounded quite a bit like KNAX. In the Summer book, neither KNAX or KSXY, which is now called "Froggy Country 101.1," did extremely well.

Oldies:

Two of those. KFSO is the established Oldies station that plays mostly 60s. Not long ago, KKDJ, where I work, was bought by Henry, who owns KMJ, the leading news/talk station and KSKS, the leading Country station. Henry switched KKDJ from Progressive to 70s Oldies.

Spanish:

Lots. I'd love to talk more about them, but when I listen I can't understand what the announcers are saying. :) I include the heading here because we, seriously, have a disporportionate amount of stations with Spanish formats. There are a total of 8 that serve this market and there's about a 40% Hispanic content here.
Why it is that 8 stations are chasing down 40% of the audience, I have no idea. Even if it's for advertising dollars, how big of a share of those are you gonna get if 8 other guys are trying to split 'em up?!? How many *can* you get?!

There's an odd sort of FM here that is a live, locally-originated, news/talk station called KMPH that, in at least a couple of demos in the summer book, simply dropped to a 0.0 share. Their presentation is fairly staid and formal and, for some reason, broadcasts in Mono. Some say the best way to do a newstalk FM is to have an upbeat, heavily-processed, free-form format that targets a young audience, but for some reason, they aren't doing that.

I don't have any of the Summer book numbers with me. If I hear of 'em, I'll
pass 'em along.

Dan Kennedy
KKDJ/Fresno

[Moderator's Note: I posted the following to the 'kidmedia' list and wanted to also post it here since I know that kidstar people are in the audience. Bill]

} From: RocketB@aol.com
} >>Here in Seattle, we have a radio station called KidStar
} >>I was wondering if anyone knew of similar kids' radio stations elsewhere in
} >>the country. Any information would be greatly appreciated!<<

Children's radio (kidstar, AAHS <not OZ> etc) is an interesting and unique media force right now. But it is not without it's problems.

The problems are these. First and foremost is the fact that Arbitron, the leading radio rating company and the *bible* of advertisers) does not count listeners under 12 in any of their research. I suppose that until AAHS and such came about there was not much need to do so. But, sadly, this has caused a lot of problems for commercial children's radio.

Secondly, children's radio must 'educate' the public as to what children's radio is. Unlike Top-40 or 'Light Rock' stations, which are familiar and well known formats, kids radio is different. It has not developed 'household name' status yet. When you say "Kids Radio" to the average listener they say "What's that?". Then you have to describe it, which is not easy to do because for the most part it is an entirely different beast.

Now add these two problems up and what do you have? A tough sell. If you think it is hard to explain the magical medium of children's radio to Joe Radio Listener, just try selling it to the advertisers who are traditionally very wary of anything new, then add the fact that there are seldom any significant Arbitron numbers for this new product, and the advertisers scratch their heads and say "We better go advertise on that Hot Young Country outlet across town, they are #1".

Radio AAHS is surviving because it is a national network (based out of Minneapolis' WWTC radio) and can spread its self around. Kidstar is in the process of going national its self. Also AAHS is heavily involved with Disney, who have virtually unlimited pockets...

On the flip side, locally run kids stations are going bust. In St Louis, WFUN FM 95.5 has just gone dark after trying to stay afloat with a combination of commercial and public funding. They also suffered from a marginal signal in the heart of St Louis (they transmitted from the Illinois side of the river with a relatively small signal).

In Springfield Missouri, locally operated KIDS-AM went dark this summer too, after trying to get funding through commercial and semi-public means. There is no word yet whether either AAHS or KIDSTAR will pick up either of these signals.

Signal is a big issue in kids radio. Most of the stations are 'rim-shot' AM stations, meaning that they are not major signals in the entire market. as evidences below...

} Radio Oz, in the Washington/Baltimore area, has 3 AM stations.

This is because none of these stations can cover the entire market day and night. Here is a problem.

In the day of CD sound and multi-media computers, small weak AM signals are far less competitive than large FM signals. It is just a fact. Even small kids of today are used to stereo boom-boxes and CD-ROM games. It is hard to get loyal listening when you must hunt for a weak signal then put up with low-fidelity monaural sound.

In almost every market of any size that has a Kids station, the station is on AM, and in many of those markets, the coverage is not solid throughout the market, day and night. So they go to several stations to cover the market. Problem is, the general public wants their Hi-Fi stereo right now with no fiddling around.

So here we have a beautiful and unique format, floundering because ...

1) Arbitron refuses to offer ratings for listeners 12 and under
2) The format is not familiar, people need educating as to what it is.
3) Networks have opted for 'low-budget' - 'low-power' - 'mostly AM' signals which are difficult for many people to find, let alone really enjoy.

Now, Radio AAHS is getting more into "familiar" sounds. You will hear songs by pop artists more and more. Also, they are very Disney-heavy, probably because of the close relationship they have with the Disney people. In days gone by, AAHS was much more free in their music. Perhaps this evolution is an attempt to stem the effects of problem 2 above.

None the less, kids radio is something to really enjoy, even if you are not a kid. I am pushing 40 and I love it. I am sad that our local station KIDS had to go bust. But there were other factors at work there too. I am glad that someone decided to buck-the-system and create a Radio AAHS/Kidstar. It is a format that is in need of more exposure, on more powerful stations. I wish it nothing but the best.

Bill

I live in Victoria, BC, where we can pick up many Seattle stations, but finding Kidstar is a bit of a lottery. In the car, it depends on time of day and the part of town I'm in. If I could get a stronger signal, I'd have our children listening to it more.

However, advertisers are not going to look at a listener in BC as a plus for supporting a stronger Kidstar signal.

Ok, in response to a plethora of msgs (meaning from Bill Pfeiffer and one more too numerous to mention), I'll type in the lyrics from the "the-type's-so-small-it's-barely-readable" WLS Musicradio 89 survey for the week ending November 30, 1974. I will, however, omit the photo of J.J. Jeffrey, since the hairstyle would result in this msg being rejected... <grin> Here goes:

B.B. Bumble and the Stingers, Mott the Hoople, Ray Charles Singers.
Lonnie Mack and Twangin' Eddy, here's my ring, we're goin' steady.
Take It Easy, Take Me Higher, Liar, Liar, House on Fire
Locomotion, Poco Passion, Deeper Purple, Satisfaction
Baby Baby, Gotta Gotta, Gimme Gimme, Gettin' Hotter
Sammy's cookin', Lesley's gory, Richie Valens, end of story.
Mahavishnu, Fujiyama, Kama Sutra, Rama Lama.
Richard Perry, Spector, Barry, Righteous Archies, Nilsson Harry.
Shimmy Shimmy, Ko Ko Boppin', Fats is back, and Finger Poppin'.

[chorus that we all know anyway]

FM, AM, hits are clickin', while the clock is tockin', tickin'.
Friends and Romans, salutations, Brenda and the Tabulations.
Carly Simon, I behold her, Rolling stoning, center folder
Johnny Cash and Johnny Rivers, can't stop now, I got the shivers
Mungo Jerry, Peter, Peter, Paul, Paul, and Mary, Mary.
Dr. John, the nightly tripper, Doris Day, and Jack the Ripper.
Got to go, Sir, got to swelter, Leon Russell, Gimme Shelter.
Miracles in Smokey places, slide guitars and Fender basses.
Mushroom omelet, Bonnie Bramlett, Wilson Pickett, Stomp and kick it.

[chorus]

Arthur Janov, primal screamin', Hawkins Jay and Dale and Ronnie.
Kukla, Fran, and Norman, Okla, Denver John and Osmond Donnie.
J.J. Cale 'n' Z.Z. Top 'n' L.L. Bean 'n' D.D. Dinah.
David Bowie, Steely Dan, and sing me proud, oh C.C. Rider.
Edgar Winter, Joanie Sommers, Ides of March, and Johnny Thunder.
Eric Clapton, pedal wah-wah, Stephen Foster, doo-dah, doo-dah.
Good Vibrations, Help Me Rhonda, Surfin' Girl, and Little Honda.
Tighter, Tighter, Honey, Honey, Sugar, Sugar, Yummy, Yummy.
CBS and Warner Brothers, RCA and all the others.

[chorus]

Rock it, sock it, Alan Freed me, Murray Kaufman tried to lead me.
Fish and Swim and Boston Monkey, make it bad and play it funky.
Freddie King and Albert King and B.B. King and frolicking...

Ok, there it is! Please excuse any dumb spelling or punctuation errors;
it's late and I'm tired!!!! <grin>

>hilarious!

Pete Franklin hosts a show weekdays from 2-4pm. Gary Radnich who does the hottest sports talk show in town calls Pete "the King". Radnich also does TV sports on Channel 4 (NBC). Pigskin Pete still exists on Thursdays for college and Fridays for pros. He also does winner and loser of the day. Just today, he interviewed Brent Musburger who was down here at the studios. KNBR is titled "the 50,000 watt high hard one" among other things. At night if you live west of the Rockies, you will be able to get KNBR. We have listeners as far north as Canada and as far south as New Mexico. He has been at KNBR for about two years. He also hosts a couple jems of specialty shows - Cooperstown Corner, which highlights members of the Baseball Hall of Fame, before each Giants game (on KNBR) and Air Franklin, an analysis of the Warriors opponent, which airs right before each Golden State Warrior game. More info than you were wondering about I bet.

Here is a brief update on Seattle radio...

KZOK -- Steve Slaton is now the PD and Gary Lockwood is out as the morning drive guy, he will be replaced by Robin Erickson and John Maynard who were left jobless after KXRX switched to country from rock.

KMTT -- Gary Crow is moving to mornings and is reuniting with his long time partner Mike West. West is coming off the beach after a few months off since leaving KXRX at the same time Robin & Maynard did.

That's it.....E-Mail me if you have any other Seattle radio news!

In response to a question, yes there was another "War of the Worlds", right here in Quito, Ecuador. Don Moore detailed it in an issue of Monitoring Times a year or so ago (I don't know the date, it is at home). Anyhow, Radio Quito did a similar thing in the late 40's, with the alien forces landing at a town south of Quito and advancing on the Capitol.

The sad result was a little more serious than much of the response in the U. S. A mob of citizens, incensed at the trick played on them, gathered downtown in front of the studio building and set it on fire. It burned to the ground, along with its commonly-owned "El Commercio" newspaper! Much of the records of the newspaper were lost in the fire.

This incident was recently recounted in "El Commercio" as they published a special section in honor of their new press and totally redesigned newspaper. I am now trying to find out if anybody has a copy of that original Radio Quito broadcast, but I doubt it.

Along the same line, back in 1972 there was a terrible tornado in Louisville, Kentucky. WHAS radio did a fantastic job covering it, even had their helicopter traffic reporter Dick Gilbert follow it. Several months later, at around the same time of day they planned a special hour broadcast with highlights of the coverage. It turned out also to be a humid, muggy, threatening day. 30 minutes into the program they had to cut it, the population was terrified. One man even said "The new tornado is following the exact same path as the original one".

A year later, figuring that the fear and panic would be over, they scheduled the special for the same time of the afternoon. Again, it was a hot, humid threatening day. Again, they had to interrupt the coverage after less than 30 minutes, too many people panicked. I am not sure if the special ever was broadcast in its entirety. May Tom Kennedy can tell us.

A correction and a follow-up: It appears I misread Inside Radio, and the $38 million was for Noble's Houston stations, not for WSSH-AM. The actual price for 1510 has been reported locally as $1.5 million -- still more than I'd pay for that signal and that physical plant, but it's not like I have $1.5 million to play with anyway :-)

And as of Monday, 1510 has dumped Talk America and gone back to Spanish. All I can say about the latest Spanish operators is that it's NOT a simulcast with any of the city's other Spanish stations (890 WBMA/1060 WBIV, 1150 WMEX, 1330 WRCA, 1550 WNTN, or 1600 WUNR)...and that it's more music than talk. I ought to learn Spanish one of these days...

articles@airwaves.chi.il.us

>Digitally delayed from North County San Diego, it's another
week in the life of Southland Radio! For: Oct. 27, 1994

North County San Diego Books:

calls spring summer format
KIOZ 5.6 6.6 album
KFI-AM 6.9 5.1 Talk/News
XETRA-FM 6.9 4.9 modern
KYXY 3.8 4.1 AC
KSON A/F 3.6 3.7 country
XEMO 1.8 3.6 espanol
KKLQ 4.9 3.5 Top 40
XHTZ 2.9 3.5 Urban/T 40
KJQY 6.9 3.4 AC
XETRA-AM 2.8 3.1 Sports Sports
Sports
KSPA 2.0 2.9 Adult
standards
KCEO 2.0 2.7 Talk News

Showing the biggest gain:

KKOS no show 2.0 AAA

Totals: Par Broadcasting, (SD's only duopoly) which owns KIOZ,
KKLQ AM/FM and KOGO: 10.1 Nobel Broadcasting
has a 8.0 share with XETRA AM/FM. North County based Tri-
Cities share is at 4.7 with KCEO and KKOS.

KFI, which I reported [in error] of having a 6.9 rating, actually
dropped nearly two points from the spring to summer books.
The 50kw power house from Los Angeles' draw can be attributed
to the bedroom communities in North County. KFI, and KNX offer
the cleanest sound from an LA based AM station; and commuters
going to the basin need the traffic reports. KNX, the CBS O&O
has a 2.1 share.

KKOS-FM (95.9, 3.3kw) dramatic rise from a no-show in the last
books to a 2.0 can be a sign that the AAA format -- which KKOS
was one of the first -- has caught on. The Escondido Times-
Advocate and KKOS report that up to twenty percent of their
music is local. Plus, John Hyatt, Al Stewart, and Richie Havens
have been in studio individualy, playing an "unplugged" session.

[The station is limited in reception to the north because of KEZY, Anahiem at 95.9.]

KCLX (102.9, 32kw) San Diego, dropped the syndicated Mark and Brian show from Los Angeles. The SD Tribune reported that the Gannett station received complaints from listeners on crude comments, lame jokes, and deviant behavior. [I'm not making this up!] Mark and Brian fans can still hear them on KLOS, Los Angeles at 95.5.

>From the Reader's Post: Broadcasting and Cable listed the 1994 Marconi Awards:

Is it true that CKLW (AM back then) had a sales office in Cleveland back in the early 70's? I seem to recall that they did, but I think I'm the only person who does.

Now CKLW is FM (93.9), but I have picked them up on my cheap Delco car radio as far east as Erie PA. That has to be nearly 200 miles (line of sight). It is the only FM Detroit/Windsor/Toledo radio station I can pick up in Cleveland (it comes in strong too!). Is this the result of exceeding the US 50KW limit or am I mising something?

BTW, if anyone at CKLW is reading this keep up the good work!

> hot FM B-104."

KIIS-FM in Los Angeles had a version which included their calls and slogan
at the time "KIIS-FM, Hot hits" just at the end of the first verse, where
it would normally be just instrumental.

And back when KFI/LA played music, they had a version of the Pointer
Sisters singing "Fire" with a line that went, "I'm driving in my car/
I turn on KFI".

Anyone else know of other songs with custom versions?

Dis 'n Dat: As a returning broadcaster to the industry, I am often amazed by the new machines in various radio studios. When visiting, I often hear the engineers say, "I wish there was one book that covered it all."

There is for Digital Audio Tape machines!

"The DAT Technical Service Handbook," by Richard Maddox is a 224-page companion test to the service manual. It explains in general and detail the aspects of DAT machines. It includes servicing techniques, troubleshooting strategies and illustrations for a majority of studio-based DATs.

For example, when a DAT machine ages, electronic tape alignment and tape path adjustments are required to keep recording errors to a minium. But, as the engineer finds out, most of the man-ufacture's service literature does not give the bench techie a background on "why and how" mis-alignments and mis-adjustments and how they affect the quality of the recording and playback.

Fortunatley, the book goes into detail and can guide the technician through the maze of wires, schematics, and testing equipment.

The book is available at technical bookstores. It's published by Van Nostrand Reinhold. (ISBN is 0-442-01423-6; Library of Congress Catalog number 93-77964); or contact the author, Richard Maddox, at: PO Box 303, Carlsbad, CA 92018.

In a previous article, our moderator wrote...

>and what is needed on the air is not a
>Left Wing Rush, but a more balanced program. Interestingly, such a
>program would be infinitely more effective at persuasion, due to the
>fact that it would not be as predictable and one-sided.
>
There are and have been, some talk shows that provide more balanced viewpoints
than Rush or John Hightower. They may not have the national coverage as of yet,
and heck, they may not be overly political at all.

>radio's content in other ways (obscenity for example) then I think
>their regulatory power should also do something to be sure that an
>entity with a singular point of view, does not monopolize the <so-called>
>public airwaves to hammer home thier point without some accountability
>to the other sides of issues. This goes for both sides of the
>debate,, left and right, conservative and liberal chirsitan and
>non-christian.
>
My concern is: does it end there?

Sure, you can write an FCC rule that says, for every hour of Rush, you
gotta put on an hour of Larry King.

The "fairness" debate has the exact same root problem as the "obscenity"
debate: who defines? Do we have some "board of censors" listening to
stations all day and deciding which show is "liberal" or "conservative"?

And does it end with political talk shows, or does it extend to
non-political shows (Bruce Williams, Laura Schlessinger, etc.) as well?

How about "religious" stations. If a "Christian" station was required to
carry other "religious" programs, how "far afield" would they be
required to go? Would a few hours of Jewish programs be sufficient? How
about Buddhist programs? Islamic? Atheist?

How about all-music formats? Someone could play a political satire song
(Dr Demento does it all the time)--would he be required to play an
equal number of songs of an opposing political viewpoint?

>Lately the FCC seems to hold very little regard for the public in its
>rulings. With all the duopoly (read: monopoly), LMA, and 80-90

>business, only a business and the player with the most chips takes

>the pot'.
>
These things can be argued. I don't know enough about LMA or 80-90
to really comment on them at this point.

I don't share your fear of "duopolies", because as often as not, it's
probably a choice between having two stations owned by one party, and
having one of the stations go dark.

>The previous poster spoke of 'faux christian hate talk'. I personally
>am very concerned about the mass encroacment of <so-called> christian
>radio networks who are buying up stations and placing powerful
>translators everywhere.
>
>And all of it is tax free!!!

I do agree that the translators are a bit of a waste in many cases.

>Is this a wise use of spectrum? You tell me. In any event, I digress.
>
>I know the Fairness Doctrine is a hot topic,, and that I come down on
>a side that is less popular with the broadcasting community. Also, I
>am not sauying that I agree with *any* fairness doctrine. I do, however
>bemoan the not-so-gradual erosion of the idea that broadcasting is a
>service first, and a business second.

I tend to agree that broadcasters should be at least concerned with
"serving the public" as with making money (although I accept that
they may define "serving the public" in a way that I may not agree with
totally)

My concern is more with the agendas of the folks so hot on pushing
"fairness" on the radio, who are in some cases, those so concerned about
other forms of censorship.

>
>As long as the FCC maintains such high hurdles (financial and
>spectral) to the entrance of new stations and continues to allow
>translators to exist, yet make it essentially impossible for a community to
>have 5 or 10 watts on the air legally for the dissemination of
>programming not carried by mainsteram media, then I believe it is
>also up to them to assure that the station that DO exist are
>accessable by as many views as possible.
>

The whole low-power broadcasting issue is a whole different matter that
I've discussed on here before. I'd like to figure out a way that we
could have low-power signals without interfering with other folks rights
to listen to the radio. ...

4617. KMOX (was: St. Louis Arbitrons (Summer 1994))

Newsgroup: rec.radio.broadcasting
Date: 1994-10-28 04:26:31 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <38puhn$25j@gagme.wwa.com>
Source record: 37072

Alan L. Cassel (alcassel@crl.com) wrote:

: So is the jury still out on Limbaugh insofar as KMOX is concerned? (They
: did, after all, gain 0.2 points, according to your numbers, since spring.)
: How long will it take for him to get dumped with talent more consistent
: with KMOX's image? Will it take KMOX dropping to #2 behind WIL?

Since I live 250 miles from the market in question, I don't have a chance to monitor the 'MOX's meanderings on a daily basis, though I do receive it very well during critical hours and nighttimes. This time of year, I listen to morning drive on KMOX up to 8 o'clock and a little beyond, for instance.

So this is for what it may or may not be worth. KMOX's problems are far, far deeper than Limbaugh, much as I personally find his performances to be a disgusting devaluation of public discourse and civility.

KMOX is a station listeners grow into. Its audience has been declining for years, because its core audience grew older and older, yet the "baby boom" wasn't ready for its bill of fare quite yet.

Now that they're ready, finally maturing and interested in the station's news/talk programming, the station is having an identity crisis of outsize proportion. The man responsible for the 'MOX's image, Bob Hyland, died of cancer two years ago. CBS did not promote from within; it imported someone from the sales organization who had hopped from station to station, city to city, like a fast-food franchise peddler. To expect Rod Zimmerman to understand what KMOX is 'about' after being parachuted into the market is to expect him to be an exceptional individual. So far, there is no evidence to prove this is so.

Another station mainstay, Bob Hardy, the morning news anchor, personified the term "anchor" in the sense of stability, reliability, and credibility. He dropped dead last summer while mowing his lawn in Virden, Illinois. He has not been replaced, for he is irreplaceable. His co-anchors, Wendy Wiese and Bill Wilkerson, are certainly capable individuals. But they don't have the track record, the "weight," if you will, that Hardy had.

Midday talk show host Anne Keefe, a woman who was clearly cultured yet down-to-earth, too, was so distressed by the advent of Limbaugh that she moved up her retirement. There went one of the best talk show hosts anywhere.

And the station is now tweaking with its newscasts, adding sounders (when before did KMOX ever need sounders?) and clipping off the network at three minutes past the hour.

To be sure, KMOX had grown a little stale in many ways. Fine tuning was in order. But fine tuning of such a station can be accomplished without the difficulties that KMOX now seems to be encountering. There still is much about KMOX that is valuable and can be strengthened without rendering the station unrecognizable.

KMOX's real challenge is to modernize its format and presentation without losing the unique image it had built for 35+ years as a community institution. Its challenge is similar to the challenge faced by many newspapers: how to keep readers without turning into a clone of USA Today and losing whatever it was that made those newspapers unique and vital in the first place.

Unfortunately, most radio GMs and PDs have neither the finesse nor the wits to meet such a difficult challenge successfully and profitably.

That is KMOX's real challenge. Comparatively, the controversy over Limbaugh, while poignantly symbolic, is really nothing more than pointing and gawking at the neighborhood bully after he's eaten too many beans and forgotten the Beano(R).

4618. "Liberal media"

Newsgroup: rec.radio.broadcasting
Date: 1994-10-28 04:26:39 UTC
From: janik@spss.com
Message-ID: <38puhv$25l@gagme.wwa.com>
Source record: 37073

In this group, I have read a number of posts claiming that the media is "liberal" whatever that means... where is the liberal media?

Pacifica? How many people listen to it? I live in Chicago. It doesn't exist here.

How many stations carry Jim Hightower? How many carry Rush Limbaugh?

In Chicago, WLS AM has 3 weekday shows hosted by avowed conservatives, and Bob Brinker and the Best of Rush on the weekends. Not one show on WLS is hosted by a liberal. Every host on WLS AM/FM except for one on the FM are anti-Clinton. The only black host remaining on WLS is buried late at night. He does not sound particularly liberal or conservative.

WGN in Chicago is run by the Republican leaning Chicago Tribune. For many years, they received the services of an Illinois state trooper gratis to do traffic reports courtesy of Republican governor Jim Thompson. No other station received this favor. In 1988, George W. Bush guested on WGN and led the pledge of alliegiance. No one from the Dukakis campaign was invited. WGN also carries Paul Harvey daily at noon.

WLUP personality Kevin Matthews, a comedy jock, often espouses his anit-abortion views on the air.

WRCX personality Scott Loftus, in a rock'n'roll show referred to President Clinton as a liar.

On WJMK, a newscaster during a story on abortion said on the air that "[some numerical figure] *babies* are killed each year by abortion". This is clearly slanted toward the anti-choice point of view. The newscaster is anti-choice, I spoke with the morning jock about this.

So here's the challenge, folks: count the number of LIBERAL talk show hosts/stations in your market. Count the number of CONSERVATIVES. Note the power/coverage of the stations they are on.

Once and for all, let's see where the balance of power lies in the media.

Sacramento, California is about to be overrun by Spanish broadcasters as more stations are signing on or converting to Spanish.

KSQR 1240 (Sacramento) (formally KSAC) signs on officially Tuesday, November 1 at midnight. KSQR simulcasts Super Q in Fresno (KOQO 790 and 101.9)

KRCX 1110 (Roseville) The grandlady of the Spanish format in Sacramento, Owns the advertising for now and most likely the reason for the 3 million price when the station sold recently

KCVR 1570 (Lodi) Another Spanish station

KTRB 860 (Modesto) Spanish Talk radio the 50,000kw signal covers Sacramento just fine !

KZSA 92.1 (Placerville) Flagship station for LA "Z" network which includes many stations down the Sacramento-San Joaquin Valley includes 92.7 in San Francisco.

KSXX 99.9 (Marysville) (formally KRFD) A new contemporary Hits Spanish format Sister Station is KRCX.

KSTN 107.3 (Stockton) With the stick on Mt. Diablo. A long time presenter of the format. One of very few FM stations not broadcasting in stereo never has and as long as the owner is alive never will. It is reported that when the owner passes away he will take the station with him !

Now if that is not enough, 2 more stations are stated to sign on in the coming months pending FCC decisions.

KQSC 105.5 (Willows) are in the process of moving its city of license to Dunnigan (few miles north of Woodland) up its power
and simulcast its signal with a new station at 97.9 in Esparto (just west of Woodland) and a translator in Sacramento at 105.7.
the owner has set up shop, hired staff, bought equipment and plans to take the market by storm !

This boggles my mind and could somebody explain the Spanish
market to us. I cannot comprehend 9 signals coming into the Sacramento market with the highest rating of any Spanish broadcaster ever receiving was a 1.0 share.

Who will succeed is the markets decision, I wish them all Good Broadcasting.

From: slutsky@tesla.njit.edu
Message-ID: <38puk7$287@gagme.wwa.com>
Source record: 37075

Throughout the baseball strike and hockey lockout WFAN in New York (and other sports radio stations) have re-broadcast classic games such as Don Larsen's Perfect game in the World Series, The Mets winning the 1969 and 1986 series, The 7th game of the 1960 World series, etc.

I am not in the radio business, but I think this is a total waste. Who is going to listen to a game, when the outcome is known. I just love watching replays of Mookie Wilson hitting that ball to Bill Buchner, but I couldn't stand listening for 3 hours to a game when I know the outcome.

Any comments from people in the business. Do people really want to listen to that or rather to interviews or telephone talk?

Bruce Slutsky

1. You must be able to put forward, with a straight voice, the idea that there is some sort of great liberal/international banker/Jewish/combination-of-any-of-the-three conspiracy controlling the news media and/or screwing up the country in general and that you, as a "conservative", will provide "balance" to said "conspiracy's" perspective, even if you know that no three of us in the media can successfully conspire to choose the toppings on the same pizza.

2. You must always support the interests of management in a local industrial strike situation for fear of offending said management and thereby losing the chance to have them buy spots on your show.

3. Related to point number 2, you must believe that all financial talk shows are essential to the marketplace but the idea of a labor talk show is inherently Communist.

4. You must believe that your listeners will be much more interested in how badly the Green Bay Packers played last weekend than what poisons may be in the municipal drinking water.

5. You must believe that only the Republicans and the Democrats count during discussions of public office races, even if over half of the eligible voters in your market have had it with both of those parties and, seeing no alternative discussed in the media, choose to stay home on Election Day.

6. You must never suggest there may be corruption in any local law enforcement agency, any federal regulatory agency or any "mainstream" religious group. This is so as to remain free from potential physical attack or harrassment by cops, anti-choice terrorists, local televangelists or the FCC.

7. You must not challenge the prejudices of significant sections of your potential audience. Such honesty is too often a tune-out factor.

8. Violence in rural communities and affluent suburbs, particularly those that are predominantly white, must be treated as shocking human tragedies. Similar events in predominantly Black, Hispanic and Asian neighborhoods must be treated simply as typical instances of gang-related activity.

9. You must be able to claim you speak for groups of people you wouldn't invite into your own house.

10. You cannot post messages on the Internet either delineating or questioning the above nine points for fear of offending some station owner or programmer you may need a future job from.

The band, Offspring, was apparently angered at Q104.3 WAQX-FM in NY recently when the station was giving away t--shirts with the bands name on it.

The station is currently playing a pretty cool promo in which they apologize to the band and ask listeners to send back their t-shirts.

Seeing several recent posts checking into the whereabouts of Chicago radio personalities leads me to make one of my own. Anybody know where to find "Chicago Ed" Eddy Schwarz (sp?), who used to do lighthearted and fun overnight talk at WGN (720AM) ? I used to listen to him a lot while a grad student at Wheaton College (IL) about ten years ago. Someone told me once they thought he had passed on, but I am hoping that this is (as Mark Twain once said about reports of his own passing) an exaggeration. "Chicago Ed" and his WGN stablemate Milt Rosenberg kept me interested in the possibilities of radio during a time when I might easily have been tempted to quit school and go back to something else, like flipping burgers or driving a bus.

> I represent WUMD Radio, AM 560 Carrier Current at the University
> of Maryland Baltimore County(UMBC). We are a station which severely
> lacks proper equipment to broadcast effeciently.

> Basically, we need a decent broadcast console which works and is reliable
> but the problem is we do not have money. We have 1 board which works,
> but cannot be sure how much longer it will last. We have 2 other nice
> boards which would do very nicely if they worked. If anyone can provide
> parts for these boards, we would be very greatful. Also, does anyone
> know of an organization which donates radio broadcast equip. to college
> stations?

> Our goal is to get a regular broadcast signal this year, but it is no
> good without decent working consoles.

> Dan F. Zubai1i
> Engineer
> WUMD RADIO, UMBC
> 410-455-3192

Dan...

I'm an alum of the Univ. of Md./College Park's WMUC AM-FM (650AM Carrier Current, 88.1 FM). As such, I'm a big supporter of student-run college radio...but I have some questions:

1) Before casting your net broadly, did you consult local broadcasters in your community (WBAL, WCBM, etc.) to see if anyone had boards? The chief engineers of local stations are often very solicitous when approached by local student stations. Also, you failed to mention the brand/model of the boards you had in your request for parts, etc.

2) How are you financed? Does the station run solely on the basis of student funds, or does the University make any money available for your operation? You should be able to put together some money for a "capital" budget for equipment purchases. If you don't have the wherewithal for capital equipment purchaes, like a console, where do you think you'll get the bucks for a transmitter (assuming you can find a frequency?)
(Strictly for what its worth, the WMUC Alumni Association was recently formed to gather together the resources of those of us who have done well because of our association with the station, in an effort to help the student station at a time when the University's committment to the station is flagging. You may wish to consider trying to gather together some of WUMD's alum to assist in your efforts at this time!)

3) As far as a regular broadcast signal this year...how long have you been working on this? The market in Baltimore is *saturated*, and as far as I

know, there are *no* open/unused frequencies available in the area, even in the low-power/non-commercial end of the FM band or the AM band. (I do not know how Baltimore came out in the FCC's recent "extension" of the AM band beyond 1600.) If our past experience getting WMUC-FM was any indication, you have a project of 4-5 YEARS in the making...not something that can be achieved in "a year". You might have better luck taking WUMD, and making it a "Cable FM" station available through Comcast/Baltimore County. Also: have you consulted the University on this? Unless you have some entity willing to take on the responsibility for the FCC licence, you may have some bureaucratic considerations. You may also want to explore some of the low-power AM possibilities, as WMUC is considering for its AM station, under new FCC rules.

I wish you luck in your endeavors...(and no, we don't have any consoles available...sorry!).

Cheers,
Max

4625. Boston Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-10-29 09:59:29 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <38t6e1$t2b@vixen.cso.uiuc.edu>
Source record: 37080

* One of Boston's most respected journalists, David Brudnoy, 54,
who hosts a weeknight(7-12a) talkshow on Westinghouse's 50Kwatt
powerhouse WBZ AM 1030 was rushed to Mass. General Hospital on
Tuesday(10/25) night where he currently remains in a critical
condition with a very serious heart ailment(leaky heart valve).
Brudnoy, a known workaholic with a huge workload, remained hooked
up to a respirator as of Thursday...

Brudnoy will be out definetely. In his absence WBZ will use
Steve Leveille to fill in the 7-12a shift...

Get-well cards can be send to :

Mr. David Brudnoy
c/o WBZ Radio
1170 Soldiers Field Road
Brighton, Mass 02135

* Former Boston talkradio master Gene Burns who was heard on WRKO AM 680
up until last week has quit his syndicated show based at NYC's WOR-AM.
Apparently, Burns was very unhappy with recent changes to his show.
He left with a 1-year left on his 3-year deal. Burns also underwent
a major kneck surgery very recently. Jay Severin will be filling in
until WOR management decides on the future of the syndicated show.
WRKO AM 680 is one of more than 100 stations nationally which carries
the 3-5pm show. 'RKO actually tapedelay it until 7pm.

Burns' departure from WOR has refueled speculations that he might
be headed back to the Boston market(WRKO?) where he hosted a top-rated
mid-day show...

* As Scott. F reported a little earlier, a very quiet transaction took
place last week. Noble Broadcasting has sold its 50,000watt
WSSH AM 1510 to Denver-based Communicom Co. Until Monday(10/24) 'SSH
was an affiliate of Talk America Radio Network when Noble decided
to pull a plug on the Talk America and leased out most of 'SSHs
airtime to a Spanish broadcasting group. So, for the next 3-4 monhts
(while awaiting the official FCC approval on the sale) you can brush
up on your Spanish....Communicom does not have definitive format
plans but 24-hour kid service(KidStar out of Seatle or AAHS out of
Minneapolis) are rumored to be headed to 1510...

* Four major Boston FM stations have now full access to the Internet :
CR WZLX-FM, AOR WBCN-FM, AAA WBOS-FM and CHR WXKS-FM are all plugged
in courtesy of America On-Line...

>From the #4 market:

Urban/CHR station Q-102 (WIOQ-FM) has made the switch!! They've tweaked their format to drop the "Urban" part of "Urban/CHR". Before, most of their playlist consisted of artists like Toni Braxton, TLC, SWV, Boyz II Men (lots of it!!),
R. Kelly, etc. Now their top-of-the-hour sweeper goes something like: "First, there was WFIL {560 AM - the top 40 giant of the 60s & 70s - now religious}, then WCAU {98.1 FM - the big top 40 station in the early and mid 80s - now oldies}, then WEGX {Eagle 106.1 FM - hit music king of the late 80s and early 90s before switching to contemporary jazz}...now, it's Philadelphia's NEW number one hit music station -- WIOQ Philadelphia -- Q-102!!!!!" In the past hour that I've been listening, they've not only played *some* of the usual R&B artists, but I also heard Madonna's "Secret", UB40's "Can't Help Falling In Love", Bon Jovi's "Always", and Gin Blossom's "Until I Fall Away"...I spoke with PD (and also former WCAU jock) Glen Kalina briefly, and he says that it has been in his heart to do this for years...

TOP 40 RADIO IS BACK IN PHILLY!!!!!

ANOTHER MAJOR PLAYER IN THE MARKET MAKES A FORMAT CHANGE

Most people said it was just a matter of time before someone else made a change. But first, a recap....

In August, WGLD-AM (Sat Driven oldies format, owned by HMW Communications, Inc) changed to 'The News Station,' offering CBS News at the top of each hour and AP 'News Station' format thru the rest of the hour.

Then in September, WWWB-FM (B-100, Light AC, owned by HMW Communications, INC) changes to 70's based arrow format and becomes 'The Fox', WFXF-FM. Four days later, WNEU-FM (Cat Country, Hot Country) changes to an 80's/90's based rock/alternative rock format and becomes 'The Rock Alternative', WXRA-FM. Both these stations, owned by two different heavy hitters in the market, are attacking the heavy hitting rock station in the market, WKRR-FM, 'Rock 92' - owned by Dick Broadcasting Inc., by luring the older and younger audiences away.

Then, today, WKSI-FM (Kiss FM, CHR, owned by Bahakel Communications Inc.) decided that the hot country format would be good to pick up from the now deceased Cat Country and became 'Kiss Country'. While liners and positioning statements are being phased in, the change was quick and quiet. Most people expect the format to do well and slice off a piece or two from the #1 station in the market, WTQR-FM (Country, co-owned with WSJS-AM and WXRA-FM).

Who will survive? Will it end??? who knows.. more later...

Hey,

We want to accurately measure our FM antenna's radiation pattern. We have a Shively omnidirectional antenna, but it is my understanding that the tower that the antenna is mounted on will greatly affect the actual transmitting pattern.

It is my understanding that there are companies that will fly around an antenna at a mile or two radius with a helicopter and an RF measurement system and a GPS system and can produce antenna pattern measurements that are acceptable to the FCC. If anyone knows such a company in or near the Boston area, I would really like to know. Also if anyone has any experience with trying to get this kind of measurement done, I would really like to hear it.

Thanks in advance!

(on CKLW AM/FM)

I'm not CKLW staff but I do know some of the folks in charge there right now...they're using their FM (which has 50 kW but a very clear channel and tall antenna, and only a 90 mile straight line shot to the Cleveland area---no one on 93.9 for a couple hundred miles around) to recreate the "big 8" sound of 20-25 years ago, and doing a good job of it too.
On the AM, they're doing a regionally oriented and somewhat Canadian-centered talk format that's an alternative to the strident garbage that often passes for talk on our side of the border these days. It's the market leader in southwest Ontario and has listeners across the border in Michigan and Ohio as well (although that's no longer the AM station's prime target, but just a little added gravy). Both AM & FM stations sound better than they have in years, IMHO, and their boss Warren Cosford has told me they're rolling up higher ratings than they have had in some years as well. They also own two other stations, CIMX/88.7, a new rock outlet that is format dominant in Detroit, and CKWW/580, a regional big-band nostalgia station.
The owner is CHUM Ltd., which also has TV and cable channels based in Toronto (MuchMusic is national, Musique Plus has a national Francophone audience and CITY-TV covers southern Ontario)...and radio stations in various markets across Canada. It's a progressive company, one of the most respected in the business in North America.
The stations now are different from what they were when CKLW/800 was Motown Records' main pipeline to the world...but they're very successful at serving their intended markets, and picking up listeners in outlying communities on both sides of the border while they're at it.
Bob Smith, midday host WXXI-AM 1370 Rochester NY

Hello!

I have noted people reporting 95.9 Ajax on the air testing, presumably CHOO-FM, though I too have not heard any definite call mentioned. Country music is all that I have heard so far, and it has a pretty good signal here in the Buffalo area, with my antenna. We suspect that it may be directional N-S, judging how on a recent road trip in S. Ontario, it was better in Ft. Erie than it was in Mississauga! It may be pointed south to avoid interference to CFJB 95.7 Barrie, and CFPL 95.9 London.

In other area news, I hear that 101.1 Barrie (ex CKBB 950) and 95.1 in Collingwood, Ont. (ex CKCB 1400) are expected on soon testing, though at fairly low powers. There is a Weather Radio Canada Affiliate on FM now on 90.7, from the tip of the Bruce Penisula in Ontario (can't remember the name of the park offhand), at 50 watts. I also hear that CKVR-3 has perhaps successfully broken off from CBC, and will go independent. Thus Barrie may get a ch16 CBC affiliate. CFTO-9 Toronto wants repeaters for Orillia (ch21), and Peterborough (Bobcaygeon) on ch54.

Where in Chicago? What station? What do Don & Mike do? Talk, rock,
country, punk Hawaiian? Inquiring minds want to know!

Most recently, Eddie left (was let go?) from WGN and went to, of all
places, WLUP-AM where he did overnights...and Steve & Garry were still
on in the morning! When the AM went all sports and the FM became the
personality station, Eddie went to overnights on FM 98. Several months
ago he took ill while doing his show, and has been in the hospital ever
since. I don't know what is wrong with him, but he has been in the
hospital for months now... recall that he used to weigh around 600 pounds,
I don't think he's gone below 300 yet.. obviously he has had some
serious health problems for some time. He is not dead.

> signals coming into the Sacramento market

It's all about fragmentation. Just as though the `english stations' have fragmented to serve different parts of that audience (country music, news, top-40, adult contemporary, talk, etc) the spanish stations must think they can effectively target enough of a particular audience that advertisers want to reach.

. Sacramento, California is about to be overrun by Spanish broadcasters as more
. stations are signing on or converting to Spanish.

I used to work at the station you mentioned at 105.5. It really isn't allotted very much power and it didn't make it as Oldies (as KYLO) or Classic Rock (as KLCQ). But, then, the station at 92.1 in Sacramento couldn't make it as an AC station (when it was KHTN), but since it went Spanish it's at least been delivering a 1 share, which is better than it ever did before!
With more choices, however, comes a smaller potential share for each of the parties trying to divy it up, unless a KLAX-type station comes to down and just squashes everybody, and the chances of that happening are, as you can imagine, minimal.
It'll be interesting to see just how many stations wind up diving into the fray!

: Why it is that 8 stations are chasing down 40% of the audience, I have
no
: idea. Even if it's for advertising dollars, how big of a share of those
: are you gonna get if 8 other guys are trying to split 'em up?!?

The last time I counted stations receivable in Fresno, there were about
75 or so. So, how can you say that 8 stations with Spanish language
formats is a disproportionately large share of stations? To serve the
40% of the audience speaking Spanish it should be 30 stations! So,
they're actually far UNDERserved.

Huh. That's odd. I live here and don't count 75 receivable stations.
Arbitron only ranked 25 in the Winter 94 book. There are 3 times the
stations coming in as there are licensed to serve Fresno? You must have
a better radio than I do, or you caught the AM band on the night there was
one *hell* of a
skip!!! :)

Paul, you will *never* see Ron Harris make a statement about Tom that is in any way negative, as Tom doesn't like his employees to do that (Ron writes Tom's jingles for him, among other duties).
In Tom's own words, he has no compunction about saying whatever pops into his mind at any given time, as his only goal is ratings. The only subject he will not discuss on the air is Tom - specifically related to the criminal charges he faced in Boston last year.
Many broadcasters believe that they have some responsibility to their audiences, and make some effort to avoid crossing the line into bad taste and personal attacks. Anyone who has listened to Tom's show a few times understands that he is not among them.

You said "media". I consider the liberal media to be the likes of
Dan Rather, Tom Brokaw, Peter Jennings, etc.

Can't argue that talk radio is full of conservatives. But if you take
the media as a whole, newspapers included, I'd say that the "media"
is liberally slanted.

("Liberal media" is baloney)

Ed, I agree...across the nation, NARTSH, our trade organization, says 70% of talk hosts are avowed conservatives. Now this is down from 80% last year, perhaps a reflection of recent turnover following the severe erosion many Rush-driven stations have seen in their quarter-hour numbers since the peak of the format in the Fall of 1992. (Arbitrons, top 50 markets, as reported periodically in Radio and Records.) But those of us who are not conservative are still a rather rare species, especially outside the major markets on the coasts.
And frankly, the audience erosion for Rush and his clones, the growth and resurgence in Hot AC and AOR, and the rise of AAA format stations, indicates a lot of non-conservative listeners in the prime 25-54 demo have given up on talk radio ever balancing itself out or at least lightening up and making itself more entertaining again, and drifted back to music radio. These listeners are lost to the format forever if we don't act soon to convince them we as a format and an industry don't scorn them.

Orange & Rockland, our local utility is said to be selling off it's 6 radio properties. WALL/WKOJ Middletown NY (Once owned by Cousin Brucie et al), 2 in ME, 1 in NJ and 1 in IL will probably be sold by next year. A lot of this has to do with the scandle that rocked the utility and forced the resignation of the top two players. The new management is said to want to get back to being a utility and not spread out to media.

>was called Elvira. This particular DJ sounded to me like a mixture

The show, Cruisin' U.S.A. (not to be confused with Bruce Morrow's CBS
show Cruisin' America) was hosted by Jerry Thomas and "Samantha," whom
he sometimes just called "the Girl." They did a show on saturday night
on SMN's Pure Gold satellite service. I loved the show because they
played a lot of R&B, made the phone calls sound interesting and were
good together on the air. I used to hear it on one very TERRIFIC
station in Yuba City, CA. :)

I have not heard it in about 3 years. Since then, I believe
JT has left the show. "The Girl" has been gone for awhile.

It was great listening.

regards,
mark

Source record: 37013

In article <38pukf$28d@gagme.wwa.com>, UltimaJock@aol.com writes:

(10 rules of talk radio)

This post could easily have been titled "10 reasons why talk
radio is about to marginalize and devour itself."
I've said it before, and the Arbitrons we see in R&R every quarter
give a growing chorus of proof...the talk format is driving a lot of its
prime potential audience away and over to AOR, Hot AC and AAA
stations because it is so relentlessly partisan, and scornful of the
majority who don't share all its views/prejudices/idees fixes.
I don't think there's a conspiracy of PDs and GMs to turn their
stations into propaganda machines (although I'm familiar with one
or two who treat their stations that way, and I'm grateful for one of
them for giving me the chance to build an audience against him).
But so many PDs made the mistake of thinking Rush Limbaugh
became a hit in the late 80s because of his politics, and hired a
bunch of clones for their local talk shows, when in fact it was his
humor and style that made him big (in more than the sheer physical
sense). Now they're beginning to see their mistake, watching the
numbers fall (and billings along with them), and some are hiring
hosts without imposing a political litmus test. But the damage to the
format has already at least partly been done. It's going to take years
to repair, and we'll see some leaner times for talk radio in both
Arbitrons and ad billing until listeners finally get a clear message
that moderates and liberals are not going to be treated like the
incarnation of Satan every time they turn a talk station on.

A public radio station in the suburbs about 15 miles from my home recently
put in a directional antenna and raised their power to 1,000 watts (from
what I don't know). Before this change I could receive the station with
a rooftop TV antenna with a rotor; I no longer can although oddly the direction
al antenna is in my direction. I would be willing to invest in a higher or
more senstitive antenna to bring in this station again (they play oldies that
no other station ever does). However, the people listed in the yellow pages
under antennas seem to have no clue whatever besides why don't you get an
omnidirectonal FM antenna, which seems illogical to me. Can anyone offer
me any suggestions both on what to get and where to get a competent installer.

Fall and spring are times of the year when VHF propagation is interesting.
Usually thermal ducting over Lake Erie permits reception in Ohio of many
Canadian and Michigan stations, FM, TV and VHF/UHF ham repeaters, and
vice versa. CK FM used to be on the Ch.9 tower on the Detroit River
(don't know if it still is), which would give them a clear shot over
the southern Ontario FLAT lands and thence to Lake Erie.

On the subject of CKLW, there has been a shortwave pirate around the past couple of years calling itself "CKLW". Sounds like CKLW circa 1972, complete with Motown music, jingles, liners and Detroit spots. The verification signer, incidentally, is John C. Lodge. Anybody wanting to read more about CKLW should check out George Zeller's Pirate Directory.

But this is only true because of another Commission ruling: the abandonment of the 3-year rule. This rule functioned as a brake on the activities (in the broadcasting industry) of the next-quarterly-report-bottom-liners who have wrecked most of American industry. With that restraint removed, speculation in broadcast properties shifted into high gear with the result that most stations (at least in major markets) are saddled with debt loads that make them uneconomic to operate.

On a recent trip through the Southwest I was struck by differences in the industry according to market size. In the major markets, there is the usual group of sydicated biggies--in both music and talk formats. In the small markets (where survival depends more on schmoozing up the local merchants at the Rotary Club than it does on successful formats supported by rational advertising decisions) there are a bunch of marginal sattelite formats accompanied by really poor local production--usually the office boy or girl stumbles through a legal ID and "positioning statement" every half-hour.

But in the medium-sized cities there still seems to be some real radio going on. Local personalities, quirky musical selections, service interviews, etc. I think this happens because there are still a lot of local owners who are happy to make a living instead of a killing, and because, even if the return on invested capital could be driven to the levels MBAs are indoctrinated to demand, there isn't enough money to cause the big groups to wrest control from the small owners.

If I were young and wanted to have a nice life in radio, I would head for some place like Sedona, AZ.

This does not sound unlike Rush Limbaugh, who once said before the NAB convention in San Francisco, "It doesn't matter what my politics are, what matters is ratings." He was on a talkshow panel with local talker Ronn Owens and others. (Owens is on KGO 9-12noon, same time as Rush's show is carried on KNBR.) Owens said that politics and show content DO matter. So, Rush overtook Owens in the ratings, has burned out, and now Owens is back on top again. Apparently, some things DO matter besides just going for ratings in the short-term.

>Jack Bougat, and Bill Steinbach?

John Cigna --- now morning drive host (with a HUGE 23 share of the audience) He replaced Jack Bogut when Bogut jumped ship and went to WTAE. Bogut later bombed and was fired. After a few years on hiatus he can now be found doing mornings on WISH-FM.

Roy Fox - caretaker for a city operated mansion in new York City

Perry Marshall - retired many years ago

Bill Steinbach - retired last year but still fills in occasionally for other news guys.

Thanks for asking ---

Fred Honsberger (formerly Cigna's news guy)
3-6pm talk host

Ted,

As a consulting engineer, I can tell you to *be careful*. Although
some companies claim to do air based measurements, the results need
to be carefully evaluated to ensure that there is no corruption from
ground reflections or other artifacts.

The FCC will not accept airborne measurements because there is not
a controlled environment.

It may well be cheaper to ask Bob Surette at Shively to do a
range test for your configuration. At least that way, you
know the environment is controlled and the results are not
affected by "unknown" phenomena.

How about the same song in the same marketplace, but a different
station?

While KFI down at 640 was playing the Pointer Sisters, KTNQ, before they went Spanish and moved their entire station to KHTZ-FM, had a first line that went, "I'm driving in my car/I turn on 10-Q" (that's what KTNQ went by in those days).

Anybody else have another version of that song?

Back in around 1979 baseball had a strike. WABC AM in New York was
carrying Yankee(?) games. They broadcast Japanese baseball games
during the strike for a while, if memory serves. Though you don't
know the outcome, most listeners probably were not familiar with
the teams, like the Tokyo ______'s, Heroshema ______'s. etc.
Not being much into baseball myself, I don't know what sort of ratings
the Japanese games got.

: Can't argue that talk radio is full of conservatives. But if you take
: the media as a whole, newspapers included, I'd say that the "media"
: is liberally slanted.

How could you ever say that? I look at the politcal endorsements in the papers and almost without exception they always support Republican candidates, and nearly always go with conservative ideals on ballot propositions. (I don't believe any newspapers are supporting our single-payer health plan, Prop 186). Now, as for radio/TV, I look and listen for how candidates are covered -- almost without exception they choose to cover ONLY the 2 mainstream (Republican and Democrat) candidates in any race. They leave out the Peace & Freedom Party, the Patriot Party (Ross Perot's party), the Communist Party USA, the Libertarian Party, et al. If THIS isn't conservative politics, I don't know what is.

The conservative media in the USA are making a mockery of the political process by NOT carrying the viewpoints of the OTHER political parties in this country. It's no wonder the voter turnout will be about 24%.

4676. New Central PA station

Newsgroup: rec.radio.broadcasting
Date: 1994-10-31 03:25:41 UTC
From: Brandt Maxwell <maxwell@essc.psu.edu>
Message-ID: <391o3l$iu2@vixen.cso.uiuc.edu>
Source record: 37032

Well, Monday, Oct. 17, WXXZ Port Matilda-State College signed on as WINK 108. The tricky thing is that supposedly they still are WXXZ (a friend heard the legal calls very quickly and quietly), but they claim to be WINK State College (even using these calls and city at or near the top of the hour)!
Anyway, they are on 107.9 and are generally sort of an AC/Top 40/80's mix type station. Nothing too exciting, though during Sunday, they were playing some very interesting songs during testing. Examples would be "88 Lines About 44 Women" by the Nails or "A Million Miles Away" by the Plimsouls. They were mixing in some current modern rock with their 80's stuff, but also were playing some occasional country. Now, they never play country (fortunately), but they're generally not too adventurous with their playlist overall. They mix in quite a bit of "safe" modern rock (nothing that a top 40 station wouldn't play).

Here's an approximate sample of a half hour of programming...

"Something Happened On the Way to Heaven"- Phil Collins
"What's the Frequency, Kenneth?"- R.E.M.
"No Mistakes"- Patti Smyth
"Walking on Broken Glass"- Annie Lennox
"Come Out and Play"- Offspring
"I'm the Only One"- Melissa Etheridge
"All About Soul"- Billy Joel

You get the idea...for the most part, the songs are OK, but I'd rather they be more adventurous (and alternative, certainly)...

Later...
Brandt

> Bob Smith, midday host WXXI/1370 Rochester NY
>

Here's one former talk show listener who now tunes in almost exclusively to music radio. Here in NYC, WABC is practically unlistenable, with the exception of Lionel in the mornings and Lynn Samuels on Saturdays. All the other hosts are, for the most part, rabid, mean-spirited, nasty right-wingers.

Bob Grant is the worst of the bunch. There are three main topics of conversation on his program:
1. How much do you hate blacks?
2. How much do you hate immigrants?
3. How much do you hate gays and lesbians?
Callers with dissenting points of views are almost always called names and hung up on.

Jay Diamond, who does the 10 PM-2 AM show, is just as vile as Grant, while Rush Limbaugh continues to spew out distortions, half-truths, and outright lies.

So, for the time being I split my listening time between WQXR (classical), WBGO (noncomm, jazz), WNYC-FM (classical, NPR), and WNYC-AM (NPR, talk & interview shows). WNYC's talk shows vary from middle-of-the-road to left-of-center, but at least the hosts don't call people with conservative views names and hang up on them.

From: Mark Roberts <transvox@tyrell.net>
Message-ID: <394q8d$55c@vixen.cso.uiuc.edu>
Source record: 37039

Today (Oct. 31) was the last day of the "Music of Your Life" format on KBEA(AM). The station marked the occasion with an all-day remote from a delicatessen in south-central Kansas City and phone-ins from present and past station employees.

Tomorrow (Nov. 1), KBEA enters into an LMA with KCNW(AM) and becomes an affiliate of the children's "Radio Aahs" network. Gospel station KCNW will pick up some Sunday morning church broadcasts presently aired on KBEA. The LMA apparently does not affect KBEA's co-owned station, classical KXTR(FM).

To be blunt, there is not much that can be done with KBEA. The station (1480 kHz, 1/0.5 kW, DA-2) does not adequately cover the metro area day or night. Driving home tonight, I noticed the station fading out on a street between the Westport and Hyde Park sections of central Kansas City.

After tonight the sole representative of the adult standards format in Kansas City will be stereo KFEZ(AM) at 1190 kHz (5/0.25 kW, DA-N).

****

As does many a University of Missouri student upon reaching the age of 21, Columbia, Mo. student-run station KCOU(FM) celebrated its 21st birthday Oct. 29 at a Columbia bar.

The station sponsored alternative bands Velocity Girl, Jawbox, and Jail at a local venue, and played the top 88 alternative songs of 1994 during its Saturday broadcast day.

This has been a rough year for KCOU, with political problems, technical difficulties, and even a couple of call letter changes--to KEJJ in March and then back to KCOU in May. From a technical standpoint, the station still sounds bad--distorted, bassy, and overcompressed.

****

St. Louis station WFXB(FM) appears to be shifting its format, as reported earlier in AIRWAVES.

The station now appears to have moved to a loosely-formatted classic rock style, somewhat similar to its earlier incarnation as WMRY at the 101.1 spot on the St. Louis FM dial.

Alteration of the station's format had been rumored for weeks because of the weak performance turned in by the adult-alternative programming on "The Fox." WFXB is in an LMA with modern-rock KPNT(FM) and KDNL-TV.

****

Heritage rocker KSHE(FM) continues to de-emphasize its personalities and push the music instead. The station, in its 27th year of a rock-based format, is now calling itself "the Home of the 20-Song Music Marathon."

****
St. Louis bad boys Steve and D.C. will be pulling an overnight shift for Halloween on WKBQ(FM). At midnight, they are going on the air with a Ouija board and will relay what it says to Q-104's audience. I know, doesn't sound like something that will work well on radio.
****
Columbia public adult-alternative station KOPN(FM) has a new general manager. Stewart Edwards began with Missouri's oldest community-access station on Oct. 1. At the start of the year, KOPN instituted an adult-alternative format during morning and afternoon drive, angering some station volunteers who wanted to keep KOPN's free-form programming intact.
Money has also been a problem at the station. One KOPN board member says Edwards was brought in because of his experience at rescuing a New Jersey station with similar problems.
In mid-Missouri KOPN faces format competition from commercial KBXR(FM), and non-commercial competition from two University of Missouri stations, a Stephens College station, and a station at Lincoln University in Jefferson City.
****
And if that weren't enough -- Columbia is due to get another radio station. The Columbia Daily Tribune reported Oct. 5 that the station's studios were under construction in downtown Columbia in a building owned by KFRU(AM)/KARO(FM) sales manager John Ott.
Ott is also acting as a consultant to the station owners, but declined to tell the newspaper what format is being considered for it. The only mainstream format not presently represented in the Columbia market is CHR.
The call letters or location of the station were not mentioned in the article, but it's probably KNCD, a class-A station at 102.3.
The market has had two new stations within the past year: KBXR (an LMA partner with KFRU and KARO, which will be buying KBXR) and "lite hits" KTLH(FM), a rimshot from Boonville. Another class-A allocation at 104.1 in nearby Jefferson City is also before the FCC.
****
Subcarrier mysteries solved: I have mentioned mysterious occasional subcarriers on KCFX(FM) and KYYS(FM). Some careful listening the weekend of Oct. 22-23 revealed what they're used for.
KYYS' AM partner, WDAF, uses the subcarrier for IFB to remotes. The remote I heard was from "Chuck's Boots" in Gladstone.
KCFX uses the subcarrier for mix minus IFB during Kansas City Chiefs home games. The board operator and field producer evidently were conversing quite a bit about a parabolic field mike that lacked a dynamic-range compressor -- causing the board operator all sorts of hassles in keeping the levels even.
KCFX is the flagship station of the Chiefs football network.
****
Spanish-language mystery not solved: I read with interest the posts about Fresno and Sacramento's apparent surplus of Spanish-language AM broadcasters. I remember the same phenomenon in

Houston, including one station, KEYH, that called itself "La Ranchera de la U.S.A." <sic>, and another, KYST, that once was an all-Beatles station and later ran alternating English and Spanish tunes.
Now let's go back to Kansas City. There is a longstanding Mexican-American community on the "West Side" of Kansas City, Mo., and a strong Hispanic presence in Kansas City, Kansas. Yet there is no over-the-air Spanish-language television station (not even an LPTV) and just two hours of nightly radio programming on community-access KKFI(FM).
Hmmm...que' pasa?
****
Additional numbers: WHB(AM) *did* show up in the summer survey in combination with FM partner KMZU from Carrollton, Mo. The stations together pulled down a 1.0 share 12+. This gives country formats and their variants a 27.5% share of the Kansas City metro 12+ listening audience, up slightly from spring and up from 25.0% the previous summer -- without WHB, which abandoned its legacy rock 'n roll image, oldies format, and AM stereo late August of 1993.
****
Has anyone else noticed this phenomenon? A talk show devoted entirely to the trading of sports cards? KKLO(AM) from Leavenworth, Kansas, founded by Alf Landon but now rimshotting the Kansas City market with mostly gospel programming, sells a block of two hours daily to an Overland Park (Kansas) dealer in sports cards and memorabilia. He conducts a talk show via a severely unequalized telephone line from 12 noon until 2 pm. The show just moved to this time, apparently because KKLO is inaudible in Kansas City after local sunset.
(Perhaps this is being done in Fresno and Sacramento...in Spanish....?)

4685. NYC Radio Waves

Newsgroup: rec.radio.broadcasting
Date: 1994-11-01 07:20:46 UTC
From: SRogMix105@aol.com
Message-ID: <394q8e$55h@vixen.cso.uiuc.edu>
Source record: 37040

News from NYC around the dial---

There's alot of controversy over Bob Grant's views of the world, especially towards blacks. He's on the cover of New York magazine, and his support of NJ Governor Christie Whitman and NJ Senate candidate Chuck Haytitian has made waves among black voters. My opinion--making an issue only succeeds in making Grant a bigger rating success (He's WABC's PM Driver, and gets great ratings already). One things for sure--Radio's sure getting alot of press.

Howard Stern's TV show (an edited version of his radio show) is getting the E! cable channel some viewers. Say what you want to about the 'King of All Media'--his show is a great insight behind the scenes of radio. His shows last weekend with Al Michaels were hilarious. Reminds me of a film I saw of John 'Records' Landecker's WLS show a few years ago on Cable TV.

Lotto fever hit NY last week--$72 million in the Lotto Jackpot. Mix 105/WMXV gave a listener 105 tickets every hour from 9am to 5 pm every weekday for over a week via faxes. WARNING--if your station does something like this, have a backup fax machine ready. We blew out one machine the second day. In the end, we got 4 boxes of faxes. A great way to build a database of station listeners!

Lisa G. & Wayne Mayo are doing it again - The 2nd NY Radio Party - November 9th at Flowers Restaurant on W. 17th Street from 5-9pm. Cost is $20, call Wayne at 212/840-0097 for more info.

Gene Burns has left WOR abruptly last week--reports of a major blow-up with station management are reportedly the reason. he was PM drive for 3 years and also syndicated. Speculation is he'll go back to Boston, where he was before coming to the Big Apple. Speaking of WOR management errors, Giants play-by-play man Jim Gordon missed a game recently and was docked his pay for the game ($2,000). WOR is losing money over the deal they signed to bring the Giants on and was forced by the team to take Gordon and his partners, Dick Lynch and Karl Nelson as the radio team. Apparently, they are trying to take it out on Gordon, who had exploratory surgery which forced him to miss the game. He missed a game last year with a bad cold and they docked him then, too.

: would really like to hear it.

Yes there are companies that will do antenna pattern measurments. Som
even do it from the Air. The FCC Could care less about the antenna
pattern unless you are required to be a directional FM. Then the only
acceptable pattern is the range test data for that antenna and tower
combination made by the antenna manufactuer on their test range. This
pattern must be accompanied by a statment for a surveior that the antenna
is pointed in the right direction.

For most needs a good gound based pattern survey should provide you with
then information you need on signal coverage. If you must have an thay
Air measurments I think Hammet & Eddison in Burlingame, Ca. still do this
type of antenna measurments.

Somewhere in my tape box I have a dub of a jingle package demo (Jam? TM?) that offered customised versions of The Bee Gees' YOU SHOULD BE DANCING and The Andrea True Connection's MORE MORE MORE as a bonus for purchase.

Of course, however, the nostalgic favourite among us Chicago kids is the customised version Aliotta Haynes Jeremiah did of LAKE SHORE DRIVE that had references to Eddie Schwartz and WIND. (Skip Haynes claims he can't find that version's master, or at least he hadn't last time I talked to him a few weeks ago. Bummer.)

[Moderator's Note: This came in and I dont have the answers the poster wants, can anyone assist him? Post to the group so I can learn too <grin> Bill]

Bill,

Sorry to waste your time with these two small questions but...
What is the ARS format? I don't think that I saw/paid attention to the feeder.

I got the ratings from last spring for this area and am left wondering, which of the three responses should I pay attention too: Share, AQH, or Cume. From what I gathered I should pay attention to the cume, but that would mean that the people here in Milwaukee change channels something fierce and the share is far to small a percentage that would accurately translate to the stations listeners...ie 'tmj would be the leader to 'lum by only a hair.
Just trying to get my facts straight...thanks

chris...

BTW I think that I should be able to get the summer ratings (complete through last spring's ratings) up by thursday.

News from NYC around the dial---

There's alot of controversy over Bob Grant's views of the world, especially towards blacks. He's on the cover of New York magazine, and his support of NJ Governor Christie Whitman and NJ Senate candidate Chuck Haytitian has made waves among black voters. My opinion--making an issue only succeeds in making Grant a bigger rating success (He's WABC's PM Driver, and gets great ratings already). One things for sure--Radio's sure getting alot of press.

Howard Stern's TV show (an edited version of his radio show) is getting the E! cable channel some viewers. Say what you want to about the 'King of All Media'--his show is a great insight behind the scenes of radio. His shows last weekend with Al Michaels were hilarious. Reminds me of a film I saw of John 'Records' Landecker's WLS show a few years ago on Cable TV.

Lotto fever hit NY last week--$72 million in the Lotto Jackpot. Mix 105/WMXV gave a listener 105 tickets every hour from 9am to 5 pm every weekday for over a week via faxes. WARNING--if your station does something like this, have a backup fax machine ready. We blew out one machine the second day. In the end, we got 4 boxes of faxes. A great way to build a database of station listeners!

Lisa G. & Wayne Mayo are doing it again - The 2nd NY Radio Party - November 9th at Flowers Restaurant on W. 17th Street from 5-9pm. Cost is $20, call Wayne at 212/840-0097 for more info.

Gene Burns has left WOR abruptly last week--reports of a major blow-up with station management are reportedly the reason. he was PM drive for 3 years and also syndicated. Speculation is he'll go back to Boston, where he was before coming to the Big Apple. Speaking of WOR management errors, Giants play-by-play man Jim Gordon missed a game recently and was docked his pay for the game ($2,000). WOR is losing money over the deal they signed to bring the Giants on and was forced by the team to take Gordon and his partners, Dick Lynch and Karl Nelson as the radio team. Apparently, they are trying to take it out on Gordon, who had exploratory surgery which forced him to miss the game. He missed a game last year with a bad cold and they docked him then, too.

My apologies for not getting this one on here sooner... but, well, I've been too busy working! :)

First of all, the Summer '94 Arbitron ratings - 12-plus. These are from the October 15th Sacramento Bee, as I don't have the ratings handy here at home.

Summer Spring
'94 '94 Change Notes
1. KFBK (AM 1530) 11.6 11.8 -0.2 News/talk/Gold Miners
2. KSFM (FM 102.5) 7.4 8.4 -1.0 CHR/Urban/Dance
3. KNCI (FM 105.1) 7.1 6.4 +0.7 "New Country 105"
4. KRXQ (FM 93.7) 5.5 4.0 +1.5 "93 Rock" (AOR)
5. KGBY (FM 92.5) 5.3 5.7 -0.4 "Y92" (Hot AC)
6. KYMX (FM 96.1) 5.1 4.4 +0.7 "Mix 96" (AC)
7. KSEG (FM 96.9) 5.0 5.0 0.0 "The Eagle" (Clas. Rock)
8. KXOA (FM 107.9) 4.6 4.5 +0.1 "Arrow 108" (70's/80's Rock)
9. KWOD (FM 106.5) 4.5 3.9 +0.6 Modern Rock
10. KHYL (FM 101.1) 4.4 3.8 +0.6 "Cool 101" (Oldies/49ers)
11. KRAK (FM 98.5) 3.7 3.9 -0.2 Country (mix of trad./modern)
12. KCTC (AM 1320) 3.2 3.9 -0.7 Nostalgia/A's
13. KQPT (FM 100.5) 2.9 3.5 -0.6 "The Point" (Alt. Rock)
14. KSSJ (FM 101.9) 2.3 1.9 +0.4 "Smooth Jazz"
15. KSTE (AM 650) 1.7 1.6 +0.1 "Talk 650"
16. KGO (AM 810) 1.6 1.4 +0.2 "News/Talk 810" (S.F. station)
17. KQBR (FM 104.3) 1.1 0.8 +0.3 "The Breeze" (New AC)
18. KZSA (FM 92.1) 1.0 1.0 0.0 "La Z" (Spanish Hot AC)
-- KNBR (AM 680) 1.0 1.4 -0.4 Sports (S.F. station)
20 KHTK (AM 1140) 0.9 0.5 +0.4 "Hot Talk 1140"

Owned together -
* KFBK/KGBY/KHYL
* KSFM/KSMJ
* KNCI/KRAK/KHTK
* KRXQ/KSEG
* KYMX/KCTC
* KXOA-FM/KX0A-AM/KQPT
* KSSJ/KFIA-AM

Not listed in the Top 20 - KSAC-AM 1240 (Sports), KSMJ-AM 1380 (R&B/Giants), KFIA-AM 710 (Religious), KRCX-AM 1110/KRFD-FM 99.9 (Spanish, co-run)

In the 25-54 demo race, KFBK was #1 with a 10.1 share, followed by KNCI, KXOA-FM, KGBY, KSEG, KHYL, KYMX and KSFM, KQPT and KRXQ, KSSJ, and KRAK.

Now, the news...

* Sometime around midday on Tuesday (11/1), KSAC "All Sports 1240" will be no more. They've been picked up by a south state broadcaster who owns two Spanish stations, and will be Spanish-formatted KSQR ("Super Q"). No word on what kind of Spanish-language programming they'll be running, or if it'll be locally originated. KSAC's departure brings us to 4 Spanish-language stations in the market, counting KRCX/KRFD as separate stations, and not counting 50KW Spanish news/talker KTRB out of Modesto. Incidentally, KSAC has the contract for UC Davis football...no idea yet whether they'll carry the Aggies' final two games, or in what language.

It was fun to catch the last KSAC show for the Bee's R.E. (Bob) Graswich and Dan McGrath, who also appear on KFBK's 7-8 PM "Sports Talk" show on Friday nights across the board from yours truly. My favorite Graswich line - after reading a PSA, he indicated that you could call KSAC for more information. "But you'd probably better hurry." No, Bob, they aren't pulling the phones, just changing the language on the answering machine. ;)

* KRXQ "93 Rock" had a bit of a controversy the other day. As described in the paper, apparently their night on-air personality pulled the plug on a syndicated special with the rock band "The Eagles", declaring her not-so-thrilled feelings about it, and going back to the station's regular music format (which is usually somewhat "harder" than that band plays). KRXQ is co-owned with KSEG "The Eagle", which would presumably be a better place for the "Eagles" special.

The DJ in question was reportedly disciplined for the action.

* Long-time KFBK morning editor Roger Hamlyn leaves the station next Saturday, after 17 years of service. He's headed to KPIX radio in San Francisco... no, not KPIX-TV, as erroneously reported in last Saturday's Bee... he'll be the morning editor at AM 1550/FM 95.7. The aforementioned Bee article noted that Roger is well-liked among the KFBK staff...well, Mr. Vierria got *that* part right. His mere presence in KPIX radio's newsroom will improve that operation more than they know right now. (Pass this along, Tony? ;) My best wishes to him, and he WILL be sorely missed at KFBK.

* It'd probably only be speculation that the loss of A's games in the summer book hurt KCTC "Sunny 1320". (But everyone else who comments on ratings mentions something like this, so I thought I should. ;)

* This coming Saturday night is the last Sacramento Gold Miners CFL football game, not only for KFBK, but for the Miners in Sacramento. Miners owner Fred Anderson says the team will play elsewhere next year. No word on where, but he's rumored to be hoping for a berth in the Oakland Coliseum. He and McClatchy Newspapers heir Kevin McClatchy are also reportedly looking into purchasing the baseball A's, but would keep them in Oakland, at least for now. If they moved here, they couldn't well play in the Hole in North Natomas. ;)

If you're around a radio Saturday night and want to catch the Miners' Sacramento swan song with broadcasters David Glass and Lee Grosscup, be sure to catch the Gold Miners Radio Network newscast about 25 minutes into the pregame... you might recognize the name. ;)

I hope that people who aren't able to listen to the station itself
will consider the obvious feelings of love radiating from your
post when deciding whether to take your "review" at face value.

I find all this anguish over talk radio rather pointless. If it's
experiencing all of this ratings decline then it'll be taken off
the air. I wouldn't buy an AM radio which wouldn't let me select
which station I wanted to listen to and I imagine most people
share this tendency. Why not let them decide for themselves and
vote with their tuning dial? Are you afraid they'll decide
differently than you? What do you care? Listen to what you like
and be content to let them do the same.

Matt

A report in the Detroit Free Press the past several days documents the conservative trend among radio talk show hosts and cites how their listeners mounted a campaign that is credited with changing some vote in Congress.

Unfortunately I no longer have the article and my memory is faulty on specifics. But, if accurate, the story may help clear up some disagreement posted here based on perceptions.

> Rather and Brokaw rarely if ever get their opinions (whatever
>they may be) over the airwaves, so whatever their politics may be,
>if they keep them to themselves (as they do) they don't even pro-
>vide a balance to the dominant conservative tone of broadcast
>commentary today.

Slight correction here---Dan Rather, as those of us who have been or are in the employ of CBS Radio affiliates, has a daily two-minute-but-always-seems-longer commentary on said radio network (as does Jennings for ABC Radio; as for Brokaw, I know he did before NBC Radio was taken over by Westwood One but am not sure if it coninues to this day). Dan always struck me in these commentaries as a moderate; I think his "liberal" tag came only from his once or twice lipping back at Dick Nixon at a couple of Presidential press conferences just as Watergate was beginning to break.

4710. Talk Radio's Effects

Newsgroup: rec.radio.broadcasting
Date: 1994-11-01 07:21:40 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <394qa4$582@vixen.cso.uiuc.edu>
Source record: 36915

Has the following thought occurred to anyone?

A majority of the hours devoted to radio talk shows is increasingly spent on bitter, one-sided, so-called "conservative" invective that often is nothing more than a partisan attack on the President and Mrs. Clinton.

(How "conservative" is it to be so disrepectful of the President, by the way?)

These talk shows and their hosts feed on and promote public frustration with our political leadership.

Is it not possible that someone who's not "all there" might take some half-witted talk show host's expectorant anti-Clinton attacks as a cue to go up to Washington and take some shots at the White House?

So-called "conservative" talk radio ought to reap what it has sown. A great jurist's words about "shouting 'fire' in a crowded theater" come to mind....

If you are really interested in broadcast radio in your own area, you might wish to get involved in the AIRWAVES "RadioWatcher" project.

We are currently asking for individuals who are either active in the industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES.

As a RadioWatcher, you will be responsible for reporting the goings-on in your locale, and will be, in effect, a staff reporter for AIRWAVES. While anyone can write an article for the Journal, RadioWatchers will be considered the de-facto correspondent in a given city.

As a RadioWatcher, you will be asked to keep an eye and ear out for news and schmooze about the broadcasting scene in your market. You are asked to submit at least one report per month (more if you choose) and will be kept on file here at AIRWAVES as an official member of the press (for whatever good that might be).

The purpose of this program is to create a base of volunteer staff reporters who's job it will be to keep a steady flow of good information about various markets coming in to AIRWAVES. It does not mean that the pages of AIRWAVES are closed to any of the other posters in net-land. It is just a way to assure that the readers will have something good to read, when the more casual posters are not available.

Q: What do I need to do?

A: RadioWatchers are basically the same thing as reporters. To remain on the RadioWatcher program, you are expected to be involved with

radio in your market, either by profession, or by a strong personal interest. You will be asked to report on any interesting goings-on in and around your market. Such as format changes, station sales, interesting trends, market ratings, and whatever else seems appropriate. The depths to which you dig for information is up to you.

It is important, though, that you are a true fan of radio, and not merely a fan of one sort of format. Your reports can have personal commentary, but should be based on actual facts (as you know them) rather than how those facts match up with your personal opinions.

In general, we need good, solid reporters who will do the job based upon their love of radio, and desire for more exposure. AIRWAVES is not a profit making entity, and so salaries cannot be offered. If you are a budding journalism student, or a seasoned pro, this may be a chance for you to show your stuff to the world. Airwaves is read across the globe via the Internet, and is available to subscribers of CompuServe, GEnie, AOL and on a host of BBS systems, via email. Your input will not go unnoticed.

At least one of our more prolific reporters tells me that he receives much email in praise of his posts and has made many interesting contacts as a RadioWatcher. We have also been told that our RadioWatchers have broken stories long before the trades get a hold of them. Not bad for a bunch of voluneers, huh?

So if you are interested, drop me a line and tell me about yourself. I will be in touch by return mail. Those of you who expressed an interest in the past, are encouraged to get back in touch. Those of you who are already RadioWatchers, thank you and keep up the great work. As AIRWAVES expands, your contribution will be even more important.

4713. New England Radio Watcher: WCAP owner dies

Newsgroup: rec.radio.broadcasting
Date: 1994-11-02 04:39:31 UTC
From: fybush@world.std.com
Message-ID: <397563$lon@vixen.cso.uiuc.edu>
Source record: 36931

Israel ("Ike") Cohen, the longtime co-owner of WCAP(AM) 980 in Lowell MA, died Monday morning (Oct. 31). He was in his mid-80s. Ike and his brother Maurice started WCAP in 1951, as a 1000 watt daytimer. Under their ownership, it became a 5000 watt fulltimer, the most powerful AM in the Merrimack Valley.

Ike and Maurice were the only owners WCAP ever had, but with Ike's passing, the station is likely to change hands. Rumors have WCAP going all-Spanish soon. WCAP's crosstown rival, WLLH, is also going through changes. They're moving from their current studios to new space in the Lowell Sheraton hotel, they've seriously cut back news (eliminating bottom-hour casts in PM drive, and cutting all news in midday), and there are rumors that that station may be sold as well.

And 12 miles down the road in Lawrence MA, WCCM(AM) is still for sale by Curt Gowdy. He sold CCM's sister station, WCGY-FM, to American Radio Systems (they're running it as 70s "Eagle 93-7") Rumors have CCM being either sold to local investors or being donated to Merrimack College.

BTW, the WCCM call letters are actually a twisted roman numeral! "CC" is of course 200, and when you subtract that from 1000 ("M"), you get 800, which is where they are on the dial.

-=Scott Fybush - fybush@world.std.com=-

4714. SD County Report

articles@airwaves.com

Here's the latest from North County San Diego: Nov. 1, 1994

FCC Rules: The Oceanside Blade-Citizen reported that the FCC mandated that foreign affiliates of U.S. networks were "ok." KUSI, a San Diego-based independent radio w/pictures, filed in August about XETV's Fox affiliation. KUSI wanted the so called "foreign broadcast permit" thrown out -- because the station basically wanted the Fox feed -- and NFL. [New lawsuit, same attitude (money!)]. The paper reported if XETV was forced to drop the signal, almost 1 million listeners w/pictures would not have an outlet. The implication was also thrown to the radio side (namely XETRA-AM sports) English stations based in Mexico.

Imus! Don Imus and his morning crew said on Nov. 1, that they will take a tour to Albuquerque, Tucson, San Diego, and one more west coast stop. The Marconi winner will visit the radio studios and do the show. The I-man reported this would be in February or March.

KNAC, Long Beach - based rocker at 105.5 has been SOLD to a Spanish based broadcasting group. Liberman Broadcasting is slated to take over in February. The new group also owns KWIZ, 1480 AM, and KKHJ, 930 AM.

KLOS (95.5, Los Angeles, 68kw) let go radio personality Geno Michelini last week. The Orange County Register said the CapCity/ABC O&) reached an "amicable parting of the ways." Cary Curelop, PD, said, "We're going back to what made us great." Randy Maranz is a "temporary" replacement. Michelini was most noted for the Five O'clock Funnies, and appearances at a L.A. based comedy club. He is reported to keep the appearances at the comedy club. :-(

XETRA-AM (Tijuana, BC, Mexico, 690, 50kw-U) is handing off two more San Diego State football games to KOGO (600, 5kw, U). XETRA's contract for UCLA and SDSU calls for no interruptions in the broadcast of football games -- but there were four conflicts of time. XETRA formed the "XTRA" sports network, and paid KOGO a reported $50k to broadcast the games.

For a complete radio and radio w/pictures listing, please e-mail me!

4715. St. Louis Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-11-02 04:39:35 UTC
From: alcassel@crl.com
Message-ID: <397567$lp2@vixen.cso.uiuc.edu>
Source record: 36933

A few observations from my trip to St. Louis this weekend:

(1) WFUN-FM 95.5 in Bethalto, Ill., the locally produced station for children, is still on the air, with children's programming. Whoever said they went dark appears to have been wrong.

(2) KSD-AM still seems to be mostly CNN Headline News audio, although I have seen reports here that they were increasing the time devoted to talk shows. The only talk shows I heard advertised during my visit this weekend were on weekdays, from 10 p.m. through the overnight hours. In my opinion, it would be nice if this station could do a little bettter in the ratings with news, so that KMOX wouldn't be the only game in town. KSD has a remarkable signal during the day and night at 550 KHz with 5 KW, and could be heard most of the way to Paducah, KY.

(3) Someone said a while ago that KSLH-FM (91.5) was being sold to the Lutheran Church and would become a religious station to supplement KFUO-AM, a religious daytimer, and KFUO-FM, a commercial classical station. So far, that doesn't seem to have happened. KSLH-FM had an all-jazz format as of last weekend. I like their format, but their audio, is monophonic. Also, the station is weak and low in modulation, making it hard to hear through interference in parts of west county.

(4) Speaking of the Lutheran Church, their KFUO-FM 99.1 programming is superb! The local NPR station in Atlanta pretty much turned me off from classical music with dreary presentations and lifeless music. KFUO-FM, however, sounds noticeably brighter, both because of their selections and because of their audio, which is excellent. They have a strong signal, which can be heard, at least in spots, along the highway up to the last 50 miles or so before Paducah.

Source record: 36935

In article <394q9k$57c@vixen.cso.uiuc.edu>, Christopher J Hayes
<admiral2@csd.uwm.edu> writes:

-I got the ratings from last spring for this area and am left wondering,
-which of the three responses should I pay attention too: Share, AQH,
-or Cume.

Chris: A quick ratings primer -
AQH - Average Quarter Hour - Arbitron's estimate of how many people are listening during an average 15 minute time period within the specified daypart. In real use, the estimate of how many poeple are listeing at any one time. So an AQH of 1500 during Mon_Fri 3p-7p means that 1,500 people are listening to the radio at any one moment between 3pm and 7pm Monday thru Friday (Monday at 4pm or Thursday at 6:15pm) A measure of how long people listened as well as how many.

Cume - the number of DIFFERENT people who tune into a station at least one time for at least five minutes during the daypart specified. So a Cume of 150,000 for Mon-Fri 3p-7p means that 150,000 DIFFERENT people listened for at least five minutes ONE time during that 20 hour time period (Monday thru Friday 3pm-7pm.) Comparable to a newspapers subscription count.

Share - the percentage of total AQH radio listeners that were listening to your station during the time period mentioned. So if during Mon-Fri 3p-7p, your station had 1500 AQH, and 15,000 people were shown to be listeing to the radio during that time period, your station would have a 10 share (its truly a 10% share, but the percentage is implied)

Which one should you look at? What are you tring to accomplish? I'd be gald to answer E-Mail with a specific question?

on a recent posting, i juxtaposed two letters in the address of the
c.b.c.'s ftp site for program information and sound files.

the correct address is:

ftp debra.dgbt.doc.ca

sorry for any inconvenience.

while tracking the right address down, i came upon a canadian telenet
site which has radio (broadcasting and non-broadcasting) information

this address is:

telenet debra.dgbt.doc.ca 3000

this has more than radio info, and is set up in a two way 'interactive
chat' (if you consider interacting with a computer as 'chatting') but
you can probably find out anything you want to know about canadian
electromagnetic emissions at this address. chances are, the computer will
ask you more questions than you ask it.

Someone wrote:

: : : Sisters singing "Fire" with a line that went, "I'm driving in my car/
: : : I turn on KFI".

In the Bay Area "...I turn on KFRC...", and you'd think that since they're local people and they recorded it down the street from KFRC, the Pointers would have at least changed the lyrics a little to make it rhyme.

There was other songs like this. The song "Sooner Or Later (Love Is Gonna Get You)" the musical intro has a long drawn out "K-Y-A" sung over the top of it. In sacramento "Listen to the music day by day; Listen to the music Candy's (KNDE's) gonna play"; there were lots of those. Then suddenly they seemed to disappear.

>country, punk Hawaiian? Inquiring minds want to know!

Don & Mike do thier National Radio Show out of Washington, D.C. and
can best be described like that one Seinfeld episode that described their
show idea as "a show about nuth'en"! They have a history of being "The
Bad Boys" of radio and they don't concern themselves with any of the
so called *issues of the day*. They make fun of the radio business as a
whole and love to terrorize Program Managers and Directors of all their
affiliates.

D&M truly make radio *FUN* to listen to and we recently lost the show
here in Buffalo, but are looking forward to it's return. WWKB here in
Buffalo, will be sorry they ever lost the show! They've already dropped
considerably in the ratings since then.

In a previous article, trickstr@netcom.com (HiTommy) says:

>Paul, you will *never* see Ron Harris make a statement about Tom that is
>in any way negative, as Tom doesn't like his employees to do that (Ron
>writes Tom's jingles for him, among other duties).

That's interesting... I did notice that "Ron" came from the California
area, but did not know he worked for Tom. Usually Tom replies to things
himself and doesn't use a "mediator"... I'm surprised he hasn't taken
the time to put his two cents in. Tom is usually quite outspoken on the
Net and doesn't shy away from any issue!

>In Tom's own words, he has no compunction about saying whatever pops into
>his mind at any given time, as his only goal is ratings. The only subject
>he will not discuss on the air is Tom - specifically related to the
>criminal charges he faced in Boston last year.

Are those the charges that he "threw his wife into a fireplace"? I heard
this story posted a while back on this newsgroup, but Tom denied it
infatically. He's seems to be very sensitive about the subject and
I would like to know if there is any fact in it. If there is... he has
alot of nerve talking about such issues as the O.J. Simpson / Nicole
(wife abuse) issue, if he treated his own wife like that!

>Many broadcasters believe that they have some responsibility to their
>audiences, and make some effort to avoid crossing the line into bad taste
>and personal attacks. Anyone who has listened to Tom's show a few times
>understands that he is not among them.

I know Tom "rides the crest of controversy" and believes that it will
give him higher ratings... but if he tries to "surf" over his own personal
past history, he may find himself crashing into the "reaf of reality"!

So like those on the West coast would say..."Surf's Up...Dude!"

I just love "hanging ten" while "surfing the Net"!

Mark Roberts (transvox@tyrell.net) wrote:
: Another station mainstay, Bob Hardy, the morning news anchor, personified
: the term "anchor" in the sense of stability, reliability, and credibility.
: He dropped dead last summer while mowing his lawn in Virden, Illinois.
: He has not been replaced, for he is irreplaceable. His co-anchors, Wendy
: Wiese and Bill Wilkerson, are certainly capable individuals. But they
: don't have the track record, the "weight," if you will, that Hardy had.

Bob Hardy, and before that, Rex Davis, were news anchors of very considerable "weight." St. Louis's versions of Walter Cronkite, if you will.

: And the station is now tweaking with its newscasts, adding sounders (when
: before did KMOX ever need sounders?) and clipping off the network at three
: minutes past the hour.

Actually, KMOX has used sounders before. I believe they used them during the '70's, when their local newscast was presented before the hour, leading up to the CBS newscast. The sounder was four notes of a solo horn, followed by an announcement, followed by the same four notes, a drum roll, and then music vaguely reminiscent of teletype chatter.

Also, during the late '60's, KMOX cut off the last minute of the then 10-minute CBS hourly newscasts. The last minute was always devoted to an anecdote, however, rather than hard news. There was a total of about 20 minutes each hour on the hour devoted to CBS news, then local news, sports, and weather, and finally, an hourly 5-minute CBS feature.

If you wanted to hear the anecdote at the end of CBS news, however, you had to tune to KMOX-FM, where they played the full 10-minutes, followed by 50 minutes of locally produced, automated music programs.

The upshot is that I don't think that the advent of a "sounder" is necessarily an indication of decline. The chopping of a minute of news may be a bit more serious, however, since there is now only about 1/3rd as much national news on the hour as there used to be. And that's probably because they HAVE to do it, to avoid stepping on Limbaugh's opening each hour. Without Limbaugh, they wouldn't be doing it at all.

But Limbaugh is probably cheaper than news or locally-produced programming, and we can probably see more decline in local service as KMOX's ratings fail to rebound.

Message-ID: <397582$ltb@vixen.cso.uiuc.edu>
Source record: 36954

The Tuesday (11/1/94) Washington Post reports that Albimar Comunications is selling WKYS-FM (93.9) to Radio One, a group owned by D.C./Baltimore area radio talk show host Cathy Hughes, for $34 million dollars.

Radio One already owns talk-formatted WOL-AM (1450), and urban AC WMMJ-FM (102.3), along with 4 stations in the Baltimore market (WWIN AM/FM, WERQ-AM and WOLB-AM.

Alfred Liggins, Hughes' son and Radio One's president, says WKYS "will continue to remain adult contemporary, targeting adults and serving the African-American community." Unnamed industry sources quoted by the Post sugest, however, that Radio One may move the older, more broadly based urban AC format of WMMJ to 93.9, and move the younger-oriented WKYS to 102.3.

The Post says the sale realizes a dream of Cathy Hughes to buy WKYS. Eight years ago, she raised a half-million dollars, mostly from small minority business people, in an attempt to purchase 'KYS from NBC, when the Peacock network divested itself of its owned and operated radio stations. The effort failed, but she and her son went on to buy WMMJ (the first frequency of WHFS-FM in its "Bethesda" days).

Authors notes: One wonders if Radio One will also move WKYS from its comfortable and modern studios in the NBC complex on Nebraska Avenue in Northwest D.C. Albimar bought the studio equipment from NBC, and leased its present studio/office complex in the building. Historical note: WKYS, and its then-DISCO format, was the successor to WRC-AM's successful CHR format, which NBC pulled the plug onto make room for its "News and Information Service" all-news format, which died within a few years. Rather than move the CHR format to then WRC-FM, NBC decided to climb on the disco bandwagon...and did quite well with the format for years.

Cheers,
Max

Hey! I remember that! Thanks for reminding me. BTW, I recently got hold of AHJ's Lake Shore Drive LP on CD. Taped it for myself and sold it through chi.forsale. Quite capitalistic for a flaming liberal, wouldn't you say? :) :) :)

The really sick thing, and I'm admitting this publicly, is that I used to have a recurring dream that WIND went back to its AC format. Next to a wild night with Debbie Gibson, this would be my ultimate fantasy.

There's been a lot of discussion -- and cussing -- about stations jumping into the Spanish format.

Friends, of the fifth estate: what is Spanish format? To clarify my question, most non-espanol speakers (myself included) will classify a station that broadcasts in Spanish as a "Spanish" format. That's no more than saying that all English speaking stations are an "English" format. In my posts, I am guilty of this too, classifying any espanol language station as "Spanish" -- IS WRONG!

I believe -- and will try -- to identify the proper format -- like banda music, Christian, or whatever flavor comes from the broadcaster. And, I don't believe the nine-Mexico based broadcasters that broadcast in espanol to an audience north or south of the border all use the same format! I am encouraged by the resurgence of foreign language radio broadcasts, and believe that these influences will only make better and smarter radio for the vast listening audience.

Just my opinion.

While I am only a lowly college intern at WXPN-FM here in Philly,
I am a huge baseball fan. In Baltimore this summer, WBAL 1090-AM
rebroadcast the Orioles games from the 1971 ALCS and WS and the 1966 WS.
I remember that the General Manager Geoff Beauchamp said in the
Baltimore Sun that they got a fabulous response to the programs. I had to
agree because the broadcasts were amazing in that they took you back to
the history and the nostalgia of the game that real baseball fans enjoy.
Listening to Chuck Thompson, Vin Scully, and Bob Prince when they were at
the top of their careers was spectacular. The 1971 WS was particularly
good because you got to listen to Roberto Clemente's final at bat before
he died 2 months later. It was spooky.
I think the programs worked well because Baltimore is such a ravenous
baseball town. Just my 2 cents.

(on implications of anti-Clinton invective)

We got our answer to the question, "does the incessant
right wing radio diatribe against Bill Clinton pose any danger,'
this past weekend. It has not generally been reported in the US
media (for whatever reason I leave to your imagination). But
Linda Diebel of the Toronto Star Washington bureau told her
Canadian readers this weekend, that the man who fired his
assault weapon at the White House drove there in his pickup
truck, festooned with such bumper stickers as "Impeach Butch
Reno" (referring both to the Attorney General and to popular
and false allegations that she is a lesbian). It also had a bum-
per sticker reading, as I recall, something on the order of
"If we beat swords into plowshares, we'll be beaten down by
those who didn't." No question the man was as right wing as
they come, but no one here has chosen to report this fact,
either on radio, TV or in print. Wonder why? (Needless to say
I'll be discussing this with MY listeners this week, because
I don't hide a thing from them...)

I think that it is easy to blame the "other side" for everything that goes
wrong. To blame the "half-witted conservative talk show" (I'm really surprised that
you didn't add "right wing") for the shooting is a stretch. I suppose the
airplane that tried to do the same thing was motivated by the same emotion.
I also suppose that the ratings of these shows don't show a thing about what
people want to hear. The people are all sheep, following the conservative
subliminal message. If you think that there is room for another side, go ahead
and syndicate a show and attack from the left. Nothing to stop either side
but advertising dollars.

Mark --

You should know better. Does the same argument hold for the talk hosts
who bashed the living hell out of Reagan and Bush. Maybe it was talk
radio that drove Hinkley to shoot Reagan!

You give talk hosts too much credit. Those with a liberal bent can blast
away with the best of the conservatives...but they can't take the same
type of criticism. What is their right to speak out against the system is
"hate" and "bitterness" when it comes from someone who doesn't agree with
them.

Come on!

}
} I think that it is easy to blame the "other side" for everything that goes
} wrong.

Ha Ha Ha Ha Ha Ha Ha Ha Ha ....

Thank you Steve. That was just the poke of joviality I needed.

} To blame the "half-witted conservative talk show" [...]
} for the shooting is a stretch.

Yes it is a stretch. About as much of a stretch as it is to blame
<so-called> liberals, Democrats and especially Clinton for everything
that is wrong in America. I am so glad you brought that up, Steve.
It always amazes me how *some* conservatives can totally bash the
commander-in-chief of the armed forces and the leader of this great
nation, blame him personally for everything that is wrong in America
today (forgetting, conveniently about 12 years of Republican rule)
then say that it is a stretch to blame that relentless drum beat for
driving a kook over the edge of his shaky sanity.

} I suppose the
} airplane that tried to do the same thing was motivated by the same emotion.

Maybe, maybe not. We don't know, do we? But it is as plausible as
the idea that the media is a liberal conspiracy, isn't it? Can anyone
tell me exactly what a 'liberal' is anyway?

} I also suppose that the ratings of these shows don't show a thing about what
} people want to hear. The people are all sheep, following the conservative
} subliminal message.

Some are sheep, some are not. There are sheep on both sides and
plenty of shepherds to shear them. Left wing exremists are just as
full of sheep-dung as are right wingers.

} If you think that there's room for another side, go ahead
} and syndicate a show and attack from the left. Nothing to stop either side
} but advertising dollars.

Why attack anyone? Why do you think that the counter measure to
'right wing attack' is 'left-wing attack"? It says a lot for the
outlook of some on the right (such as Steve, apparently) that the only
answer is attack attack attack. There is another way, you know. It
is called reasoned thought. It is done by looking at each issue unto
its self. Taking the time to reason each thing out, rather than
lumping everything into convenient catagories.

Never mind, it is much more fun and a lot less trouble to just think
in 'binary-mode' than to actually use your brain and decide each issue
based upon the merits of that issue.

Sigh.

Bill

There's no doubt there's an anti-taxation mood. In Oakland there is a ballot initiative to do away with an assessment district because it costs "a lot" of money. Thing is, this district takes care of Oakland's park maintenance and street lighting. People may actually vote streetlights out of existence! I have no doubt that this kind of mood has come about because of people like Rush. KGO takes credit for helping pass the infamous Proposition 13 in 1978. That initiative has nearly ruined California. (There's a huge story all about it in the current issue of "Harper's".

Depends upon what one seeks to conserve Mark....
>
> These talk shows and their hosts feed on and promote public frustration
> with our political leadership.

Isn't that a good thing? If people get frustrated enough, perhaps we can
return to constitutional government.
Patrick Henry said, "Show me that age and country where the rights and
liberties of the peole were placed on the sole chance of their rulers
being good men, without a consequent loss of liberty! I say that the loss
of that dearest privilege has ever followed, with absolute certainty, every
such mad attempt."

Grayson: "Power ought to have such checks and limitations as to prevent
bad men from abusing it. It ought to be granted on a supposition that men
will be bad; for it may be eventually so."

"Let's hear no more of confidence in men...but bind them with the chains
of the Constitution"

> Is it not possible that someone who's not "all there" might
> take some half-witted talk show host's expectorant anti-Clinton attacks as a

Someone who is not "all there" might just take some of the nonsense on the
daytime TV talk shows seriously and become a left-handed, cross-dressing,
transvestite, KKK, female Morman priest and do some serious damage.
Mark, we can't go through life planning one's affairs on the basis of
"What will the feeble-minded do?"

> So-called "conservative" talk radio ought to reap what it has sown.

So far we have....higher ratings...loyal listeners... vigorous two-way debates on the issues. Conservatives above all want rule of law...I can't image anything you may have heard on Rush's show would lead even the feeble minded to take a shot at the White House, no matter who the occupant is. Have you?

<lance@kiss-my.aiss.uiuc.edu> writes:

(liberal media bias?)

> Rather and Brokaw rarely if ever get their opinions (whatever
>they may be) over the airwaves..

Rather and Brokaw are more sophisticated than just blurting out their opinions on the air. Sometime take note of how the news stories are written. Listen for adjectives that sway the viewer into a particular frame of mind. Watch for the "raised eyebrow" every now and then. Notice the labels that they put on people (for example: Pro-Life demonstrators are always called "Anti-Abortion" Protesters and Abortion Supporters are called "Pro-Choice" Activist.) It's subtle and it does happen.

>Perhaps we should focus more on those whose opinions DO
>get on the air, even in the guise of straight reporting...well known and
>outspokenly conservative voices like Brit Hume, Sam Donaldson, Andrea
>Mitchell, John Cochran, George Will, et. al.

I never thought I'd hear someone say that Sam Donaldson was a Conservative. Anyone that's seen him on the Sunday Morning news programs knows that Sam is extremely liberal. Brit Hume goes out of his way to defend the President whenever he can. George Will is obviously a conservative, but he appears as a commentator and doesn't try to shape the news in a bonafide "News Story." As for the others, I'll watch them closely.

4751. Traffic Computer Programs

Newsgroup: rec.radio.broadcasting
Date: 1994-11-02 04:41:21 UTC
From: technofile@aol.com
Message-ID: <39759h$lvo@vixen.cso.uiuc.edu>
Source record: 36928

Once again I'm turning to the best known resource for information on the business of radio. (Insert loud kiss-up sound here.)

I'm looking for input on a computer program to handle a small or medium market station's traffic. Scheduling is the main issue; we're still doing manual logs and our spot load has grown to the point that it's becoming very difficult.

The program should be able to handle differently formatted hours. It would also be handy if it could keep track of competitive codes and avoid conflicts; reports capability should include the ability to print an affidavit (or at least the information required to prepare one).

We don't necessarily need an interface to billing, but could use it if available.

As always, money is the prime issue. I -- like so many of you -- work with zero budget.

I'd also be interested in hearing from anyone else out there in small markets. How are you doing your logs? What cost effective alternatives are there to a manual system?

As always, thanks.

This has been an on-and-off kind of thing. Mark Klose had a midday talk
show until he went over to WFXB to play music again. He wasn't replaced.
I think EZ Communications is still trying to figure out what to do with it.
Yes, the station has a great signal; it's too bad it has languished for
many years, first under Post-Dispatch ownership and then under the
ruination that was Gannett (which also destroyed KCMO in Kansas City).

> it hard to hear through interference in parts of west county.

This hasn't happened because KFUO's license has been designated for hearing
by the FCC for affirmative action deficiencies. Everything else is on
hold. Webster University is now programming KSLH. The station is still
broadcasting with its original late-40s vintage equipment. The signal
problems you describe are a result of that. The St. Louis City schools
just don't have the money to spend on upgrading the station.

>
> (4) Speaking of the Lutheran Church, their KFUO-FM 99.1 programming is

> which can be heard, at least in spots, along the highway up to the last 50
> miles or so before Paducah.

KFUO-FM is on the St. Louis master blaster at Kenrick Seminary in
Shrewsbury. It is an excellent station. The announcing is very
professional as well. And, I agree, the audio quality is wonderful.
It's now up to the FCC as to whether the LCMS can keep it. The outlook,
unfortunately, isn't good. The LCMS did things such as advertise for
management positions only in Lutheran publications -- since the LCMS is
predominantly a German-American denomination, it is unlikely that any
minority applications would have resulted from that type of effort.

(By the way, LCMS == "Lutheran Church - Missouri Synod")

From: TOMLACKO@delphi.com
Message-ID: <39aba5$io5@vixen.cso.uiuc.edu>
Source record: 36960

On Monday, October 31, Radio One Inc. announced that they would be paying $34 million to Albimar Communications Inc. for WKYS FM 93.9 (Urban format). This deal is reported to be the largest among two properties which are owned by minorities. Radio One Inc. is chaired by Cathy Hughes and her son Alfred Liggins. Albimar Communications' principal partners include Ron Brown, the Secretary of Commerce, and Jim Kelly, husband of D.C. Mayor Sharon Pratt-Kelly.

Radio One's other properties in the area include WOL AM 1450 (Local Talk) and WMMJ FM 102.3 (Urban/AC format). In Baltimore, Radio One owns four properties; WWIN AM & FM and WERQ AM & FM. This will be the first station that Radio One has acquired that won't need a major overhaul when the deal is done. In the past two years WKYS has had very respectable ratings. Here's how they've fared with listeners aged 12+:

Summer '94 4.0
Spring '94 4.1
Winter '94 4.0

Fall '93 4.4
Summer '93 5.9
Spring '93 4.7
Winter '93 4.1

Fall '92 5.2

If all goes as planned with the acquisition, Radio One plans no changes with WKYS's format. There is talk however of moving WMMJ's format to WKYS's high powered frequency at 93.9 FM (50,000 watts). And moving WKYS'S format to the lower powered FM 102.3 (6,000 watts). FCC approval of the sale should take three to four months.

WMAL (Local & Net. Talk) AM 630's Milagros Ardin was first on the scene to interview two of the three men who subdued Francisco Duran after he shot several rounds from his semi-automatic rifle in to the White House on Saturday afternoon. Ardin, who has also been working weekends for WRC TV channel 4, was in the area interviewing one of the Virginia Senate candidates when she heard of the commotion at the White House and responded immediately.

WJZW (Smooth Jazz format) FM 105.9 has hired another former WJZE (Jazzy 100) staff member. Jesse Brandon will be working weekends, doing fill-in and some production at WJZW. Jesse worked mid-days at the former Jazzy 100 FM until they were sold and switched format

to Oldies. She joins another former Jazzy 100 staffer, Felicia Ledesma, who came on board last week. Most recently Jesse worked at a station in Ocean City, MD. Welcome back to Washington, Jesse! You were always my favorite at Jazzy 100!!!

Back in Airwaves #905, Ed Janik was asking about the nationally syndicated Don & Mike show whose flagship station is WJFK FM 106.9 here in Washington. The recent post from Paul Kerr (aka JethroGump@aol.com) pretty much covers what they're all about. In short, it's radio like you've never heard before! If anyone would like to learn more about the Don & Mike show, see alt.fan.don-n-mike in USENET. There you can learn about the daily happenings on the show and catch the latest FAQ. If you don't have access to USENET, I can mail the most recently posted FAQ to you. Just email me at the address below.

Yes, there is a lonely non-directional beacon called "NB", from North Bay, Ontario. This beacon is operated The Royal Canadian Air Force at CFB/North Bay, Ontario. The transmitter is a 250 watt Nautel, throttled back to 100 watts into PA120B Polestar Omni antenna. Boy, does it get out ! Once CIAO vacates the 530 frequency, your chances of getting it will improve dramatically.And boy does it get out !! I had the pleasure of receiving "NB" back in 1987.
I got the famous "NB" QSL card with the picture of the Maple Leaf Flag of Canada with all of the station's information superimposed on it. They are QSL friendly to anyone who receives this beacon. You may find that MANY NDB's (non-directional beacons) love to receive reception reports ! Anyone out there into beacons ? Drop me a line and let me know what beacons you received and QSL'ed ! It is a quite "off the beaten path" kind of DXing, but its' worth checking out ! 73's !

Back in the early 1980s Bob and Doug McKenzie (of SCTV fame) did a song called "Take Off," with chorus vocals by Geddy Lee of Rush. They shipped the song with some customized intros which were then inserted by the stations either in the song itself or was used as part of a station ID at other times.

Perhaps this was only in Canada...

Nope, I haven't heard anything about Love 93.9 (Miami). They're running a
great TV campaign with frustrated office workers and a man on a
Love 93.9 billboard who suggests some `Love at the office.'

They're part of the Paxson empire, co-owned with AOR Zeta-94 (also recently
re-imaged) and WINZ-940, all-news.

No, the rain itself should not affect the signal in a noticeable way,
although if the rain is accompanied by lightning then there will be an
increased noise level due to static crashes.

A soaking rain may also (marginally) improve ground conductivity and enhance
the daytime signal of a distant station, but not probably to any measurable
degree.

4765. Jazzy 100 Status Report

Newsgroup: rec.radio.broadcasting
Date: 1994-11-03 09:42:47 UTC
From: goldberg@oasys.dt.navy.mil
Message-ID: <39aban$ios@vixen.cso.uiuc.edu>
Source record: 36970

[A MESSAGE FROM THE COMMITTEE TO BRING BACK JAZZY 100!!!]

! ONCE AGAIN, DON'T BE CONFUSED - 105.9 IS *NOT* THE NEW JAZZY 100 !

Once again, the Committee to Bring Back JAZZY 100 would like to
remind former JAZZY 100 fans that the former WCXR 105.9 FM is
NOT the New JAZZY 100!

Though the former WCXR 105.9 has changed its call letters to WJZW,
(something that normally occurs when a radio station changes its
format), and though one or two former JAZZY 100 radio personalities
may be heard at this time on the station, the Committee would like
to make sure that former JAZZY 100 listeners do *NOT* interpret
these occurrences as the re-emergence of "JAZZY 100".

And, once again, we would also like to remind folks that WCXR's
recent format change can only be seen as *temporary* since there
is no guarantee that the format will remain after the sale of the
station, which is slated for sometime next year.

However, the *GOOD NEWS* is that Committee to Bring Back JAZZY 100,
along with former WJZE-JAZZY 100 program director Bob Linden are still
working hard to acquire of the next *TRUE* JAZZY 100 radio station,
and, therefore, still need the support of former JAZZY listeners
to see our long-awaited dream become reality. We are *closer than
ever before* and do ask our JAZZY 100 family members to stay in touch
with us as we continue to keep the *TRUE* JAZZY 100 Spirit alive
in the metro Washington D.C. area.

To help keep the *TRUE* JAZZY 100 Spirit alive and get up-to-date
information on JAZZY news, events and activities happening
in your area, please pick up a free copy of the latest issue of
Bob Linden's "JAZZY Music Scene" *NOW AVAILABLE* at all area
Kemp Mill and Wiz Stores, participating Jazz clubs and other
JAZZY locations in the Washington D.C. metro area. Or, call
our 24-hour hotline (202) 387-1003.

* Remember, You're helping us get the *REAL* JAZZY back on the air! *

4768. Sales of Radio Stations Increase by 50%; FM Duopolies Also Soar

Newsgroup: rec.radio.broadcasting
Date: 1994-11-03 09:42:55 UTC
From: d-schutz@pipeline.com
Message-ID: <39abav$iov@vixen.cso.uiuc.edu>
Source record: 36973

Radio station sales have increased nearly 50% in the first two calendar quarters of 1994, according to a new report; _Trends in Radio Station Sales; 1992-1994_, just published by the National Association of Broadcasters ("NAB").

In the new report, compiled by David Schutz of Hoffman-Schutz Media Capital, Inc., the first six months in 1994 are compared with the same period in 1993. Station sales are up 127% compared to 1992.

Among the stations sold to create duopolies in local markets, more than 55% were FM stations. All "FM-Only" transactions made up 40% of the total dollar volume for the first six months of 1994.

The NAB publication tracks sales of radio stations from January 1992 through the Summer of 1994. All transactions are listed by states, markets, and included is a listing of all radio "group" sales. The book also includes an analysis of individual station values and how they have changed over the past 20 years. This appreciation/depreciation information is a unique feature of the publication.

Trends in Radio Station Sales; 1992-1994 is available from NAB Services in Washington, DC. Cost is $140 for NAB members, $290 for non-members.

NAB is a non-profit organization which serves and represents America's radio and TV stations, and all major broadcast networks.

[Moderator's Note: The NAB gopher is just one of dozens of radio-related links now available on the AIRWAVES WORLD-WIDE-WEB page. Access it at http://radio.aiss.uiuc.edu/~rrb. You can also browse our archives and get to several gophers and FTP sites. Check it out. Bill]

---

czech radio (formerly Czechoslovak state radio, now a public-service radio station) was connected to the internet on november 1, 1994.

we plan to use the internet to communicate with our listeners here in the czech republic, but also with listeners of our shortwave service all over the world.

we also plan to act as an 'information provider' beginning in 1995, with a service comparable to that of VOA and other broadcasters.

we'd be very interested to hear about how other broadcasters use the internet, tips on other groups that discuss radio-related issues, advice on what kind of information we should be providing as of next year or even what kind of questions you'd like to see answered in our FAQ...

we are all complete newbies, so *any* information or advice is *very* welcome.

thank you in advance,

From: "D. Citron" <dcitron@gate.net>
Message-ID: <39abb5$ip7@vixen.cso.uiuc.edu>
Source record: 36975

I have two newspaper article topics for which I'd appreciate your input.

1. Digital information broadcast by some stations (including call letters, etc.) for display on certain radios.

Where would I get information about:
which stations are broadcasting this info?
who manufactures radios equipped to receive this.

Is this SCA info or what?

Can you refer me to any technical articles about these systems?

2. What are some of the most popular nationally-syndicated radio shows heard in south Florida and what local stations carry them? I mean most popular in terms of being heard in the most markets, not necessarily local ratings in this market.

Though #2 could create a thread of its own, #1 probably would not be of interest to most, so an e-mailed reply would be most appropriate. Use your judgement.

Thanks in advance!

4771. RDAT: True AES Compatibility

Newsgroup: rec.radio.broadcasting
Date: 1994-11-03 09:43:02 UTC
From: Greg Monti <GMONTI@npr.org>
Message-ID: <39abb6$ipj@vixen.cso.uiuc.edu>
Source record: 36976

>From time to time, stations have called our satellite system
replacement project ofice asking for the "NPR-approved list" of RDAT
machines that will be compatible with the AES-EBU digital audio output
of the new digital demodulators that are currently under prototyping
by ComStream Corporation of San Diego. The stations are often
disappointed that NPR does not test, approve, guarantee or
anoint any broadcast or satellite equipment.

One chief recently attended a presentation by an Orban rep, in which
the Orban guy said that many RDAT machines, although they are
advertised to be compatible with the AES-EBU standard, are not
in fact compatible. The Orban guy had heard of problems in
which RDAT machines, when fed with a genuine AES-EBU signal,
recorded for a few seconds and then dropped out of record mode.
The chief who called was obviously concerned that he buy the
"correct" RDAT recorders for his plant upgrade.

This particular problem sounds to me to be suspiciouly like a
consumer machine with Serial Copy Management System (SCMS).
The SCMS may have disabled the record circuit when it sensed that
it was being used to make a second-generation digital copy.
Truly professional RDAT machines are *not supposed* to have SCMS.
Or they are supposed to ignore SCMS. I'm not sure which is the
correct wording.

Have any of you run into problems like this?

SCMS may or may not have been the problem in the above,
fifth-hand tale. Are there other incompatibilities to watch out for?

AES cannot force manufacturers to comply with anything. It only
prints "Recommended Practices."

What AES-related items should radio-audio engineers look for
when specifying or buying RDAT recorders?

Are there any brands or models of RDAT machine that should definitely
be avoided because they cannot handle recording -- or playback -- of
a true, professional AES-EBU digital signal?

ComStream is contractually obligated to provide us with digital
demods whose AES-EBU outputs are compatible with the "AES
Recommended Practice for Digital Audio Engineering - Serial
Transmission Format for Two-Channel, Linearly-Represented
Digital Audio Data, AES-3, 1992 (ANSI S4.40-1992)."
This was the latest version of the AES-EBU standard that was
available at the time we required demod manufacturers to

propose their systems to us.

PREPARING FOR RENEWAL - PART III
YOUR STATION'S PUBLIC INSPECTION FILE

In our continuing series of articles aimed at assisting our broadcast clients with their next license renewal, we present the following memorandum on the FCC's requirements concerning the station's Local Public Inspection File.

CheckList For Broadcast Station's Public File

General Rules

A. All broadcast stations must maintain a Local Public Inspection File within their city of license. This differs from the Main Studio that may be located outside of the city of license but within the station's principal community service contour.

B. If an application requires local public notice, or is open for public inspection at the Federal Communications Commission, it is to be maintained in the station's public file.

C. All exhibits, letters and other documents relating to materials required to be kept in the public file must also be included in the public file.

D. When amendments are made to materials required to be kept in the public file, the amendments should also be included in the file.

E. Any information which is incorporated by reference and which is already in the local public file need not be duplicated, if its reference sufficiently identifies where the information may be found in the file and if the applicant states there has been no change in the document since its filing.

F. The substance of an oral contract must be reduced to writing and included in the file.

G. The public file of a particular station is only required to contain reports which pertain to that individual station.

H. Any materials not required to be in the public file should be held in the station's private files for FCC inspection.

Specific Requirements

All AM, FM, and TV licensees or permittees are required to maintain the following items in the public inspection file:

A. Copies of every application tendered for file including:
1. New construction permits.
2. Construction permits for major changes of facilities of authorized stations.
3. License renewals.
4. Consent for assignment or transfer of control of license.
5. Extensions of time to complete construction.

B. In connection with all applications, the following items must be retained as well:

1. All letters, exhibits, and other documents filed as part of the particular application.

2. All amendments to the application.

3. All correspondence between the Commission and the applicant concerning the application.

4. All documents incorporated by reference in the application.

5. Service contour maps and data showing the main studio and transmitter sites.

6. If a Petition to Deny has been filed against any application, a statement that such petition has been filed, together with the name and address of the party filing the petition.

7. If there has been a hearing on the application, copies of the Initial and Final Decisions.

8. Copies of written citizen agreements that help meet public interest programming.

C. Copies of Ownership Reports and supplemental ownership reports. Also include the following related to Ownership reports.

1. Exhibits, letters, and other documents.
2. Amendments.
3. Supporting materials pertaining to ownership or control of license.
4. Correspondence with the FCC concerning the ownership report.

5. Documents incorporated by reference, including contracts listed in the reports. (Examples are: contracts which contain pledges, trust agreements, options to purchase stock agreements, partnership or corporate agreements, management consultant agreements, mortgage or loan agreements.)

6. Management agreements with independent contractors or with employees, if the employee agreement involves revenue sharing.

7. Contracts or other documents relating to ownership or control.

D. Citizen Agreements - agreements whereby station promises performance in some noncommercial aspect of the station's operation, such as programming or hiring.

E. Records concerning broadcasts by candidates for public office. These records include a record of all requests for air time by or on behalf of candidates, with a notation showing how each request was handled (including charges). This file should be updated daily. Any free political time given within 72 hours of the election. A list of chief executive officers of any organization that sponsors or supplies information for political programs containing controversial issues of public significance. Information should be kept on file for two years.

F. Copies of annual employment reports for any station with five or more full-time employees. All exhibits, letters, other documents, amendments, and correspondence relating to the report and all documents incorporated by reference.

G. The newest edition of The Public and Broadcasting: A Procedural Manual. The Manual should be kept on file indefinitely.

H. Letters received from members of the public. Letters should be kept on file for three years.

I. "Issue/Programs Lists. A quarterly list of programs that have given the most significant treatment of issues that the licensee determines to be of community concern during the proceeding three months. Include a brief narrative describing what issues were given significant treatments and the programming that provided this treatment. The description of responsive programs should include, but is not limited to, time, date, duration, and title. State whether program was news interview, call-in, documentary, etc. (File this issue responsive programming list by the tenth day of the succeeding calendar quarter, that is, by January 10 for the prior October-December quarter; et cetera.) Exempt from this requirement are stations whose facilities are Class D FM stations or whose programming is wholly "Instructional."

J. Noncommercial educational stations must also maintain the lists of donors supporting specific programs.

K. A statement certifying that the station broadcasted notice of its renewal filing. This statement must appear in the file within seven days after completion of the announcements, and must contain the dates and times that the pre-filing and post-filing notices were broadcast and the text thereof.

: And, I don't believe the nine-Mexico based
: broadcasters that broadcast in espanol to an audience north or
: south of the border all use the same format!

And don't forget that in a lot of places the formats en Espanol are generated by local people, not by Mexican broadcasters. In the SF Bay Area, KOFY is owned by James Gabbert, long an innovative broadcaster. He was known mainly for K-101, a contemporary station in English, but when he sold that he went to an oldies format on KOFY. Didn't work. So, he chose his other language, Spanish, and turned KOFY Spanish. Doubled the ratings almost overnight. With his KOFY-TV he uses the SAP channel to do Spanish translations of programs like "Magnum PI", or just simulcasts the radio station when a translation isn't available.

So, too, other Bay Area stations, KIQI (no relation to KIOI above), KLOK, KBRG, KNTA -- and KBBF in Santa Rosa which has been bilingual since the early 1970s -- all are programmed and owned by Americans, not Mexicans.

>humor and style that made him big (in more than the sheer physical
>sense).
The copycat factor for Rush is not just limited to ideological
clones. Too many local liberal/moderate hosts are trying to capitialize
on his style as well. They play music to make a point, talk loosely with
the control room staff. This was unheard of until the last few years.
To the astute listener of talk radio it shows thru like clear glass.
Even elements of the Hightower show seem to be a rebuttle to
Rush's updates.

>But the damage to the format has already at least partly been done.
>It's going to take years to repair, and we'll see some leaner times for
> talk radio in both that moderates and liberals are not going to be
>treated like the incarnation of Satan every time they turn a talk station on.

Moderates and liberals seem to do fine on the air but they have a smaller
margin of error than a conservative. A conservative host can be a real
dunce in discussion and topic selection but still get calls and listeners.
A liberal needs to be a skilled debater and ready to reference his
statements, or else she/he gets ripped by the callers.

In article <38vf7i$g1j@vixen.cso.uiuc.edu>, honzman@aol.com (Honzman) writes:

(on talk radio and politics)

With all due respect to Fred Honsberger, who is a talented broadcaster and highly successful host in his own right, he may be overstating the power of talk radio to shape public opinion and votes, as may the other media. (And he may be overstating the popularity of the format at this juncture, as Billboard and R&R both say news/talk has hit a four year low in AQH across the top 100 Arbitron markets. Not all stations are as popular as KDKA and not all hosts are able to draw like Fred does.)
We're good at galvanizing public anger over the issue of the moment. But we may be overstating our ability to change people's voting behavior. The latest poll results demonstrate very well that while there seemed to be evidence of a major shift to the Republicans a couple of months ago, now we are seeing a rapid return to normal historic voter preferences which will certainly result in something pretty closely approaching normal off-year election outcomes. Mario Cuomo's future is now safe, and it now appears that the Bush boys may come up empty in their quest for the governorships of two major states. Changes in the House will be no more than a normal off-year shift, if that, and even the Senate may not fall into Republican hands (Ollie North is now falling behind, Harris Wofford may well survive, so will Diane Feinstein---and John Warner is now seriously considering crossing the aisle and voting with the Democrats to organize the Senate in January). Talk hosts across the country made no secret of their hopes that the GOP would take control of the Congress, and their ability to help achieve that aim may prove to be far less than they thought. And when you look at Mr. Limbaugh's AQH and cume in the top 50 markets, ol' Rush ain't what he used to be.
Fact is, people don't listen to us to be led. They listen to us to be entertained, stimulated, and maybe on occasion informed about different viewpoints on issues. They will make up their own minds, no matter what we say, and if we mislead them, we will trade short-term manipulation for long-term disdain. If we delude ourselves into thinking we're any more powerful than we are, we'll just be damaging ourselves and the business. Fred's long term tenure at KDKA is based, not on any political philosophy he may have, but on the simple fact that he's an interesting guy to listen to and call in to match wits with. Now, being able to do that on the air consistently over the years is no small achievement. (I'd like to think I've lasted almost 7 years at my station while

competitors have come and gone,ave, but on the simple fact that he's an interesting guy to listen to and call in to match wits with. Now, being able to do that on the air consistently over the years is no small achievement. (I'd like to think I've lasted almost 7 years at my station while competitors have come and gone, and I've won some awards along the way, for the same reason.) We try to tell them how to vote, and maybe they'll smile, maybe they'll be angry, but in the end they'll do pretty much what they damn well please, whether it pleases us in the business or not. And if we get more strident and preachy, TRYING to manipulate popular opinion, we'll keep on sliding downward as a format. I don't want to see that happen.

> share this tendency. Why not let them decide for themselves and
> vote with their tuning dial? Are you afraid they'll decide
> differently than you? What do you care? Listen to what you like
> and be content to let them do the same.

Sure, people can vote with their tuning dials -- but that doesn't mean that Grant's blatant hate or Limbaugh's lies should go unchallenged. This is often difficult to do, since opposing points of view are rarely aired on either program; in the case of Grant, almost every dissenting caller is called names and hung up on.

Grant and Limbaugh have their right to freedom of speech, and the stations that carry their programs have the right to air them. That, however, doesn't mean I have to be silent.

If the FCC went after Grant and Limbaugh or the stations that air their programs, I would be on the side of the hosts and the stations. If Congress tries to impose the Fairness Doctrine again, I would also oppose that, since I believe the doctrine created a chilling effect on free speech in the past.

Having said that, however, I will continue to criticize the likes of Grant, Limbaugh, and Jay Diamond. IMO, Grant and Diamond are just the white versions of black haters like Louis Farrakhan or Khalid Muhammad, while Limbaugh is a modern-day snake oil salesman deceiving millions with his distortions, half-truths, and outright lies.

4777. Liberal Media Bias

Mark...Are you suggesting (gulp) censorship?

And how about the nasty partisanship that the Democrats put forth during
the Reagan years?

It's all a a part of Democracy and the American Political process.

>Is it not possible that someone who's not "all there" might take some
>half-witted talk show host's expectorant anti-Clinton attacks as a cue to
>go up to Washington and take some shots at the White House?

You can hardly hold a talk show host responsible for actions taken by a
crazed listener. If we start doing that then we would have to hold the
President responsible when a crazed citizen goes after one of those "awful
Republicans" that voted against Health Care reform. Why stop there, lets
go after the Catholic Church everytime a pro-life zealot bombs an abortion
clinic. It's called "Freedom of Speech."

> Have you?

While I have not heard of Rush either promoting or condoning assassination, G. Gordon Liddy apparently made some remarks along that line awhile back. (I did not hear the actual broadcast, but it was discussed on WABC in New York, which aired his show at that time.) Liddy allegedly said that when he went target shooting with his sons, they pasted a picture of President Clinton on the target.

Can anyone confirm those remarks?

Also, with regards to two-way debates: The most popular right-wing talk show in NYC, The Bob Grant Show, is strictly one way. If a caller disagrees with Grant's right-wing agenda, Grant almost always insults the caller with gratuitous name-calling, then hangs up on the person.

Not exactly two-way debate, is it?

4779. WKYS-FM / D.C. SOLD TO RADIO ONE

Newsgroup: rec.radio.broadcasting
Date: 1994-11-03 09:43:19 UTC
From: Max Cacas / NPR News Ops / 202-414-2218 <MCACAS@npr.org>
Message-ID: <39abbn$is2@vixen.cso.uiuc.edu>
Source record: 36984

The Tuesday (11/1/94) Washington Post reports that Albimar Comunications is selling WKYS-FM (93.9) to Radio One, a group owned by D.C./Baltimore area radio talk show host Cathy Hughes, for $34 million dollars.

Radio One already owns talk-formatted WOL-AM (1450), and urban AC WMMJ-FM (102.3), along with 4 stations in the Baltimore market (WWIN AM/FM, WERQ-AM and WOLB-AM.

Alfred Liggins, Hughes' son and Radio One's president, says WKYS "will continue to remain adult contemporary, targeting adults and serving the African-American community." Unnamed industry sources quoted by the Post sugest, however, that Radio One may move the older, more broadly based urban AC format of WMMJ to 93.9, and move the younger-oriented WKYS to 102.3.

The Post says the sale realizes a dream of Cathy Hughes to buy WKYS. Eight years ago, she raised a half-million dollars, mostly from small minority business people, in an attempt to purchase 'KYS from NBC, when the Peacock network divested itself of its owned and operated radio stations. The effort failed, but she and her son went on to buy WMMJ (the first frequency of WHFS-FM in its "Bethesda" days).

Authors notes: One wonders if Radio One will also move WKYS from its comfortable and modern studios in the NBC complex on Nebraska Avenue in Northwest D.C. Albimar bought the studio equipment from NBC, and leased its present studio/office complex in the building. Historical note: WKYS, and its then-DISCO format, was the successor to WRC-AM's successful CHR format, which NBC pulled the plug onto make room for its "News and Information Service" all-news format, which died within a few years. Rather than move the CHR format to then WRC-FM, NBC decided to climb on the disco bandwagon...and did quite well with the format for years.

Cheers,
Max

A couple of years ago, he was doing afternoons on WJMK, Oldies 104.3 in Chicago. Here's some inside info I got from someone who used to work at WJMK: Harvey Perlman, the stations GM OM or whatever he is never signed contracts with his talent...a handshake was good enough. One day, Ron Brittain walked out at the end of his shift at 6pm and walked into his new gig at 7pm at Mix 102, WTMX...without telling ANYONE at WJMK that he was leaving.

I don't think he works at WTMX anymore...it's gotten hipper and is a hotter AC than it was 2 years ago...now known as Mix 101.9.

BTW...the talent at WJMK are all under written contracts now.

>rating?
>

Wow... Strange to see my old buddy's name all the way here in Texas.
Matter of fact, I just opened some mail from him a few minutes ago. Mike
is going on to bigger and better things, though I don't know if he'd want
me to say where. Probably nobody will replace him. It'll just be Jaybo
on his own like it used to be.

WKIX 96.1 is gaining steam, and they're over 'QDR in certain areas, but
overall, 'QDR still leads them.

- Former employee of 'QDR... But got out alive while I could! :)

Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.shortwave,rec.radio.noncomm,ba.broadcast,chi.media

The AIRWAVES RADIO JOURNAL (the email digest of
rec.radio.broadcasting) is seeking to add a "Radio Folks"
Page to its ever-expanding web server (http://radio.aiss.uiuc.edu/~rrb).

We are looking for home pages of any and all radio people.

This is different from the "Personality Page" we have started which
consists of, mainly, well known radio personalities FTP sites and web
pages (although we need more of those too).

This page will be strictly for the working women and men in the
business, or those who have recently left the business, to tell their
tales, show their stuff and stake their place on the web.

You can post your resume', sound clips from your show, photos, what
ever you wish, and it will be accessible by the many broadcast pros
and quasi-pros who read AIRWAVES and who visit our web site daily.

So, if you are involved in radio, either on-air, in sales, management,
engineering, or what-have-you, be you commercial, non-comm, USA or
elsewhere, send me your URL, to the address below, and I will add you
to our new feature called Radio Folks.

Please reply to web@airwaves.com. If that should bounce (the
domain was just changed and may not have propagated everywhere yet)
try web@airwaves.chi.il.us.

This is a new and exciting project. We are trying to bring together
as many broadcast people on the web as possible. We would love to add
you to the composite.

If you do not have a web page, create one. It is very easy. Ask your
system administrator. If you are not able to create a page, you may
send us a "Short" (under 10k) bio sheet with information about who you
are and what you are interested in. No photos or sound clips in this
file, sorry. But do include your email address(es) and we will see to
it that people who read your page have instant mail access to you via
the World Wide Web. We will post as many bios as we have room for
here, but it is much better if you maintain your own page so it can be
updated at a moments notice bu you, plus you can have the sounds and
photos available on your page.

Again, the address to send URL's or bio's is - web@airwaves.com.

Our web site's address is - http://radio.aiss.uiuc.edu/~rrb.

It was JAM - You've got it package.

It was from these that they went in the remakes of the Pointer Sisters
etc. Min order 5 @ $200 each. Well that was the price in '78.

Someone in Dallas call John Wolfert and ask him if they do these now.

I remember Don Geronimo. He used to really dis Dick Biondi (who he
replaced as morning jock at CHR WBBM-FM.) I personally think Don sucked.

Too bad if it's true. Bad radio. Being rude isn't a feature of conservatism, but it may be a feature of Bob Grant. Shock talk, rage radio, left or right burns up phone lines, but usually burns out listeners.

From: kgiven@bu.edu
Message-ID: <39c8p4$ccp@vixen.cso.uiuc.edu>
Source record: 36994

I am looking for some information about the radio talk program called "For the People" and I was told that maybe I should ask here. My father and I have started having "interesting" political discussions since he began listening to the program. Among other things, he's now worried that as an aspiring journalist I am soon to become part of a media elite that is hiding the truth from the American public. What is this show???? I'd really like to convince my father that he should continue to pay my tuition bills and not be ashamed to have a journalist as a daughter, so if you have any info about who this guy is and where he gets his information I would really appreciate it. Also, if you know where/when I can listen to the show in Boston I would like to see what this guy is up to for myself.

Thanks,

Karen Given

Message-ID: <39c8pd$cdj@vixen.cso.uiuc.edu>
Source record: 36996

Ed Janik (janik@spss.com) wrote:

: In this group, I have read a number of posts claiming that the media
: is "liberal" whatever that means... where is the liberal media?

: Pacifica? How many people listen to it? I live in Chicago. It
: doesn't exist here.

: How many stations carry Jim Hightower? How many carry Rush Limbaugh?

: In Chicago, WLS AM has 3 weekday shows hosted by avowed conservatives,
: and Bob Brinker and the Best of Rush on the weekends. Not one show
: on WLS is hosted by a liberal. Every host on WLS AM/FM except for one
: on the FM are anti-Clinton. The only black host remaining on WLS is
: buried late at night. He does not sound particularly liberal or
: conservative.

: WGN in Chicago is run by the Republican leaning Chicago Tribune. For
: many years, they received the services of an Illinois state trooper
: gratis to do traffic reports courtesy of Republican governor Jim Thompson.
: No other station received this favor. In 1988, George W. Bush guested
: on WGN and led the pledge of alliegiance. No one from the Dukakis
: campaign was invited. WGN also carries Paul Harvey daily at noon.

: WLUP personality Kevin Matthews, a comedy jock, often espouses his
: anit-abortion views on the air.

: WRCX personality Scott Loftus, in a rock'n'roll show referred to President
: Clinton as a liar.

: On WJMK, a newscaster during a story on abortion said on the air that
: "[some numerical figure] *babies* are killed each year by abortion".
: This is clearly slanted toward the anti-choice point of view. The
: newscaster is anti-choice, I spoke with the morning jock about this.

: So here's the challenge, folks: count the number of LIBERAL talk show
: hosts/stations in your market. Count the number of CONSERVATIVES. Note
: the power/coverage of the stations they are on.
Ft Lauderdale's politically-oriented talk is found on WFTL.If my
calculations are correct,6 conservative hosts there total 69 hours/wk
while 3 liberal hosts get 37.5 hours/wk on the air.Interesting is that 5
of the 6 conservatives have described themselves as former liberals who
have "smartened up" and seen the light;remember jr high school civics
class and the "jump on the bandwagon" lesson? Listen awhile and you'll
hear the president and first lady called "white trash" and don't try
calling and disagreeing with these guys 'cause they'll either call you
names,laugh at you like schoolboys or just groan in exasperation and blow

you off.
: Once and for all, let's see where the balance of power lies in the media.

Anew station in Portland is doing a 70's oldies format. I don't know
their callsign yet, They call themselves "95point5" and "Mix".
Lately, they've been asking listeners for oldies suggestions and
other comments. Some of the stuff they play I haven't heard in
years, some good, some not so good... Least it's a change
from the standard 800 song playlist oldie station. I tune them
in when KBBT is in commercials...

>are an "English" format. In my posts, I am guilty of this too,
>classifying any espanol language station as "Spanish" --
>IS WRONG!

Chris, I do understand and sympathize with what you're saying... but I simply don't know enough about the Spanish language or music to classify them more than in a broad sense. I do try, though... if you'll notice in my last listing of Sacramento ratings, I identified KZSA-FM 92.1 ("La Z") as a Spanish Hot AC station.

I wouldn't know the first thing about "ranchera" vs. "banda" (?) music, and wouldn't know the difference if you hit me over the head with either. I would, however, attempt to classify between a station doing news/talk in Spanish (a la KTRB-AM 860/Modesto) and one doing uptempo music. It's no more of a crime to call a station "Spanish hot adult comtemporary" than to call an English station that, like our own KGBY-FM 92.5...especially since I don't understand more than "si" or "uno dos tres" in Spanish, and never intend to work for a non-English language station.

Mike

In article in Airwaves, Dan Kennedy writes:

"There is an odd FM station here that is live, locally-originated, news/talk station called KMPH. Their presentation is fairly staid and formal. Some say the best way to do newstalk FM is to have an upbeat, free form format that targets a young audience, but for some reason, they aren't doing that."

Mr. Kennedy,

If you're such an expert about Fresno radio, then you would know that KMPH NewsRadio 107.5 FM is not a news/talk station like KMJ -- the station operated by the company you work for. KMPH NewsRadio is an all-news station.

If you did some research, you'd find that KMJ Radio first took to the airwaves 72 years ago with fifteen minute news capsules designed to promote the local paper, the Fresno Bee. KMJ was owned by the McClatchy Publishing Family, which also lauched the Central San Joaquin Valley's first television station (KMJ TV - now KSEE TV 24, owned by Granite Broadcasting) some forty-one years ago. KMJ programming hasn't changed much, and the station continues to offer both news and talk similar to its original broadcasts (although there were a few years of music programming in the late 70's).

Meantime, KMPH NewsRadio is a brand new station and has been on the air of a little more than a year. KMPH NewsRadio is the first station in the country to use digital audio in a news operation. Three other stations in the country are following KMPH NewsRadio's success with the MediaTouch and ComPrompter marriage to launch 24-hour news operations using computers to record, edit, and replay everything from soundbites to jingles to commercials. The Canadian Broadcasting Company and Israeli Broadcasting are now exploring technology in use by KMPH NewsRadio in "little" Fresno. The CBC spent a week observing KMPH NewsRadio while planning a new coast-to-coast radio service.

KMPH NewsRadio uses the CBS Radio format, a format used by KCBS 740 in San Francisco and KNX 1070 in Los Angeles. It has taken KCBS and KNX quite a few years to establish themselves in their respective markets and score points in those moronic and unscientific survey books called rating bibles. As I mentioned above, the Fresno market leader, KMJ, has been around for quite a long time to establish itself here. So your comments about KMPH NewsRadio are biased considering your paychecks come from KMJ revenue and illogical considering the bigger picture of how long it takes to establish a 24-hour NewsRadio operation in ANY market.

Further, KMPH NewsRadio is owned by Pappas Telecasting, a local company which owns the nation's second highest rated FOX affiliate, KMPH FOX 26, in Fresno, along with a dozen other television and radio stations across the country. What makes KMPH NewsRadio the best news source in the Valley is its marriage

with the city's highest rated television newscast, the "Ten O'clock News." The KMPH NewsTeam covers the Central Valley with an army of news professionals, who file both for television and radio. No other news organization in this area, except for the Fresno Bee, has the number of news staffers as KMPH. So don't be so quick to use cyberspace and public billboards to write off KMPH NewsRadio to people who don't have access to KMPH programming. The KMPH news product may be "formal and staid" to you, but it is so solid that all area newsrooms, including yours, have a radio set to 107.5 FM around the clock.

So, Mr. Kennedy, with all due respect, you and I are here today and gone tomorrow, but legendary stations like KMJ and KMPH NewsRadio are only born once in a great while...HAVE RESPECT.

Paul Chaderjian
Managing Editor, KMPH NewsRadio 107.5 FM
Former Reporter, KMJ News 58

Doings in the #40 market:

*A lot of stuff is happening at WGR-AM,none of it good.

First,Barry Buetel was passed over for a vacant sports reporting job with WKBW-TV(ch.7)-Eric Goodman,who last worked at KTKA-TV in Topeka,KS got the job. The good news for Buetel is that News Director Chuck Samuels said Barry will remain as a part-timer,noting that "he has great television potential and we're going to develop it."
This week,AM driver Tom Bauerle was suspended for 2 days-not for his mouth,for his fists. He 'earned' the suspension for allegedly throwing a punch at Robert Schalk,Jr.-the station's controller(or bookkeeper). Sources inside the station,as noted in Alan Pergament's column yesterday,added that the blowup was tied to a recent corporate parking policy at the station which Schalk signed.
No one could comment on the story-Bauerle couldn't be reached,Schalk declined comment,and GM Jim Meltzer said he didn't discuss personnel issues-though the article states that Meltzer is conducting an investigation to see if Bauerle was provoked and whether to suspend him. Bauerle returned back yesterday,while Schalk didn't work on Wednesday.
This is another headache for Bauerle-the article notes that he has had some personal problems(but it didn't say what-I can say that Tom and his wife, astrologer Cassandra Jean,are in the process of divorcing,and it is getting nasty,from what I've heard. Ironically,Cassandra also has a radio show on astrology on WWKB-AM Sunday nights.).
One thought:think Tom listened to the song "Kung-Fu Fighting" one too many times? :)

*Speaking of WWKB,it has added Leslie Marshall's show from Major Talk and slotted it at 10pm,after Tom Leykis. Marshall is back in the market again, having done a stint at WGR in the early part of this decade,then appearing again on WGR with the national show-later dropped for John Otto. Marshall replaces Ron Barr's "Sports Byline USA"-indicating that KB is moving ahead in making The Big 1520 a "hot" talk station.

*Across the border,one of the longest-running announcing teams may be ending. Via the Blue Jays mailing list,I came in contact with a message from the alt.sports.baseball.toronto.blue-jays board that said Jerry Howarth, one-half of the "Tom(Cheek) and Jerry" team(heard on a number of stations from its flagship station CJCL(The Fan 1430) in T.O.,is heading to TSN(The Sports Network)to be part of its announcing team-replacing Jim Hughson,who left to become the Vancouver Canucks new play-by-play man. If true,this would end 13 years of working on air between Cheek & Howarth.

*Our first candidate for the ARS file(not American Radio Systems, Absolutely Ridiculous Statements)comes from...Alan Pergamnent. Recently,he

said the summer ratings may have been a major factor in it becoming FM 101 The Planet. One problem:A Canadian station bases its ratings on the Bureau of Broadcast Measurement(BBM)book,*NOT* the Arbitrons or AccuRatings. Any extra ratings they may get stateside is icing on the cake.

TTYL...

C.K.G.

4807. Pittsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-11-05 05:53:55 UTC
From: AMCCOY@delphi.com
Message-ID: <39f6lj$mia@gagme.wwa.com>
Source record: 36862

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

On Halloween Eve 1938, Orson Welles and the medium of radio scared the collective pants off the nation with a realistic radio theater production of H.G. Wells' sci-fi classic ``The War of the Worlds.'' People were convinced that the reports of a Martian invasion of earth were real.
NPR will carry a new radio theater version of ``War of the Worlds.'' Locally, you can hear it Monday (Halloween) on WDUQ-FM from 10 to 11 p.m.
It's a major Trekkie event as well: The cast includes ``Star Trek'' alumni Gates McFadden, Brent Spiner and Jonathan Frakes of ``Star Trek: The Next Generation,'' plus Leonard Nimoy from the original series. It's directed by John DeLancie (Q of ``Next Generation.'')
The production uses Howard Koch's original radio screenplay for the Welles production, plus new material written by Koch. It's produced by L.A. Theater Works, a company with a long tradition of doing radio theater.

Just as cable TV lets us relive those TV memories, WDSY-FM wants to help us remember the lost sport of baseball and what should have been the heady last days of the World Series.
You can't enjoy the World Series this year, but you can catch a classic World Series game from the past - like the 1960 Pirates victory over the New York Yankees.
On Sunday at 2:55 p.m, WDSY will air a recreation of the original broadcast with the voices of Bob Prince and Jim Woods, announcers for the 1960 game. They recorded the recreation in 1981 because there was a baseball strike that season, too.

The FCC has approved a call letter change for the former WQKB-FM. The new call letters are WZPT-FM. The station switched from country to a hits of the '70s format a few weeks ago.

Tex Meyer has been promoted to senior vice president of WBZZ-FM/WZPT-FM. Meyer has been general manager/vice president at WBZZ for 10 years, and held the same post at WQKB when parent company EZ Communications acquired that station.

WBZZ-FM has finally hired a permanent replacement for departed evening jock Mike ``The Real Deal'' Neil. It's....Mike Neil, who returned to the air last week.
Neil and the station had a parting of the ways six months ago. Neil says he had other job prospects, but none really appealed to him. ``It's the best job offer I had.''

Neil said he kept in touch with WBZZ-FM program director Buddy Scott over the past few months. ``Just like the split was pretty much both of us, this [agreement] was too.'' They had lunch several weeks ago and Scott offered him the job. ``It's great to have him back,'' Scott says. Neil joined B94 two years ago, first doing afternoons and then moving to the 7 p.m. to midnight shift, which is where he can be heard now. Elsewhere in radio land, KDKA has promoted Mike Romigh to full-time talk host. Romigh, who has been doing part-time weekend and evening fill-ins at the station, is now the regular night talk host ``The Live Mike'' airs weeknights from 8 p.m. to midnight.

``No Harmful Side Effects,'' the new comedy CD/cassette release from WDVE-FM's Scott Paulsen and Jim Krenn, debuted at number one in the Pittsburgh metro area. According to Soundscan Retail Sales Research, the recording beat RE.M. and Eric Clapton for first place during the first week of its release.

Around the Dial:

KDKA-AM has picked up ``The Ross Perot Show.'' The one-hour syndicated program features listener call-ins, occasional guests and discussion of political and social issues. Whether or not you agree with his views, Perot's direct approach is always fun to listen to. It airs Sundays at 8 p.m.
Perot's daily commentaries run on KDKA Monday through Saturday at 6:10 a.m.

The challenges of being a parent is the focus of a new series of daily shorts on WDUQ. ``Today's Child'' looks at parenting from infancy through adolescence. It starts Monday and runs through January, airing at 6:33 a.m. and 3:27 p.m.
The show is written and hosted by Marilyn McCracken and Kathy Leahy of Allegheny County Children and Youth Services. It's produced by CYS in collaboration with American Information Marketing (producer of ``The Traveler's Journal'' and WDUQ.

4808. M'Bow to address AMARC 6

Former Director General of UNESCO to address AMARC 6
==========

Amadou-Mahtar M'Bow, Director General of UNESCO from 1974 to 1987, will be the keynote speaker at the 6th World Conference of Community Radio Broadcasters in Senegal this January.

Born in Dakar in 1921, Mr. M'Bow became Senegal's Minister of Education, Culture, Youth and Sport in 1957 and 1958. After an absence from government, during which he taught at Lycee Faidherbe de Saint-Louis and at L'Ecole Normale Superieure de Dakar, M'Bow once again joined the government, serving as Minister of Education from 1966-1968 and Minister of Culture from 1968-70. In 1970 he was appointed UNESCO's Assistant Director General for Education and in 1974 became Director General.

Mr. M'Bow's tenure at UNESCO was highlighted by the debate over the New World International Information and Communication Order that was sparked by the 1980 report of the International Commission for the Study of Communications Problems (commonly referred to as the MacBride Commission).

Mr. M'Bow's speech will inaugurate AMARC 6, the 6th World Conference of Community Radio Broadcasters. Over 300 community and alternative radio broadcasters from all continents are expected to attend the conference in Dakar, Senegal from January 23 to 30, 1995. Organized by the World Association of Community Radio Broadcasters (known by its French acronym, AMARC) the Dakar meeting is the first to take place in Africa (the previous five took place in Montreal and Vancouver, Canada, Nicaragua, Ireland and Mexico.

AMARC 6 will be preceded by a two day meeting of African community and alternative radio broadcasters on January 20 and 21, and a one day meeting of women active in community radio on January 22.

For more information about AMARC 6, or to register, contact the international secretariat at the address below.

This afternoon, the America On-line news machine went berzerk, sending me over 500 pieces of mail, from only 4 posters (all duplicates of single articles) and came very close to crashing my host machine here. The near-crash was not due to the influx of mail, but to the outpouring of autoreplies which essentially choked sendmail and caused a load average of over 75.8!!!!!!

I have diabled all auto-replies to articles untill we can sort this mess out. Since it was obviously a software malfunction and not an attempt to mail bomb, no action is being taken against the posters of these articles.

However, we are suggesting that AOL users start to email their articles to AIRWAVES/rec.radio.broadcasting, by sending to the following address.

articles@airwaves.com

Thank you.

"Hello, Big."

He died. In Florida. In his retirement, he apparently was the announcer for "Jack Horkheimer, Star Hustler" a 5-minute daily PBS show out of Miami for us budding astronomers. It was a generic opening and closing, so Big's still doing the gig.

He was part of one great lineup on the late "W - eNNNNNNNN - B - C": I think Joe O'Brien led off the AM (did Imus ever do the warm up for Big's show?), then Big middays, and Ted Brown in PM drive. And wasn't Jim Lowe in there somewhere too? I know at some point WNBC seemed to raid WNEW-1130 ("in New York") air staff - at least Ted and Jim. I don't think they ever got Julius LaRosa or William B. though.

btw, I think Brad Crandall and Long John Nebel were doing call-ins overnights at WNBC long before they let Big talk "risque" to housewives in the morning.

Today's letter comes from JFSANDERS@DELPHI.COM, who writes:

: Does anyone remember Big Wilson, one of the first "call-in talk show
: hosts" on clear-channel radio? He was broadcasting in New York City over
: WNBC (I believe) 25 years ago. Whatever happened to him?

Biggie (Malcolm John Wilson, I believe) ended up in Miami doing radio and then TV -- something like an afternoon movie host, I believe.

Sadly, he passed away several years ago.

I remember going to watch him broadcast live on WNBC from the Florida Showcase, a tourism promotion office in Rockefeller Center. His show was wonderfully friendly, warm and very enjoyable to hear.

WNBC (around that time, "The Big Voice of Big Town U.S.A." - ouch!) had a number of interesting talkers, including Brad Crandall, Long John Nebel, Lee Leonard and Bill Mazer. And, of course, Sterling Yates' FortunePhone.

Brad and Long John have also passed away.

That was Studio 5A. 5B was the home of Monitor on the weekends, with (at that point) hosts like Henry Morgan, Gene Rayburn and even Mel Allen!

There were several booth announcers who had been there for YEARS, including Fred Collins and probably the most-heard but least-known voice, Mel Brandt. Mel did the famous "The following program is brought to you in Living Color, on NBC" TV v/o!

WNBC was a great radio station back then!

: interference to CFJB 95.7 Barrie, and CFPL 95.9 London.

CHOO went to FM officially on Monday, according to reports in the Oshawa
Times. they have dropped much of their religious broadcasting, limiting
that format to Sunday mornings between 0600h and 0900h. The rest is country
music. CHOO also let go two of three newsrom staffers and six part-time workers. The
station
will now Id as KX 96.. The part-timers, according to the Times, had
provided technical services in taking programming of satellite, a service
that will no longer be used.

The opening was also marred by a thunderstorm and lightning hit which
knocked the station off the air for about two hours, according to news
reports.

"Ban" might have been a poorer choice of words than "attack" for example.

My only point is: either we're all either responsible for our own actions
or we're not (indicating a mental problem of some kind). How much can *anyone*
get away with "the devil made me do it" anymore?

I listen to Rush quite often, although not everyday. However, does that make
me "hate" Clinton? Heck, no, I voted for him and will probably do so again.

And, OF COURSE, after I post the first article in this particular thread, my local newsreader gets indigestion and loses most of a couple days' worth of articles. I had to go to the back-up. That's just as well, this is going to be a long post.

Well, where do we start?

How about landing in Pittsburgh first?

> 2 Nov 1994 04:41
> Honzman: >Talk Radio's Effects

> You should know better. Does the same argument hold for the talk hosts
> who bashed the living hell out of Reagan and Bush. Maybe it was talk
> radio that drove Hinkley to shoot Reagan!

Name a liberal talk show host who bashed Reagan and/or Bush, and tell me how extensively aforesaid theoretical host was syndicated and/or networked. We certainly have a high number of so-called conservative talk show hosts of a bitter bent: Liddy, Buchanan, Limbaugh (though I really think Limbaugh's just in it for the money).

As far as we know, Jodie Foster was never a talk show host.
>
> You give talk hosts too much credit. Those with a liberal bent can blast
> away with the best of the conservatives

And where are these "liberals"? Where are you hiding them? Clearfield? Uniontown? Where?

And don't just point to Hightower. He's only on weekends and doesn't have nearly the distribution the "conservatives" do. He is also a genuinely funny man -- and I detect no trace of bitterness in his bones.

(Btw, one should also note that, unlike Limbaugh, Liddy, and Buchanan, Hightower has (1) run for and won public office (Texas Commissioner of Agriculture) and (2) actually had to make a government agency work. It's a lot easier to carp about government until you've been involved in it.)

Next!

> wrong. To blame the "half-witted conservative talk show" (I'm really
> surprised that

> you didn't add "right wing") for the shooting is a stretch.

You did not read what I wrote. I did not blame anyone for anything.
I merely suggested it as a possibility to illustrate the degree to which
the talk show hosts comprising the so-called "conservative" monopoly
on talk-show air time have lacked accountability for the manner in which
they have advanced its cause. They seem to think any means are justified
in this regard.

I thought accountability was something "conservatives" were interested in,
but I suppose not when it involves themselves -- only when it involves
those evil old "liberals" and tyrannical institutions such as the
public schools, the American Civil Liberties Union, the local social
welfare agency, ad nauseam.

>
> [Moderator's Note: Er, um, I might have missed something, but where in
> Mark's post did he suggest banning Rush or any other talk radio? Bill]

Well, Mr. Moderator, Hobbs also did not read what I wrote. And if he followed
his own line of reasoning, he certainly should have no objection any time
two men kiss on teevee in circumstances clearly designed to delineate the
presence of a romantic relationship, with aforesaid lack of objection thereby
distinguishing him from most other of the so-called "conservatives" out there.

This is, of course, assuming that Hobbs is a "conservative." If he is not,
I will accept the correction accordingly.

> Isn't that a good thing? If people get frustrated enough, perhaps
> we can return to constitutional government.

First off, let me say that I have a lot of respect for Mickelson's
belief in constitutional government. I share many of the same concerns.

Last time I checked, though, we did have a constitutional government, even if its head is someone whom you don't happen particularly to like. We have Mr. Clinton and, as Mr. Johnson once said, "Boys, I'm the only president you've got." One can disagree with him without being disrepectful, and this is the particular point I was making here.

America's most bitter man in politics, the senior senator from Kansas, is doing more to destroy faith in constitutional government than our president ever could by continually preventing ANY kind of legislative action whatsoever, and so obviously doing so for personal political gain. Dole is manipulating the rules of the Senate, rules which have the most slender of constitutional bases, for the sole purpose of usurping the elected head of state.

Contrast Dole's actions to the manner in which Democrats worked with Presidents Reagan (especially) and Bush (at first) to shape and advance legislative initiatives: the tax cuts, deregulatory measures, etc. etc.
>
>
> > So-called "conservative" talk radio ought to reap what it has sown.
>
> So far we have....higher ratings...loyal listeners... vigorous two-
> way
> debates on the issues.

OK, prove it. Show me the ARBs. Count up and post the numbers of how many callers of ALL viewpoints--and the number of minutes each receives--on the shows WHO airs. Surely there must be a few, doubtless escaping the shackles of the advancing vanguard of the "liberal" editorial page of the Des Moines Register and just barely able to dial the phone and ring you up to form a few feeble sentences!

That may be a bit sarcastic on my part and since I can't hear Mickelson's product because of KBEQ's particular brand of talk radio at 1030 kHz, I can't say how open his show really is. To start, though, if he thinks it's just a "two-way" debate -- well, there are often more than two sides to any issue or set of issues.

KBEQ is a good example. It is a relay of the People's Radio Network. Other than for its display of an excessive fondness for conspiracy theories, it's misleading to classify PRN and/or its hosts as "liberal," "conservative," or even "libertarian" or "populist." "Populist" probably does come closest to its viewpoint but even there the label doesn't fit neatly.

Nor should it. Life is not cut and dried. Nor should politics be.

About audiences: who knows why they're listening to you, Jan? Maybe they like you, even if they don't agree with your political views. Maybe they're looking for a viewpoint different than the one they get from the Register. Maybe it's because WHO has been a news/talk station for a very, very long time and has a blowtorch of a signal. Maybe it's because most of the Des Moines media have a true statewide audience. Maybe it's because there's no other talk station in Des Moines.

Questions like these keep consultants and their "research" departments employed for weeks on end.

> 2 Nov 1994 04:41
> A E-PUBLISHING: Talk Radio's Effects
>
> Maybe, maybe not. We don't know, do we? But it is as plausible as
> the idea that the media is a liberal conspiracy, isn't it? Can anyone
> tell me exactly what a 'liberal' is anyway?

Or a "conservative," for that matter. That's why I've been putting those terms in quotation marks.

I am also amazed at the mind-reading abilities of some of the respondents. For all you know, I could be objecting just to the manner in which the debate is being conducted: one-sided and bitter to the verge of hysteria in a few instances (Buchanan being Exhibit A).

> 3 Nov 1994 09:43
> Bobby Laverga: >Talk Radio's Effects

>
> Not exactly two-way debate, is it?

Similarly with Kansas City's local Republican mouthpieces, Mike Shanin and Jerry Fogel on KNHN. This morning (Nov. 3) I heard them interview Congressional candidate Karen McCarthy (Democratic) and then, in the next hour, once she was away from the studios, slash everything she had said to pieces in an effort to build up Republican candidate Ron Freeman, often accused of being a "stealth" candidate for reactionary fundamentalist elements of the Republican party.

Fogel and Shanin also were blasting Democratic senate candidate Alan Wheat for refusing to appear on their program. Small wonder. Wheat probably wouldn't want the kind of treatment McCarthy got.

It takes a special kind of mind to define this sort of thing as "two-way" debate, I suppose.

> 3 Nov 1994 09:43
> Mark Bianchi: Liberal Media Bias
> In Airwaves #911 Mark Roberts <transvox@tyrell.net> wrote:
>
> Mark...Are you suggesting (gulp) censorship?
>
No. I am suggesting accountability, as mentioned previously. It is possible to disagree without being disagreeable.

> And how about the nasty partisanship that the Democrats put forth during
> the Reagan years?

It always seemed to me that, especially in the first four years or so
of the Reagan administration, Democrats were falling all over themselves
to do Reagan's bidding. The illegality of the Iran-contra dealings finally
woke people up, but until then, it wasn't just Bedtime for Bonzo.
>
> It's all a a part of Democracy and the American Political process.

But when does vigorous debate become vituperative debate? And when does
it turn people off to such an extent that they don't vote or participate?

> It's called "Freedom of Speech."
>
But there are limits even on that. Would you advocate letting a talk
show host say "fuck," "shit," "piss" and other earthy words on a routine
basis? After all, they are effective, they pack a punch, and they are
understood by even the humblest listener.

Would you let your kids watch people fucking on TV? (I mean on a TV
show, not on the TV set itself.) If any of the respondents who objected
to my remarks object to this particular concept, then they are not
being consistent with their self-professed philosophy, whatever it may be.

I also deliberately used raw language to put the shoe on the other foot,
so to speak.

Should freedom of speech extend to graffiti artists? Even if they spray
paint all over a street sign, later causing a traffic accident because
somebody turned the wrong way at the wrong time?

The bottom line is "freedom of speech" does not exist in and of itself.
It exists within a context of other freedoms, responsibilities, and
accountabilities.

Radio cannot exist in a vacuum. It must exist in a physical
environment. It also must exist in a social context. Those who control the
content of radio transmissions must be aware of that context and
recognize that if they do something harmful to it, they are doing harm to
themselves as well. They may not recognize the harm immediately because
it takes time for this particular kind of feedback loop to complete.
But it will happen.

That, to me, is quite a conservative point of view. Without quotation marks.

: emissions from car radios? Why isn't this type of data widely used
: by the broadcast industry?

Because there is no accurate way to measure. My car radio, for example, puts out very little LO emission. Other car radios put out much more. And further, some of the radios use different frequency approaches that make measuring a random sample of cars difficult.

I read about this being attempted back in the 60s and 70s...sounded like a great idea. Hope it could still work somehow.

Sean

A major problem is that car radios don't have the same amount of LO
leakage from one brand to another. Also, there is a lot of noise
from the car's engines. Also, one could concievely "plant" a strong
"false" LO near the survey site to skew the survey.
And radios don't leak as much as they used to....

To the best of my knowledge FOr the People is either the name of a show or the organization that sponsors the talk show done by Chuck Harder, that's his name. It is done out of Flroida. The host,Chuck, hemphasiszes on American First. It used to be on WWCR shortwave at night and I don't know if it is still on SW. It is done live in the afternoon and fed to some AM stations on a network.

Allan

As you may or may not know, employees of both San Francisco daily newspapers are on strike, leaving the papers with skeletal issues filled with stories bylined either from a wire or "staff reports"; there is no classified section, and circulation has been hampered.

KGO AM 810, the a local newstalker in San Francisco, is trying to fill thhe void ... during their morning news block, they are interviewing columnists and reading features from the S.F. Chronicle (the morning paper) and during their PM news block from the S.F. Examiner (the afternoon paper). They've even gone as far as horoscopes & reading the comics on the air!

As of the time I write this, 10:30 p.m. Pacific on Thursday, the strike is in its second day.

: > about them?
Nothing special, they're just joining the nineties. The station
is at 93.9 and it is foolist to refer to themselves as something they're
not. In the days of analog dials, Love 94 made a lot of sense...but
today, people will start looking for gthem at 94.1 and go from there.

The next step is one taken by many, including WRMF in West Palm
Beach. They refer to themselves as 97 9, omitting the "point."

BTW, it;'s always been my position that the words "love" hurts
them with males. What kind of guy says he listens to "love?" There male
numbers are horrible when compared to,other contemporary jazz outlets.
What6 do YOU think?

>their callsign yet, They call themselves "95point5" and "Mix".
Listened at the top of the hour for the legal id, they're KXL Portland.
They "hid" the ID in the middle of a block of commercials. The other
oldies station, KKSN, does the same thing. Some PD's must really hate
their station's callsign or something....

KKSN keeps calling themselves KISN except for their legal ID.
They also say "kissen". KKSN would also fit that, go figure...

4828. Re: Commercial programmers are sheep

Newsgroup: rec.radio.broadcasting

I am glad to see I've started something. I saw what I expected: mediocre radio programmers praising mediocrity and creative radio people (and their fans) sounding off about how much they hate all the main-line junk on commercial radio.

To the guy at WXXI who talked about public radio stations going mainstream too -- yes you're right. But I think that's driven primarily by dollars -- or a lack thereof. It's tough to produce a Derek McGinty Show or Diane Rehm Show (or Car Talk or Fresh Air) from scratch. You have to pay a lot of people up-front to get it off the ground.

In commercial radio though, there's no excuse. It's all a matter of sticking your neck out a little. Look at Don & Mike. It's clever, it's fresh, it treats the bulk of radio programming for what it is (The Best Grule of the 70s 80s and 90s) and it's growing (and it's making money).

Take a chance once in a while.

[Moderator's Note: Don & Mike, Stern, Imus not to mention the entire WLUP radio concept has shown that money can be made stepping out of the clone-mainstream. I agree with you, we need more guts and less glitz in radio. Any takers? Bill]

4829. KMOX (was: St. Louis Arbitrons (Summer 1994))

Newsgroup: rec.radio.broadcasting

From: "MARK808@DELPHI.COM" <mark808@news.delphi.com>
Message-ID: <39f71c$msi@gagme.wwa.com>
Source record: 36866

The Tyrell newsreader blew up yesterday, so I'm having to go to my backup, but I did want to reference Alan's response to what I had posted regarding Bob Hardy and KMOX "sounders":
--Alan:
Bob Hardy, and before that, Rex Davis, were news anchors of very considerable "weight." St. Louis's versions of Walter Cronkite, if you will.
--Mark:
Absolutely agreed.

--Alan (after first quoting Mark):
: And the station is now tweaking with its newscasts, adding sounders (when
: before did KMOX ever need sounders?) and clipping off the network at three
: minutes past the hour.

Actually, KMOX has used sounders before. I believe they used them during the '70's, when their local newscast was presented before the hour, leading up to the CBS newscast. The sounder was four notes of a solo horn, followed by an announcement, followed by the same four notes, a drum roll, and then music vaguely reminiscent of teletype chatter.
<...>
The upshot is that I don't think that the advent of a "sounder" is necessarily an indication of decline.

--Mark:
The mention of a sounder was kind of a throwaway line; it's more symbolism than anything else. Many good stations use sounders; for KMOX, it's a symbolic kind of thing. Before, you tuned to KMOX and it WAS the news; noww, news is just one piece of the puzzle, it seems. I think you'd agree with me there. I don't remember what KMOX was doing when my family moved to St. Charles in 1972 -- I was 15 years old and listened first to KXOK, then to KSLQ when it first started up, and then quickly moved over to KADI and KSHE. To me, KMOX was that station with the old guys and 300 million school closings every time it snowed. I had to grow up before I could appreciate it.

I hope you could track who said what. I hate the pico editor! Grrrowwwl!

>are an "English" format. In my posts, I am guilty of this too,
>classifying any espanol language station as "Spanish" --
>IS WRONG!

We're starting to see some diversification of Spanish language
radio here in LA. We have at least 3 FM stations, and several (more
than 10?) AM signals in Spanish.

All three FM, and most of the AM stations play varying kinds of music
KLVE (107.5) has the widest variety; pop, salsa, etc. KLAX (97.9) is
more oriented to Central Americans, as opposed to Mexicans. There is
a third station out of West Covina (15-20 miles east of LA)--I forget
the frequency, but they also play more traditional music.

The AM stations also tend to play mostly music, but I believe at least
one (KWKW-1300) is going more toward a spoken-word direction. This station
also carries sports programs

>We are looking for home pages of any and all radio people.

First of all, I want to say that the Airwaves web page is pretty cool
and I congratulate Bill on his efforts.

We at WMBR have put together what i believe to be the most comprehensive
listing of radio station home pages on the Web. We currently have
links to about 90 radio stations, and a few radio networks. The
URL is "http://www.mit.edu:8001/activities/wmbr/otherstations.html".

We encourage people with radio web pages to either make a link to it,
or copy links from this list to put in their own web pages. And of
course, if you know of any stations on the net that are not on our
list, please let me know!!

In addition, in attempt to increase the usefulness of radio information
on the web, I have started a mailing list discussion group on the topic
of radio station information servers. Anyone who maintains a Web page,
a gopher hole, a telnet site, or any information at all on the Internet in
association with a radio station is welcome to join.

For more info, send an email message to <listproc@wmbr.mit.edu> with
the following line in the body of the message:

info radio-info-servers

So far, traffic on this list has been light, but I am hoping it will
pick up soon.

Source record: 36873

>From the the revolving door of talk show hosts, reporters and deejays file:

Ed Vrdolyak, best known for his days as an Alderman, has resurfaced as expected at WJJD. Vrdolyak, last spotted on the radio at WLS afternoons, took over mornings from Clark Weber. Weber had been on mornings at JJD for the past 8 years. Weber's ratings, while in the top ten at 2.8, scored very poorly with the key 28-54 year old demographic.

WJJD, in an unusual classy move for radio stations, allowed Weber to bid a fond adieu to his listening audience. Clark expressed a possible interest in doing weekend work and noted that the daily morning grind was wearing on him and he was looking for a change.

Expect Ty Wansley, former partner with Vrdolyak on WLS to join Fast Eddie in the near future. The duo pulled in an impressive 5.6 share (3rd in the market) during their afternoon stint at LS.

Dave Robbins, formerly mornings at WWBZ (now WRCX), has resurfaced on weekend mornings at the WRCX.

Rob Price moves from sports talker WMVP to WSCR. Rob will be a reporter at the Score. Steve Grad, formerly of WSCR, KMPC (former sports talk in Orange County) has resurfaced at weekend updates at WMVP. Sportschannel supplies updates to WMVP twice an hour.

John Paxson takes over for Tom Boerwinkle on Chicago Bulls radio broadcasts on WMAQ.

Speaking of WMAQ, the station has dumped Weather Command forecasts. Roberta Gonzalez, morning weather personality on WMAQ-TV, picks up the duties of weather forecasts for the station. The station continues to counter program against news radio bigfoot WBBM. Imitating their successful "Sports first at 13 and 43 past the hour" (BBM has sports updates at 15 and 45), MAQ now offers Business first at 23 and 53 past the hour. The report airs two minutes before BBMs business reports which are at 25 and 55.

Natilie Olinger, writer and fill in news anchor at WBBM has left the station to serve as the public affairs officer at the American Medical Association.

>From the no wonder this industry has a bad rep file:

Bob Dearborn, long time Chicago deejay, left WJJD for a six figure offer at Portlands KKSN. On the air for four weeks (no ratings released during the period and no on air incidents), Bob was dumped by station powers without an explanation. There was some speculation that Heritage Media Corp, owner of the station, dumped Bob is a salary move.

>From the "Isn't there a law against noise pollution file":

Don Wade and Roma have signed on for five (count em 5) more years at WLS-AM where they handle mornings. Never underestimate the taste of Chicago radio audiences.

If this is the competition for Eddie and Ty in the serious talk genre, bet on Eddie and Ty.

Joe

4837. Kansas City Radio Watch (11/5/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-06 03:57:30 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <39hk7a$e52@vixen.cso.uiuc.edu>
Source record: 36874

Topeka multiple-format station KWIC(FM) has dropped its
morning-drive news block and its afternoon talk shows.
The morning shift is now locally programmed oldies with a heavy
newscast schedule. The afternoon talk shows, except for sports talk
from 5-7 pm, have been replaced with oldies from the Satellite Music
Network.
The station is still airing "KWIC Talk" from 9 am to 12 noon, and
continues its relay of the Satellite Music Network at other hours.
Wonder how the M Street Directory will describe all *that*??!!
****
Kansas City talk station KCMO(AM) is adding Ross Perot's weekly
talk show to its schedule -- on tape delay.
The station's announcement of Perot's show says it will air from 9
to 10 pm Sundays, but callers who want to participate must call during
the station's live feed from 7 to 8 pm.
(Now how much sense is there is having a tape-delayed talk show?)
KCMO is also carrying a daily two-minute commentary from Perot.
*****
Adult-standards station KBEA(AM), as scheduled, flipped the switch
at midnight Nov. 1 to become the Kansas City-area "Radio Aahs"
affiliate.
During its last day as a "Music of Your Life" station Oct. 31, KBEA
conducted a day-long remote from a Kansas City delicatessen and, later,
morning drive host and program director Dave Wilson came back to do the
station's last music shift, finishing off with Frank Sinatra's "My Way"
and the well-known cartoon signature tune with Porky Pig saying "That's
all folks!"
Except it wasn't. The 9 pm network talk show wasn't ready for
another couple of minutes, and so Wilson had to fill in with the
weather and some per-inquiry spots.
Oddly enough, during breaks in the Radio Aahs programming, the
station is still running traffic and weather from Metro Traffic.

wrote:

>

> > > So-called "conservative" talk radio ought to reap what it has sown.

> > So far we have....higher ratings...loyal listeners... vigorous two- way debates on the issues.

> OK, prove it. Show me the ARBs.

If we are only talking about WHO...we have been at or near the top for past several years....but perhaps you're right...perhaps we are a market anomaly.

Count up and post the numbers of how many
> callers of ALL viewpoints--and the number of minutes each receives--on the
> shows WHO airs. Surely there must be a few, doubtless escaping the shackles
> of the advancing vanguard of the "liberal" editorial page of the Des Moines
> Register and just barely able to dial the phone and ring you up to form a few
> feeble sentences!

But this is the main point... Talk hosts who gauge their sucess by caller levels or their ideological bent, fall into the oldest trap in talk radio.... THE CALLERS ARE NOT THE LISTENERS.... The best two ways to gauge the sucess of the daypart is to assess the long-term numbers, plus client response. Are the advertisers happy with the results THEY are getting? I try to make my program listener-driven, not caller-driven. Mark, it's fun to lob a few grenades in the culture war from time to time, but that can't sustain a talk show.

> That may be a bit sarcastic on my part and since I can't hear Mickelson's product because of KBEQ's particular brand of talk radio at 1030 kHz, I can't
> say how open his show really is. To start, though, if he thinks it's just a
> "two-way" debate -- well, there are often more than two sides to any issue
> or set of issues.

Mark, WHO is a generic full-service, newstalk station... 5-9 AM a two person morning get-up happy man/woman prattle talk show... Van and Bonnie show... no political view or ideology ... number one in the market. 9-12 Mickelson... I'm a flaming moderate, radical neo-Puritan Calvinist easy-going moral cultural conservative. 12-1PM Farm Markets...Paul Harvey... 1-4PM tape delayed Rush. 4-6PM Drive Time... Sue and Jerry....PM Prattle...lifestyle..etc. Evening....Bruce Williams...Michael Reagan.....etc. Our weakest daypart is Bruce Williams. As long as the forum, is open the debate is multi-dimensional. They hardest part of our

scedule for our listeners to which our listeners can respond is Rush
because he is tape-delayed, plus access is almost impossible.

> About audiences: who knows why they're listening to you, Jan? Maybe they like you, even if they don't agree with your political views.

Precisely.... I hear it all the time.

> Maybe they'relooking for a viewpoint different than the one they get from the Register.

Exactly....

> Maybe it's because WHO has been a news/talk station for a very, very long time and has a blowtorch of a signal.

Doesn't work that way.... our current sucess follows some pretty grim
years for our predecessors.

Anyhow, thanks for the follow-up.

Mickelson

WHOA there, big fella! You have 6 remotes every weekend? What kinds of
remotes? What do you do? Are these paid for by the clients or does the
station do them simply to get out around town?

I don't know where you've been, but lots of talkshow hosts, including I, have talked loosely with the control room staff and played music connected with the topic. When George Bush was running for president I played Romanovsky & Phillips' "Wimp" song, to some astounding success. Bush had been accused of being a wimp early in his campaign (probably why he later led invasions, but that's another story). This was years before Rush made the scene. My mentor, Jerry Dimmitt, used sound effects, comedy, and other bits for his talkshow, and that was a full decade before Rush. But, isn't it typical of Dittoheads to selectively remember the truth.

Does anybody out here know if there is a publically accesible
database of AM stations for the U.S.? How about Canada?
It would come in handy when I do my DX'ing...

For now, 1390 appears to be simulcasting 95.9. Not sure when the plug
will be pulled on 1390. By the way, I believe I heard a full set of
calls at one point as "CJKX". Wonder if another Canadian station will
snap up the CHOO calls?

In other news... Noted Barrie's new CIQB testing on 101.1 calling itself
"B 101 point 1" and featuring oldies from the 1960s, 70s and 80s. Signal
was neck and neck with Fort Erie's CKEY ("The Planet") in mid-town
Toronto. For now, CKBB-950 was running their usual programming. I
assume that CKBB will eventually simulcast CIQB and then pull the plug?

> Question: Why has no organization been successful in
>selling radio audience survey data based on local oscillator (LO)
>emissions from car radios? Why isn't this type of data widely used
>by the broadcast industry?

At one of the Radio Shows (New Orleans 1992?) I heard about a company based in Phoenix called TrendData that does exactly that. They place sensor boxes at strategic pointa along major highways and count radios. I find two main problems with this approach:

1. You have no way of knowing who's in the cars, only the dial settings of the radios. If you're an advertiser who sells, say, major appliances, it doesn't help to know that 25% of the radios in Phoenix are tuned to station X without knowing who the listeners are. They may be teenagers that won't be in the market for a new refrigerator for five or six years; they may be tourists from Boston for that matter.

2. It only works with FM signals, not AM. You can monitor the LO of an FM receiver enclosed in a metal box (automobile) because the car windows are large enough in terms of wavelength to allow some of the LO signal to escape. At AM frequencies, though, a car resembles a Faraday cage and LO radiation cannot be detected by a roadside box.

Nevertheless this method has one great advantage: it measures actual listening, not somebody's recollection of his or her listening. At WCRB (where I work) we suspect an important part of our audience is underrepresented by Arbitron and AccuRatings because they won't respond to phone calls from strangers in the middle of dinner or a favorite TV show.

I'd actually like to hear from TrendData if they still exist.

Date: 1994-11-07 01:49:55 UTC
From: Jeff Gilbert <gilbert@oeonline.com>
Message-ID: <39k143$rrb@vixen.cso.uiuc.edu>
Source record: 36808

I'd like everybody on this list to know that one of the top programmers in the business is available. He doesn't know that I'm posting this, so I won't use his name. But, if anybody knows of a major market programming job, please send me an e-mail note (gilbert@oeonline.com), and I will pass it along to the person involved.

A little something about the person I'm talking about: 20 years in the business--almost 15 of them programming major market stations. Great stability--12 years in his most recent jobs. He's received many awards, and this is the first time he's ever been let go. The only reason given "time for a change."

I'm talking about a good stable family man, who doesn't really want to drag his family across the country. But, he is willing to relocate, for a good, stable position.

If anybody thinks I'm talking about myself, I'm not. I am in a good position--not programming related, and have no desire to change jobs.

Thanks for your help.

4852. Hartford's "New 104"

Newsgroup: rec.radio.broadcasting
Date: 1994-11-07 01:49:56 UTC
From: drchuck@alpha.netusa.net
Message-ID: <39k144$rre@vixen.cso.uiuc.edu>
Source record: 36809

I was driving home from work, and I "discovered" Hartford's WYSR-FM 104.1 playing Soundgarden's "Black Hole Sun." As it turns out, WYSR has dumped its old AC format for a more "modern rock" sound. For now, they just call themselves the "New 104" and stress the fact they are playing "new music" (new to CT, I guess, I don't recall Hartford having any "modern" or "alternative" stations prior to this one). They've only been using the WYSR calls at the top of the hour, but this may change if they applied for new calls. They are also jockless, but that will probably change, too.

Chuck

>>
>Many other full service, local talk operations have had their butts
>kicked by lesser operations running Limbaugh. If Limbaugh had landed
>on an actual player in the market (to the extent that they exist in
>St. Louis) and not WIBV, there could have been trouble.

Here we go again. :-) Name some. Prove this assertion.

Where else could Limbaugh have landed in St. Louis? If KSD had stayed with the all-news format it started in 1978 or 1979 (I forget the exact year), sure, it could have been a player by now. But then Gannett bought it, and managed to screw up both KSD and KCFM (93.7, now KSD-FM) in about every way imaginable. (Although still small potatoes compared to the massive f***-up that KCMO became under Gannett ownership.) KSD went to the KUSA calls and country music, and so, well, so much for that.

>And frankly,
>when your airstaff is so super-annuated that you're losing key players
>on your staff to the grim reaper, it may be time to make some changes.

The only ones I remembered who actually keeled over were Jack Carney and Bob Hardy, both of whom were in their 50s and in apparent good health.

Sure, Anne Keefe was about ready to retire anyway, but she's gone on to start a post-retirement career as a KETC-TV talk show host.

Do you throw out unique talent just because they're getting old?

>I gave it 18 months and bowed out, like many out-of-towners, before and
>since. It was fun while it lasted.
>
Yes, KMOX has been particularly resistant to change. I have said this before and will say it again: it needed fine-tuning. But, while getting rid of what's bad, obsolete, whatever, the new management also is throwing out some of the good things about KMOX.

One of the good things was the station's impeccable credibility. Putting Limbaugh on the air threw that out the window.

As I have also said before, KMOX is a station listeners grow into. For my part, I have only been able to listen to it and appreciate it in the past few years. As I also said before, I used to think of it as "that station with the old guys and 300 million school closings." My opinion is somewhat different now; then again, I'm not in high school or college any more. Now is not the time for KMOX to be messing around with itself too much, right when a substantial chunk of its potential audience is now ready for its raison d'etre.

TAXI DRIVER was, in fact, one of the most important films produced through a major Hollywood studio in the last 25 years (and I have the opinion of Roger Ebert to back me up on that). One of its main points, illustrated by the next-to-last scene in the film (the newspaper clippings taped on Travis Bickle's apartment wall), is that the mass media---radio included---will make a folk hero out of vigilantes, provided they shoot someone society doesn't like (Bickle fails to shoot a Presidential candidate but succeeds in splattering gangsters' guts all over a New York whorehouse). In their own twisted ways, Hinckley (one of George Bush's distant cousins, BTW) and right-wing poster boy Bernhard Goetz have proven TAXI DRIVER's sociopolitical theory to be horrifyingly true.

kgiven@bu.edu (Karen Given) writes:

>I am looking for some information about the radio talk program called "For
>the People" and I was told that maybe I should ask here. My father and

"For the People" (heard closest to Boston on WCAP-AM 980 Lowell weekday afternoons and WNNZ-AM 640 Springfield Sunday nights) is a call-in talk show hosted by Chuck Harder, an individual who claims to be a "consumer advocate" but whose program content of the past 18 months has mainly consisted of yelling about how Janet Reno was a mass murderer at Waco, how the Mexicans are ruining the United States through NAFTA (and how the Indonesians will ruin the U.S. through GATT), how the Federal Reserve System is a big Jewish conspiracy to illegally control the U.S. economy (one of Harder's favourite guests is the infamous anti-semite Eustace Mullins---check the Anti-Defamation League for further info on him), how non-heterosexuals are eating away at the national morality of the U.S. and causing a health hazard with AIDS, and how all of this is not common public knowledge because the Rockefellers and their international banker buddies control both the mass media and American politics and don't want this "information" to "get out". (That final point he occasionally tries to support by reminding his listeners that he was once a weekend call-in host on NBC Talknet, thus once being an "insider" and allegedly "knowing" what goes on in the corporate boardrooms of the networks.) Harder's idea of political satire is to take an audio clip of Bill Clinton and run it side-by-side with an audio clip of Adolf Hitler, and then claim they sound remarkably similar (as Harder did on Friday's broadcast). To help cover the cost of distributing these "facts," Harder also has a mail-order business through which he sells Mullins' anti-semitic scribblings and videos in which Bill and Hillary Clinton are accused of having dozens of people killed because they "knew too much" about the Whitewater affair.
IMHO, this is one of the most irresponsible talk programs that has been unleashed on the American public in the wake of Limbaugh's success. To establish exactly how irresponsible, note the shocking difference between the following quotations, both made on broadcasts shortly after assassination attempts on American presidents (one successful, one unsuccessful):

Chet Huntley: "It's a logical assumption that hatred---far-left, far-right, political, religious, economic or paranoid---moved the person or persons who today committed this combined act of murder and national sabotage. There is in this country, and there has been for too long, an ominous and sickening popularity of hatred. The body of the President lying at this moment in Washington is the thundering testimonial of what hatred comes to, and the revolting excesses it perpetrates. Hatred is self-generating, contageous, it feeds upon itself and explodes into violence. It is no inexplicable phenomenon that there are prophets of hatred in our country, areas and

communities where the disease is permitted or encouraged or given status by those who can and do influence others. You and I have heard, in recent months, someone say 'Those Kennedys ought to be shot.' A well-known national magazine {The National Review} recently carried an article saying Chief Justice Warren 'should be hanged'. In its own defense, it said it was only joking. But the left has been equally bad. Tonight, it might be the hope and the resolve of all of us that we've heard the last of this kind of talk, jockular or serious, for the result is tragically the same."
---THE HUNTLEY-BRINKLEY REPORT, NBC-TV, 22 November 1963

Caller: "How do you know it's autumn in Washington? The squirrels are scampering around the White House lawn picking up shell casings."
(Chuck Harder responds with hearty laughter and no reprimand whatsoever.)
---FOR THE PEOPLE syndicated broadcast of 4 November 1994

> anomaly.

It wouldn't be proper for me to ask for comment on markets one wouldn't
be expected to know about. It *is* hard to prove or disprove an assertion
that "conservative talk radio" in general is reaping high numbers and solid
revenues wherever it's on the air just based on what happens in Des Moines.
Besides, from remarks about the WHO program schedule:

> Mark, WHO is a generic full-service, newstalk station... 5-9 AM a two
> person morning get-up happy man/woman prattle talk show... Van and Bonnie
> show... no political view or ideology ... number one in the market.
> 9-12 Mickelson... I'm a flaming moderate, radical neo-Puritan Calvinist
> easy-going moral cultural conservative. <etc>

...we may be in danger of comparing apples and oranges here. What concerns
me most are the stations that have nothing other than right-wing viewpoints
expressed. This is a somewhat different type of station than a "generic
full-service news/talk station," at least in my categorization of these
formats. Your mileage may vary.

And if Mickelson's description of himself is any indication of the level of
irony and good humor he brings to his program, then I can understand why
he does well even among people who don't agree with him.

Hey, Jan, aren't "Calvinist" and "easy-going" contradictory terms? :-)

> > Count up and post the numbers of how many
> > callers of ALL viewpoints--and the number of minutes each receives--on the
> > shows WHO airs.
>
> But this is the main point... Talk hosts who gauge their sucess by caller
> levels or their ideological bent, fall into the oldest trap in talk
> radio.... THE CALLERS ARE NOT THE LISTENERS....

No disagreement here, although I will say that if the callers are all of
one particular type of ideology, it is my opinion that it scares off callers
of other ideological stripes.

However, with all due respect, I also detect an attempt to reframe the debate
here. I'd still like to know what the on-air ideological tally is. That
was an issue in many of the other posts about the "conservative" talk show

hosts who hang up or screen away callers who might challenge them in any
way, shape, or form. That's not a talk show; that's a virtual monologue.

> The best two ways to
> gauge the sucess of the daypart is to assess the long-term numbers, plus
> client response. Are the advertisers happy with the results THEY are
> getting?

No disagreement here.

> I try to make my program listener-driven, not caller-driven.
> Mark, it's fun to lob a few grenades in the culture war from time to time,
> but that can't sustain a talk show.

No disagreement here, either. Trouble is, far too many think they can.
(KNHN in Kansas City is an especially boring example of this at the
moment -- then again, I can't prove that its one-sided programming is
responsible for its basement-level ratings, especially since the station
has been referred to by one local comedian as "Mr. Microphone" for the
poor coverage of its signal.)
>
> our current sucess follows some pretty grim
> years for our predecessors.

That is interesting. I was not aware there was a time when WHO (I almost
typed KMOX there) was not successful.

OTR (OLD-TIME-RADIO) Newsletter Created

OTR, the noncommercial, electronic newsletter for folks who
enjoy collecting and listening to nostalgic radio programs is proud to
announce the acceptance of charter subscriptions.

OTR was founded after discussion in Usenet newsgroups and email
exchanges, indicating the desire of a number of Usenet users to
have a forum dedicated to the hobby of listening to old-time radio
(OTR) programming.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

Some of the anticipated topics include (but are not limited to):

Lists of AM radio stations broadcasting OTR.
Lists and critiques of OTR tape vendors.
Contents of personal libraries / collections.
Offers to privately exchange recordings.
Critiques of individual or serialized programs.
Discussions about radio dramas / mysteries / adventures.
Hints on re-recording and preserving audio quality.

-o-o-o-o-o-o-o-o-o-o-o-o-o-

If you fondly reminisce about some of the programs you heard during
the "golden age of radio", would like to learn more about programming
on the "TV without a tube" that fascinated your parents, or would like
to contribute your topical expertise, send in your subscription
request now.

Are you interested in the "Modern Day" radio dramas and how they
compare and contrast to the 'Golden Age" of radio? If so, then OTR
is for you.

Subscribers will receive periodic emailings of contributed articles.
in a daily digest format (as news warrants). You may enjoy reading

OTR while listening to your favorite radio dramas. An enjoyable
example of sensory multiplexing :-).

-o-o-o-o-o-o-o-o-o-o-o-o-

To subscribe, send an email message in the following format:

To: otr-request@airwaves.chi.il.us
Subject: SUBSCRIBE

You will receive a 'welcome' message with even more information.

OTR is brought to you courtesy of -Airwaves Radio Journal
and Lou Genco, who actually remembers some of the original programs |-).

4862. Seeking radio people in SW Missouri

Hello all.

I would like to hear from radio people who work in the general area
of Branson/Joplin/Springfield Missouri. This can be within 100 miles
or so of Springfield. Either currently active or recently active.

Drop me some email if you are in radio and in this area. Tell me
about yourself & your station. I will reciprocate.

Thanks

Bill

>emissions from car radios? Why isn't this type of data widely used
>by the broadcast industry?

as the media director of a major advertising agency, i can tell you right off the bat that this kind of information would be absolutely useless to me.

the advantage of buying radio for your client is that, as a fragmented medium (i.e., with several vehicles in each market devoted to several different types of audiences), it is a very targeted medium, much more so than television, and would allow me to be very specific in my selection of stations to impact my audience (say, men 21-24 for a beer client). even if this "lo" method were available, it would tell me only what the car was listening to, but wouldn't tell me anything about the age/sex of the person in the car. any "ratings" information, therefore, that this method would provide to me would be irrelevant.

no other agency or respectable media buying professional would take such a method seriously, either.

looks like we're stuck with the diary method for awhile.

4870. Re: Info about "For the People"

Newsgroup: rec.radio.broadcasting
Date: 1994-11-07 10:30:21 UTC
From: st23@aol.com
Message-ID: <39kvjt$pod@vixen.cso.uiuc.edu>
Source record: 36891

For the People is both the name and the organization. The network is the Proples Radio Network, based in White Springs, FL. Most of the folks at the network buy in to Chuck's view of the way things are. The station I used to work at carried For the People and some of the other network offerings (mostly the comsumer oriented stuff on Saturday, which is really quite good).

The show is available on one of the audio subcarriers of Satcom C-1, and cam be picked up with any satellite receiver with a tuneable audio section. Try Tansponder 2, Audio 7.20.The show airs from 2-5pm Eastern each afternoon, and repeats overnight, I believe from midnight to 3am. The network is on 24 hours.

Most of Chuck's audience is intensely loyal, and very hard to sway to a logical point of view. He mixes his brand of paranoia with just enough fact that you *don't know* if maybe it could be the truth! He really can make you think at times! (I can't say as to whether I bought much of it -- but it did make me wonder....)

Hope it helps!

Best,
Scott Temaat

Robert Casey (wa2ise@netcom.com) wrote:

: They "hid" the ID in the middle of a block of commercials. The other
: oldies station, KKSN, does the same thing. Some PD's must really hate
: their station's callsign or something....
: KKSN keeps calling themselves KISN except for their legal ID.
: They also say "kissen". KKSN would also fit that, go figure...

There's a reason. They don't want to confuse listeners because ratings books hinge on listeners correctly remembering slogans and callsigns. >From about 1959 to 1969, in the early days of rock and roll there was a KISN (910, now KKSN(AM)). That station was a phenomenal success, at times garnering a 75% share of the audience at night! Unfortunately, the FCC yanked the license due either to a faked contest or double billing, I can't remember. The KISN call letters were subsequently assigned to a station in Salt Lake City, I think.

The 910 channel was restarted by another owner. It changed hands a few times, and current people decided to play the same kind of music which once made 910 great. They also bought an FM station at the time and simulcast. So, to keep the "KISN"/"Kissin" slogan alive, they applied for and got KKSN; close enough. Eventually they dropped the format from the AM and opted for a big bands format there.

But, as to hiding the KKSN call, Portland is blessed with lots of stations beginning with KK. There are KKEY, KKCW, KKRZ -- all high-profile stations. KKSN simply didn't want somebody's fuzzy handwriting or a bad guess in a ratings diary or phone survey to credit another station when they're really listening to KKSN. So, they hide it.

From: airworks@aol.com
Message-ID: <39kvk6$poj@vixen.cso.uiuc.edu>
Source record: 36894

It has been announced that former K-Rock (WXRK, NY) DJ and VH-1 VJ Meg Griffin will begin a morning show at X-107 (WRGX, ex-WXPS) in Westchester County. This will put her up against former co-worker and arch phylosopical nemesis Howard Stern. This should be interesting. Griffin last held down the 10-2 night shift at K-Rock after being bumped from her evening gig by the Greaseman.

>other comments. Some of the stuff they play I haven't heard in

> Least it's a change from the standard 800 song playlist oldie station.

Yes, it's a change for the first few weeks or so, but those 70's oldies stations just have a different 800 song playlist (more like 500). You'd better like Elton John, you'd better like him A LOT, because he will be on continuously.

Memphis has had 2 such stations for the last 8 months. I thought it was great at first, since the AOR/Classic Rock station here had narrowed it's list to about 200 songs (they've since broadened it a bit, nothing like competition.) But now I'm just about sick of the 70's. I've now switched to the AAA/Progressive station most of the time. But the playlist there is also a bit limited (not to mention a little too wierd for my tastes sometimes). I basically listen to the radio now like I watch cable, station surfing. It's the only way to get any variety, and you can miss a lot of those pesky commercials.

In article <39abb8$iq3@vixen.cso.uiuc.edu>, dk@crl.com (David A. Kaye) writes:

"So, too, other Bay Area stations, KIQI (no relation to KIOI above) ..."

Actually, at one time, K101-FM and KIQI-AM (1010 kHz) were both owned by Gabbert, with the AM simulcasting the FM (a radical thing to do at the time). As I recall, Gabbert had to wheel and deal to get both the call and the frequency; and of course, he later sold off both stations, when he moved into television with KTZO (later KOFY)-TV. During my college years (mid-to-late 70s), I was briefly a transmitter tender at KIQI AM; it had the highest-fidelity signal of any AM I have ever heard, before or since. I believe Gabbert sold the station before the advent of the AM stereo standard(s). Too bad. I would have enjoyed hearing what he could have done with the property.

There are several databases, but since they are in constant flux, you
won't find a free one anywhere. IF you are willing to pay for
immediate
information, call Dataworld or CDS. If you want the recent
compilations, call M Street Journal and order their radio directory.

[....]
: I listen to Rush quite often, although not everyday. However, does that make
: me "hate" Clinton? Heck, no, I voted for him and will probably do so again.

Sure, Bill Clinton stands for nearly everything Limbaugh espoused on his show, to wit: the passage of NAFTA, the continued pressure against Castro, increased trade with China (despite the Tianamen Square massacre).

But more to the point: "attack" is also a wrong word. Limbaugh supporters somehow feel that his opinions should stand by themselves without counterpoint. Such a view is un-American. We live in a pluralistic society. A counterpoint is not an attack. An attack is a personal defamation, such as the recent show in which the Clintons were called "white trash". THAT is an attack. I don't hear people who dislike Limbaugh calling him names.

>100 Arbitron markets.

Bob misstates or misunderstands my response to his posting. I do NOT belive that talk radio is shaping opinions or trying to make people vote one way or another. I mean, it's been shown time and time again that doesn't work. Rush --- at a peak in his popularity, couldn't get Bush elected. I and other talk hosts are merly conduits. I give my opinion and solicit others. I am no missionary. I'm not trying to convert people to my way of thinking. I AM firm in my opinions...but I like to hear from those who dis-agree. I agree with Bob...talk radio is another form of entertainment. Although he cites the various trades indicating talk is on the way out...there are many indicators to the contrary. There have never before been so many syndcated talk shows. ABC World News Tonight ran a story just last week on the increasing populariy of talk radio. ABC should know --- most of it's AM stations use the format to great success.

4882. New England Radio Watcher: Brudnoy improving

Newsgroup: rec.radio.broadcasting
Date: 1994-11-08 02:57:06 UTC
From: fybush@world.std.com
Message-ID: <39mpe2$d01@vixen.cso.uiuc.edu>
Source record: 36818

It's nice to have some good news to pass along. WBZ's evening talk host David Brudnoy was moved out of the intensive care unit at Mass General over the weekend. He's now in fair condition, off the respirator, and in much better spirits.

Get-well cards can be sent c/o WBZ, 1170 Soldiers Field Road, Boston MA 02134.

In other New England news, Charles Adler has added radio to his TV talk show, "Adler On-Line", seen weeknights at 8 on WABU-TV 68. Adler is now heard on WRKO AM 680 from 7-10pm. The 8-9 hour is a simulcast of the TV show, and the whole thing originates from the WABU studios.

Not much else to mention; the WYSR format switch in Hartford has already been mentioned.

Oh, and if you've been trying to find the "Let's Talk About Radio" show on WJIB-740 Cambridge MA, we've moved again -- now on at 1pm on Sundays!

Message-ID: <39mpe5$d04@vixen.cso.uiuc.edu>
Source record: 36819

NY City Radio Waves 11/7/94

The WABC/Bob Grant controversy took another turn with ABC PD John Mainelli questioning rival station WLIB's "racist" views. WABC also noted the Rev. Al Sharpton, a leading critic against Grant, has appeared with Grant on his show. Grant continues to catch grief in TV ads by Senator Frank Lautenberg for his views and association with Republican opponent Chuck Haytiatian. The election is over Tuesday, but don't look for this to die. WABC has lost several sponsors from the Grant show (3-7p weekdays), but the ratings will tell if the controversy will hurt the PM Driver.

Meg Griffin, ex-WNEW-FM and K-Rock DJ, is back on-the-air mornings at X-107/WXPS-FM in Westchester, NY as of Monday 11/7. Griffin left K-Rock earlier this year.

Bob Bruno, GM of WOR, says the rumors of the station's sale are false. He states the station enjoyed their best month in history, and is very healthy, financially.

Rumors abound concerning the direction of WRKS/Kiss-FM with Emmis Broadcasting closing on the station soon. Emmis, which owns Hot 97, may change formats. Rumors of an all 70's format, the Big Apple's first, continue to circulate. Kiss-FM has taken a hit in the rating lately, due in a large part to Hot 97. History lesson--98.7 dial position used to be WOR-FM in the 60's, & WXLO/99X in the 70's. It was switched from A/C to Urban and Kiss-FM on 8/1/81.

Z-100/WHTZ's Christmas Concert is coming December 3rd at Madison Square Garden. The acoustic show features Green Day, Sheryl Crow, Bon Jovi and others.

Art Athens, a fixture on WCBS-AM's political coverage and in NY broadcasting for over 20 years, is quitting the station. He announced his intentions last Wednesday in an internal memo. He reportedly is disgusted with station management. Curious timing of the announcement--a week before the elections. On the CBS-FM side, Midday man Ron Lundy is rumored to be exiting the station. Lundy has been in NY since 1965, working at WABC until the music died in 1982. He joined CBS-FM in 1984. He would be the second CBS-FM air personality to leave in last six months. Fill-in Marc Summers left recently.

Mix 105's 8th annual Coats for Kids campaign kicks off Monday. Kenny Loggins serves as honorary chairman this year. Sponsors include NatWest Banks, the Marriott Corporation, the Neighborhood Cleaners Association and Heartshare. Last year, we collected over 30,000 coats and look to top that this year. One of the highlights will be the on-air auction of collector's items--last year's raised over $30,000.

Sunday's NYC Marathon featured a number of radio participants, including WCBS-FM's meteorolgist Mr. G, and Deidre Coleman, the I-man's intended bride. Her time - 3:32. WFAN & The Imus Show ran a contest to guess her time. Winner got a trip.

More next time---

4884. Springfield radio watch

Newsgroup: rec.radio.broadcasting
Date: 1994-11-08 02:57:10 UTC
From: Terry Knab <tknab@nyx10.cs.du.edu>
Message-ID: <39mpe6$d05@vixen.cso.uiuc.edu>
Source record: 36820

A lot is going on here in Springfield, and I am going to try to give you all my expert commentary:

"A changing of the guard is happening", according to KTOZ-FM Promotions Director Scott Smith. In an interview, Mr. Smith was quoted as saying that the market is getting younger and younger. Looking at what has been occurring in the market, nothing could be closer to the truth. In looking at what has been hitting the air in the market in the last year, it is noticeable that several new AC outlets have sprung up, as well as 2 rock outlets. Namely KLTQ flipping from Country to Soft Rock, KTOZ-FM changing from alternative rock "the Planet" to new rock "Channel Z", KWTO-FM flipping from Hot AC "the Heart 98.7" to Alternative rock "Rock 99", KELE Soft AC to Hot AC "Hot 106.7". Noticeably these formats have all been young skewing. KGBX Program Director Mitch Baker says "The market has been shaken up with duolopy and LMA's, and you are seeing it settle down now."
Several program directors in town question the viability of many of these formats. One station in town is already rumored to be looking at other options, namely country. This is at this moment only rumored.

Another interesting development in the market is with the Branson Country network. Their Classic oldies format is so off-the-wall..Last night I heard Tears for Fears, Phil Collins, and Roxette on it...Classic Oldies? I don't think so... :) Also, the big thing...they are identifying stations it is heard on, 93.5 Branson, 99.9 Buffalo/Springfield, 95.9 Mansfield, and 1470, Dewitt ARK. The 93.5 frequency I can't seem to find any info on other than KXBR Greenfield, Dark signal once existed on that frequency. No legal ID is being given for it either. The odd part is from my listening post (over 60 miles from Branson) I can pick it up loud and clear on 93.5. They claim (due to technical problems with KMAC 99.7) that they are temporarily bring classic oldies on 93.5.. *boggle*

Later ppl.....

Drew is the big boss (the PD reports to him) at WLS AM/FM in Chicago,
and often pops in on Jay Marvin's show to needle at Jay (who is a
left-wing anarchist/libertarian) with his right-wing comments. I've
spoken with Drew...he told me himself that he is a right-wing Republican,
so I'm not making that up. Drew is a fair-minded human being and he
is quite entertaining on the air. See, I just said something nice
about a conservative. :)

Two alternative stations, and you're complaining? Try living somewhere
where you have to put up a 10-element Yagi to get a decent
quasi-alternative station.

Such as Kansas City.

I first heard Hayes when he, Don Vogel and Mort Downey took WMAQ Chicago from country into talk in '87 (Vogel prefers not to discuss Hayes nowadays; the one time I talked to Drew he was extremely ornery, to be generous). Hayes is now PD of WLS Chicago.

Employment opportunities:

Pacific Recorders & Engineering Corporation, of Carlsbad,
California, has the following employment opportunities:

Radio/Audio Systems Engineer:

Successful candidate must have the background and experience
to:

*Perform Radio/Audio systems design engineering.
*Provide project coordination and leadership between sales,
engineering and manufacturing
*Provide customer coordination throughout the project.
*Juggle multiple priorities in a fast-paced environment.
Specific Requirements include:
*High level or organization and attention to detail
*Minimum of five (5) years related experience
*A Team Player
*Good communications skills
*Familiarity with computer-based wiring design (desirable)
*Previous experience in manufacturing (a plus)

Digital Signal Processor Engineer:
*Minimum two (2) years experience
*familiarity with TI 320 series DSP technology

Senior Technical Support Technician
*Minimum five (5) years experience
*Troubleshooting skills with analog, digital and microprocessor
circuitry
*competency with electromechanical assemblies
*Experience in a telephone based, technical support environment.

Applicants are encouraged to make an appointment to speak with
Dave Pollard or Ted Staros at the AES Show, San Francisco, at
booth 220, or:

Mail resumes with references and salary history to:
Patti Watson, Personnel Manager
Pacific Recorders & Engineering Corp.
2070 Las Palmas Drive Voice: 619.438.3911
Carlsbad, CA 92009 Fax: 619.438.9277

Carlsbad, a growing community, is located 35 miles north of
downtown San Diego, on the Pacific Ocean. It's also 80 miles
south-east of Los Angeles. The surrounding area offers a multiple

of outdoor activities, two community colleges, and one state university.

Please direct all employment inquiries to the above address. No e-mail questions about these or other employment opportunities will be acknowledged!

[Pacific Recorders and Engineering does not have an e-mail account at this time.]

I know this may seem naive and stupid and downright idiotic...but doesn't the FCC maintain a current list of all broadcast stations in this country? If so, why can't the list be on a public server for perusal? If not, why not? If the FCC doesn't know what every station in America is doing right now at least as it concerns call letters and power then isn't the commish not doing its job?

OH....! Never mind...

From: laporte@crl.com
Message-ID: <39mpeo$d1p@vixen.cso.uiuc.edu>
Source record: 36829

Hi, Bill et al. I'd like to introduce myself and ask for some input...

I've been a professional broadcaster for 18 years. Starting as a DJ in college radio in the 70's at WYBC, New Haven, then at KMBY, Monterey, KLOK-AM, San Jose, and KLOK-FM, San Francisco. I started doing talk in 1987 at KNBR, San Francisco. I am currently a weekend talk show host at KSFO, San Francisco.

I am also the creator and former host/producer of "On Computers," (nee Dvorak on Computers) a nationally syndicated computer talk show that is still heard in 60 markets and on Armed Forces Radio.

After suffering a falling out with the syndicator of that show, I left and now host "Laporte on Computers" Saturdays from 10a-1p on KSFO, 560 AM, San Francisco.

I also host a weekly television show for Ziff-Davis titled "The Personal Computing Show." It can been seen Sundays at 1p Eastern, 10a Pacific on CNBC, and on Jones and the Sci Fi channel at some ungodly hour. But don't look for at after 11/13/94 -- we're going on hiatus until early '95. (I think that's what they told Martin Short, too.)

I'd like to start a conversation with you computer-literate radio types about what you think a good computer radio (or TV) show would be like. How high (or low) to aim the content. Do we focus on issues, consumer information, or tech support (or all three). Guests? Tutorials? Features? Just lots of calls?

I have some ideas about all this, based on the last four years of computer broadcasting, but I don't want to prejudice you, so I'll hold them for a later message (or until someone asks me for them!)

Nice to meet y'all. Thanks!

Leo

: remind former JAZZY 100 fans that the former WCXR 105.9 FM is
: *NOT* the New JAZZY 100!

: However, the *GOOD NEWS* is that Committee to Bring Back JAZZY 100,
: along with former WJZE-JAZZY 100 program director Bob Linden are still
: working hard to acquire of the next *TRUE* JAZZY 100 radio station,[A

Was Jazzy 100 a TRUE jazz format? There are those of us who
wonder how a "jazzy" format, such as the one apparently programmed
by Bob Linden, could exclude the work of such current artists as
Roy Hargrove, Wallace Roney, Wynton Marsalis, Bobby Watson,
Arturo Sandoval, Marcus Roberts, Terence Blanchard, Nnenna Freelon,
Joey DeFrancesco, Paquito D'Rivera, etc. Frankly, I don't hear
much difference between Jazzy 100 and WJZW.

Yes, I enjoy listening to Sade, but I'd also like to hear Betty
Carter. If there's room for Kenny G in a "jazzy" format,
surely there's room for Joshua Redman as well!

>: > Something must be going on at Love-94. They have been Love 94 for some
>: > 15 years now and suddenly they are Love 93.9. Add to that the music
>: > is more vocal with lots of A/C in the mix.

> Nothing special, they're just joining the nineties. The station
>is at 93.9 and it is foolist to refer to themselves as something they're
>not. In the days of analog dials, Love 94 made a lot of sense...but
>today, people will start looking for gthem at 94.1 and go from there.

Eh? Do you mean that young radio listeners raised on digital tuners
will hunt for Love-94 from 94.0-94.9 and give up when they can't find it?

For the record, entrenched Phoenix rocker KUPD (97.9 FM) has been
referring to itself as "98 KUPD" for ages, and no one has accused
them of false advertising or foolishness -- yet!

Source record: 36835

I had also heard of the TrendData system, though I did not
remember their name. I was not aware of the problem with AM. I thought
the LO reradiation was off the antenna, outside the car.
I helped a friend build a system like that for his senior project
at Cal Poly. His system was put in the car (so you have some idea who
the listener is), and would have similar requirements for inducements for
participants that diaries have. His system monitored LO leakage down the
antenna lead (it was installed between the radio and the antena). It
recorded the time the radio was turned on and off and the time a station
change was made. It would then report the results over a radio modem
link (again through the car radio antenna). It was a neat project.
Another friend (up in Canada) developed a TV cable box that
similarly recorded viewing data. It could pop a message up on the screen
asking who was watching at some particular point (in case it's just the
dog), and the viewer could respond by remote control. To make
installation easy, the box had a cordless phone transceiver in it. The
viewer was given a cordless phone and this unit would place a call in the
middle of the night to report the results. No wires all over the house
were required. Nowadays this could be done with IVDS, assuming IVDS ever
turns into anything.
One problem with all these actual mechanical sampling systems is
that they tend to show lower listening/viewing than diaries. And
broadcasters pay for ratings, so they tend to want the methodology that
gives higher exposure. Diaries are assumed to be right. If anything
disagrees with diaries, the new method is obviously wrong.

Anyone with a genuine interest in rave culture who is also a broadcaster?
My highly successful RAVE documentary "going_off" is now available to
other broadcasters who would be interest in re-broadcasting this half
hour feature. I am particularly interested in broadcasters who work for
public or community groups or other non-profit organisations who have an
interest in alternative/progressive politics. Re_broadcasting on
commercial networks would infringe copyright and professional persons
interested in this product would have to approach the Australian Broadcasting
Corporation for permission.

Going_off info attached.
Rgds,
Rosie Cross

PRESS RELEASE
GoinG_Off!! A Radio Eye Feature on RADIO NATIONAL
__________ Sunday Nov 6 at 8.20pm _____________
across australia

Something vibrant is happening in the close knit
quarters of the underground. Transcending deep
into the trenches of the urban tribes, producers
Rosie Cross and John Jacobs investigate the high
ideals and crazy dreams of those involved in the
politics of dance. Dancing can be a powerful political
expression of freedom and a pretext to changing
social structures. But where can you go to have a
good time without getting caught, closed down or
ripped off!

Come to the party with Radio Eye and listen_up to
the voices who are fighting for their right to RAVE.
Meet the Australian tribes fearful of a similar
scenario to Britain, where the Criminal Justice and
Order Bill threatens the lifestyles of travellers,
ravers and squatters. Can it happen here ? Or will the
energy and creativeness of global do-it-yourself
culture continue to allude the authorities and other
threats to commercialize the scene.

For more info contact Mr Nick Franklin
Executive Producer Radio Eye, ABC + 61 2 3331329
or Rosie Cross email: rosiex@jolt.mpx.com.au };-)

4901. Re: 10 PREREQUISITES FOR BEING A RADIO TALK SHOW HOST

Newsgroup: rec.radio.broadcasting
Date: 1994-11-08 02:57:50 UTC
From: talk1370@aol.com
Message-ID: <39mpfe$d3m@vixen.cso.uiuc.edu>
Source record: 36837

In article <39kvkm$pp0@vixen.cso.uiuc.edu>, honzman@aol.com (Honzman) writes:

(on talk's influence)

Fred Honsberger and I may be more in agreement than we realize...we agree talk radio is popular entertainment AND it is not as powerful as some say in forming public opinion.
One thing I do worry about, is whether or not its relatively narrow range of opinions will limit its appeal and stunt its growth. In a way I'm slitting my professional throat by saying this, because in my town part of my recent growth is due to the fact that everyone else toes the far-right line and screens out callers and guests who disagree. A lot of stations are like this largely because talk programming is still in its primitive stages.
Talk is the oldest format on radio (Fred's station has been heavy on the news/talk since November 1920), but in many ways it's in its infancy. Music programmers have figured out long ago that they have to balance out and daypart their lineups with varying personalities and styles. Talk programmers haven't figured it out yet.
The next phase of talk radio programming, will be to establish some sort of rotation and mix for hosts and topics, viewpoints and political affiliations so everyone can feel at home with the station, just like CHR and AOR stations rotate and daypart their music mixes and hosts. Looks like some programmers in our business, on each coast, are trying this already...the ABC West Coast O&Os are balancing their lineups. Judging by how a recent article in R&R described it, Gabe Hobbs at WFLA in Tampa/St. Pete has a hot rotation on topic selection. Most talk PDs still fly by the seat of their pants, but the way talk seems to be stalling out on its growth curve right now, I expect research and rotations to become part of the talk PD's repertoire just like research and dayparting became a part of music programming almost 30 years ago. Stations programmed this way will have a consistent high energy level, and uniform formatics, but they'll be different in topic and viewpoint throughout the day. And just like research and "playing the hits" helped CHR meet the challenge of early album rock and move forward into the 70s [I remember this well, it was when I was getting started in the business], it will do the same for talk without removing the personality and spontaneity.
Now...the only remaining question is, who's going to be the one who brings a little science to the art of talk radio, the way Bill Drake did for CHR and Lee Abrams did for AOR? We need to develop a method of topic research, and find a way to establish a mix of hosts

and viewpoints that works better than the monotonous party line most stations offer now. First to do it becomes the programming guru of the 90s...

[...]
>Grant and Limbaugh have their right to freedom of speech, and the
>stations that carry their programs have the right to air them. That,
>however, doesn't mean I have to be silent.

Whatever. What it all comes down to is that you don't trust the
listeners to come to the "right" conclusion so you have to try
to convince nonlisteners (I assume, perhaps incorrectly, that
most r.r.b readers can't receive WABC) that these talk hosts
are hate-mongers, etc. If you're defense is that Grant, Diamond,
et. al. won't give you airtime to insult them, that still avoids
the fact that each and every listener gets to hear what the
host they are listening to is like. Unless you think they are
particularly stupid, why do you assume that you need to tell
them what is (in your opinion) so obviously true. I stand by
what I said above... you listen to what you like and let them
listen to what they like. I personally think you're getting a
little too worked up about shows which, despite the size of
their piece of the radio ratings pie, really only reach a
small segment of the population.

KVIL-1150 Highland Park (Dallas), after years and years of simulcasting its AC FM, flipped 11/1 to satellite (WW1?) standards as "Memories 1150AM." They are apparantly looking to change calls to KDMM. There still isn't a station that programs 40s-60s standards that reaches all of Dallas/Fort Worth since KVIL is really only strong in Dallas due to country KJSA-1140 just to the west of Fort Worth. However, Fort Worth folks can get KCYT-106.7, which Dallas folks can't due to Spanish KRVA-FM-106.9 McKinney. However, many of the folks who brought us KAAM-1310 before it was sold off to become sports KTCK are still working on relocating KWFT-620 Wichita Falls to Dallas/Fort Worth to resurrect KAAM (the second time Dallas has stolen a frequency from Wichita Falls 140 miles to the northwest - we took 570 in the '20s).

KFGI-94.7 Luling (Austin) changes formats yet again. According to the Austin paper, they are now adult CHR KPTY "Party 94.7." When I moved to College Station in the fall of 1987, they were hot AC KAPT "Capitol 94-7FM." They then went through various shades of AC (I think referring to themselves from "male AC" to "adult top 40" at various points) then to brief stints as new age, EZ, and soft AC before becoming largely SMN country KATG "the Country Cat" before being LMAed by KKMJ-FM-95.5 into oldies KFGI "Froggy 94.7." Other Austin tidbits, the new KOOP-91.7 may be on this month. KOOP is to time-share 91.7 with UT's KVRX. Granite Broadcasting is buying KBVO-42 and will convert it to be a CBS affiliate when it loses its Fox affiliation next year. New World, which Fox gave $500 million to, is set to pick up current CBS affiliates KTBC-7 Austin and KDFW-4 Dallas and Fox will move its affiliation to those stations when the sales close in April. Granite promises to install newscasts for the switch.

International Spanish KRVA-FM-106.9 McKinney (Dallas) "Latin 107" says they will change frequencies and upgrade to 50,000 watts last week on WFAA-TV-8's Sunday morning public affairs show LA VIDA. The announcement is interesting in that KRVA-FM has no CP or application to do such. My guess is that they are buying or going to LMA the now silent KTCY-104.9 Denison. KTCY has had a CP for about 6 years to upgrade to 50 kw. Earlier in the year, it was modified to have their city of license changed to Pilot Point, near Denton. KRVA-FM says the switch will occur by the end of the year.

Elsewhere, country KIKM-FM-96.7 Sherman is buying crosstown classic rock KDSQ-101.7 Denison. Poor Sherman/Denison, KIKM is the only live FM station. KLAK-97.5 "K-Lake" is SMN AC; KTCY is silent; oldies KWSM-104.1 and KDSQ are automated. Here's hoping KIKM does something with KDSQ.

I know the odds a slim but....

Does anyone have a recording of the Modernaires singing the theme of "Milkman's Matinee", the former WNEW late night/early morning show?? I used to listen to the program from northern Maine during the 60's. I last heard the show the week before the demise of WNEW in late 1992. Unfortunately, I was on a business trip and didn't have a recorder with me.

I have their recording of "Make Believe Ballroom" that was recorded with Glenn Miller. I think that the "Milkman's Matinee" theme was recorded before the group joined the Miller Band.

Thanks for any info. WNEW was a beautiful station. Too bad that a market as big as New York City couldn't sustain it!

I'm speaking for myself, not my company.

WJFK's (Local & Net. Talk) bad boys Don & Mike are being sued again! This won't surprise anyone who is familiar with the duo. Here is part of the article that appeared in the BALTIMORE SUN on October 26th and in the news group: alt.fan.don-n-mike.

STUDENT SUES DEEJAYS
BALTIMORE MORNING SUN (BS) - Wednesday October 26, 1994

By: Jay Apperson Sun Staff Writer
Edition: Final Section: News (Local) Page: 2B
Word Count: 376

TEXT:
The radio team of "Don and Mike," whose "shock jock" antics are heard in Baltimore on WJFK-AM, was sued yesterday by a University of Maryland student who says they broadcast that she has herpes after she refused to have sex with deejay Don Geronimo.

The suit, the third to accuse the radio personalities of defaming on-air comments, seeks $6 million in damages.

Yesterday's filing in Baltimore Circuit Court came five months after the deejays reportedly settled a suit brought by a Baltimore woman who charged them with invasion of privacy for broadcasting that she was a lesbian.

In yesterday's suit filed under the pseudonym "Jane Poe," the plaintiff is described as a one-time fan who went to the Fairfax, Va., radio station to meet Mr. Geronimo. The woman, who the suit states was alternately "infatuated" with and "intimidated" by Mr. Geronimo, met him in his car but refused to have sex with him, according to the suit.

They crossed paths later when the deejays performed at a Rockville, MD., bar and dubbed the woman the "Polky Dot Lady." Mr. Geronimo later broadcast that she has herpes to "punish" her for rejecting his advances, the suit alleges. The suit does not say exactly what was broadcast or when.

The suit names as defendants: Mr. Geronimo, his on-air partner, Michael O'Meara; Infinity Broadcasting Inc., owner of WJFK-AM and WJFK-FM; WJFK General Manager Ken Stevens; producer Billy Reed; and two other station employees.

Mr. Stevens yesterday declined to comment on the suit. The other defendants did not immediately respond to messages left at the station seeking comment.

Baltimore attorney JoAnne L. Suder, who filed the suit on the student's behalf, refused to comment on the suit yesterday.

In June 1993, Dawn Tritaik, public relations director for WWMX-FM in Towson, filed a $50 million suit charging the deejays with defamation and invasion of privacy by "outing" her on the air as a lesbian. The suit was settled in May, the Washington Post reported.

The newspaper also reported that the deejays settled a 1991 suit filed when they worked at WAVA-FM in Arlington, Va. That suit charged them with defamation for calling a public relations executive offensive names.

Copyright The Baltimore Sun 1994

All fans of the Don & Mike show feel strongly that this lawsuit is nothing but an attempt to extort money from the two but, we'll just wait and let the lawyers battle it out in court. When the matter is settled, I'll post whatever is released.

The Greaseman is back in Washington, D.C., for a visit this week and next week. "Grease", who worked for over 10 years as the morning man on WWDC FM 101.1 (Album Rock format), left a few years ago to join Infinity's team of syndicated shock jocks. The Greaseman's show will be broadcast live from the Improv theatre in Northwest Washington, D.C. Locally the Greaseman is on the air from 7 p.m. to midnight on WJFK FM 106.7.

You know, I keep reading these posts from Terry Coles and Mark Goldberg (goldberg@oasys.dt.navy.mil) warning me to not be confused by WJZW. "They're NOT the new Jazzy 100", etc., etc. Sorry, but I don't get the reason why these posts keep appearing.

Those who desire traditional jazz can listed to the public and listener supported stations in town. Those of us who liked a more contemporary jazz with some rock flavor listened to Jazzy 100. Jazzy 100 is gone and that's that! Don't give me this nonsense that Smooth Jazz 105.9 is not playing the same style of music that Jazzy 100 was. They are! I listened to Jazzy 100 and I currently listen to WJZW. They're playing the same songs that Jazzy 100 played. If I'm wrong, then send me an example of music that WJZW has ignored or refused to play that Jazzy 100 used to play.

As for the probable future sale of WJZW, well I as a listener and fan have no control over what will happen just like I had no control over what happened with Jazzy 100 being sold.

I just have a feeling that if Bob Linden had been hired by Smooth Jazz 105.9, we wouldn't be seeing all these posts bashing WJZW. If you don't like 'em, don't listen to 'em! Just my humble opinion.

WTEM AM 570 (All sports format) is losing their programmer, Doug Gondek. Gondek says it was his decision to leave the struggling

all sports station. Gondek will continue consulting for WTEM for a few more months then will begin working on some other projects he's been wanting to do.

: I know this may seem naive and stupid and downright idiotic...but doesn't the
: FCC maintain a current list of all broadcast stations in this country? If so,
: why can't the list be on a public server for perusal? If not, why not? If the
: FCC doesn't know what every station in America is doing right now at least as
: it concerns call letters and power then isn't the commish not doing its job?

The data in that databse changes so fast that the moment you downloaded
it it would change. There are about 50 to 75 callsign changes per week
in addition to upgrades, new stations, stations going silent. Keeping a
current list of the 10,000+ radio stations is a full time job. However
Dataworld keeps on top of it as good as anyone.

Yes, same guy, great voice. "Big" was in Cleveland at what was then "KYW-1100" before the big Philly for Cleveland swap that NBC and Westinghouse effected in the 60's. "Big" Wilson was a disc jockey on radio, and hosted the afternoon movie on KYW TV-3...playing his piano and chatting through breaks in the film.

That was a pretty neat era at a station that spawned "The Mike Douglas Show," Mark Russell (Washington political humorist) who hosted a mid-day show called "3 on the Town" and others. I hadn't realized that "Big" passed away.

: Hi, Bill et al. I'd like to introduce myself and ask for some input...

: I'd like to start a conversation with you computer-literate radio types
: about what you think a good computer radio (or TV) show would be like. How
: high (or low) to aim the content. Do we focus on issues, consumer
: information, or tech support (or all three). Guests? Tutorials? Features?
: Just lots of calls?

I have cough the show on one of the local Talk Stations, Not mine
though. The problem I see with these shows is.

1) The are not techinical enough, I can't sit through another explination
of what's in the Autoexec.bat file or what COMMAND.COM is for.

2) Too technical. My boss does not know what Command.COM is for and
does not care. He just wants to get the latest version of DOOM running
on his computer.

It's tricky finding a balance between usefull new information
and going over the same stuff all the time.

There is a local Computer Talk program here that is a 2 hour long comercial
for a large computer software store they discuss the latest game
program to arrive at the store that week. The host of the program is the
stations Genreal Manager / Program Director / Operations Manager. He
knows better than this but I think he is afraid to tackle a complicated
computer topic.

>It would come in handy when I do my DX'ing...

The shareware program that I reviewed, "ID-Logic" is a fine
example of a Canada, U.S.A, and borders states of Mexico database.
It's available from America on Line's shareware dept.; or
ftp from ftp.hk.net. It's called the ID_NA491.zip. You'll need
MS-Windows 3.1, and VBRUN300.dll to drive it. Registration is
$45; and it's well worth the price. I believe that an updated
module, ID_NA492.zip, may be available, but haven't seen it yet.

You can position yourself anywhere in the U.S.A, Canada, border
area of Mexico -- even the Hawaiian Islands!

From: m1bz@aol.com
Message-ID: <39pj4p$bet@gagme.wwa.com>
Source record: 36767

David Brudnoy, talkmaster on WBZ-AM Boston was hospitalized a couple of weeks ago with heart problems complicated by a flu-type virus. He was in critical condition in the Intensive Care Unit for close to 2 weeks. Things looked pretty grim for Boston's favorite Libertarian for a while, but I can now tell you that this past weekend (11/5-6) brought heartwarming news for David and all those who are concerned for him. He is in a private room now, no longer on a respirator, and looking forward to coming back to his air shift. The prevailing wisdaom has it he'll broadcast from his home at first, seeing as he still needs plenty-o-rest.
David also writes movie reviews for a chain of local weekly newspapers and teaches at Boston University.It's unclear at this writing if/when he might return to those duties.
All the prayers must have done SOME-thing, folks, because David Brudnoy is much better now than many had expected he could be this soon.

Message-ID: <39pj55$bfn@gagme.wwa.com>
Source record: 36768

Tuesday's (11/8/94) Washington Post "On the Dial" (Radio) column reports that Doug Gondek, program director for all-sports WTEM (570 AM), is leaving to become a consultant. The Post says Gondek, and his GM, Bennett Zier, stressed the decision was Gondek's and has been in the works for some time now. He'll continue to consult the station thru December.

[Author's notes: WTEM continues to be a "no-show" in the market, even with the Redskins. I haven't seen any audience data, but I suspect more people are listening to the 'Skins on co-owned WBIG-FM ("Oldies 100) than are listening to WTEM's rather faint signal. Last season, WTEM's Redskins coverage was simlcast on also-co-owned classical WGMS-FM (103.5). There's admittedly some room to consider the fact that the Redskins lackluster "rebuilding year" performance may not be helping the station, either; but it also testifes to the fact that with only weekend CBS Sports broadcasts of baseball, WTEM didn't have anything to hold listeners thru the spring and summer. As far as I know, they also still do not have Bullets basektball, or Caps Hockey play-by-play, franchises owned by other stations in the market. If anyone knows differently, please, correct me!]

> Quick question, if I am trying to DX a NYC AM station here in
> Va and it's raining in NYC could the weather up there affect
> the signal even thoguh it is sunny in Virginia/

About the only thing the weather will do to interrupt an AM signal is where there is a temperature inversion, usually this is when a front comes through so it's only momentary. A strong charge on a cloud could bounce the skywave back down to the ground.

A stagnant inversion layer is usually quite weaker. It acts like a dome and will scatter signals bouncing from the ionosphere before they reach the ground. Only the powerhouse signals will get through. But it will also extend the range of "local" signals under the dome since their skywaves can't get out and bounce back to earth.

This is a very rare occurance. In the northeast you can find it happening during the middle to end of February for a period of 1 to 3 weeks. You may discover it as only existing for one night or it may hang around for days. It is this same phenominon causes good TVDX well into the UHF band, but it may not effect AM radio every night.

To tell if this is happening, tune in a surburban station on a graveyard frequency that reduces it's power at night. One that is either normally inaudible, or is burried by other stations. If you hear it with very little or no interference, that is what is happening.

On 10/22/94 at 5:07 AM, AIRWAVES E-PUBLISHING wrote:

AE> > Who can give me some informations about Kidsradio?

WBZ in Boston carries a program I produce, Kid Company. We've been on the air since 1990, and last year won the Peabody Award. It's a two hour live newsmagazine/talk program that provides kids with a variety of discussion topics and games. In addition, we have trained 350 students aged 8-14 to report news. The more agressive kids have taken to interviewing political, show biz and sports celebrities, going out with their tape recorders and bringing home soundbites. Snared celebs include Presidents Clinton, Bush and Carter, Supreme Court Justices Souter and Bryer, the cast of Beverly Hills 90210 and Melrose Place. The reporters also introduce subjects to the show, and our production staff (mostly me) line up appropriate guests and place them on the air with the kids. Recent discussions include the return of Aristide to Haiti (we interviewed Haitian emigres), the continuing war in Bosnia-Croatia, female athletes (Jackie Joyner Cursey, Kristi Yamaguchi), plans for an extended school day, school uniforms . . . Each week we offer at least 3 juicy discussion topics, a celebrity guest, 3 or 4 contests, a book review, and an 8 minute straight ahead newscast featuring stories generated by our reporters.
Positioned on the number one station in Boston with a good reputation for news coverage, we are able to attract interesting guests. Our numbers are difficult to measure (Arbitron ignores "under 12"), but our 7-9PM airtime in Boston rates on a par with the rest of BZ's weekend numbers. For more info, contact KidCompany@AOL.com

4916. Re: Liberal Media Bias

Newsgroup: rec.radio.broadcasting
Date: 1994-11-09 04:28:45 UTC
From: rspencer@netcom.com
Message-ID: <39pj5t$bh7@gagme.wwa.com>

Arrrgh! The argument over whether the media is biased, as with most arguments nowadays, is fruitless because both sides tend
towards the extreme.

This discussion cannot proceed on mere impressions. Liberals of course see no bias (which to me is incontrovertible evidence
of one), while conservatives tend to view all journalists as liberal who do not come pre-packaged as conservative. For the
record, Brit Hume is one of the most brilliant and articulate conservative journalists in the business, but he is too busy
trying to be a good journalist to attempt his own spin on the news. Anyone who doubts this has never read his incisive
articles in _The American Spectator_. On the other hand, anyone who would call Sam Donaldson a "conservative" needs his
political pointer re-centered.

Rather than painting the corners, then, perhaps we could get some stuff over the plate.

Rob Spencer

P. S. Please forgive me if I sound a bit irritable; I always get this way around election day.

As mentioned in the NYC Radio Watch Art Athens has retired from the CBS family. And while it's true NY Newsday reported that a station "insider" says he despises management, the truth comes from Art's own memo faxed to the newsroom last Friday

"Contrary to a report in NY Newsday, I do NOT "despise management", but I am beginning to despise media reporters.

In case any more enquiring minds want to know, please tell them that Art Athens says even if he DID despise management he loves his craft even MORE.

I made every effort to be able to at least work election night, covering what is probably one of the best political stories of the decade.

Alas, the decision of the judges, the doctors, and the disability administrators prevailed.

In fact, management has gone out off its way to help me through what has been a difficult time healthwise and careerwise."

The memo continues on, but it should be pointed out Art suffered a stroke over the summer, which probably has quite a bit to do with his decision to retire.

We'll all miss him. He's an incredible talent, a true communicator, and an asset at WCBS.

4921. Oldies That Give Oldies Radio a Bad Name

Newsgroup: rec.radio.broadcasting
Date: 1994-11-09 04:29:33 UTC
From: tblumen1@cc.swarthmore.edu
Message-ID: <39pj7d$bjt@gagme.wwa.com>
Source record: 36776

Advocating for listeners like myself and many others, I would like to submit
a list of records that have us reaching for the dial more than anything. If I
never hear any of the following records on the radio again, it will be too soon. In hopes of improving your local outlet, "Oldies" (popular music circa 1955-1975) programmers, listen up; the following are Recorda Non Grata, and someone please trash the masters:

You're Having My Baby - Paul Anka
Ben - Michael Jackson
Teen Angel - Mark Dinning (what's the point of this song other
than to contest for most maudlin thing
of all time)
Just A Little Bit More - Dr. Hook
I'd Like To Teach The World To Sing - (artist not remembered at the moment)

Any Pat Boone remakes of erstwhile R&B hits like "Tutti-Frutti".

For your doo-wop programmers, no more "Valerie" by Jackie & The Starlites, please either; THE most maudlin thing ever recorded. It embarrasses me just to keep the dial on my oldies stations here, if and whenever they play it. I could never be more ashamed to listen to a record, if caught listening.

Also any 1970's era disco-tized remake of classic sixties records, that serve only to abuse the memory of the original. Disco is not what I turn on my local
oldies station for. Disco destroyed oldies for awhile. Even "Working My Way
Back To You" by the Spinners bothers me for becoming more popular than 4 Seasons original, a trend I would hate to see repeated with other oldies, and Gloria Gaynor's "Never Can Say Goodbye" is more of the same.

Plus any wimpy records by Andy Kim, Osmonds, The Partridge Family and assorted bubble-gum groups of the sixties such as the 1910 Fruitgum Company, Ohio Express, Cufflinks, Archies, etc. Andy Kim's "Baby I Love You" is particularly
detestable for becoming more popular than The Ronettes' original in some places.

If any others come to mind, I may submit a future post. Clean up your formats and keep us tuned in, and up your ratings!

Tom (east coast listener)

4922. For The People/PRN

Newsgroup: rec.radio.broadcasting
Date: 1994-11-09 04:29:44 UTC
From: wyatt.cox@delta.com
Message-ID: <39pj7o$bkc@gagme.wwa.com>
Source record: 36777

It figures that just when the topic of PRN and For The People comes up again, massive internet problems hit here. If I didn't know better....(GRIN)....

First, some thanks to Mark Roberts for noting...

"KBEQ is a good example. It is a relay of the People's Radio Network. Other than for its display of an excessive fondness for conspiracy theories, it's misleading to classify PRN and/or its hosts as "liberal," "conservative," or even "libertarian" or "populist." "Populist" probably does come closest to its viewpoint but even there the label doesn't fit neatly."

"Nor should it. Life is not cut and dried. Nor should politics be."

This is the biggest point that I can make about PRN. There are those on this network who believe that PRN hosts all the wackos and loonies in America. In fact, weekdays we are probably more diverse than any network from far right to far left to extreme moderate -- despite what Mr Aaechen would lead you to believe. The difference is, we aren't playing to a New York City crowd. Our core audience isn't San Francisco, it isn't LA, it isn't Philadelphia. It is hometown America.

"Similarly with Kansas City's local Republican mouthpieces, Mike Shanin and Jerry Fogel on KNHN."

FWIW, these guys have been two of the biggest critics of Harder in Kansas City. So much for the "right wing" tilt of Harder, eh?

Oh, to Scott "Roberts" Temaat, checking in from wherever he landed (proving there is life after Oklahoma...):

"The station I
used to work at carried For the People and some of the other network offerings (mostly the comsumer oriented stuff on Saturday, which is really quite good). "

...but what about the NEWS offerings? (grin)

"The show is available on one of the audio subcarriers of Satcom C-1, and can be picked up with any satellite receiver with a tuneable audio section. Try Transponder 2, Audio 7.20.The show airs from 2-5pm Eastern each afternoon, and repeats overnight, I believe from midnight to 3am. The network is on 24 hours."

To correct, Transponder 2, 7.50, with feeds live 2-5 eastern, 11p-2a. Maybe if the Moderator would allow, I could post the ASCII Network schedule that I keep handy for just such occasions?

"Most of Chuck's audience is intensely loyal, and very hard to sway to a logical point of view. He mixes his brand of paranoia with just enough fact that you *don't know* if maybe it could be the truth! He really can make you think at times! (I can't say as to whether I bought much of it -- but it did make me wonder....)"

Much of what Chuck does is old fashioned news and commentary. He is very careful to insure that there is documentation about things before he brings it up.

If we were the Right Wing screamers that some would make us out to be, wouldn't we have been on the bandwagon with Linda Thompson and her call for a march on Washington? Wouldn't we be demanding a violent taking back of government? CHUCK DOES NOT! Even though there are many callers and many many more Americans who are sick and tired of politics as usual on the parts of both Republicans and Democrats, Chuck always insists that "Violence is not the answer".

Finally, Mr Aachen....and his own brand of distortion...

""For the People" (heard closest to Boston on WCAP-AM 980 Lowell weekday afternoons and WNNZ-AM 640 Springfield Sunday nights) is a call-in talk show hosted by Chuck Harder, an individual who claims to be a "consumer advocate"..."

Did you see the large expose' in the most recent magazine - "Stealing from Grandpa and Grandma"...filled with people's experiences on how they got ripped off by crooks in the "Gold and Silver", "rare Coin", "speculative commodities", and so many other types of investments...

You may not recall that Harder was instrumental in building public awareness on one of Detroit's biggest bombs -- the GM Diesel Engine.

"...but whose program content of the past 18 months has mainly consisted of yelling about how Janet Reno was a mass murderer at Waco..."

...she was...

"...how the Mexicans
are ruining the United States through NAFTA (and how the Indonesians will ruin the U.S. through GATT)..."

We are currently losing one US Factory a day to Mexico, and have already lost thousands of factories to the far east through prior rounds of GATT. The Uruguay round will simply finish the job IMNSHO.

"...how the Federal Reserve System is a big Jewish
conspiracy to illegally control the U.S. economy (one of Harder's favourite guests is the infamous anti-semite Eustace Mullins---check the Anti-Defamation League for further info on him)..."

Harder has NEVER blamed the Jewish people for the Federal Reserve mess. Further, the ADL has proven to be not only less than accurate, but less than honest in many of their dealings...

"...how non-heterosexuals are
eating away at the national morality of the U.S. and causing a health hazard
with AIDS..."

I've made my feelings on this well known in the past, and won't renew the flame
war....

"...and how all of this is not common public knowledge because the
Rockefellers and their international banker buddies control both the mass
media and American politics and don't want this "information" to "get out"..."

You tell me. The SEC numbers show who owns much of the media. As Harder says,
the only way to have freedom of the press is to own the press.

"...(That final point he occasionally tries to support by reminding his
listeners that he was once a weekend call-in host on NBC Talknet, thus once
being an "insider" and allegedly "knowing" what goes on in the corporate
boardrooms of the networks.)..."

Tell the whole story, Daevid. Harder uses this story to point out that when he
was doing his consumer show there were certain subjects that fell in the
consumer end that NBC would NOT allow. One of those was his GM Diesel story!
He could tell people who bought those beasts how to get GM to replace it almost
free! He was also not permitted to discuss credit repair, how to handle debtors
or how to determine if Bankrupcy was an alternative. Anyone who has listened to
Harder on these subjects know he gives sound information in this area. NBC said
"shut up".

"...To help cover the cost of distributing these "facts," Harder also
has a mail-order business through which he sells Mullins' anti-semitic
scribblings and videos in which Bill and Hillary Clinton are accused of
having dozens of people killed because they "knew too much" about the
Whitewater affair..."

We have the documentation on the above. OF course, you could really care
less...

"IMHO, this is one of the most irresponsible talk programs that has been
unleashed on the American public in the wake of Limbaugh's success...."

For what it's worth, Harder has been in national syndication since BEFORE
Limbaugh!

If I didn't know better, Daevid, I would assume that you have
nothing better to do than listen all the time. You probably spend
more time listening to the show than I do. And I WORK here!
Sounds like an obsession to me...

Good luck, Daevid....

4923. Re: Radio Emission Survey Method

Newsgroup: rec.radio.broadcasting
Date: 1994-11-09 04:30:09 UTC
From: detboy@aol.com
Message-ID: <39pj8h$blr@gagme.wwa.com>
Source record: 36778

In article <39mpfa$d36@vixen.cso.uiuc.edu>, hhallika@zeus.aix.calpoly.edu (Harold Hallikainen) writes:

> One problem with all these actual mechanical sampling systems is >that they tend to show lower listening/viewing than diaries. And >broadcasters pay for ratings, so they tend to want the methodology that >gives higher exposure. Diaries are assumed to be right. If anything >disagrees with diaries, the new method is obviously wrong.

boy, what a low opinion you have of media and advertising professionals!

you would have be no more discriminating than pavlov's dogs, salivating in increments directly related to the height of the number reported. you must think we're awful stupid.

the media and the advertising community occupy naturally adversarial positions: the media try to sell time for the higher dollar possible, and the advertisers try to get the lowest price possible. we do not act as an oligopoly, with
everyone rolling in so much money we don't know what to do with it, while you poor suckers out there in realpeopleland are being fleeced.

the currency of broadcast time is ratings, and in radio, ratings are kept by diaries. over the decades, after millions of dollars were spent on the study of dozens of different methodologies, this method has been decided, by the realities of mathematics and by the marketplace, to be the best available for the money involved. if there were a methodology that were more accurate abd
reasonably priced, it would definitely in place.

this is not to say the both the media vehicles and the individual advertisers don't have their beefs with the diary methodology. we certainly do. there is a definite concern that the numbers reflect reality within the bounds of reason.

however, your post would suggest that there is some sort of conscious conspiracy to deceive ourselves with the notion that the actual number of people listening to the radio is inflated, the sole purpose being that it strokes our massive egos to score "big numbers".

in point of fact, even if a methodology that inflated the numbers were artificially maintained, at the behest of broadcasters as a whole, then everyone's numbers would inflate in pretty much the same way. in addition, the payoff to a broadcast market as a whole would be negligible at best, because the cost of a radio spot is far less dependent on the actual numbers of listeners being reported than it is on advertiser demand itself. quite simply, the price of broadcast advertising, as a perishable

medium, rises as more advertisers enter the marketplace and put more pressure on available inventory, creating a premium pirced market. It is not a result of increased numbers of listeners across the board.

of course, there are issues that pertain to the natural demographic skewing of the diary method, but that's a separate issue. all i'm saying here is, the diary method has been established as the accepted survey method because it has proved to be the most reasonably accurate given the cost of measuring audiences in the first place.

Message-ID: <39pj90$bn4@gagme.wwa.com>
Source record: 36780

Very fascinating post! I have listened to the program when it
was on SW, before WWCR burnt down. I have never heard him say
anmything racist or anything close to what you accused him of.
But what about Tom Valentimne, who used to follow Harder on
SW. I have heard that HE is supported by an anti semitic
organization.
True that assassinations are driven by political hatred
but that's no means to stop people from airing their views on
the radio. What is irresponsible and what is not really varies
from person to person.

4926. Re: WNEW Airchecks??

Newsgroup: rec.radio.broadcasting
Date: 1994-11-09 04:30:39 UTC
From: johnstp@aol.com
Message-ID: <39pj9f$boc@gagme.wwa.com>
Source record: 36781

In article <39mpfm$d44@vixen.cso.uiuc.edu>, Bill Corea <hwcco@chevron.com> writes:

>Does anyone have a recording of the Modernaires singing the
>theme of "Milkman's Matinee", the former WNEW late night/early
>morning show??

>WNEW was a beautiful station. Too bad
>that a market as big as New York City couldn't sustain it!

Last part first. WNEW was a great station, but poor management made a mess of it in its later years.

I used to be the APD at WQEW. WQEW went on the air in New York on December 2nd, 1992, to replace the soon-to-be-gone WNEW, and keep the music called American Popular Standards alive. Since then, WQEW has achieved a 2.1 share of the New York audience (12+), and its 35+ numbers are even more impressive. If you don't know about it, I humbly suggest you start listening. 1560 AM.

Former WNEW personality Stan Martin is the PD, and he has brought along Bob Jones, Jonathan Schwartz, and Rich Conaty. Lee Arnold, Del De Montreux, Chuck Leonard, Bill Jerome, and Valerie Seagraves round out the pack.

Take a listen. I'm sure you'll like it.

Regarding the Milkman's theme, I will speak to Bob Jones and Les Davis, former Milkmen, and see if they have a copy.

Thanks.

John Sanpietro

Hi:

I was in a multiple rollover car wreck tonight and am laid up for at least a couple days.

Please hold your submissions for a shoet time.

My mom (80) was in the truck too, she is hospitalized, I am recovering at home, in a lot of pain, bvut basically OK.

I lost my galasses in the wreck so it is hard to read and one finget is sp[rained so it is hard to yype.

PLEASE hold all submissions till I return.

Bill

4928. Kansas City Election Coverage (11/8/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-11-11 08:24:08 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <39v9n8$9l6@vixen.cso.uiuc.edu>
Source record: 36783

The lackluster nature of Kansas City's news and talk oriented radio stations once again came through in tonight's election coverage. One station limited its coverage to one-minute taped updates. Still another let the demands of a syndicated sports show take precedence over a candidate's concession speech. And another did its best job by simply plugging into a TV station's feed.

Let's show the unappetizing picture this presents by rating the stations in the style of restaurant reviews.

The Kansas City-area Nov. 8 menu featured a Missouri senate race involving one candidate from Kansas City, a competitive race for governor in Kansas, congressional races in both Missouri and Kansas with potential for upsets, and a Missouri ballot proposition that would have caused draconian cuts in state and local government.

Yes, plenty was on the menu. Still, I found radio coverage lacking, and eventually settled on KMOX from St. Louis.

====

So how did Kansas City stations perform? On a scale of one to five stars....

WDAF (610): Stayed with its normal country-music programming but did have frequent cut-ins that anchor Frank Haines stumbled through. Did not use its ABC network feed for any coverage. Had no reporters at election-night headquarters. Provided very few details but did try to cover the major issues. Rating: 1 star.

WHB (710): The farm-and-talk oriented station tried to cover issues in many of the counties in its listening area. The station fielded reporters and stringers in the larger counties, who called in frequent reports. However, the reporters just rattled off numbers. Especially for the Jackson County (KC south of the Missouri River) reporter, this surely had to have become tongue-numbing. Anchors Wayne Combs and Miles Carter tried to put all the numbers in the framework of a larger statewide context, but didn't always succeed. Did not use its NBC network feed for any coverage. Rating: 2 stars.

KCMO (810): An absymal, pathetic performance. Local coverage was limited to one-minute taped updates, read by KMBZ's studio anchor, Larry Moldenbrink. Did not use its CBS network feed for any coverage. Did not interrupt Tom Leykis or Michael Reagan talk shows either for CBS updates or for any local coverage. The audio equivalent of the bag of microwave popcorn I accidentally burned in my kitchen two days ago. Does not deserve a rating.

KMBZ (980): This provides a good example of KMBZ's problem as a news/talk station. It wants to play in the pros but won't put in the effort it needs to become good at its game. There were frequent updates during the local Duke Frye sports talk show between 7 and 9 pm. However, after 9 o'clock, during a period of time when the results of

key races became apparent, KMBZ limited its efforts to half-hourly updates and a once-hourly Q-and-A between anchor Moldenbrick and ABC's Sheila Kast. Fielded two reporters at local campaign headquarters, but one of them missed concession speech of Democratic senate candidate Alan Wheat in Kansas City because the station refused to cut away from satellite-fed "Sports Byline USA" just before 9.30 pm. Made limited use of Missouri Network feed. Showed promise at the start but then dropped the ball. Message to KMBZ: on election night, lose the damn sports. Rating: 3 stars.

KNHN (1340): Before its simulcast of WDAF-TV's 9 and 10 pm newscasts, provided half-hourly wire copy updates of local issues and CNN feeds for national coverage. Did not interrupt Bruce Williams whinefest for anything. Got much better once it plugged into Channel 4. The only Kansas City radio station to cover live the victory speech of Republican senate candidate John Ashcroft in St. Louis and the concession speech of Wheat in Kansas City. Channel 4 coverage of the actual numbers relied on graphics which did not translate to radio. Rating: 2-1/2 stars.

KCUR (FM, 89.3): From 7 to 8 pm, appeared VERY promising, with coverage anchored by Mary Jo Draper and frequent call-ins from local political figures. Deteriorated quickly after 8 pm, when KCUR just rode the NPR network feed. NPR coverage was complete but, as NPR reporters and commentators tend to do, just droned on and on and on. Dropped the ball on having a local presence. Rating: 2 stars.

For comparison, KMOX (1120, St. Louis): From 7 to 8 pm, did NOT appear promising, just carrying the Jack Buck sports talk show with brief updates. After 8 pm, talk show hosts Doug McElvin ('til 10 pm) and Jim White (after 10 pm) displayed smooth, professional composure in hectic circumstances. Insightful commentary provided by St. Louis University political science professor George Wendel. Began with an in-studio interview with senator Christopher Bond, and had frequent phone-ins from former St. Louis mayor Vince Schoemehl. Also had phone-ins from Rep. Jim Talent, Gov. Mel Carnahan, and St. Louis County Executive Buzz Westfall. Fielded reporters at both Ashcroft headquarters at St. Louis Union Station and Wheat headquarters on the Country Club Plaza in Kansas City. Missed Wheat's concession speech but did carry Ashcroft's. Fielded reporters at other candidates' headquarters as well, with air-quality Marti feeds. Only blank spot was coverage of Missouri ballot propositions. Rating: 4-1/2 stars.

Other stations worth noting from brief spins across the dial:

KFEQ(AM) covered St. Joseph-area races well although with a lot of number-rattling; modern-rock KLZR(FM) had brief election updates; Topeka's WIBW(AM) provided its own coverage but also made competent use of WIBW-TV field reporters.

====

As I'm wrapping this up just before 11 o'clock, KMOX is still going strong, with a live report from Richard Gephardt campaign headquarters. No empty filling; just good, solid content. KMOX did a great job in the kitchen tonight.

4929. KMOX Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-11-11 08:24:09 UTC
From: "Terry L. Fox" <Terry_L._Fox#UP@notes.up.com>
Message-ID: <39v9n9$9l8@vixen.cso.uiuc.edu>
Source record: 36784

The comments over the past few days about KMOX have been very interesting. Since I am KMOX's Program Director, I thought some first-hand insight might be helpful.

KMOX is a legendary radio station with qualities similar to WJR-Detroit, WTMJ-Milwaukee, WGN-Chicago, WCCO-Minneapolis, and KDKA-Pittsburgh. The challenge is to preserve what made these stations great, and at the same time keep them relevant for today's listener.

In the past 10-15 years, the above stations have all dropped from a share standpoint in the 12+ Arbitron category. That does not necessarily mean that they aren't as good as they used to be, but it is actually much more likely to be an indicator of competition from other forms of media and lifestyle changes (fragmentation).

For example, in Chicago: How many "spoken word" radio stations are there today, as opposed to 15-20 years ago (all sports, all news, hot talk, issue driven talk, and "general" talk)? How many cable channels are NOW available to the information hungry consumer as opposed to 15 years ago (C-Span, ESPN, Sportschannel, The Weather Channel, CNBC, CNN, Headline News, etc.)? How long have local TV stations been doing "full-service" morning shows with news, weather, AND traffic? Has WGN gotten worse, or are they subject to fragmentation? What do you think? The last time I checked, they were the top billing radio station in the country (yes... this is a business.)!

KMOX has faced the similar challenges. Bob Hardy, who was a mainstay on the station for 33 years was remarkable. Up until his death in April of '93, he not only was morning drive host, but also did a two-hour midday news program from 11a-1p. He was smooth as silk in a crisis, knowledgeable, fair, hard working, commanded respect, a mentor, and a true gentleman. Bob was involved in many aspects of the community, worked with numerous charities, and gave the "Voice of St. Louis" a voice from the Illinois side of the Mississippi. When he died at his home in Marine, IL, it was a great loss not only for KMOX, but the region as well. Rex Davis, who also worked with Bob, recently celebrated his 84th birthday. He retired several years ago.
Robert Hyland, who held forth as the stations' manager for nearly 40 years, was unlike any other manager that existed or could ever exist again. He dedicated his life to KMOX and the community. Most people in the business have heard the stories of Mr. Hyland arriving at 11:00 pm every night for his day at work! He stayed until 4 or 5 pm the next day to make sure the format and station worked. He left us with a wonderful radio station. One of the finest in America.

Anne Keefe worked on the air here for 18 years. She was one of the best interviewers I have ever heard. Anne prepared tirelessly. She is very intelligent, spirited, and has a most distinctive voice. In 1992, she

privately announced to me that she would be retiring in one year. She did not leave as a result of Rush Limbaugh being added to the station. Limbaugh's program didn't start on KMOX for 7 months following her retirement. Anne continues to do a weekly program on KETC-TV (PBS) called "Donnybrook" as she has for years, and also hosts an occasional special: "Conversations with Anne Keefe." She is in her 70s. She remains active with travel around the world, gardening, and her family.

Jack Carney, another mainstay on KMOX (middays) died a few years ago. Jack was a great communicator, did the best live commercials I've ever heard, and had a wry sense of humor, combined with a "friendly neighbor" approach. He was another St. Louis treasure.

John McCormick, who retired a few years ago was "The Man Who Walked and Talked at Midnight." John died this past Saturday night. He combined a voice, thought pieces, and music that created a wonderful image in the mind of the listener. I can remember listening to him as a kid and wondering what he looked like. His picture is in the hallway here. He's just as I imagined. He looked like a movie star, not unlike Clark Gable; pencil thin mustache, hair combed back, with a cigarette holder!

Bruce Bradley, another talented personality left the station nearly three years ago. He was our afternoon person for six years. He recently returned to St. Loius, resurfacing as a midday talk host on WIBV in nearby Belleville, IL.

As you can see, KMOX lost 7 key players (and many others to death and retirement) in a relatively short time. The only regularly scheduled host that has really remained constant is Jim White (our nighttime personality). He's excellent! Mornings, Middays, Early Afternoons, Late Afternoons, Evenings, and Overnights have all changed as a result of the above circumstances.

Lifestyle changes mean programs have to adjust as well. St. Louis is a community where many people lived in a "Leave It To Beaver" world. Guess what!! June Cleaver has a job now!

Our challenge again is to continue to be strong and provide more relevant information and entertainment programming for TODAY'S listener.

Our morning program with Bill Wilkerson and Wendy Wiese has grown in the past year. This has been a result of our making the product user-friendly. People who "grow into KMOX" now know how to "use" the station. Our news department covers more stories, the technology has improved, (updated equipment etc.), the writing and story selection has improved, and our listeners have noticed it. This is truly an issue of improving CONTENT. It is also an issue of packaging it for TODAY'S consumer. If the listener doesn't know where or when to get a weather report on KMOX, they'll go somewhere else and get it! We are not only here for those in the "KMOX Club," but need to be attractive to those who are "growing into the station" as well.

Our midday programming formerly ranked #5, #6, or #7 in adults 25-54. It is now ranked #1 12+ and 25-54. Whether you like or dislike Rush Limbaugh, he has introduced more listeners to KMOX. He is simply a PART of the station. Unlike many stations that carry his program again at night and all through the

weekend, KMOX is no defined by Rush Limbaugh. A comment was also made that "Rush Limbaugh is probably cheaper than news or locally-produced programming, and we can probably see more decline in local service." This is inaccurate. We PAY for Rush Limbaugh with both cash and commercial inventory. We have also NOT eliminated staff positions because he is on our air.

The comment about clipping the last minute of CBS news is a good one, but here's the full story. The last minute is clipped during Limbaugh to allow for more local news. It is also the case in late evenings and weekend afternoons. This allows local news to be aired earlier (listeners need) and allows us to avoid having "kicker stories" ahead of our important local news. Kicker stories often occur at the end of "out-of-drive" newscasts on networks (stories about the World's Biggest House of Mud" etc.).

Our "sounders" are actually custom logo thematics we had done by members of the Dallas Symphony Orchestra with a company known as Thompson Creative. They are elements designed to freshen up the station from a production standpoint! They don't replace content, the merely showcase it. Again, for today's listener, we can't sound flat. Packaging is a reality in 1994, even for the "Mighty MOX"!

Our General Manager Rod Zimmerman was incorrectly portrayed in a recent comment. "CBS did not promote from within; it imported someone from the sales organization who had hopped from station to station, city to city, like a fast food peddler." Rod has actually been with CBS for 17 years. He is a mid-westerner who grew up listening to KMOX, Jack Buck et. al. from his home in Illinois. He, like Mr. Hyland before him, did originally come from the CBS sales organization. Rod was the General Manager of our station in Detroit (WWJ) before moving here in 1992. He has a track record of success within the company. Knowing KMOX, and being a performer are key elements of being a manager at KMOX. Rod has those qualities and more. Since Mr. Hyland virtually ran every department, it may have been difficult to promote someone from within the station instead of CBS Radio. In fact, I'm am actually the "outsider;" brought into the company a couple of years ago.
The future is bright for KMOX because of the legacy left by Mr. Hyland and the new team that is in place to continue to evolve the station. KMOX is a wonderful station, It has evolved for many reasons and will continue to do so. It is not a museum piece. It is dedicated to community service, a source for news/talk/sports for St. Louis and 44 states, an institution, and yes a business too! The ratings up in the Summer despite the loss of Cardinal Baseball (Strike), and no great Midwest flood this year. The Blues aren't playing hockey now (Fall), Rush Limbaugh is here, and we're hiring a new host (2p-4p), and two new newspeople in the next few days. By the way, business is GOOD!

Reports of the death of KMOX are exaggerated. KMOX, to this day, remains the top rated radio station in the 40 top markets in the United States, and frequently ranks #1 in share in the top 50 markets as well!

The history is very interesting and important, but it is history. KMOX continues to evolve... as it has for nearly 70 years! Those who have died and retired are gone. They aren't coming back. The real issue is not one of "mourning" the loss of those who have died and retired. It is how KMOX will

continue to thrive in the late 90s and beyond!

I would appreciate hearing your thoughts on the continued evolution of KMOX; and how we can improve in continuing it's tradition of leadership in the market.

Sincerely,

Tom Langmyer
Program Director
KMOX/CBS Radio

"The man who walks and talks at midnight," longtime KMOX overnight announcer John McCormick, died Saturday in the St. Louis suburb of Frontenac.

McCormick was the announcer for the CBS O&O's overnight program of easy-listening and big-band music, bridging selections with news stories and other information. Often he would end a story by saying, "And now you knooooow via radiooooo."

McCormick held down the overnight shift well into the 1980s. Services will be tomorrow in St. Louis.

>Dataworld keeps on top of it as good as anyone.

Well, I know DataWorld does a good job and I do not mean to minimize what they do. But it seems to me NONE of those call letters changes can happen until the FCC gives its OK. That means paper is shuffled, signed, and pushed on to another bureacrat. SOMEWHERE along the way couldn't it be placed in a database and that database be made accesible? If there is no such database then how the heck does the FCC know which call letters go with which station? Same would be true for Canada and any other nation. Seems to me we may have the start of a vision here...

I have a dream...all nations of good faith with any radio broadcast operations at all, public or private, maintain simple databases of call letters and frequencies and any other pertinent info...ALL of this is made readily available on the Web and is updated continuously...the public realizes the potency of radio and starts 'surfing' the spectrum...sales of shortwave sets skyrocket...information that had been sent out all the time and heard by a relatively small number of people is now heard by hundreds of millions...a movement begins...no, LOTS of movements begin...the power of radio grows exponentially...radios are everywhere...those of us in the business become GODS...we're paid MILLIONS of dollars to share our knowledge...entire nations rise and fall on our words...OH!...

I just woke up. I nodded off there for a minute.

Don't download it; it wouldn't make sense to do so. Instead, do
something similar to the amateur callbook server: set up a service
where you feed it a call sign, and it gives you back the relevant
info. If you can make it work for city-of-license and frequency
searches as well, you'll have most of what people want.

I have considered buying one of the commercial CD-ROMs and doing
precisely this. Unfortunately, I don't have a CD-ROM drive or large
disk I can devote to such an effort. I could easily imagine a service
like the following:

```
====================================
Welcome to the FCC database query system!
Please enter a callsign, or `quit'.
> WLNW

Working....Done.
Callsign: WLNW
Frequency: 800 kHz
Parameters: [insert parameters here]
City of License: Waltham, MA
Owner: Fybush Broadcasting, Inc.
[insert address here]

Please enter a callsign, or `quit'.
> quit
====================================
```

[WLNW is not a real station (yet).]

The April 1993 "HamCall" CDROM by Buckmaster has the FCC database files
for AM and FM stations. The AM database is a 16 meg file with all
sorts of information. It would be more useful if a description of
the various fields were provided.

RH>WNBC (around that time, "The Big Voice of Big Town U.S.A." - ouch!) had a
RH>number of interesting talkers, including Brad Crandall, Long John Nebel,
RH>Lee Leonard and Bill Mazer. And, of course, Sterling Yates' FortunePhone.

RH>Brad and Long John have also passed away.

RH>That was Studio 5A. 5B was the home of Monitor on the weekends, with (at
RH>that point) hosts like Henry Morgan, Gene Rayburn and even Mel Allen!

That was a different day, too. On two or three occassions in 1966 and
1967, my mother and I got on the elevator at Rockefeller Center and took
the trip up to WNBC radio studios. I was 11 at the time. We peered
through the glass wall of the studio and watched radio. I met all the
WNBC talk guys you mention, except for Brad Crandall, who I worshipped
anyway. I was pretty sick at the time, and Sterling Yates even dropped
me a get well card in the hospital. Six months later when I revisited
the studios, he remembered my name. I was impressed. My mother once
won a set of Tupperware on Fortune Phone.

Was Long John on WNBC, or was he on WMCA at that time?

JF>Does anyone remember Big Wilson, one of the first "call-in talk show
JF>hosts" on clear-channel radio? He was broadcasting in New York City over
JF>WNBC (I believe) 25 years ago. Whatever happened to him?

I do, I do! I listened to him as a pre-teenager, for several years surrounding 1966. It was a great show, and I liked it a lot when he could play the piano on the air. There was a broadcasters' strike sometime during that period, and the new contract required extra pay for playing instruments on the air. The management nixed the piano, and that was it.

His theme song was, "This Could Be the Start of Something Big." He came on at 6:00 or 6:15 am. During that time I had a serious illness, and at least twice my mother took me to WNBC studios at Rockefeller Center - I was a big radio fan even then - and I met all the hosts. Big Wilson was definitely as nice in person as he was on the air. I remember most of the rest of the lineup - Sterling Yates with Fortune Phone - Lee Leonard w/ Afternoon Talk - Bill Mazer had the sports show - Brad Crandall did evening talk (does anyone know what happened to him - I know he was injured and had to leave the air - but he was real good. When I listen to Gene Burns or David Brudnoy today, I'm reminded of Brad Crandall.)

I know he worked in Miami in the 80's. Two or three years ago I read his obituary. Biggie had died, I believe of heart disease, at the age of 65.

4939. WA Post-Don & Mike lawsuit

Newsgroup: rec.radio.broadcasting
Date: 1994-11-11 08:24:30 UTC
From: JIMLEARS@cais.com
Message-ID: <39v9nu$9mf@vixen.cso.uiuc.edu>
Source record: 36794

This was in the Washington Post on 11/8/94.

A University of Maryland student has filed a lawsuit against WJFK-FM (106.7) afternoon hosts Don Geronimo and Mike O'Meara and five other defendents seeking $35 million in compensatory and punitive damages for invasion of privacy, emotional distress and neglience.

In a 20 page complaint filed Oct. 25 in Baltimore City Circuit Court, the woman, identified only as "Jane Poe," alleges that she ws introduced to the duo at a wedding at the Northern Virginia radio station. After agreeing to meet Geronimo at another location, the suit says, she allowed him to kiss and fondle her but refused to engage in any other sexual conduct. Geronimo, whose real name is Michael Sorce, then became angry and satisifed his sexual needs himself while she was in his car, the complaint says.

While the woman was getting out of Geronimo's car, the suit alleges that Geronimo told her that he wanted to see her again.

After running into the radio team later at a Rockville bar where they were hosting a show, the woman was allegedly "singled out" by the two and referred to as the "Polky Dot Lady." The suit says that they still use the nickname on their show, "and, as a result, this is the name by which the Plaintiff has become known in her community."

She also claims that she became involved in a relationship with another defendant and that she told him she has herpes. The information was relayed to Geronimo and O'Meara, who broadcst it with the intention of injuring her, the suit says.

Geronimo, whose wife Freda, and son Bart, are regular call-in guests on the top-rated program, did not return phone calls yesterday.

The defendants include WJFK General Manager Ken Stevens and the stations

I would hope that any broadcaster worth his salt sees himself as his customers' ally not their adversary. Certainly that's the case at WCRB, where every effort we put into our jobs is done to help our customers generate new business, whether it be audience research, promotional outreach or building a new studio. Our station has been around for more than forty years; if it weren't for the repeat business satisfied advertisers give us we'd not be here.

Cheers!

I've been seeing a lot of bandwidth lately, either from or about "The Committee to bring back Jazzy 100". Does anyone have any information on this committee? As a former listener of WJZE, and a current listener of WJZW, I'm interested in the goals and motives of this group. I'm not in the Washington D.C. area anymore, so I'm not able to pick up the newsletter alluded to at Kemp Mills. I do travel to D.C. quite a bit, so I've caught WJZW several times since they signed on, and I've really enjoyed their format. Given that WJZW is already signed on, what does the committee hope to accomplish by putting Jazzy back on the air? What is the purpose of all the negative bandwidth? I'm a bit confused by some of the Committee's postings, so I would love to hear from either Terry Coles, Mark Goldberg or anyone else connected with the committee, either via e-mail, or through this group.

TIA :)

Tom Webster

: Jazz 105.9, we wouldn't be seeing all these posts bashing WJZW. If
: you don't like 'em, don't listen to 'em! Just my humble opinion.

Tom, I am really glad that you finally said this. My feeling also is that the people from Jazzy 100 are jealous because THEY were not the ones selected to be working at WJZW. Also, as you said, if Bod Linden would have been selected as PD, none of these E-mail messages would be occurring. The people from Jazzy 100 have to realize that in radio, sometimes things don't go like we would want them to. This includes their favorite ousted DJs coming back to a station with a similar or duplicate format.

I wish that people could be satisfied with what is offered to them. How many of the "Bring Back Jazzy 100" people listen to WJZW? I bet alot of them - but I don't think they'd admit it because it is not Jazzy 100. You guys may not have Jazzy 100 back, but you DO have a contemporary Jazz station. Why can't you be happy with that?

Also, please stop telling us that Jazz on 105.9 is a temporary thing until the station is sold. 1. We don't even know whether Viacom will be required to sell some of its DC properties and 2. It sounds as though you are trying to sell me on your cause by telling me something is temporary (thereby, saying that we won't have jazz after the sale and Jazzy 100 will come back) - No, I don't think radio works like that. I think that if the station is sold and the Jazz format is successful in the Winter book, then the new owners would likely keep up the format. Afterall, WJZW is the only commercial jazz station in DC.

I don't mean to flame or be preachy, but I feel that certain people cannot be happy with an attempt at something unless it was exactly like what we had before. And now I'm off my soapbox.

See ya-
Mike

: Who can give me some informations about Kidsradio?

I hate to be a seconder of information, but it is not actually possible to say enough good about Kids Corner on WXPN in Philly. You must experience it. I'm 27, unmarried (until next Saturday) and have no kids (or plans) and I have discovered that there's one heck of a demographic spread in Kids Corners audience. I would feel pretty safe in saying that the parental makeup is a Mercedes dealers idea of heaven - and the non-parental regular listener group is just as impressive (myself excluded). The show stays lively with a varied format and a standard guest each day - Nurse Mimi, the Compududes, the Science Guys, etc... who all field questions from kids who are brought out of their shells by Kathy (or Cathy, I forget) O'Connell. Simply brilliant. no station could fail with this show. Of course, I don't think it would wash as a 24hour format, but it does great as a 1-2 hour one.

From: dk@crl.com
Message-ID: <39v9ov$9nu@vixen.cso.uiuc.edu>
Source record: 36734

: Whatever. What it all comes down to is that you don't trust the
: listeners to come to the "right" conclusion so you have to try
: to convince nonlisteners (I assume, perhaps incorrectly, that
: most r.r.b readers can't receive WABC) that these talk hosts
: are hate-mongers, etc.

A democracy is a very difficult political system because the populace can NOT make the right decisions when they don't have all the information. This leads to stupid decisions: Prop 13, which has nearly bankrupt California, being an excellent example. Somehow people were convinced by talkshow hosts that there was "too much fat" in government. And in the 15 years since Prop 13, more misguided tax-cutting measures have gone on the ballot, ALSO the result of people not having all the information needed to make a cogent decision. (Oakland's Measure S, I think it's called, will repeal a tax which ultimately pays for street lighting. For all I know it may have already passed.)

When stations choose to air only one politically-correct side (these days "PC" means the Rush Limbaugh/Bob Grant axis), they do a grave disservice to democracy.

(on bias)

"Anyone who calls Sam Donaldson a conservative needs his
political pointer re-centered."
I've said it because Sam says it...and when he describes him-
self as a "Goldwater Republican" of 30+ years' standing, I think we
ought to take him at his word. Brit Hume is incisive as a conserv-
ative commentator, but that same tilt does go through on the air in
his "objective" reporting as well...did you happen to see him fight
unsuccessfully to contain his delight at last night's outcome when
he was doing that midnight standup on the White House lawn? God,
I've never seen a man fight a smile so hard, and so unsuccessfully.
Bias and viewpoints are fine for opinion forums like talk radio.
They're appropriate from commentators with established views. But
Sam and Brit need to forget they're not George Will. (Cokie Roberts
often grates on me because she errs the same way coming from
the other direction...even if I may agree with her, it is intrusive when
you're trying to play the role of objective analyst.)

>: :music radio station in Portland, OR.

>Guess again. You might be better off in alt.radio.pirate with that idea.
>The FCC doesn't do 100 watt FM. They do 3000 watts min...I believe.

I think everyone may have missed what Ryan was looking for here. I think (again, couched carefully) that he really was given information on starting a Non-Commercial or Educational FM which is available at 100watts and restricted to the 88-92Mhz arena (also see "rec.radio.noncomm"). If that's the case, and he has a few friends (lawyers) or a school to hook up with, he can possibly squeeze a small FM into Portland (and I'll bet the format kicks butt there as well). $25K is probably still gonna fall real short, but its a lot closer to the target for non-com. Someone please give this guy the name and number for the Frequency Coordinator for the SBE Chapter in Portland...

I say Go For It Dude! :-)

E-me if you need help. ;-)

4955. Northern California broadcast news awards

Newsgroup: rec.radio.broadcasting
Date: 1994-11-11 08:25:13 UTC
From: rtnda@aol.com
Message-ID: <39v9p9$9oa@vixen.cso.uiuc.edu>
Source record: 36707

News broadcasters in Northern California have been invited to enter the 14th annual Awards Competition sponsored by the NorCal Radio-Television News Directors' Association.

The contest is open to everyone who works in a radio or television newsroom, whether or not he or she appears on the air. There are 15 radio categories and 16 for TV. Large and small newsrooms compete in separate Divisions.

News Directors customarily enter their newscasts in one of two categories: over and under 15 minutes for radio; 30 minutes or 60 minutes for television. Other categories recognize Special News Programs, sports, weather, news writing, investigative reporting, hard news and enterprise reporting. There are categories to honor the best multi-part series; features, both light and serious; live or breaking news coverage and technical excellence: photography and videotape editing, and use of sound in radio news.

For the first time, NorCal RTNDA will recognize The Reporter-Photographer-Editor, the television newsperson who does it all. The parallel in radio is a special category for the one-person news department.

Letters inviting entries have gone to all the news directors in NorCal's territory---from Fresno to the San Luis Obispo-Santa Maria-Santa Barbara ADI north to the Oregon border, including the Reno-Tahoe-Carson City area.

Only Best Newscast entries must have been broadcast on the Designated News Day, which will occur next week, November 13-19.

The deadline for receipt of entries is January 11, 1995. The wood and brass plaques will be presented at the NorCal RTNDA convention in March in Monterey.

NorCal Executive Director Gil Haar asks that anybody who works in a television or radio newsroom in northern California and has not received a letter with the rules and an entry blank by Monday morning's mail, November 14, call him at (415) 259-7538 or fax (415) 259-7539. E-mail rtnda@aol.com.

Now that NPR and PBS funding is largely going to be controlled by the likes of Jesse Helms, Newt Gingrich, and vicariously, by Rush Limbaugh, what is going to happen to All Things Considered, Fresh Air, Morning Edition, McNeil/Lehrer Newshour, and even Sesame Street (which has received received considerable criticism from rabid neoconservatives for being on public TV) and Barney (which has been called anti-Christian)? Are these all going to be replaced with reruns of the now politically-correct Rush Limbaugh?

And what about classical music in most areas? Is the funding for this going to stop completely?

Having once moonlighted as an oldies DJ, and having twice compiled a listener call-in "Bottom 10 of all Time," allow me to add some grist to the mill:

Tell Laura I Love Her--Ray Peterson

Let's Get Together--Hayley Mills

Leader of Pack--Shangri-Las (honorable mention to "You Can Never Go Home Anymore," same group)

Patches--Dickie Lee (the other "Patches" by Clarence Carter wasn't much better)

Last Kiss--J. Frank Wilson

Turn Me Loose or Tiger--Fabian

And then there's always the novelty records, but most of them that became popular had some redeeming value :-)

And still later we can get into songs by Lesley Gore, Patty Duke, Connie Francis (remember "Mama"?), Paul Peterson ("My Dad"), and so on. Maybe we should have an entire newsgroup dedicated to debating the absolute worst oldies of all time??

P.S. You won't hear **any** of the above on oldies stations in S. Calif--only "happy" music is allowed. Talk about oldies I don't want to hear again--try "Good Vibrations," "Chantilly Lace," most any early Beatles, etc.

But that's another subject.

Cheers--Jim, San Diego (a.k.a. "Jungle Jim" years ago)

>please either; THE most maudlin thing ever recorded. It embarrasses me
>just to keep the dial on my oldies stations here, if and whenever they play
>it. I could never be more ashamed to listen to a record, if caught
>listening.

Tom--First of all, I for one happen to like "Valerie". Now, as for the larger problems you outlined in your post, isn't this business really about supply and demand?? There is a market for "discoized" remakes of 60's oldies as well as for ARROW (all rock and roll oldies) format all over the country. When the demand changes, so will radio formats all over the country.

[...]

Hmm. You'd hate a program that has been a 10-year success story on Sunday nights in Boston, called "Lost 45's", whose tag line is "Songs you never thought you'd hear on radio again". It's hosted by a chap named Barry Scott. I've heard EVERY one of those songs mentioned from the 70s and early 80s. The show must be doing OK if it's hung around that long. It has moved stations a couple of times over the decade, but it now resides on WBMX-98.5. Its success may be responsible for the format change that recently came over the former WCGY-93.7 Lawrence/Boston, which now dubs itself "The Eagle" and plays nothing but 70s stuff. The VAST bulk of what they play are good rocking tunes, but they do occasionally throw in many of your hated songs.

Anyone out there know if the "The Eagle" 93.7 is doing well in the fall books?

Is it even as much as 500 songs? It's gotten to the point where I've subconsciously memorized the order of the songs on their tape-loop; this is especially noticeable on my way to work, where I experience a sort of _Groundhog Day_ effect (the same song coming on about the same time). It got to the point where I could count on "Love Potion No. 9" starting up whenever I passed Portland International airport.

Once, in a restaurant tuned to KISN 97.1, as a nice song was coming to an end, I got an unexplicable feeling of dread. Sure enough, the next song to come on was that yowling, shrill, R-E-S-P-E-C-T garbage.

How in God's name could you forget "Feelings"?

And also, please, no more "Louie Louie" marathons, not even as part of a format change "screw-with-the-listeners'-minds" ploy.

> Disco is not what I turn on my local
> oldies station for. Disco destroyed oldies for awhile.

Hey, whoah, hold on a sec. How old are you? To me, disco *is* part of the oldies format. Can a song not be an "oldie" if it was made after 1972? I consider WPLJ to be a heavily-oldies station, and they don't play anything before the late 70s. It's also my favorite station in town (though CBS-FM is a close second, obviously depending on my mood).

And don't knock Laurie Partridge! I know where you live! Ahhhughugh! ::ahem::

NBS LOGO
THE NATIONAL BROADCASTING SOCIETY - ALPHA EPSILON RHO
1995 CALL FOR PAPERS

The Office of the Vice President for Faculty/Professional Development of the National Broadcasting Society - Alpha Epsilon Rho invites the submission of scholarly and professional papers for a poster presentation session at the national convention in Atlanta, Georgia, March 22-25, 1995. Papers relating to all aspects of communication as they pertain to the electronic media are welcome. All presenters must attend the 1995 national convention in Atlanta. PAPERS WILL BE PRESENTED IN POSTER FORMAT.

Papers will be presented in poster format for the following reasons: 1) to foster a sense of community by establishing juried and non-juried divisions, thus enabling all who want to participate the opportunity; 2) to provide a forum for discussion and exchange of ideas; 3) to increase exposure and awareness of scholarly and professional endeavors by showcasing our work for several hours; 4) to create opportunities for enhanced relationships between industry representatives, faculty, professional members and students; and 5) to enable the membership more opportunities to attend professional development sessions.

SUBMISSION CATEGORIES:
"OPEN" - Papers will not be referred. Submissions will be checked for ability to conform to the poster presentation guidelines and completeness.
"JURIED" - Papers for presentation will be selected through a blind review process. Those works not selected for presentation in the juried section have the opportunity to be considered for presentation in the "OPEN" section.

JUDGING OF JURIED PAPERS:
Papers will be selected through a blind review process. The process will entail two to four reviewers reading the papers and providing feedback for the author. The judges are from professional and academic settings across the country.

SUBMISSION PROCEDURE:
All papers should have a cover sheet which contains the following information: name of author, institution(s), address(es), phone number(s), e-mail adddress if applicable, and the submission category. The second page should list the title of the presentation and an abstract that does not exceed 125 words for inclusion in the convention program.

For juried submissions, please make no reference to the author or the author's school. Juried papers should not exceed 20 typed, double-spaced pages. Four copies of the paper must be submitted. No Fax or e-mail papers will be accepted.

DEADLINE: SUBMISSIONS MUST BE POSTMARKED BY JANUARY 5, 1995. NOTIFICATION
OF PRESENTATION DATE AND TIME WILL BE MADE NO LATER THAN FEBRUARY 15, 1995.
ALL SUBMISSIONS SHOULD BE SENT TO: ANN JABRO, Ph.D., PENNSYLVANIA STATE UNIVERSITY, SCHOOL OF COMMUNICATIONS, 202 CARNEGIE BUILDING, UNIVERSITY
PARK, PA 16802. (814) 865-2170.
uha@email.psu.edu

Please return the following form with your submission:
Name _____ Phone _____
Institution _____ e-mail address _____
Address _____ Category: _____
_____
When is it best to schedule your presentation? _____ Friday _____ Saturday
_____ 9:00 - 10:30 _____ 10:30 - 12:00 _____ 1:30 - 3:00 _____3:00 - 4:30
*** All papers will be presented as posters. The brochure, "How to prepare a Poster Presentation" will be sent in conjunction with a letter acknowledging receipt of your paper. Posters will be displayed from 8 am to 8 pm with the author(s) available for comments and questions during a designated time period. Juried and non-juried presentations may be site judged and eligible for awards.

Dick Reeves here from 590 VOCM in St.John's, Newfoundland Canada.
I do morning drive as well as some Public Relations and Marketing
for our Network (8 stations - 7 are AM-ers 1 FM).
I'd like to hear from anyone out there that might be interested
in exchanging some ideas regarding working with Elementary,
Junior High and Senior High Schools in their market place.
VOCM has managed to maintain the dominant market position for
more than twenty-years, our other AM-ers do the same in their
markets too. We attribute alot of our success to the "genuine"
attention we offer our schools, their students and staff people.
We've got some pretty successful programmes along these lines,
and are always interested in hearing about new ones. If you'd
like to swap some ideas you can E-mail directly to me at the following

address: dreeves@random.ucs.mun.ca

Look forward to hearing from you.

Dick Reeves - P.O.Box 8590 - St.John's, Nfld. Canada A1B 3P5

4968. Re: Programmers are like sheep

From: laughkids@aol.com (Laughkids) wrote:

:I am glad to see I've started something. I saw what I expected: mediocre
:radio programmers praising mediocrity and creative radio people (and
their
:fans) sounding off about how much they hate all the main-line junk on
:commercial radio.

And those of us IN radio saw what we expeted: Those who can't make it
crying about the so-called "mediocrity" of radio.
People on the outside looking in always say "I can do it better", or
Why don't they do it the way I like it?" Or worse yet, pointing to PBS as
an example of how things should be done. I guess if I had my hand in the
taxpayers pockets instead of legitimately earning my keep, I could take a
lot of chances too.

:To the guy at WXXI who talked about public radio stations going
mainstream
:too -- yes you're right. But I think that's driven primarily by dollars
:-- or a lack thereof. It's tough to produce a Derek McGinty Show or
Diane
:Rehm Show (or Car Talk or Fresh Air) from scratch. You have to pay a lot
:of people up-front to get it off the ground.

There may be another reason as well. Lack of listeners on a large
scale. If these shows were so great, there would be a place somewhere on
commercial for them, especially with the glut of talk radio. The closest
thing possible to a mass-appeal show that ever came out of Public Radio
was "A Prarie Home Comapnion". And let's face it, taxpayers are getting
sick of subsidising a contradiction in terms like Public Broadcasting,
where the public has no say on the content of the programing.

:Take a chance once in a while.

Are you going to provide the money for this venture? And what if (like
in most cases) it doesn't work? What are you going to do then? This is
the typical mentality of those who don't have a stake in the financial end
of a station telling those that do how to run it.

Hello everyone,
I would like to introduce myself to the usenet group here. I've been telecomputing since 1986 when I joined 'The Source' with an XT286 & 2400 bd modem which cost me several thousand dollars back then. I jumped over to CompuServe later the same year. All the while aware of something called the "Internet", which sounded too complicated to investigate. About '88 I remember joining Prodigy when it still only had a couple of cities linked together. Elvis Duran, our pm drive jock, introduced me to AOL last year, about the time I was buying every book I could find on the Internet. I have a stack of them here, all unread....I don't have the time to concentrate on it. I briefly operated my own BBS (Radio Pro's BBS) for 6 months last year, and shut it down. Recently America Online offered usenet groups, and the interface is extremely friendly...so here I am...no books.

My radio career reads:
Wknds: WYFM Youngstown, OH
Overnites: WBVP Beaver Falls, PA
PM: WJAL (WJXY) Conway, SC
Overnights, Latenights, Nights, PM, MD: WKZQ, Myrtle Beach, SC
Nights: WSKS Cincinatti-Hamilton, OH
Nights: WMJX Miami
Nights: WRBQ Tampa
Nights: KKBQ Houston
Nights, MD: WAPE Jacksonville
Nights: WHYI Miami
LateNights: KDWB Minneapolis
PM: WZOU Boston
Midday: WHTZ New York

There you have it....it's nice to be here!
Human Numan, Z100
